PENJELASAN TEMA

THEME EXPLANATION

ENHANCING, STRENGTHENING, AND GROWING EXCELLENCE

**Meningkatkan, Memperkuat,
dan Menumbuhkan Keunggulan**

Tahun 2022 adalah tahun yang penuh tantangan, tetapi PT Chandra Asri Petrochemical Tbk (Perseroan), memperlihatkan ketahanan keuangan yang baik. Ketahanan di bidang keuangan ini terutama ditunjukkan melalui *liquidity pool* Perseroan yang besar, baik dari fasilitas *Committed Revolving Credit*, surat berharga, serta kas dan setara kas. Bahkan, Chandra Asri menjadi perusahaan pertama di Indonesia yang menjadi penerima fasilitas *Sustainability-Linked Trade* dari UOB. Fasilitas ini diberikan mengingat komitmen dan progres Chandra Asri dalam meningkatkan standar kinerja keberlanjutan.

Komitmen di bidang keberlanjutan dan aspek Lingkungan, Sosial, dan Tata Kelola (*Environmental, Social, and Governance* atau ESG) memang terus menjadi fokus Chandra Asri untuk bisnis berkelanjutan. Wujud dari komitmen tersebut, pada tahun 2022, Perseroan telah melahirkan kerangka (*framework*) di bidang ESG berjudul "*RESPONSIBLE*". Kerangka ini diimplementasikan dalam setiap aktivitas keberlanjutan, baik di bidang operasional bisnis maupun sosial dan lingkungan.

Sejalan dengan perkembangan tersebut, Perseroan juga fokus pada pertumbuhan yang memberikan manfaat bagi banyak pemangku kepentingan. Upaya ini, antara lain, diwujudkan melalui perjanjian jual beli saham bersyarat (CSPA) dengan PT Krakatau Sarana Infrastruktur (KSI) untuk dua anak perusahaannya PT Krakatau Daya Listrik (KDL) dan PT Krakatau Tirta Industri (KTI).

Strategi korporasi tersebut memperkuat dan meningkatkan fundamental bisnis Chandra Asri. Kedepannya, akan terbuka banyak peluang sinergi. Sebagai entitas induk, Perseroan memiliki kesempatan untuk mendiversifikasi pendapatan ke utilitas infrastruktur pendukung, sejalan dengan rencana ekspansi kompleks petrokimia kedua Chandra Asri serta pengembangan industri hilir kelas dunia di Indonesia.

The year of 2022 was a challenging year, however PT Chandra Asri Petrochemical Tbk (the Company) was financially resilient. This financial sector resilience was primarily demonstrated by the Company's large liquidity pool, which includes Committed Revolving Credit facilities, securities, as well as cash and cash equivalents. In fact, Chandra Asri was the first company in Indonesia to be granted a UOB Sustainability-Linked Trade facility. This facility was granted in recognition of Chandra Asri's dedication and progress in improving sustainability performance standards.

Chandra Asri's focus on sustainable business continues to be commitment to sustainability and Environmental, Social, and Governance (ESG) aspects. As a manifestation of this commitment, the Company developed the "RESPONSIBLE" ESG framework in 2022. This framework is used in all sustainability activities, including business operations, social and environmental activities.

In line with these developments, the Company was also focusing on growth that will benefit a wide range of stakeholders. This effort was made possible, among other things, by the conditional share sale and purchase agreement (CSPA) with PT Krakatau Sarana Infrastruktur (KSI) for its two subsidiaries, PT Krakatau Daya Listrik (KDL) and PT Krakatau Tirta Industri (KTI).

This corporate strategy strengthens and enhances the fundamentals of Chandra Asri's business. There will be numerous synergy opportunities in the future. As a parent company, the Company has the opportunity to diversify its revenue into supporting infrastructure facilities, aligned with the planned expansion of the second Chandra Asri petrochemical complex and the development of Indonesia's world-class downstream industry.

THEME CONTINUITY

2021

STRATEGIC PARTNERSHIP FOR A BETTER FUTURE

**KEMITRAAN STRATEGIS
UNTUK MASA DEPAN LEBIH BAIK**

Pada tahun 2021, PT Chandra Asri Petrochemical Tbk (Perseroan) menuntaskan kemitraan senilai Rp15,5 triliun dengan Thai Oil Public Company Limited (Thaioil), perusahaan asal Thailand yang fokus pada bisnis pengolahan minyak. Melalui kemitraan ini, Thaioil memperoleh kepemilikan 15% saham di Perseroan.

Bersama Thaioil dan pemegang saham lainnya serta seluruh karyawan, Perseroan akan membangun kompleks petrokimia kedua (CAP2), sehingga menggandakan hasil produksi Perseroan menjadi lebih dari 8 juta ton per tahun. Meningkatnya kemampuan produksi ini akan memberikan kontribusi besar bagi perekonomian nasional, karena selama ini sebagian besar produk petrokimia masih didatangkan melalui impor, sehingga menjadi beban neraca perdagangan.

In 2021, PT Chandra Asri Petrochemical Tbk (the Company) entered into a partnership agreement worth Rp15.5 trillion with Thai Oil Public Company Limited (Thaioil), a company from Thailand that focuses on the oil processing business. Through this partnership, Thaioil gains a 15% stake in the Company.

Together with Thaioil, other shareholders, and all employees, the Company will build the second petrochemical complex (CAP2), thereby doubling the Company's production to more than 8 million tons per year. This increased production capacity would make a major contribution to the national economy, since most of the petrochemical products are still imported, thus weighing on the trade balance.

2020

MENJAGA KETAHANAN & MENGHANTARKAN KEUNGGULAN

MAINTAINING RESILIENCE & DELIVERING EXCELLENCE

Ketidakpastian ekonomi serta tantangan-tantangan yang datang dari kondisi eksternal sepanjang tahun 2020 berhasil dilalui Chandra Asri dengan baik. Kinerja seluruh sektor bisnis yang terhambat mendorong Perseroan untuk mewujudkan berbagai perbaikan serta bekerja lebih keras dan cerdas.

Dari aspek operasional, Chandra Asri menyelesaikan pembangunan pabrik MTBE & B1 pertama di Indonesia dan mulai mengoperasikan *Enclosed Ground Flare* di kompleks petrokimia dengan total investasi sebesar US\$14 juta untuk meminimalkan dampak lingkungan dan sosial.

Sementara dari aspek finansial, Chandra Asri tetap dipercaya oleh para pemangku kepentingan. Perseroan memperoleh fasilitas keuangan dari mitra bank dan berhasil menerbitkan obligasi 1 triliun Rupiah yang 100% terserap secara penuh bahkan dalam masa-masa sulit ini.

Dengan menjaga komitmen dan konsistensi, Chandra Asri akan terus berusaha untuk memberikan kinerja terbaik bagi Indonesia.

Chandra Asri managed to survive through economic uncertainties and challenges from external conditions throughout 2020. The performance of all business sectors that is currently being hampered has driven the Company to improve, work harder, and think smarter.

In terms of operations, Chandra Asri completed the construction of the first MTBE & B1 plants in Indonesia and started the operation of the *Enclosed Ground Flare* in its petrochemical complex with a total investment of US\$14 million to minimize environmental and social impact.

In terms of finances, Chandra Asri was still trusted by its stakeholders. The Company obtained financial facilities from its financial partners and successfully issued a 1 trillion Rupiah bond, which was 100% fully subscribed even in these challenging times.

Through strong commitment and consistency, the Company strived to perform its best for Indonesia.

2019

MEMBANGUN KEMITRAAN, BERTUMBUH BERSAMA

BUILDING PARTNERSHIPS, GROWING TOGETHER

Di sepanjang tahun 2019, Perseroan menjajaki beberapa inisiatif strategis dengan mitra kerja utama sebagai langkah untuk membangun bisnis dan terus bertumbuh bersama dengan seluruh pemangku kepentingan. Hal ini juga merupakan inti dari narasi baru milik Perseroan pada tahun 2019 yaitu *"Your Growth Partner"*. Melalui sinergi dan kemitraan yang lebih kuat, kami percaya akan mampu berkontribusi dan terus bertumbuh bersama seluruh pemangku kepentingan serta menghadirkan produk petrokimia yang unggul.

Throughout 2019, the Company explored several strategic initiatives with key partners as a step toward establishing a business and continuing to grow in collaboration with all stakeholders. This was also the essence of the Company's new narrative in 2019, *"Your Growth Partner"*. Through stronger synergies and partnerships, we believe that we will be able to contribute and continue to grow with all stakeholders, and deliver excellent petrochemical products.

TERKEMUKA DAN TERPILIH

LEADING AND PREFERRED

Perseroan memiliki berbagai keunggulan yang menempatkannya pada posisi yang lebih baik di industri petrokimia Indonesia. Sejumlah fasilitas pabrik dengan skala yang besar dan terintegrasi mulai dari hulu menuju hilir menjadikan Perseroan sebagai produsen pilihan karena mampu menawarkan ragam produk yang sangat luas dan berkualitas tinggi bagi pelanggannya.

The Company has many advantages that place it in a better position in the petrochemical industry in Indonesia. Dukung Produksi Dalam Negeri, Chandra Asri Luncurkan Produk untuk Aplikasi Kemasan Fleksibel
Supporting Domestic Production, Chandra Asri Launches Products for Flexible Packaging Applications

Atas respon terhadap tingginya permintaan dan belum adanya produksi dalam negeri, Chandra Asri meluncurkan produk Asrene® C6 Metallocene LLDPE untuk membuat film dengan keuletan dan kekuatan *sealing* yang lebih tinggi seperti kemasan *printed multi-layer* dan *heavy duty*. Produk ini juga telah mendapatkan izin dari Badan Pengawas Obat dan Makanan (BPOM) serta standar halal dari Majelis Ulama Indonesia (MUI) sehingga terjamin keamanan dan kualitasnya.

Kapasitas produksi Asrene® C6 Metallocene saat ini, yaitu 50 kilo ton per tahun, menjadi salah satu upaya Chandra Asri dalam diversifikasi produk LLDPE yang diproduksi sehingga dapat memenuhi kebutuhan konsumen dan membantu meringankan beban impor.

As a respond to high demand and a lack of domestic production, Chandra Asri introduced the Asrene® C6 Metallocene LLDPE product to produce films with higher ductility and sealing strength, such as multi-layer and heavy-duty printed packaging. This product has also obtained approval from the Food and Drug Supervisory Agency (BPOM) as well as halal certification from the Indonesian Ulema Council (MUI), ensuring its safety and quality.

The current production capacity of Asrene® C6 Metallocene, which is 50 kilo tons per year, is one of Chandra Asri's efforts to diversify the LLDPE products it produced in order to meet consumer needs and reduce the burden on net imports.

Chandra Asri dan Sinar Mas Land Ajak Masyarakat Peduli Sampah Plastik melalui Program "Plastic to Food"

Chandra Asri and Sinar Mas Land Invite People to Care About Plastic Waste through the "Plastic to Food" Program

Chandra Asri bersama Sinar Mas Land melanjutkan inisiatif peduli sampah plastik melalui kegiatan "Plastic to Food" di kawasan BSD City. Melalui program ini, kedua perusahaan mengedukasi dan mengajak masyarakat untuk mengelola sampah plastik yang ada di lingkungan sekitar. Sampah plastik yang terkumpul kemudian dibawa ke fasilitas pengolahan sampah binaan Chandra Asri yaitu Industri Pengelolaan Sampah Terpadu-Atasi Sampah, Kelola Mandiri (IPST ASARI).

Chandra Asri and Sinar Mas Land continued the initiative to care for plastic waste in the BSD City area with the "Plastic to Food" activity. Through this program, the two companies educated and invited the public to manage plastic waste in their surrounding environment. The collected plastic waste is then transported to a waste processing facility fostered by Chandra Asri, i.e., the Integrated Waste Management Industry-Managing Waste Independently.

LAPORAN DEWAN KOMISARIS

REPORT FROM THE BOARD OF COMMISSIONERS

Djoko Suyanto

Presiden Komisaris (Komisaris Independen)

President Commissioner (Independent Commissioner)

**Pemegang saham dan pemangku kepentingan yang terhormat,
Dear shareholders and stakeholders,**

Laporan ini disampaikan sebagai bagian dari pertanggungjawaban pelaksanaan tugas dan fungsi Dewan Komisaris serta manifestasi dari keterbukaan informasi. Untuk tahun buku 2022, Dewan Komisaris menyadari bahwa manajemen menghadapi kondisi yang tidak mudah.

Ketika pemulihan dari dampak pandemi COVID-19 sedang berlangsung, terjadi peristiwa perang Rusia dan Ukraina. Akibatnya, rantai pasok di tingkat global mengalami gangguan, sehingga menciptakan ketidakseimbangan antara

This report is submitted as part of the accountability for the implementation of the Board of Commissioners' duties and functions, as well as a manifestation of information disclosure. The Board of Commissioners recognized that management faced difficult conditions in the fiscal year 2022.

The events of the war between Russia and Ukraine occurred while the recovery from the impact of the COVID-19 pandemic was underway. As a result, the global supply chain was disrupted, resulting in an imbalance between supply

tingkat penawaran (*supply*) dan permintaan (*demand*). Harga-harga, terutama pangan dan energi, serta merta meningkat tajam, termasuk minyak mentah.

Pada saat yang sama, COVID-19 memberikan tekanan pada kondisi di Tiongkok. Aktivitas produksi terkena dampak kebijakan *lockdown zero-COVID* di negara itu. Permintaan produk petrokimia yang menjadi *core business* PT Chandra Asri Petrochemical Tbk ("Perseroan") juga melemah, sementara pada saat yang sama, pasokan dari banyak negara melimpah. Akibatnya, *margin* keuntungan menurun tetapi situasi mulai meningkat dari Kuartal ke-4 dan seterusnya, mengarah ke kondisi pasar yang lebih menguntungkan di tahun 2023.

Secara keseluruhan, Dewan Komisaris berpendapat bahwa berbagai strategi dan inisiatif yang diterapkan oleh Direksi telah berhasil membuat Perseroan mampu beradaptasi dengan situasi saat ini. Selain itu, Direksi dan organisasi yang berada di bawahnya mampu menunjukkan ketahanan Perseroan baik di bidang operasional maupun keuangan.

PENILAIAN KINERJA DIREKSI

Mandat yang diberikan kepada Dewan Komisaris, antara lain tertuang dalam Undang-Undang No. 40 tahun 2007 tentang Perseroan Terbatas maupun Peraturan Otoritas Jasa Keuangan (POJK) No. 33/POJK.04/2014 tentang Direksi dan Dewan Komisaris Emiten atau Perusahaan Publik. Dua regulasi tersebut menegaskan fungsi Dewan Komisaris untuk melakukan pengawasan terhadap kebijakan pengurusan maupun jalannya pengurusan Perseroan, sekaligus memberikan nasihat kepada Direksi.

Dalam memberikan penilaian kepada Direksi, Dewan Komisaris mengacu pada rencana usaha yang telah ditetapkan bersama serta indikator-indikatornya. Dewan Komisaris juga mempertimbangkan kondisi eksternal yang dihadapi Perseroan sebagai pertimbangan untuk menilai kinerja Direksi.

Pencapaian-pencapaian penting dalam perjalanan usaha Perseroan pada tahun buku juga jadi pertimbangan Dewan Komisaris untuk memberikan penilaian. Begitu pun dengan realisasi dari nasihat-nasihat yang diberikan oleh Dewan Komisaris kepada Direksi.

Untuk tahun buku 2022, di tengah kondisi ekonomi yang penuh dengan tantangan, Dewan Komisaris memberikan apresiasi yang tinggi kepada Direksi dan jajarannya atas sejumlah pencapaian dan catatan penting. Di antaranya, pencapaian implementasi *Environment, Social, and Governance* (ESG) *Framework* dan memperoleh *rating* dari Sustainalytics.

and demand levels. Prices, particularly for food and energy, jumped dramatically, including for crude oil.

At the same time, COVID-19 was putting pressure on conditions in China. Production activities were impacted by the country's zero-COVID lockdown policy. The demand for petrochemical products, the core business of PT Chandra Asri Petrochemical Tbk (the "Company"), also weakened, while at the same time, supplies from many countries are plentiful. As a result, profit margins were compressed but the situation started picking up from the 4th Quarter onwards, to lead into more favourable market conditions in 2023.

Overall, the Board of Commissioners believes that the various strategies and initiatives implemented by the Board of Directors have succeeded in enabling the Company to adapt to the current situation. Furthermore, the Board of Directors and the organizations that report to them are able to demonstrate the Company's resilience in both operational and financial areas.

PERFORMANCE ASSESSMENT OF THE BOARD OF DIRECTORS

The mandate given to the Board of Commissioners, among others, is contained in Law No. 40 of 2007 concerning Limited Liability Companies, and Financial Services Authority Regulation (POJK) No. 33/POJK.04/2014 concerning Directors and Board of Commissioners of Issuers or Public Companies. These two regulations emphasize the function of the Board of Commissioners to oversee the management policies and the management of the Company, as well as provide advice to the Directors.

The Board of Commissioners refers to the jointly determined business plan and its indicators when providing an assessment to the Board of Directors. The Board of Commissioners also considers the Company's external conditions when evaluating the performance of the Directors.

The Board of Commissioners considers significant achievements in the course of the Company's business during the fiscal year when providing an assessment. Similarly, the realization of the Board of Commissioners' advice to the Board of Directors.

In the midst of challenging economic conditions, the Board of Commissioners expresses its gratitude to the Board of Directors and its staffs for a number of significant achievements and records for the fiscal year 2022. Among other things, accomplishments in the implementation of Environment, Social, and Governance (ESG) Framework and obtaining a rating from Sustainalytics.

Sustainalytics, lembaga internasional pemeringkat ESG terkemuka, menganugerahkan Perseroan skor 17,7 atas penerapan ESG yang konsisten. Skor ini menunjukkan bahwa Perseroan memiliki "Risiko Rendah" dari faktor ESG yang mempengaruhi dinamika keuangan yang material. Sustainalytics memeringkat Chandra Asri dalam persentil 1 teratas di sub-industri "Bahan Kimia Komoditas Global".

Dewan Komisaris meyakini bahwa penerapan ESG Chandra Asri akan terus meningkat, mengingat pada tahun 2022 Perseroan telah memiliki *framework*. Kerangka tersebut berisi tentang beragam prakarsa di bidang ESG, sehingga pelaksanaannya semakin terarah.

Dari sisi operasional dan keuangan, Perseroan juga semakin tangguh. Kemampuannya beradaptasi dengan perkembangan situasi telah berkontribusi pada pertumbuhan Perseroan sebagai perusahaan petrokimia terintegrasi terbesar di Indonesia.

Dengan demikian, Dewan Komisaris mengapresiasi kinerja Direksi sepanjang tahun 2022. Semua rencana strategis telah berjalan dengan baik, meski mereka menghadapi tantangan yang berat. Salah satu kesuksesan kunci adalah aksi korporasi pemecahan saham 1:4 yang berhasil dilaksanakan untuk memberikan partisipasi bagi investor ritel.

Demikian pula proses akuisisi dua perusahaan utilitas, yakni PT Krakatau Daya Listrik (KDL) dan PT Krakatau Tirta Industri (KTI), berhasil dijalankan. Dewan Komisaris berkeyakinan bahwa selain dapat memberikan kontribusi finansial bagi Perseroan, entitas bisnis ini akan menjadi bagian penting dari ekosistem bisnis Chandra Asri dalam jangka panjang. Dengan kerja sama ini, akan terjadi sinergi antara PT KSI dan Chandra Asri yang diharapkan dapat mengoptimalkan pasokan air dan energi untuk kebutuhan industri di wilayah Cilegon dan masyarakat sekitar. Aksi korporasi ini juga dilakukan untuk mengoptimalkan utilitas sebagai penunjang proses operasional, proses teknis dan keuangan, terutama untuk pengembangan kompleks petrokimia berskala global (CAP2) kedua milik Chandra Asri ke depan.

PENGAWASAN TERHADAP PERUMUSAN DAN IMPLEMENTASI STRATEGI

Dewan Komisaris berpandangan bahwa terealisasinya rencana strategis di tengah kondisi yang tidak mudah pada tahun 2022 menunjukkan bahwa Direksi telah merumuskan strategi yang efektif.

Pencapaian tersebut tidak terlepas dari kemampuan Direksi dalam menerapkan strategi yang tepat, termasuk merespons perkembangan situasi eksternal. Penerapan kebijakan strategis yang direalisasikan sepanjang tahun buku

Sustainalytics, the leading international ESG rating institution, awarded the Company a score of 17.7 for its consistent implementation of ESG. This score indicated that the Company has "Low Risk" from ESG factors affecting material financial dynamics. Sustainalytics ranked Chandra Asri in the top 1 percentile in the "Global Commodity Chemicals" sub-industry.

The Board of Commissioners believes that Chandra Asri's ESG implementation will continue to grow, given that the Company already has a framework in place for 2022. The framework includes various initiatives in the ESG sector, allowing for more focused implementation.

The Company is becoming stronger in terms of operational and financial aspects. The ability of Chandra Asri to adapt to changing circumstances has contributed to the Company's growth as the largest integrated petrochemical company in Indonesia.

As a result, the Board of Commissioners recognizes the performance of the Board of Directors throughout 2022. All strategic plans have gone well, despite the fact that they faced difficult challenges. Among the key success was the 1:4 stock split corporate action which was successfully executed to provide retail investor participation.

Similarly, the acquisition processes of two utility companies, namely PT Krakatau Daya Listrik (KDL) and PT Krakatau Tirta Industri (KTI), was successfully executed. The Board of Commissioners believes that, in addition to being able to contribute financially to the Company, these business entities will become an important part of the Chandra Asri's business ecosystem in the long run. With this collaboration, there will be synergies between PT KSI and Chandra Asri which is expected to optimise the water and energy supplies for industrial needs in Cilegon area and the surrounding communities. This corporate action is also carried out to optimize utilities as support for the operational, technical and financial processes, especially for the future development of Chandra Asri's second global-scaled petrochemical complex (CAP2).

OVERSIGHT OF STRATEGY FORMULATION AND IMPLEMENTATION

The Board of Commissioners believes that the implementation of the strategic plan in the midst of difficult conditions in 2022 demonstrates that the Board of Directors has developed an effective strategy.

This accomplishment is inextricably linked to the Board of Directors' ability to implement the appropriate strategy, including responding to changes in the external environment. The implementation of strategic policies

telah terbukti menghasilkan kinerja usaha yang positif bagi Perseroan.

Dalam proses perumusan strategi perusahaan, Dewan Komisaris turut melakukan pengawasan dan memberikan nasihat bilamana diperlukan.

Selanjutnya, pada proses implementasi strategi serta evaluasi pelaksanaannya, Dewan Komisaris juga telah melakukan pengawasan. Semua itu, antara lain dilakukan melalui rapat koordinasi secara berkala. Dewan Komisaris juga didukung oleh sejumlah komite yang memberikan masukan dalam proses pengawasan tersebut.

Berdasarkan hasil evaluasi, Dewan Komisaris berpendapat bahwa Direksi telah merumuskan strategi dengan baik dan tepat pada tahun buku. Direksi telah mempertimbangkan kondisi internal maupun eksternal Perseroan dalam penyusunan strategi. Implementasinya juga tidak terlepas dari keterlibatan Direksi, sehingga semua rencana berjalan dengan baik dan terarah.

PANDANGAN TERHADAP PROSPEK USAHA

Dewan Komisaris telah memperhatikan prospek usaha Perseroan pada tahun depan yang disusun oleh Direksi. Dewan Komisaris juga telah menyetujui dokumen tersebut serta memberikan berbagai masukan.

Dewan Komisaris berpendapat bahwa prospek usaha yang disusun oleh Direksi telah mempertimbangkan berbagai situasi, baik internal maupun eksternal Perseroan. Sementara Perseroan sangat optimis untuk kinerja keuangan yang lebih baik mengingat membaiknya kondisi pasar pada tahun 2023 dengan dibukanya kembali negara Tiongkok, dan pertumbuhan Indonesia yang berkelanjutan, diperkirakan akan ada banyak volatilitas.

Di antara tantangan yang berpotensi dihadapi Perseroan di tahun 2023 adalah kenaikan *cost of fund* akibat kenaikan suku bunga acuan, seperti yang diidentifikasi oleh pemerintah. Gambaran tersebut terungkap dalam Nota Keuangan Anggaran Pendapatan dan Belanja Negara (APBN) Tahun Anggaran 2023.

Namun, pencapaian di bidang ESG pada tahun 2022 semakin memperkuat fundamental Perseroan dalam menghadapi berbagai tantangan. Dukungan lembaga keuangan kepada Chandra Asri semakin tinggi atas keberhasilan di bidang ESG tersebut.

throughout the fiscal year has been shown to result in positive business performance for the Company.

In the process of formulating Company's strategy, the Board of Commissioners also supervises and provides advice when necessary.

Furthermore, the Board of Commissioners has conducted supervision throughout the strategy's implementation and evaluation. All of this, among others, was carried out through regular coordination meetings. The Board of Commissioners was also supported by a number of committees that provide input in the supervisory process.

Based on the evaluation results, the Board of Commissioners believes that the Board of Directors has developed a good and appropriate strategy for the fiscal year. In developing the strategy, the Board of Directors considered both internal and external conditions at the Company. Its implementation was also inextricably linked to the involvement of the Board of Directors, which ensures that all plans run smoothly and are directed.

VIEWS ON BUSINESS PROSPECTS

The Board of Commissioners has paid attention to the Company's business prospects for the coming year, as prepared by the Board of Directors. The document has also been approved by the Board of Commissioners, who have provided various inputs.

The Board of Commissioners believes that the business prospects prepared by the Board of Directors have taken into account a variety of situations, both internal and external to the Company. Whilst the Company is cautiously optimistic for an improved financial performance in light of the improved market conditions in 2023 due to China's reopening, and Indonesia's continued growth, there is expected to be a lot of volatility.

Among the challenges that the Company has the potential to face in 2023 is the increase in the cost of funds due to an increase in the benchmark interest rate, as identified by the government. This description is revealed in the Financial Notes of the State Revenue and Expenditure Budget (APBN) for Fiscal Year 2023.

However, ESG's achievements in 2022 further strengthened the Company's fundamentals in facing various challenges. The financial institutions' support for Chandra Asri was increasing with its success in the ESG field.

Selanjutnya, Perseroan memutuskan untuk menunda Final Investment Decision (FID) CAP2 selama 6 hingga 12 bulan setelah mempertimbangkan volatilitas makro dan geopolitik yang lebih luas. Tawaran EPC untuk CAP2 yang masuk lebih tinggi dari anggaran semula, di tengah inflasi yang tinggi.

Di sisi lain, Chandra Asri berhasil melakukan 2 akuisisi *bolt-on* dengan mengakuisisi aset infrastruktur strategis air (KTI) dan listrik (KDL) yang dibutuhkan CAP2, juga memperkuat keputusan Perseroan untuk menunda FID CAP2.

Karena itu, Dewan Komisaris memberikan dukungan penuh pada prospek usaha yang telah disusun oleh Direksi. Dalam pelaksanaannya, Dewan Komisaris bersama Direksi akan mengevaluasi secara berkala sambil menyesuaikan dengan segala perkembangan pada tahun buku 2023.

PENERAPAN TATA KELOLA PERUSAHAAN

Chandra Asri mengembangkan penerapan tata kelola perusahaan yang baik (*Good Corporate Governance/ GCG*) secara terus-menerus, sejalan dengan perkembangan peraturan perundang-undangan yang relevan serta kondisi industri. Sebagai organ dalam pelaksanaan tata kelola perusahaan, Dewan Komisaris menyambut baik kebijakan dan inisiatif tersebut.

Pada tahun buku 2022, Perseroan telah mengadopsi standar yang dikeluarkan oleh Komite Nasional Kebijakan Governansi (KNKG): Pedoman Umum Governansi Korporat Indonesia (PUG-KI) 2021. Dewan Komisaris memandang kebijakan Perseroan mengadopsi praktik terbaik dalam GCG sangat penting, sehingga Perseroan dapat beradaptasi dengan perkembangan dan dinamika di dunia usaha.

Dengan mempertimbangkan sudut pandang tersebut, Dewan Komisaris menilai bahwa penerapan GCG di lingkungan Perseroan pada tahun buku 2022 sudah berjalan dengan baik. Perseroan telah melaksanakan mandat dari peraturan perundang-undangan yang relevan serta praktik bisnis terbaik (*best practice*) dalam penerapan GCG.

PERUBAHAN KOMPOSISI DEWAN KOMISARIS

Sepanjang tahun buku 2022 tidak ada perubahan pada komposisi Dewan Komisaris. Namun, Perseroan menyelenggarakan RUPS Luar Biasa pada tanggal 12 Januari 2023 yang menyetujui pengunduran diri Wirat Uanarumit selaku Komisaris Perseroan. Dewan Komisaris menyampaikan terima kasih atas jasa-jasa yang telah diberikan kepada Perseroan selama masa jabatannya.

Further, the Company decided to postpone the CAP2 Final Investment Decision (FID) by 6 to 12 months after taking due consideration of broader macro and geopolitical volatility. The EPC bids for CAP2 that have come in higher than the original budget, in a high inflation environment.

On the other hand, Chandra Asri has successfully executed 2 bolt-on acquisitions by acquiring strategic water (KTI) and electricity (KDL) infrastructure assets that CAP2 needs, also reinforces the Company's decision to delay CAP2 FID.

Therefore, the Board of Commissioners fully supports the business prospects prepared by the Board of Directors. The Board of Commissioners and the Board of Directors will evaluate it on a regular basis while adjusting to all developments in the fiscal year 2023.

IMPLEMENTATION OF GCG

Chandra Asri continuously improves the implementation of good corporate governance (GCG) in response to changes in relevant laws and regulations as well as the industrial environment. The Board of Commissioners, as an organ involved in the implementation of corporate governance, supports these policies and initiatives.

The Company has adopted a standard issued by the National Committee on Governance Policy (KNKG) for the fiscal year 2022: Indonesian General Guidelines for Corporate Governance (PUG-KI) 2021. The Board of Commissioners believes that the Company's policy of adopting best practices in GCG is critical in order for the Company to adapt to changes and dynamics in the business world.

Taking this into consideration, the Board of Commissioners believes that the implementation of GCG within the Company in the fiscal year 2022 has gone well. In implementing GCG, the Company followed the mandate of relevant laws and regulations as well as best business practices.

CHANGES IN THE COMPOSITION OF THE BOARD OF COMMISSIONERS

Throughout the 2022 financial year, there were no changes to the composition of the Board of Commissioners. However, the Company had an Extraordinary GMS on 12 January 2023, which approved the resignation of Wirat Uanarumit as the Company's Commissioner. The Board of Commissioners expressed Wirat's gratitude for the services that had been provided to the Company during their term of office.

Pada kesempatan yang sama, rapat menyetujui pengangkatan Bandhit Thamprajamchit dan Diana Arsiyanti sebagai Komisaris Perseroan yang baru. Komposisi Dewan Komisaris hingga Laporan Tahunan ini disampaikan secara lengkap disajikan pada bagian "Profil Dewan Komisaris" pada bab "Profil Perusahaan".

At the same time, the meeting approved the appointment of Bandhit Thamprajamchit and Diana Arsiyanti as the new Commissioners of the Company. The composition of the Board of Commissioners until this Annual Report is presented in full in the "Board of Commissioners Profile" section of the "Company Profile" chapter.

APRESIASI

Chandra Asri berhasil melewati tahun buku 2022 dengan berbagai pencapaian penting yang akan memperkuat fundamental Perseroan untuk terus berkembang ke depan. Karena itu, Dewan Komisaris memberikan apresiasi kepada Direksi dan jajaran manajemen serta seluruh karyawan atas dedikasi dan kerja keras yang telah diberikan, sehingga mampu mewujudkan kinerja yang baik di tengah beragam tantangan yang dihadapi tersebut.

Dewan Komisaris juga menyampaikan terima kasih kepada para pemegang saham dan pemangku kepentingan lainnya, karena telah memberikan kepercayaan dan dukungan kepada Dewan Komisaris dalam menjalankan fungsi dan tugasnya. Apresiasi juga kami sampaikan kepada regulator yang telah ikut mengawasi kegiatan usaha Perseroan serta memberikan bimbingan kepada Perseroan dari aspek kepatuhan.

Dewan Komisaris mengucapkan terima kasih yang setinggi-tingginya kepada seluruh mitra kerja Perseroan atas kerja samanya pada tahun buku. Semoga apa yang sudah terjalin dengan baik dapat terus ditingkatkan di masa-masa yang akan datang.

APPRECIATION

Chandra Asri has completed the fiscal year 2022 with a number of significant accomplishments that has strengthened the Company's fundamentals and allows it to grow for the future. As a result, the Board of Commissioners wishes to thank the Board of Directors and management, as well as all employees, for their dedication and hard work in achieving good performance despite the various challenges faced.

The Board of Commissioners would also like to express its gratitude to the shareholders and other stakeholders for their trust and support in carrying out their functions and duties. We also wish to express our appreciation to the regulators who have assisted in supervising the Company's business activities and providing compliance guidance to the Company.

Finally, the Board of Commissioners wishes to express its gratitude to all of the Company's business partners for their cooperation during the financial year. We hope that we can continue to improve our business well into the future.

President Director

Pemegang saham dan pemangku kepentingan yang terhormat,
Dear shareholders and stakeholders,

Kondisi tahun 2022 yang dilalui PT Chandra Asri Petrochemical Tbk ("Chandra Asri", "Perseroan") diwarnai oleh dinamika geopolitik global, yaitu terjadinya perang Rusia dan Ukraina. Peristiwa ini berpengaruh besar pada kondisi ekonomi, karena membuat rantai pasok pangan dan komoditas di tingkat global mengalami hambatan, yang pada akhirnya mendorong kenaikan harga-harga, termasuk harga energi.

Lonjakan harga minyak mentah sangat berpengaruh pada Chandra Asri, karena harga bahan baku produksi mengalami kenaikan tinggi. Sementara di lain sisi, harga jual produk

The conditions that PT Chandra Asri Petrochemical Tbk ("Chandra Asri", the "Company") faced in 2022 were influenced by global geopolitical dynamics, specifically the outbreak of war between Russia and Ukraine. This event had a significant impact on economic conditions because it disrupted the global supply chain of food and commodities, which in turn drove up prices, including energy prices.

The rise in crude oil prices had a significant influence on Chandra Asri, as the cost of raw materials for production dramatically increased. Meanwhile, on the other hand, the

yang dihasilkan oleh Perseroan tidak mengalami kenaikan, mengingat lesunya kegiatan industri di Tiongkok, negara yang menyerap banyak produk petrokimia.

Kendati demikian, penerapan berbagai strategi membuat Perseroan berhasil untuk beradaptasi dengan kondisi yang berkembang tersebut. Daya tahan operasional dan keuangan Perseroan tetap tangguh berhadapan dengan situasi yang penuh tantangan.

PENCAPAIAN DAN PERISTIWA PENTING

Walaupun kondisi perekonomian pada tahun 2022 masih penuh dengan tantangan, namun kondisi Chandra Asri tetap tangguh dalam menghadapi situasi tersebut. Perseroan tidak hanya mampu beradaptasi, tetapi tetap mampu merealisasikan rencana aksi korporasi maupun proyek yang tidak hanya akan mendukung kinerja usaha dalam jangka pendek dan menengah, tetapi juga jangka panjang.

Proses Akuisisi Perusahaan

Perseroan telah menandatangani Perjanjian Jual Beli Saham Bersyarat (*Conditional Shares Sale and Purchase Agreement/ CSPA*), kemudian diikuti oleh Perjanjian *Shareholders Agreement* (SHA). Perjanjian tersebut merupakan rangkaian dari proses akuisisi PT Krakatau Daya Listrik (KDL) dan PT Krakatau Tirta Industri (KTI). Kedua anak perusahaan PT Krakatau Sarana Infrastruktur (KSI) itu masing-masing bergerak di bidang penyediaan listrik dan air. Melalui aksi korporasi ini, Chandra Asri akan memiliki saham PT KDL sebesar 70% dan di PT KTI sebesar 49%.

Perseroan mempertimbangkan tiga faktor strategis utama dalam melaksanakan transaksi ini. Pertama, adanya peluang sinergis dengan kedua perusahaan baru tersebut, untuk meningkatkan pendapatan dan mengoptimalkan pemanfaatan aset dan operasional. Kedua, perusahaan utilitas tersebut memiliki *captive market leadership* di kawasan industri Cilegon yang merupakan *home ground* Chandra Asri. Ketiga, akuisisi ini sejalan dengan rencana jangka panjang Perseroan untuk mengembangkan kompleks petrokimia berskala global kedua, CAP2.

Dengan demikian, 2 (dua) perusahaan baru itu dapat menjadi bagian dari ekosistem pertumbuhan Chandra Asri.

Pencapaian di Bidang ESG

Perseroan telah meraih 2 (dua) pencapaian signifikan di bidang ESG (*Environment, Social and Governance*). Pertama, Perseroan meluncurkan ESG *Framework* holistik yang mendasari semua inisiatif ESG.

selling price of products produced by the Company did not increase, given the sluggish industrial activity in China, a country that absorbs a lot of petrochemical products.

Nevertheless, the implementation of various strategies made the Company successful in adapting to these developing conditions. The Company's operational and financial resilience remained strong in dealing with challenging situations.

ACHIEVEMENTS AND SIGNIFICANT EVENTS

Despite the fact that the economic conditions in 2022 were still challenging, Chandra Asri's condition remained resilient in dealing with this situation. The Company was not only adaptable but also successfully implemented planned corporate actions and projects that would benefit the Company's business performance not only in the short and medium term, but also in the long term.

Company Acquisition Process

The Company has signed a Conditional Shares Sale and Purchase Agreement (CSPA), followed by a Shareholders Agreement (SHA) for the acquisition of PT Krakatau Daya Listrik (KDL) and PT Krakatau Tirta Industri (KTI). These two subsidiaries of PT Krakatau Sarana Infrastruktur (KSI) are engaged in the supply of electricity and water, respectively. Chandra Asri will own 70% of PT KDL and 49% of PT KTI as a result of this corporate action.

The Company considered three key strategic factors in executing this transaction. First, there are synergistic opportunities with the two new companies, to grow revenues and optimize asset utilization and operations. Second, these utility companies have a captive market leadership in the Cilegon industrial area, which is Chandra Asri's home ground. Third, this acquisition is in line with the Company's long-term plan for developing the second world-scale petrochemical complex, CAP2.

Thus, the 2 (two) new companies can become part of the Chandra Asri's growth ecosystem.

ESG Sector Achievements

The Company has made 2 (two) significant achievements in the area of ESG (Environment, Social and Governance). First, the Company launched a holistic ESG Framework which underpins all its ESG initiatives.

Melalui *framework* ini, implementasi ESG Perseroan akan lebih terfokus untuk mewujudkan dampak yang lebih besar bagi seluruh pemangku kepentingan.

Pencapaian kedua adalah memperoleh pemeringkatan dari Sustainalytics, lembaga pemeringkat dan penelitian ESG global, dengan skor ESG 17,7 (10–20 kategori risiko rendah). Pencapaian ini juga menempatkan Perseroan dalam 1 (satu) persentil teratas di sub-industri "Kimia Komoditas Global" yang dinilai oleh Sustainalytics.

Pencapaian di bidang ESG tersebut memberikan manfaat besar bagi Perseroan, untuk menyatukan antara keuntungan dan tujuan, untuk memberi manfaat bagi semua pemangku kepentingan utama.

Stock Split 1:4

Perseroan juga telah berhasil melaksanakan pemecahan nilai nominal saham (*stock split*) dengan rasio 1:4. Dengan demikian, nilai nominal yang sebelumnya Rp200 per saham menjadi Rp50.

Melalui kebijakan tersebut, jumlah saham Perseroan di pasar berhasil ditingkatkan, mendorong pertumbuhan volume transaksi, serta membuka peluang yang lebih luas bagi masyarakat untuk memiliki saham Perseroan. Sedangkan bagi para pemegang saham, tingkat turnover bisa lebih cepat. Perseroan juga terus menjaga batas minimum kepemilikan saham publik di Chandra Asri, sesuai dengan mandat regulasi.

Through this *framework*, the implementation of the Company's ESG will be more focused to realize a bigger impact on all stakeholders.

The second achievement obtaining a rating from Sustainalytics, the global ESG rating and research institute, with an ESG score of 17.7 (10–20 low-risk category). This achievement places the Company in the top 1 (one) percentile in the "Global Commodity Chemicals" sub-industry as assessed by Sustainalytics.

This achievement in the ESG sector provides significant benefits to the Company, to intertwine between profits and purpose, for the mutual advancement of all key stakeholders.

Stock Split 1:4

The Company has also succeeded in carrying out a stock split with a ratio of 1:4. Thus, the nominal value that was previously Rp200 per share became Rp50 per share.

Through this policy, the number of Company's shares in the market was successfully increased, encouraging growth in transaction volumes, as well as opening up wider opportunities for the public to own the Company's shares. Meanwhile, for shareholders, the turnover rate can be faster. In accordance with regulatory mandates, the Company maintains the minimum limit of public share ownership in Chandra Asri.

STRATEGI DAN KEBIJAKAN STRATEGIS

Kendala dan Tantangan

Kondisi tahun 2022 pada umumnya memberikan tantangan bagi Perseroan. Terutama terkait dengan kenaikan harga bahan baku sebagai dampak dari melonjaknya harga minyak mentah. Kondisi ini membuat beban produksi ikut mengalami kenaikan, yang selanjutnya memengaruhi *margin* usaha Perseroan.

Pada saat bersamaan, produk petrokimia hasil produksi Perseroan juga mengalami tekanan harga. Ada ketidakseimbangan antara pasokan yang berlebihan dan permintaan yang lesu, terutama karena ekonomi Tiongkok yang lesu terkait dengan kebijakan *lockdown zero-COVID* negara tersebut. Daya serap yang menurun tersebut menciptakan anomali dari sisi harga: di saat harga bahan baku meningkat, harga jual produk justru melemah.

Selain situasi *supply-demand*, Chandra Asri juga menghadapi beberapa masalah operasional di sisi produksi yang menyebabkan *unplanned shutdown*, yang berdampak pada fasilitas pabrik polimer Perseroan. Demi pertimbangan

STRATEGIES AND STRATEGIC POLICIES

Obstacles and Challenges

Conditions in 2022 generally provided challenges for the Company. This was mainly related to the increase in raw material prices because of soaring crude oil prices. This condition caused production expenses to also increase, which in turn affected the Company's operating margins.

At the same time, petrochemical products produced by the Company were also experiencing price pressure. There was an imbalance between excessive supply and sluggish demand, mainly due to the sluggish Chinese economy relating to their zero-COVID lockdown policy. The decreased absorption capacity creates an anomaly from the price side: when raw material prices increase, product selling prices actually weaken.

In addition to the supply-demand situation, Chandra Asri also faced some operational issues in the production side leading to an unplanned shutdown, which consequently affected the Company's polymer plant facilities. In consideration of safety,

keamanan dan keselamatan, Perseroan segera menutup *cracker* dan harus menyatakan keadaan luar biasa (*force majeure event*) selama periode 1 November 2022 sampai dengan 31 Desember 2022. Pada pemeriksaan yang dilakukan secara detail ditemukan bahwa *Heat Exchanger* dan pipa terkait di dalam *cold box* mengalami kerusakan. Produksi pabrik dikembalikan ke level kapasitas operasi sebesar 70% setelah isolasi peralatan yang rusak. Penggantian dan *commissioning* peralatan yang rusak diikuti dengan kembalinya 100% kapasitas operasi akan dicapai sekitar Kuartal 2 tahun 2023.

Klaim asuransi Kerusakan Properti dan Gangguan Usaha telah diberitahukan kepada perusahaan asuransi atas kejadian di atas dan penerimaan klaim telah dikonfirmasi. Kerugian Gangguan Usaha yang dihasilkan saat ini sedang dihitung dan akan disajikan kepada perusahaan asuransi untuk penggantian kepada Perusahaan. Pembayaran akhir akan dilakukan setelah pemulihan telah terjadi.

Kendati demikian, Perseroan cukup tangguh menghadapi situasi tersebut. Beragam strategi dan inisiatif strategis yang diterapkan turut memperkuat posisi Perseroan sebagai produsen petrokimia terintegrasi dan terbesar di Tanah Air.

Penerapan Kebijakan Strategis

Chandra Asri terus bergerak maju dengan ketahanan neraca keuangan dan keunggulan operasional. Perseroan terus mempertahankan disiplin keuangan untuk menavigasi ketidakpastian makro yang berlangsung. Pada saat bersamaan, Perseroan juga terus berinvestasi untuk tumbuh secara berkelanjutan dalam jangka panjang.

Pengalaman Perseroan yang telah beroperasi lebih dari 3 (tiga) dekade di industri petrokimia menjadikan Chandra Asri tangguh dalam menghadapi segala perubahan situasi eksternal yang terjadi. Kendati demikian, Perseroan tetap meningkatkan kewaspadaan mengingat ketidakpastian dalam perkembangan makro masih sangat tinggi agar tetap mampu memitigasi segala potensi risiko yang dihadapi.

Hal itu juga tercermin pada sejumlah strategi yang telah direalisasikan pada tahun 2022. Misalnya, Perseroan melakukan *refocusing* belanja anggaran. Manajemen melakukan kaji ulang (*review*) terhadap anggaran yang telah diputuskan. Dari belanja modal hingga belanja operasional dilakukan peninjauan ulang untuk menentukan skala prioritas.

Di bidang digitalisasi, Chandra Asri juga telah memiliki "Digital Twin" pertama di Indonesia. Perseroan membuat replika pabrik dengan sistem digital tiga dimensi (3D). Gambar virtual tersebut memperlihatkan secara rinci setiap bagian dari pabrik, mulai dari mesin, pipa-pipa yang dipasang, hingga koneksi dalam arsitektur pabrik. Sistem

the Company shut down the cracker immediately and had to declare a force majeure event over the period of 1 November 2022 until 31 December 2022. On detailed inspection it was found that Heat Exchanger and associated piping inside the cold box were damaged. The plant production was restored to 70% operating capacity after isolation of the damaged equipment. The replacement and commissioning of the damaged equipment, followed by production returning to 100% operating capacity is due to occur around Quarter 2, 2023.

A Property Damage and Business Interruption insurance claim has been notified to Insurers for the above incident and claim admissibility has been confirmed. The resulting Business Interruption losses are currently being quantified and will be presented to Insurers for reimbursement to the Company. The final payment will be made once reinstatement has occurred.

However, the Company was quite resilient in facing this situation. The various strategies and strategic initiatives implemented have contributed to strengthening the Company's position as the largest and integrated petrochemical producer in the country.

Implementation of Strategic Policy

Chandra Asri continued to move forward with balance sheet resilience and operational excellence. The Company continued to maintain financial discipline to navigate ongoing macroeconomic uncertainties. At the same time, the Company also continued to invest in order to grow sustainably in the long term.

The experience of the Company, which has operated for more than 3 (three) decades in the petrochemical industry, makes Chandra Asri resilient in facing any changes in the external situation. Nevertheless, the Company continues to increase vigilance, considering that the uncertainty in macroeconomic developments is still very high, so that it is still able to mitigate all the potential risks it faces.

This is also reflected in a number of strategies implemented in 2022. The Company, for example, continued its focus on cost leadership. Management conducted an evaluation (*review*) of the budget decision. A review is carried out to determine priorities, from capital expenditures to operational expenditures.

In the field of digitization, Chandra Asri also has the first "Digital Twin" in Indonesia. The Company makes plant replicas with a three-dimensional (3D) digital system. The virtual image shows in detail every part of the plant, from the machines and installed pipes to the connections in the plant architecture. This system allows the Company to

ini memungkinkan Perseroan memantau langsung masalah yang mungkin dialami pabrik. Dengan demikian, Perseroan mampu melakukan mitigasi potensi masalah di bidang produksi dengan efektif dan efisien.

Dari sisi pembiayaan, Perseroan juga memiliki sumber yang terdiversifikasi. Sebesar 57% merupakan pinjaman bank dalam negeri, 38% obligasi rupiah, dan 5% pinjaman bank luar negeri. Kondisi ini ikut mendukung ketahanan keuangan Chandra Asri.

Peran Direksi dalam Perumusan Strategi serta Upaya Memastikan Implementasi Strategi

Setiap tahun, Chandra Asri menetapkan strategi yang tertuang dalam Rencana Kerja dan Anggaran Perusahaan (RKAP). Seluruh direktorat Perseroan ikut terlibat dalam prosesnya, yaitu sejak dalam perencanaan yang dilaksanakan bersama dengan organisasi di bawah Direksi. Selanjutnya, Direksi bersama Dewan Komisaris memutuskan strategi tersebut untuk menjadi panduan dalam kegiatan usaha di tahun buku.

Pada saat pelaksanaan strategi di tingkat operasional yang dijalankan oleh organisasi Perseroan, Direksi juga terlibat memberikan masukan dan persetujuan. Selain itu, Direksi melakukan evaluasi terhadap implementasi strategi. Proses ini menunjukkan bahwa Direksi memiliki keterlibatan secara langsung dalam perumusan strategi perusahaan.

Untuk memastikan bahwa implementasi strategi sesuai dengan yang telah ditetapkan, Direksi melakukan rapat koordinasi secara berkala dengan organisasi pelaksana di bawahnya. Pada kesempatan tersebut, selain mendapatkan informasi perkembangan pelaksanaan, Direksi juga melakukan evaluasi sehingga seluruh strategi dapat diimplementasikan dengan baik.

Bahkan untuk kasus tertentu yang memiliki tingkat urgensi tinggi, Direksi yang diwakili oleh Direktur penanggung jawab mengadakan rapat harian. Tujuannya agar ada deteksi dini dan keputusan dapat segera diambil.

Pada proses selanjutnya, Direktur yang menjadi penanggung jawab melaporkan dalam rapat mingguan Direksi. Rapat ini, antara lain melakukan evaluasi serta, jika diperlukan, mengambil keputusan lanjutan untuk dilaksanakan. Mekanisme tersebut sudah berjalan di Perseroan sehingga seluruh kebijakan strategis yang dirumuskan dan diputuskan dapat terealisasi dengan baik.

directly monitor problems that may be experienced by the plant. Thus, the Company is able to effectively and efficiently mitigate potential problems in the production sector.

In terms of financing, the Company also has diversified sources. 57% are domestic bank loans, 38% are rupiah bonds, and 5% are foreign bank loans. This condition also supports Chandra Asri's financial resilience.

The Board of Directors' Role in Strategy Formulation and Efforts to Ensure Strategy Implementation

Every year, Chandra Asri develops strategy that is incorporated into the Company's Work Plan and Budget (RKAP). All of the Company's directorates are involved in the process, beginning with the planning stage, which is carried out in collaboration with the organizations reporting to the Board of Directors. Furthermore, the Board of Directors, together with the Board of Commissioners, decides on the strategy that will serve as a guide for business activities during the fiscal year.

During the implementation of the strategy at the operational level carried out by the Company's organization, the Board of Directors is also involved in providing input and approval. In addition, the Board of Directors evaluates the strategy's implementation. This process shows that the Board of Directors has direct involvement in the formulation of corporate strategy.

The Board of Directors holds regular coordination meetings with the implementing organizations under it to ensure that the strategy is being carried out as planned. On this occasion, in addition to gathering information on implementation progress, the Board of Directors conducts evaluations to ensure that all strategies are properly implemented.

Even for certain cases that have a high level of urgency, the Board of Directors, represented by the Director in Charge, holds daily meetings. The goal is to detect problems early so that decisions can be made quickly.

The next step is for the Director in charge to report at the Board of Directors' weekly meeting. This meeting evaluates and, if necessary, formulates additional decisions to be implemented. This mechanism has been in place in the Company to ensure that all strategic policies that have been developed and decided upon are properly implemented.

PENCAPAIAN KINERJA USAHA

Pada tahun 2022, dari sisi operasional, Chandra Asri berhasil memperoleh sertifikasi SNI 8887:2020, standar bahan baku aplikasi pipa gas untuk produk High-Density Polyethylene (HDPE), Asrene® SP4808. Pencapaian ini turut mendukung target pemerintah Indonesia untuk membangun jalur distribusi gas bumi untuk 4 (empat) juta rumah tangga pada tahun 2024.

Penerapan Asrene® SP4808 untuk pipa gas dapat meningkatkan Tingkat Komponen Dalam Negeri (TKDN), mengingat saat ini bahan baku yang digunakan untuk proyek jaringan gas diimpor sepenuhnya. Oleh karena itu, Perseroan berharap Asrene® SP4808 dapat menjadi solusi baik dari sisi teknis maupun komersial untuk mendukung program strategis nasional jaringan distribusi gas bumi (jargas) untuk rumah tangga.

Pada tahun 2022, tingkat operasi rata-rata Perseroan mencapai 77% untuk seluruh fasilitas pabrik. Dibandingkan dengan tahun 2021 yang sebesar 91%, terjadi penurunan akibat perawatan rutin dan pemberhentian secara tiba-tiba tanpa direncanakan (*unplanned shutdown*) di pabrik UCC2.

Meski situasinya penuh dengan kesulitan, kinerja keuangan di tahun 2022 cukup solid. Melalui berbagai inisiatif strategis yang telah diterapkan, Perseroan terus mendapat dukungan kuat dari mitra bank terkemuka, terutama sebagai wujud kepercayaan yang tinggi terhadap kualitas kredit jangka panjang Chandra Asri serta standar ESG yang kuat yang diterapkan oleh Perusahaan.

Kinerja pendapatan bersih Perseroan di tahun 2022 mencapai US\$2.385 juta, turun 7,59% dibandingkan tahun sebelumnya yang sebesar US\$2.580 juta. Penurunan ini terutama disebabkan oleh penurunan volume penjualan akibat pengurangan produksi.

Disebabkan oleh dua tantangan yang telah disebutkan sebelumnya yang berdampak pada industri petrokimia, yaitu Perang Rusia-Ukraina yang meningkatkan biaya input, ditambah dengan kebijakan *zero-COVID* Tiongkok yang menekan harga jual produk, Perseroan membukukan rugi bersih sebesar US\$149,4 juta. Dibandingkan laba bersih tahun sebelumnya yang sebesar US\$152 juta, terjadi penurunan sebesar 198,37%. Namun demikian, Perseroan mampu menghasilkan margin kas yang positif dari operasi dengan mempertahankan Laba Sebelum Bunga, Pajak, Depresiasi, dan Amortisasi (EBITDA) yang positif sebesar US\$5,3 juta, terdepan di antara rekan-rekan dan pesaing lain yang sebanding karena posisi aset istimewa Chandra Asri yang melayani pasar domestik Indonesia.

BUSINESS PERFORMANCE ACHIEVEMENT

In 2022, Chandra Asri successfully obtained SNI 8887:2020 certification, the raw material standard for gas pipe applications for High-Density Polyethylene (HDPE) products, Asrene® SP4808. This accomplishment contributes to the Indonesian government's goal of constructing natural gas distribution channels for 4 (four) million households by 2024.

The use of Asrene® SP4808 for gas pipelines can increase the Domestic Component Level (TKDN) considering that the raw materials for gas network projects are currently fully imported. As a result, the Company anticipates that Asrene® SP4808 will be a technical and commercial solution to support the national strategic program for natural gas distribution networks (jargas) for households.

In 2022, the Company's average operating rate reached 77% for all plant facilities. Compared to 2021 which was 91%, there was a decrease due to routine maintenance and unplanned shutdown in UCC2 plant.

Even though the situation is fraught with difficulties, financial performance in 2022 was solidly resilient. The Company continued to receive strong support from leading bank partners as a result of various strategic initiatives that have been implemented, particularly as a result of high confidence in Chandra Asri's long-term credit quality, as well as the strong ESG standards implemented by the Company.

The Company's net revenues performance in 2022 reached US\$2,385 million, decreased by 7.59% compared to the previous year which amounted to US\$2,580 million. This decrease was primarily due to decline in sales volume as a result of reduction of production.

Due to the twin challenges shared earlier that impacted the petrochemical industry, i.e. the Russia-Ukraine War that escalated cost of inputs, coupled with China's zero-COVID policy that depressed product selling prices, the Company posted a net loss of US\$149.4 million. This compares to the previous year of net profit which amounted to US\$152 million, there was a decrease of 198.37%. However, the Company was able to generate positive cash margin from operations, by maintaining a positive Earnings Before Interest, Tax, Depreciation and Amortization (EBITDA) of US\$5.3 million, ahead of other comparable peers and competitors due to Chandra Asri's privileged asset position serving the domestic Indonesian market.

PROSPEK USAHA PERUSAHAAN

Kondisi global pada tahun 2023 masih diliputi oleh ketidakpastian. Tekanan ekonomi masih akan terjadi, mengingat perang Rusia dan Ukraina belum berakhir.

Pemerintah Indonesia juga memandang kondisi serupa, seperti terungkap dalam Nota Keuangan Anggaran Pendapatan dan Belanja Negara (APBN) Tahun Anggaran 2023. Kondisi perekonomian masih akan diwarnai oleh ketidakpastian dan peningkatan risiko global. Risiko tersebut utamanya dipengaruhi oleh lonjakan inflasi global akibat *supply disruption* dan perlambatan perekonomian sebagai dampak tensi geopolitik.

Selain itu, ada potensi peningkatan *cost of fund* akibat kenaikan suku bunga acuan yang berpotensi mengakibatkan arus modal keluar dari negara berkembang. Seperti terjadi pada tahun 2022, kenaikan suku bunga tersebut merupakan respons terhadap inflasi yang pada tahun 2023 masih berpotensi tinggi.

Chandra Asri menyadari kondisi ekonomi makro yang masih bergejolak di tahun 2023. Oleh karena itu, Perseroan tetap menjaga kewaspadaan tinggi, kehati-hatian keuangan, dan disiplin permodalan. Setelah pertimbangan matang, Perseroan telah menunda Final Investment Decision CAP2 selama 6 hingga 12 bulan. Keputusan ini diambil setelah banyak pertimbangan, dengan mempertimbangkan ketidakpastian makro dan geopolitik yang lebih luas. Selain itu, tawaran EPC untuk CAP2 yang masuk lebih tinggi dari anggaran semula, di tengah inflasi yang tinggi dan kenaikan suku bunga.

Selain itu, keberhasilan Chandra Asri dalam melakukan 2 akuisisi *bolt-on* melalui akuisisi aset infrastruktur strategis air (KTI) dan listrik (KDL) untuk melengkapi kebutuhan CAP2 di masa depan telah membuka potensi baru sinergi capex, opex, dan integrasi pendapatan yang akan dipelajari, untuk mengatur konteks yang lebih luas dalam keputusan ini.

Namun, dengan dukungan dari lembaga keuangan selama ini terhadap Chandra Asri serta pengalaman dalam berhadapan dengan situasi yang tidak stabil, Perseroan meyakini dapat beradaptasi dengan baik. Hal itu, antara lain tercermin dari penerbitan obligasi Perseroan yang mendapatkan respons positif dari investor dalam negeri maupun ketersediaan modal kerja dari perbankan.

Dengan dukungan itu, Perseroan memiliki kekuatan finansial yang sangat baik. Cadangan kas Perseroan juga sangat memadai dengan *liquidity pool* sebesar US\$2,3 miliar yang meliputi kas dan setara kas ditambah surat-surat berharga.

Di bidang operasional pabrik, Perseroan akan terus menjaga agar tetap konsisten dan prima. Dengan demikian, kemampuan produksi akan tetap maksimal.

COMPANY'S BUSINESS PROSPECTS

The global environment in 2023 remains uncertain. Given that the war between Russia and Ukraine is still ongoing, we expect economic pressure to continue.

The Indonesian government sees similar conditions, as revealed in the Financial Statements of the 2023 State Revenue and Expenditure Budget (APBN). Uncertainty and increased global risks will continue to color economic conditions. This risk is primarily influenced by the rise in global inflation caused by supply disruptions as well as the economic slowdown caused by geopolitical tensions.

Furthermore, there is the possibility of an increase in the cost of funds due to an increase in the benchmark interest rate, which could result in capital outflows from developing countries. As occurred in 2022, the increase in the interest rate was a response to inflation, which could remain high in 2023.

Chandra Asri is cognisant of the continuous volatile macroeconomic conditions in 2023. As a result, the Company continues to maintain high vigilance, financial prudence, and capital discipline. After due consideration, the Company has re-phased the CAP2 Final Investment Decision by 6 to 12 months. This decision was taken after much due deliberation, in consideration of the broader macro and geopolitical uncertainties. In addition, EPC bids for CAP2 have come in higher than the original budget, in a high inflation and rising interest rate environment.

Furthermore, Chandra Asri's success in executing 2 bolt-on acquisitions through the acquisition of strategic water (KTI) and electricity (KDL) infrastructure assets to complement CAP2's future needs, has unlocked new potential capex, opex, and revenue integration synergies that will be studied accordingly, to set the broader context for this decision.

However, with the support from financial institutions so far for Chandra Asri and experience in dealing with unstable situations, the Company believes it can adapt well. This is reflected, among other things, in the Company's bond issuance, which received a positive response from domestic investors, as well as the availability of working capital from banks.

The Company has excellent financial strength as a result of this support. The cash reserves of the Company are also very adequate with a liquidity pool of US\$2.3 billion encompassing cash and cash equivalents plus marketable securities.

The Company will continue to maintain consistency and excellence in plant's operations. As a result, production capacity will continue to be maximized.

Sejumlah kebijakan strategis yang telah dijalankan pada tahun 2022 semakin memperkuat fondasi Chandra Asri dalam menghadapi tahun 2023. Karena itu, prospek usaha Perseroan juga akan baik, khususnya dengan dukungan 2 (dua) entitas usaha yang diakuisisi yang akan memperkuat model bisnis dan *franchise* Perseroan.

A number of strategic policies implemented in 2022 have strengthened Chandra Asri's foundation as it prepares to face 2023. As a result, the Company's business prospects will be favorable, particularly with the support of the two acquired business entities, which will strengthen the Company's business model and franchise.

PENERAPAN TATA KELOLA PERUSAHAAN

Dalam menjalankan kegiatan usaha, Chandra Asri senantiasa berpedoman pada penerapan tata kelola perusahaan yang baik (*Good Corporate Governance/GCG*). Komitmen tersebut membuat Perseroan menjadi entitas bisnis yang adaptif, berkesinambungan, serta berkembang dengan memiliki daya saing yang baik.

Penerapan GCG di lingkungan Perseroan, selain peraturan perundang-undangan yang berlaku, juga mengadopsi Pedoman Umum Governansi Korporat Indonesia (PUG-KI) 2021 yang diterbitkan oleh Komite Nasional Kebijakan Governansi (KNKG). Pedoman ini mengacu pada 4 (empat) pilar tata kelola atau governansi korporat yang mencakup: (1) perilaku beretika; (2) akuntabilitas; (3) transparansi; dan (4) keberlanjutan.

Sedangkan prinsip penerapan GCG terdiri atas 8 (delapan) yang terbagi dalam 3 (tiga) kelompok: (1) prinsip-prinsip yang mengatur organ-organ penyelenggara governansi korporat, dan (2) prinsip-prinsip yang mengatur proses dan keluaran yang dihasilkan oleh organ-organ di atas, (3) kelompok prinsip yang mengatur penerima manfaat dari pelaksanaan governansi korporat.

Sebagai bagian dari pelaksanaan GCG, Perseroan juga telah membagi peran Dewan Komisaris dan Direksi dengan jelas. Begitu juga dengan komite-komite yang ada dalam organisasi Perseroan.

TANGGUNG JAWAB SOSIAL DAN LINGKUNGAN PERUSAHAAN

Chandra Asri memiliki komitmen tinggi dalam Pelaksanaan Tanggung Jawab Sosial dan Lingkungan (TJSL) yang berpedoman pada prinsip *Environment, Social, and Governance* (ESG). Karena itu, sesuai dengan mandat peraturan perundang-undangan serta praktik bisnis terbaik, terutama di lingkungan industri, pelaksanaannya telah mengacu peraturan perundang-undangan yang ada.

IMPLEMENTATION OF CORPORATE GOVERNANCE

In carrying out its business activities, Chandra Asri is always guided by the implementation of good corporate governance (GCG). With such commitment, the Company has evolved into an adaptable, sustainable, and growing business entity with high competitiveness.

In the implementation of the GCG within the Company, in addition to the applicable laws and regulations, the Company adopted the 2021 Indonesian General Corporate Governance Guidelines (PUG-KI) issued by the National Committee on Governance Policy (KNKG). This policy refers to the 4 (four) pillars of corporate governance, which are as follows: (1) ethical behavior; (2) accountability; (3) transparency; and (4) sustainability.

While the GCG implementation consists of 8 (eight) principles divided into 3 (three) groups: (1) principles governing the organs administering corporate governance, (2) principles governing the processes and output produced by the above organs, and (3) principles governing the beneficiaries of corporate governance implementation.

The Company has clearly divided the roles of the Board of Commissioners and the Board of Directors as part of GCG implementation. Likewise with the existing committees within the Company's organization.

CORPORATE SOCIAL AND ENVIRONMENTAL RESPONSIBILITY OF THE COMPANY

Chandra Asri has a high commitment to the Implementation of Social and Environmental Responsibility, which is guided by environmental, social, and governance principles (ESG). As a result, the implementation refers to existing laws and regulations in accordance with the mandate of laws and regulations and best business practices, particularly in the industrial environment.

Sebagai perusahaan terbuka (*public company*) misalnya, Perseroan telah mengadopsi Peraturan Otoritas Jasa Keuangan (POJK) No. 51/POJK.03/2017 tentang Penerapan Keuangan Berkelanjutan bagi Lembaga Jasa Keuangan, Emiten, dan Perusahaan Publik. Selain itu, Perseroan juga menerapkan praktik bisnis terbaik dalam penerapan usaha keberlanjutan dengan prinsip ESG.

Pada tahun 2022, pencapaian penting dari penerapan ESG adalah hasil audit dari Sustainalytics, lembaga riset dan pemeringkat independen global. Hasilnya, dengan skor 17,7, Chandra Asri termasuk dalam kategori "Risiko Rendah" terhadap dampak keuangan yang material dari faktor-faktor ESG. Bahkan Perseroan ditempatkan dalam 1 (satu) persentil teratas di sub-industri "Kimia Komoditas Global".

PERUBAHAN KOMPOSISI DIREKSI DAN ALASAN PERUBAHAN

Pada tahun buku 2022 telah terjadi 2 (dua) kali perubahan komposisi Direksi. Pertama, berkenaan dengan pengunduran diri Chatri Eamsobhana dari jabatan Wakil Presiden Direktur Perseroan. RUPS Tahunan yang diselenggarakan pada 18 April 2022 telah menyetujui pengunduran diri tersebut sekaligus mengangkat Krit Bunnag sebagai Wakil Presiden Direktur dan Raymond Budhin sebagai Direktur.

Kedua, pengunduran diri Somkoun Sriwattagaphong dari posisi Direktur. RUPS Luar Biasa tanggal 5 Agustus 2022 telah menyetujui pengunduran diri ini sekaligus mengangkat Prapote Stianpapong sebagai Direktur. Susunan Direksi Perseroan hingga akhir tahun buku 2022 disampaikan pada bagian "Profil Direksi" di bab "Profil Perusahaan".

As a public company, for example, the Company has adopted Financial Services Authority Regulation (POJK) No. 51/POJK.03/2017 on the Implementation of Sustainable Finance for Financial Services Institutions, Issuers, and Public Companies. Furthermore, the Company also implements best business practices in the implementation of sustainable business with ESG principles.

The results of an audit from Sustainalytics, a global independent research and rating agency, would be a key achievement of ESG implementation in 2022. As a result, with a score of 17.7, Chandra Asri falls into the "Low Risk" category of having a material financial impact from ESG factors. In fact, the Company is ranked in the top 1 (one) percentile of the "Global Commodity Chemicals" sub-industry.

CHANGES IN THE COMPOSITION OF THE BOARD OF DIRECTORS AND REASONS FOR THE CHANGES

The Board of Directors' composition has changed twice in fiscal year 2022. First, regarding Chatri Eamsobhana's resignation from the position of Vice President Director of the Company. The resignation was approved by the Annual General Meeting of Shareholders on 18 April 2022, as well as the appointments of Krit Bunnag as Vice President Director and Raymond Budhin as Director.

Second, the resignation of Somkoun Sriwattagaphong from the position of Director. The Extraordinary General Meeting of Shareholders dated 5 August 2022, approved this resignation and appointed Prapote Stianpapong as Director. The composition of the Company's Board of Directors until the end of the 2022 fiscal year is presented in the "Directors' Profile" section of the "Company Profile" chapter.

APRESIASI

Direksi menyampaikan terima kasih kepada Dewan Komisaris dan Pemegang Saham serta regulator atas dukungan, kepercayaan, dan bimbingan yang diberikan kepada Direksi dalam mengelola Perseroan sehingga berhasil melalui tahun 2022 dengan kinerja yang sangat baik. Apresiasi juga disampaikan kepada seluruh karyawan atas kontribusinya yang positif bagi perkembangan usaha Chandra Asri.

Direksi juga menyampaikan apresiasi yang mendalam kepada para pemangku kepentingan lain seperti vendor, mitra perbankan, maupun masyarakat di sekitar perusahaan. Dukungan mereka sangat berarti bagi perkembangan usaha Perseroan.

Direksi akan berupaya untuk terus menciptakan pertumbuhan yang berkelanjutan bersama para pemangku kepentingan. Dengan demikian, Chandra Asri dapat memberikan manfaat maksimal kepada pemegang saham, masyarakat, serta negara.

APPRECIATION

The Directors express their gratitude to the Board of Commissioners, Shareholders, and regulators for the support, trust, and guidance given to the Directors in managing the Company so that it could successfully pass through 2022 with excellent performance. Appreciation is also conveyed to all employees for their positive contribution to Chandra Asri's business development.

The Board of Directors also expresses deep appreciation to other stakeholders including vendors, banking partners, and the surrounding community. Their assistance is critical to the growth of the Company's operations.

The Board of Directors will work hard to maintain long-term growth with stakeholders. As a result, Chandra Asri can provide maximum benefits to shareholders, society, and the state.

RIWAYAT SINGKAT PERUSAHAAN

BRIEF HISTORY OF THE COMPANY

Perjalanan bisnis PT Chandra Asri Petrochemical Tbk (selanjutnya disebut "Perseroan") sebagai perusahaan petrokimia terkemuka di Indonesia bermula pada 1 Januari 2011. Hal itu ditandai dengan penggabungan usaha (*merger*) PT Tri Polyta Indonesia Tbk (TPI) dengan PT Chandra Asri (CA). TPI, yang merupakan *surviving company* adalah penghasil Polypropylene terbesar di Indonesia yang didirikan pada tahun 1984 dan mulai beroperasi secara komersial sejak tahun 1992. Sedangkan CA merupakan produsen Olefins dan Polyethylene yang didirikan pada tahun 1989. Sejak itu, Perseroan menjalankan bisnis sebagai produsen domestik tunggal di Indonesia untuk Ethylene, Styrene Monomer, dan Butadiene.

Perseroan mengoperasikan pabrik Polypropylene dengan kapasitas paling besar di Indonesia, yaitu 590 kilo ton per tahun (KTA) dengan margin yang stabil serta pabrik Polyethylene terbesar dengan kapasitas 736 KTA. Kemampuan ini menjadikan Perseroan sebagai produsen Polypropylene serta Polyethylene terbesar di Indonesia. Pabrik petrokimia Perseroan dibangun di lokasi yang strategis di Ciwandan, Cilegon, Provinsi Banten, serta dilengkapi dengan teknologi mutakhir dan fasilitas penunjang yang lengkap.

Kompleks pabrik dilengkapi jaringan pipa sepanjang 45 kilometer yang memungkinkan Perseroan untuk secara efisien berhubungan langsung dengan beberapa pelanggan utama. Sementara pabrik yang memproduksi Styrene Monomer berlokasi di Desa Mangunreja, Puloampel, Serang terdiri atas dua *train* yang dapat memproduksi Styrene Monomer. Fasilitas lain yang dimiliki Perseroan adalah tiga *train* yang dapat memproduksi Linear Low Density Polyethylene dan High Density Polyethylene, serta tiga *train* untuk memproduksi beragam Polypropylene.

Perseroan juga memiliki pembangkit listrik sendiri untuk kompleks pabrik dengan kapasitas yang melebihi kebutuhan produksi normal. Dengan demikian, energi tersebut menjadi sumber cadangan listrik untuk menyokong sumber listrik utama dari PT Perusahaan Listrik Negara (PLN). Hal ini bertujuan untuk menjaga kelancaran dan efisiensi produksi.

Sistem kerja Perseroan juga dilengkapi dengan fasilitas utama yang berkualitas prima, khususnya tangki penyimpanan dan *jetty*. Fasilitas infrastruktur yang terintegrasi dengan kompleks pabrik juga telah dibangun, seperti fasilitas desalinasi dan pengolahan air murni yang diperlukan dalam sirkulasi sistem pendinginan, serta pergudangan dan perangkat penanggulangan kebakaran.

The business journey of PT Chandra Asri Petrochemical Tbk (hereinafter referred to as the "Company") as a leading petrochemical company in Indonesia commenced on 1 January 2011, through the merger of PT Tri Polyta Indonesia Tbk (TPI) with PT Chandra Asri (CA). TPI, which is a surviving company, is the largest Polypropylene manufacturer in Indonesia that was established in 1984 and commenced commercial operations in 1992, while CA was the Olefins and Polyethylene manufacturer that was established in 1989. Since then, the Company has been running the business as the sole domestic manufacturer in Indonesia for Ethylene, Styrene Monomer, and Butadiene.

The Company operates the largest Polypropylene plant in Indonesia, with a stable margins capacity of 590 kilo ton per annum (KTA), and the largest Polyethylene plant with a capacity of 736 KTA. This puts the Company as the largest producer of Polypropylene as well as Polyethylene in Indonesia. The Company's petrochemical plant was built in a strategic location in Ciwandan, Cilegon, Banten province, and is equipped with the state of the art technology and complete supporting facilities.

The plant is equipped with a vast network of 45 kilometer long pipeline that enables the Company to connect directly with some key customers. Meanwhile, the plant that produces Styrene Monomer is located in Mangunreja Village, Puloampel, Serang, consisting of two trains that produce Styrene Monomer. Other facilities owned by the Company are three trains that produce Linear Low Density Polyethylene and High Density Polyethylene, as well as three trains to produce a variety Polypropylene.

The Company has its own power generators with electricity capacity that surpasses normal production requirements as a back-up power source to support the main power source from the Perusahaan Listrik Negara (PLN), which is intended to maintain smooth and efficient operation.

The Company's work system is also equipped with well qualified main facilities, especially the impressive product storage tanks and jetties. Additionally, we also built infrastructural facilities integrated with the plant complex, such as desalination and pure water treatment used for cooling system circulation as well as warehouses and firefighting appliances.

Seluruh pabrik Perseroan dan fasilitas pendukungnya dikelola dengan baik, disertai dengan pengembangan kapasitas dan mutu produk. Pengembangan kapasitas terutama dilakukan dengan meningkatkan kapasitas fasilitas Naphtha Cracker hingga mencapai 4 juta ton pada tahun 2019. Peningkatan ini menjadikan fasilitas Naphtha Cracker Perseroan setara dengan ukuran skala dunia.

Selain itu, peningkatan kapasitas juga dilakukan pada pabrik Butadiene, dari 100 KTA menjadi 137 KTA pada tahun 2018. Sedangkan pabrik Polyethylene baru dengan kapasitas 400 KTA yang menambah total kapasitas Polyethylene menjadi 736 KTA telah selesai dibangun di tahun 2019.

Pada 2007, Perseroan memiliki Entitas Anak pertama, yaitu PT Styrimdo Mono Indonesia (SMI) melalui proses akuisisi saham. SMI adalah satu-satunya produsen Styrene Monomer di Indonesia yang melayani pasar domestik dan pasar ekspor regional. SMI memiliki Entitas Anak, yaitu PT Redeco Petrolin Utama (RPU) yang menyediakan layanan penyewaan tangki perantara dan jasa manajemen *jetty* untuk produk-produk kimia. RPU juga menangani produk minyak olahan untuk perusahaan-perusahaan minyak lokal dan internasional.

Pada tahun 2009, Perseroan mendirikan Entitas Anak lainnya, yaitu Chandra Asri Trading Company Pte. Ltd., untuk memenuhi kebutuhan pendanaan. Selanjutnya, pada tahun 2011 Perseroan mendirikan PT Petrokimia Butadiene Indonesia (PBI) yang mengoperasikan satu-satunya pabrik Butadiene di Indonesia.

Agar terus berkembang dan beradaptasi memenuhi kebutuhan pasar nasional dan global, Perseroan bertransformasi menjadi entitas yang lebih besar. Salah satu upayanya melalui penggabungan usaha (*merger*) Entitas Anak dengan Perseroan. Pada 1 Januari 2020, PBI resmi *merger* dengan Perseroan, diikuti oleh SMI pada 1 Januari 2021. *Merger* ini mengintegrasikan proses produksi secara keseluruhan, pemetaan produk yang lebih baik, serta meningkatkan sinergi pengadaan dan akuntansi. Hal ini diharapkan dapat meningkatkan kinerja operasional yang akan menciptakan perusahaan yang lebih sinergis, kuat dan lebih efisien.

Melanjutkan ekspansinya, pada tahun 2013 Perseroan bersinergi dengan produsen ban multinasional Compagnie Michelin Financiere SA dan mendirikan PT Synthetic Rubber Indonesia (SRI) yang memproduksi bahan baku untuk ban kendaraan ramah lingkungan. SRI mulai beroperasi secara efektif sejak Agustus 2018, setelah selesai membangun pabrik karet sintetis.

Pada tahun 2020, Perseroan mulai mengoperasikan Pabrik Methyl Tert-butyl Ether dan Butene-1 yang pertama kali hadir di Indonesia. Kedua pabrik ini juga merupakan pabrik pertama di Indonesia yang menggunakan Lummus Technology, salah

All of the Company's plants and supporting facilities are well managed, accompanied by capacity development and product quality. Capacity development is mainly carried out by increasing the capacity of the Naphtha Cracker facility to reach a capacity of 4 million tons in 2019. This increase puts the Company's Naphtha Cracker facility on a global scale.

In addition, a capacity increase was also carried out at the Butadiene plant, from 100 KTA to 137 KTA in 2018. Meanwhile, the new Polyethylene plant with a capacity of 400 KTA which increased the total capacity of Polyethylene to 736 KTA, was completed in 2019.

In 2007, the Company established its first Subsidiary, i.e., PT Styrimdo Mono Indonesia (SMI) through shares acquisition. SMI is a sole manufacturer of Styrene Monomer in Indonesia that serves the domestic and regional export markets. SMI has a subsidiary, i.e., PT Redeco Petrolin Utama (RPU), which provides intermediary tank rental and jetty management services for chemical products. RPU also handles refined petroleum products for local and international oil companies.

In 2009, the Company established other subsidiaries, i.e., Chandra Asri Trading Company Pte. Ltd., to fulfill the Company's financing purposes. Subsequently, in 2011, the Company established PT Petrokimia Butadiene Indonesia (PBI), which operates the only Butadiene plant in Indonesia.

In order to continue to advance and adapt with the aim of meeting the needs of the national and global markets, the Company expanded into a larger entity. One of which was by incorporating the subsidiaries with the Company. On 1 January 2020, PBI officially merged with the Company, followed by SMI on 1 January 2021. The merger integrated the overall production process, enhanced product mapping, and enhanced the synergy between procurement and accounting. Subsequently improving the Company's operational performance towards becoming a more synergistic, stronger, and more efficient company.

Continuing its expansion, the Company established a joint venture with a multinational tire manufacturer Compagnie Michelin Financiere SA and established PT Synthetic Rubber Indonesia (SRI), which manufactures raw materials for environmentally friendly tires. SRI has been effectively operating since August 2018, after the construction of the synthetic rubber plant was completed.

In 2020, the Company commenced the operation of Methyl Tert-butyl Ether and Butene-1 plants, first of their kind in Indonesia. Both plants are using Lummus Technology, one of the most advanced petrochemical processing technology

satu teknologi pengolahan pabrik petrokimia paling mutakhir di dunia. Selain itu Perseroan juga memulai pengoperasian *Enclosed Ground Flare* (EGF), teknologi suar tanpa asap dengan total investasi US\$14 juta. EGF ini mampu membakar 220 ton hidrokarbon per jam tanpa menyebabkan panas dan kebisingan.

Perseroan berkomitmen untuk melayani permintaan produk petrokimia dalam negeri dengan lebih baik serta berupaya meringankan beban impor negara dengan membangun kompleks petrokimia kedua, PT Chandra Asri Perkasa.

Dengan terus melakukan ekspansi, Perseroan bertekad untuk berkembang menjadi perusahaan petrokimia yang lebih terintegrasi di Indonesia. Upaya ini diharapkan dapat memperkuat fondasi langkah Perseroan dalam mempertahankan kepemimpinan di peta persaingan serta berkontribusi pada pertumbuhan ekonomi Indonesia.

in the world. In addition, the Company also commenced the operation of Enclosed Ground Flare (EGF), a smokeless flare technology with a total investment of US\$14 million. EGF is capable of burning 220 tons of hydrocarbons per hour without causing heat and noise.

The Company is committed to better serving domestic demand for petrochemical products and to reduce the Government imports by building a second petrochemical complex, PT Chandra Asri Perkasa.

The Company is determined to grow into a more integrated petrochemical company in Indonesia and to expand relentlessly. This effort is expected to strengthen the Company's steps in maintaining its leadership and contributing to Indonesia's economic growth.

PRODUK PERUSAHAAN

COMPANY'S PRODUCT

No.	Produk Product	Penjelasan Description
1	Ethylene	Bahan kimia organik yang paling banyak digunakan di dunia. Produk Ethylene Perseroan sebagian besar digunakan untuk memproduksi Polyethylene (PE) dan Styrene Monomer. Lebihnya dijual kepada pelanggan domestik melalui jaringan pipa dan di pasar <i>spot</i> . Ethylene is the most widely used organic chemical in the world. Ethylene from our facility is mainly used to produce Polyethylene (PE) and Styrene Monomer. The remaining is sold domestically through the pipeline network and in the spot market.
2	Polyethylene	Resin Polyethylene Perseroan dijual dengan merek dagang "Asrene®" yang meliputi produk-produk High Density Polyethylene (HDPE) dan Linear Low Density Polyethylene (LLDPE). Beberapa aplikasi produk akhir PE meliputi plastik pertanian, plastik kemasan, jaring ikan, terpal, pipa air bersih, jerigen, kosmetik, dan botol minuman. Produk-produk PE Perseroan telah memiliki sertifikat Halal oleh Majelis Ulama Indonesia (MUI). The Company's Polyethylene resin is sold under the trademark "Asrene®", which covers High-Density Polyethylene (HDPE) and Linear Low-Density Polyethylene (LLDPE) products. Several PE end-product applications include agriculture films, plastic packaging, fishnet, tarpaulin, clean water pipes, jerry cans, cosmetics, and food grade bottles. Indonesian Ulema Council (MUI) has certified the Company's PE products as halal.
3	Styrene Monomer	Bahan baku yang digunakan untuk memproduksi Polystyrene (PS), Expanded Polystyrene (EPS), Styrene Acrylonitrile (SAN), Acrylonitrile Butadiene Styrene (ABS), Styrene Butadiene Rubber (SBR), Styrene Butadiene Latex (SBL), dan Unsaturated Polyester Resin (UPR). Beberapa aplikasi produk akhir Styrene Monomer meliputi sol sepatu, gelas minuman, wadah makanan, komponen otomotif dan elektronik, mainan blok bangunan, serta helm. Styrene Monomer is a raw material used to produce Polystyrene (PS), Expanded Polystyrene (EPS), Styrene Acrylonitrile (SAN), Acrylonitrile Butadiene Styrene (ABS), Styrene Butadiene Rubber (SBR), Styrene Butadiene Latex (SBL), and Unsaturated Polyester Resin (UPR). Some Styrene Monomer end-product applications include shoe soles, drinking cups, food containers, automotive and electronic parts, building block toys, as well as helmets.

No.	Produk Product	Penjelasan Description
4	Styrene Butadiene Rubber & Polybutadiene Rubber	Bahan baku yang digunakan untuk memproduksi PBR dan SBR berkualitas yang dipasok untuk <i>plant</i> Michelin di seluruh dunia. Synthetic Rubber ditujukan untuk produksi akhir ban ramah lingkungan Michelin yang memiliki hambatan gulir sangat rendah dan daya tahan yang ekstrem (150.000 km). Synthetic Rubber is a raw material used to manufacture high-quality PBR and SBR supplied for Michelin plants all over the world. Synthetic Rubber is intended for the final production of Michelin environmentallyfriendly tires with very low rolling resistance and extreme durability (150,000 km).
5	Butadiene	Bahan baku untuk ABS, SBL, SBR dan Polybutadiene Rubber (PBR) yang menjadi bahan baku utama untuk memproduksi ban. Beberapa aplikasi produk akhir Butadiene meliputi sepatu karet, sarung tangan karet, sol sepatu, perekat, dan <i>sealant</i> . Butadiene is a raw material used in the production of ABS, SBL, SBR and Polybutadiene Rubber (PBR) which are the main raw materials to produce tires. Some of its end-product applications include rubber boots, rubber gloves, shoe soles, adhesive, and sealants.
6	Mixed C4	Mixed C4 merupakan bahan baku untuk memproduksi Butadiene, yang merupakan produk samping Mixed C4 yang memiliki nilai tambah. Mixed C4 is a raw material to produce Butadiene, which is a derivative of Mixed C4 with added value.
7	Polypropylene	Resin Polypropylene Perseroan dijual dengan merek dagang "Trilene®" yang meliputi jenis Homopolymer, Random Copolymer, dan Impact (Block) Copolymer. Beberapa aplikasi produk akhir PP meliputi plastik kemasan (IPP, BOPP, CPP), peralatan rumah tangga, benang, tas keranjang, perabotan, komponen otomotif, dan elektronik. Produk-produk PP Perseroan telah memiliki sertifikat Halal oleh Majelis Ulama Indonesia (MUI). The Company's Polypropylene resin is sold under the trademark "Trilene®", which includes the various types of Homopolymer, Random Copolymer, and Impact (Block) Copolymer. Some of PP end-product applications include flexible packaging (IPP, BOPP, CPP), household appliances, yarn, nonwoven bags, furniture, as well as automotive and electronic parts. The Company's PP products have been certified as Halal by Indonesian Ulama Council (MUI).
8	Propylene	Bahan baku untuk memproduksi Polypropylene (PP). Produk Propylene Perseroan secara langsung dipasok ke kompleks pabrik PP melalui jaringan pipa. Propylene is a raw material to manufacture Polypropylene (PP). The Company's Propylene is directly supplied to PP plant complex through the pipeline network.
9	Pygas	Bahan kimia yang dapat diproses lebih lanjut untuk menghasilkan berbagai produk bernilai tambah tinggi, seperti Benzene, Toluene dan Xylene. Produk Pygas Perseroan sebagian besar dijual kepada pelanggan regional. Pygas is a chemical material that can be further processed to generate many high-value added products, such as Benzene, Toluene, and Xylene. The Company's Pygas is mainly sold to regional customers.
10	Methyl Tert-butyl Ether	Methyl Tert-butyl Ether akan menyasar pasar <i>octane booster</i> . MTBE is tapping into the octane booster market.
11	Butene-1	Butene-1 akan diserap oleh operasional perusahaan dan sisanya akan ditargetkan untuk pasar domestik. Butene-1 will be absorbed by internal operation and the rest is targeted for domestic market.

KRONOLOGI PENCATATAN SAHAM

SHARE LISTING CHRONOLOGY

Pada tanggal 25 Juli 1994, PT Tri Polyta Indonesia Tbk (TPI) melakukan penawaran umum atas 6.500.000 American Depository Shares (ADS) yang mewakili 65.000.000 saham TPI kepada pemodal asing dan dilaksanakan di luar Indonesia. Satu ADS mewakili 10 lembar saham biasa dengan nilai nominal sebesar Rp1.000 per lembar saham dan ditawarkan dengan harga US\$21 per ADS. Sehubungan dengan penawaran umum ADS tersebut, TPI memberikan hak opsi kepada para penjamin emisi, yang sepenuhnya telah digunakan, sehingga seluruh jumlah ADS menjadi 7.475.000 (setara dengan 74.750.000 lembar saham).

ADS tersebut tercatat di National Association of Securities Dealer Automated Quotation (NASDAQ).

Pada tanggal 14 Maret 1996, pencatatan ADS TPI dipindahkan dari NASDAQ ke New York Stock Exchange (NYSE). Namun, sejak tanggal 23 Maret 2000, perdagangan saham TPI di NYSE telah dihentikan.

Pada tanggal 6 Mei 1996, para pemegang saham pendiri TPI menjual sebagian sahamnya dengan harga Rp2.840 per lembar saham kepada 400 karyawan. Penjualan saham dilakukan berdasarkan harga ADS TPI di NYSE pada tanggal 3 Mei 1996 sebesar US\$12,125 (US\$1 = Rp2.343). Setiap karyawan membeli paling sedikit 500 lembar saham, dengan jumlah seluruhnya adalah 200.000 lembar saham.

Selanjutnya, TPI memperoleh pernyataan efektif dari Ketua Bapepam (sekarang Otoritas Jasa Keuangan) dengan surat No. S-977/PM/1996 tanggal 14 Juni 1996 sebagai perusahaan publik. TPI melakukan pencatatan pada Bursa Efek Jakarta (sekarang Bursa Efek Indonesia) atas seluruh saham yang telah ditempatkan dan disetor penuh, yakni sejumlah 257.500.000 lembar saham dengan nilai nominal Rp1.000 per lembar saham. Namun, perdagangan saham di Bursa Efek Jakarta ini dihentikan mulai tanggal 3 Februari 2003.

Pada tanggal 22 Mei 2008, TPI melakukan pencatatan kembali (*relisting*) atas seluruh saham yang telah ditempatkan dan disetor penuh sejumlah 728.401.000 lembar dengan nilai nominal Rp1.000 per lembar di Bursa Efek Indonesia.

On 25 July 1994, PT Tri Polyta Indonesia Tbk (TPI) conducted a public offering of 6,500,000 American Depository Shares (ADS), representing 65,000,000 TPI shares, to foreign investors and carried it out outside Indonesia. One ADS represents 10 common shares with a nominal value of Rp1,000 per share and was offered at a price of US\$21 per ADS. TPI granted the underwriters option rights in connection with the ADS public offering, which were fully exercised; thus, the total number of ADS was 7,475,000 (equivalent to 74,750,000 shares).

The ADS was listed at the National Association of Securities Dealers Automated Quotation (NASDAQ).

On 14 March 1996, the ADS listing of TPI was transferred from the NASDAQ to the New York Stock Exchange (NYSE). However, TPI's shares trading on the NYSE has been suspended since 23 March 2000.

On 6 May 1996, the shareholders of TPI founders sold a portion of their shares at a price of Rp2,840 per share to 400 employees. Share sales were made based on the price of ADS TPI on the NYSE on 3 May 1996, at US\$12,125 (US\$1 = Rp2,343). Each employee purchased at least 500 shares, totaling 200,000 shares.

Next, TPI obtained an effective statement from the Chairman of Bapepam (now the Financial Services Authority) with a letter No. S-977/PM/1996 dated 14 June 1996 as a public company. TPI listed its shares on the Jakarta Stock Exchange (now the Indonesia Stock Exchange) for all issued and fully paid shares, with a total of 257,500,000 shares with a nominal value of Rp1,000 per share. However, share trading on the Jakarta Stock Exchange was suspended on 3 February 2003.

On 22 May 2008, TPI relisted all of its 728,401,000 issued and fully paid shares with a nominal value of Rp1,000 per share on the Indonesia Stock Exchange.

Dalam rangka mengintegrasikan dan memperkuat usahanya, TPI dan PT Chandra Asri (CA) melakukan penggabungan usaha (*merger*) menjadi PT Chandra Asri Petrochemical Tbk (Perseroan) yang efektif pada tanggal 1 Januari 2011. Dengan demikian, jumlah saham Perseroan yang tercatat pada Bursa Efek Indonesia menjadi sebesar 3.066.196.416 saham. Sejak saat itu, Perseroan aktif melakukan penawaran umum saham kepada publik, sebagaimana dijelaskan berikut ini:

In order to integrate and strengthen its business, TPI and PT Chandra Asri (CA) merged into PT Chandra Asri Petrochemical Tbk (the Company), effective on 1 January 2011. Thus, the number of the Company's shares listed on the Indonesia Stock Exchange became 3,066,196,416 shares. TINJAUAN INDUSTRI

INDUSTRY OVERVIEW

Banyak harapan yang muncul ketika memasuki tahun 2022 karena adanya ekspektasi yang cukup tinggi akan pemulihan ekonomi akibat pandemi COVID-19 di seluruh dunia. Namun sayangnya, terjadi ketegangan geopolitik di Ukraina yang menyebabkan kekacauan di pasar minyak dan gas. Kasus COVID-19 juga muncul di Tiongkok yang diiringi dengan kebijakan karantina (*lockdowns*), sehingga mengakibatkan terganggunya produksi industri dan operasi pelabuhan. Kondisi tersebut juga membuat rantai pasokan global semakin terganggu. Di sisi ekonomi, bank sentral utama di sejumlah negara menerapkan kenaikan suku bunga yang agresif untuk menurunkan inflasi yang telah mencapai level baru yang belum pernah terjadi dalam beberapa dekade terakhir.

Pada awal tahun 2023, Tiongkok, sebagai produsen dan konsumen petrokimia terbesar di dunia, telah membuka kembali perbatasannya. Hal ini membawa kabar baik bagi industri tersebut, selain meningkatkan mobilitas secara global mulai dari kuartal Q4 2022, di mana dunia diundang untuk merayakan Piala Dunia FIFA di Qatar. Pemulihan ekonomi di negara tersebut dan pembukaan kembali pabrik dan bisnis diharapkan akan mendorong permintaan untuk pulih pada tahun 2023 dan seterusnya baik di dalam negeri Tiongkok maupun internasional.

Perkembangan positif itu seharusnya berefek ke pasar domestik Indonesia di mana Perseroan meyakini, dan optimistis, walaupun tetap berhati-hati, potensi pertumbuhan ekonomi Indonesia yang didukung oleh kenaikan populasi, serta pulihnya aktivitas dan mobilitas masyarakat.

Kesulitan dalam mencari alternatif produk plastik merupakan faktor lain yang mendasari kuatnya pertumbuhan permintaan secara keseluruhan untuk produk petrokimia. Produk plastik di Indonesia digunakan oleh beragam industri, seperti industri pengemasan makanan dan minuman yang mencapai sekitar 60%, bangunan dan peralatan rumah tangga sebesar 15%, sektor otomotif sebesar 8%, dan sisanya oleh sektor lain termasuk pertanian dan industri hortikultura. Kuatnya permintaan Indonesia juga digambarkan oleh konsultan pihak ketiga, Nexant, di mana konsumsi Polyolefin Indonesia hanya 13 juta ton per kapita dengan proyeksi pertumbuhan 4,1% CAGR (2019-2035) dibandingkan dengan Asia sebesar 21 juta ton dan 3,6% CAGR pada periode yang sama.

There was much hope and promise for the industry when 2022 arrived as expectation on economic recovery from the COVID-19 pandemic was in full swing around the world. Unfortunately, geopolitical hostilities broke out in Ukraine and the oil & gas markets were scrambled. COVID-19 cases also emerged in China, resulting in lockdowns resulting in disruption of industrial production and port operations, further upsetting global supply chains. On the economy side, major central banks implemented aggressive interest rate hikes to bring inflation down from levels not seen in decades.

In the beginning of 2023, China, as the world's largest producer and consumer of petrochemicals, has reopened its borders bringing good news for the industry in addition to improving mobility globally starting from Q4 2022 where the world was invited to celebrate FIFA World Cup in Qatar. The country's recovering economy, reopening of factories and businesses are expected to drive demand to recover in 2023 onwards both in Chinese domestic and internationally.

The effect should trickle to Indonesian domestic market where we continue to believe, while being cautiously optimistic, in the potential for growth on the back of growing population, recovering travel and mobility.

The difficulty in finding alternatives to plastic product is another factor underpinning the robust overall demand growth for petrochemical products. Plastic products in Indonesia are used by a wide array of industries such as the food and beverage packaging industry which approximately accounts for 60%, building and household appliances for 15%, the automotive sector for 8% and the remainder by other sectors including agriculture and horticulture. Indonesian robust demand was also illustrated by third party consultant, Nexant, where Indonesia's Polyolefin consumption was only 13 million tons per capita with projected growth of 4.1% CAGR (2019-2035) compared with Asia at 21 million tons and 3.6% CAGR on the same period.

TINJAUAN OPERASIONAL

OPERATIONAL OVERVIEW

Perseroan mengoperasikan kompleks petrokimia terintegrasi yang berlokasi di Ciwandan, Cilegon di Provinsi Banten. Kompleks tersebut terdiri dari satu Naphtha Cracker, tiga *trains* Polyethylene, tiga *trains* Polypropylene, satu pabrik Butadiene, satu pabrik MTBE, dan satu pabrik Butene-1.

Lokasi strategis kompleks petrokimia terintegrasi Perseroan menyediakan akses yang mudah ke pelanggan utama di dalam negeri. Rantai pasok menuju pelanggan terhubung langsung dengan fasilitas produksi di Cilegon melalui jalur pipa.

Kompleks petrokimia terintegrasi Perseroan juga memiliki dua pabrik Styrene Monomer, yang merupakan satu-satunya di Indonesia. Pabrik ini berlokasi di Pulo Ampel, Serang, Banten, sekitar 40 kilometer dari kompleks petrokimia utama di Cilegon. Kompleks petrokimia Perseroan menyediakan fasilitas pendukung terintegrasi termasuk jaringan pipa, generator listrik, *boiler*, instalasi pengolahan air, tangki penyimpanan, dan dermaga. Bisnis penyewaan tangki dan dermaga Perseroan dioperasikan anak perusahaan, yaitu PT Redeco Petrolin Utama (RPU).

Berikut adalah segmen usaha Perseroan:

- Olefins (Ethylene, Propylene, Pygas dan Mixed C4);
- Polyolefins (Polyethylene dan Polypropylene);
- Styrene Monomer;
- Butadiene;
- MTBE & Butene-1;
- Penyewaan tangki dan dermaga.

The Company operates an integrated petrochemical complex located in Ciwandan, Cilegon in Banten Province. The complex consists of one Naphtha Cracker, three Polyethylene trains, three Polypropylene trains, one Butadiene plant, one MTBE plant, and one Butene-1 plant.

The strategic location of the Company's integrated petrochemical complex provides easy access to major domestic customers. The supply chain to customers is connected directly to production facilities in Cilegon through pipelines.

The Company's integrated petrochemical complex also has two Styrene Monomer plants, which are the only ones in Indonesia. The plants are located in Pulo Ampel, Serang, Banten, about 40 kilometers from the main petrochemical complex in Cilegon. The Company's petrochemical complex provides integrated supporting facilities including pipelines, power generators, boilers, water treatment plants, storage tanks and jetties. The Company's tank and jetty rental business is operated by a subsidiary, namely PT Redeco Petrolin Utama (RPU).

The Company's business segments are as follows:

- Olefins (Ethylene, Propylene, Pygas and Mixed C4);
- Polyolefins (Polyethylene and Polypropylene);

STRATEGI USAHA

Dalam menjalankan kegiatan usahanya, strategi yang diterapkan Perseroan adalah sebagai berikut:

1. Meningkatkan kapasitas dan penawaran produk Perseroan untuk mempertahankan posisi yang terdepan di pasar untuk menangkap pertumbuhan petrokimia Indonesia yang kuat;
2. Memperluas proposisi nilai kami dalam (1) produk polymer bernilai tambah tinggi, (2) membangun kemampuan teknis dan pemasaran, dan (3) fokus pada barang tahan lama, kemasan F&B, aplikasi medis, otomotif dan infrastruktur, untuk meningkatkan profitabilitas Perseroan;
3. Mengembangkan keunggulan bahan baku untuk meningkatkan daya saing biaya;
4. Mengembangkan dan membina sumber daya manusia agar sesuai dengan tujuan dan masa depan Perseroan;
5. Terus menguatkan dan memanfaatkan keunggulan Perseroan untuk menjaga hubungan baik dengan pemangku kepentingan;
6. Meraih standar terbaik operasional, efisiensi biaya, keselamatan, kesehatan, dan lingkungan, serta meningkatkan transformasi digital.

KINERJA PENJUALAN

Pada tahun 2022, Perseroan membukukan volume penjualan secara keseluruhan sebesar 1.908 KT. Dibandingkan tahun 2021 yaitu 2.211 KT, terjadi penurunan sebesar 13,70%. Perubahan itu disebabkan oleh adanya pemeliharaan rutin dan *unplanned shutdown* di pabrik UCC2.

Kontributor utama penjualan secara volume adalah Polyethylene, yang persentasenya mencapai 30,82% terhadap total penjualan. Selain itu, Polypropylene menyumbang sebesar 27,94%, produk Olefins sebesar 19,07%, Styrene Monomer sebesar 11,58%, Butadiene sebesar 8,65%, diikuti oleh Butene-1 dan MTBE sebesar 1,94%.

BUSINESS STRATEGY

In carrying out its business activities, the strategies implemented by the Company are as follows:

1. Increase our Company's capacity and product offerings to sustain on our leading market position to capture strong Indonesian petrochemical growth;
2. Expand our value proposition in (1) high-value added polymer products, (2) build technical and marketing capability, and (3) focus on durable goods, F&B packaging, medical application, automotive and infrastructure, in order to increase Company's profitability;
3. Develop feedstock advantage to improve cost competitiveness;
4. Develop and nurture our human capital to fit for the purpose and for the future of the Company;
5. Continue to strengthen and leverage our Company's branding to maintain premium relationship with stakeholders;
6. Achieve best-in-class operating standards, cost efficiency, safety, health, and environment, and leveraging on digital transformation.

SALES PERFORMANCE

In 2022, the Company recorded a total sales volume of 1.908 KT. Compared to 2021 which was 2,211 KT, there was an decrease of 13.70 %. The change was caused by decreasing production volume due to routine maintenance and unplanned shutdown in UCC2 plant.

The main contributor to sales in terms of volume was Polyethylene, which accounted for 30.82% of total sales. Furthermore, Polypropylene with 27.94%, Olefins product with 19.07%, Styrene monomer with 11.58%, Butadiene with 8.65% and follow by Butene-1 and MTBE with 1.94%.

PROFITABILITAS

Segmen Olefins

Pada 2022, pendapatan bersih Perseroan dari produk Olefins (Ethylene, Propylene, Pygas, dan produk-produk sampingannya) mencapai US\$412 juta, naik dibandingkan tahun 2021 sebesar US\$356 juta.

Untuk produk Ethylene, pendapatan bersih pada tahun 2022 mengalami kenaikan 9,52% menjadi US\$115 juta dibandingkan tahun 2021 sebesar US\$105 juta. Peningkatan tersebut disebabkan oleh harga jual rata-rata per ton yang lebih tinggi sebesar 10,05% menjadi US\$1.222 pada tahun 2022 dibandingkan US\$1.110 pada tahun 2021.

Sedangkan untuk Propylene, mencatat penurunan pendapatan bersih sebesar 20,93% menjadi US\$34 juta, dari tahun sebelumnya sebesar US\$43 juta. Perubahan ini terutama disebabkan oleh penurunan volume penjualan menjadi 32,8 KT pada tahun 2022, dibandingkan dengan 42,9 KT pada tahun 2021. Sementara itu, terjadi kenaikan harga jual rata-rata per ton sebesar 5,45% menjadi US\$1.047 dibandingkan dengan US\$993 pada tahun 2021.

Perseroan membukukan penurunan penjualan Pygas sebesar 6,04% menjadi US\$171 juta, dibandingkan US\$182 juta pada tahun 2021. Penurunan ini terutama disebabkan oleh penurunan volume penjualan menjadi 209,8 KT pada tahun 2022, dibandingkan 303,4 KT pada tahun 2021. Sementara itu, terjadi kenaikan harga jual rata-rata per ton sebesar 36,08% menjadi US\$816 dibandingkan dengan US\$599 pada tahun 2021.

Segmen Polyolefins

Pada tahun 2022, Perseroan mencatat pendapatan bersih dari Polyolefins (Polyethylene dan Polypropylene) sebesar US\$1.483 juta. Dibandingkan tahun 2021 yang sebesar US\$1.635 juta, terjadi penurunan 9,30%.

Untuk penjualan Polyethylene pada tahun 2022, Perseroan membukukan nilai sebesar US\$770 juta. Sedangkan pada tahun 2021 penjualannya mencapai US\$854 juta, sehingga terjadi penurunan 9,84%. Hal ini disebabkan oleh penurunan volume penjualan sebesar 13,68% menjadi 588,2 KT pada tahun 2022 dibandingkan dengan 681,4 KT pada tahun 2021. Sementara itu, terjadi kenaikan harga jual rata-rata per ton sebesar 4,45% menjadi US\$1.309 dibandingkan dengan US\$1.253 pada tahun 2021.

Sementara itu, penjualan Polypropylene mengalami penurunan sebesar 8,71%, menjadi US\$713 juta. Pada tahun sebelumnya, nilai penjualannya adalah sebesar US\$781 juta. Perubahan ini disebabkan oleh penurunan volume penjualan sebesar 1,12% menjadi 533 KT pada tahun 2022, dibandingkan dengan 540 KT pada tahun 2021. Dan terjadi penurunan harga jual rata-rata per ton sebesar 7,68% menjadi US\$1.335 dibandingkan dengan US\$1.446 pada tahun 2021.

PROFITABILITY

Olefins Segment

In 2022, the Company's net revenues from Olefins products (Ethylene, Propylene, Pygas, and their by-products) reached US\$412 million, increased compared to 2021 which was US\$356 million.

For Ethylene products, net revenues in 2022 increased by 9.52% which become US\$115 million compared to 2021 which was US\$105 million. The increase was due to the higher average selling price per ton by 10.05% to US\$1,222 in 2022 compared to US\$1,110 in 2021.

As for Propylene, it recorded an decrease in net revenues of 20.93% to US\$34 million, from the previous year which was US\$43 million. This change was mainly caused by decrease in sales volume to 32.8 KT in 2022 compared to 42.9 KT in 2021. Meanwhile, there was a 5.45% increase in average selling price per ton to US\$1,047 compared with US\$993 in 2021.

The Company posted a decrease in Pygas sales by 6.04% to US\$171 million, compared to US\$182 million in 2021. This decrease was mainly due to decrease in sales volume to 209.8 KT in 2022 compared to 303.4 KT in 2021. Meanwhile, there was a 36.08% increase in average selling price per ton to US\$816 compared with US\$599 in 2021.

Polyolefins Segment

In 2022, the Company recorded net revenues from Polyolefins (Polyethylene and Polypropylene) of US\$1,483 million. Compared to 2021 which amounted to US\$1,635 million, there was a decrease of 9.30%.

For Polyethylene sales in 2022, the Company recorded a value of US\$770 million. Whereas in 2021 it amounted to US\$854 million, decreased by 9.84%. This was caused by a 13.68% decrease in sales volume to 588.2 KT in 2022 compared with 681.4 KT in 2021. Meanwhile, there was a 4.45% increase in average selling price per ton to US\$1,309 compared with US\$1,253 in 2021.

Meanwhile, Polypropylene sales decreased by 8.71%, to US\$713 million. In the previous year, its value was US\$781 million. This change was caused by a 1.12% decrease in sales volume to 533 KT in 2022 compared with 540 KT in 2021. There was also a 7.68% decrease in average selling price per ton to US\$1,335 compared with US\$1,446 in 2021.

Segmen Styrene Monomer

Perseroan mencatat penurunan penjualan Styrene Monomer pada tahun 2022 sebesar 22,34%, menjadi US\$280 juta dari US\$361 juta pada tahun 2021. Hal ini terutama disebabkan oleh penurunan volume penjualan dari 300,9 KT menjadi 221,2 KT atau sekitar 26,50% di tahun berjalan. Penurunan ini diimbangi kenaikan harga jual rata-rata dari US\$1.182 menjadi US\$1.244 atau sekitar 5%. Penurunan ini diakibatkan oleh adanya *Turn Around Maintenance* di Pabrik Styrene Monomer pada tahun berjalan.

Segmen Butadiene

Penjualan Butadiene dan produk-produk sampingannya adalah US\$163 juta, turun 6,76% dibandingkan tahun 2021 sebesar US\$175 juta. Hal ini terutama disebabkan oleh penurunan volume penjualan dari 116,0 KT menjadi 89,9 KT atau sekitar 22,46% di tahun berjalan. Penurunan ini juga disertai penurunan harga jual rata-rata dari US\$1.082 menjadi US\$1.054 atau sekitar 3%.

Segmen Butene-1 & MTBE

Perseroan mencatat penjualan Butene-1 & MTBE pada tahun 2022 sebesar US\$40 juta, mengalami penurunan 15,47% dibandingkan tahun 2021 sebesar US\$47 juta. Perubahan ini terjadi, terutama karena penurunan volume penjualan dari 64,6 KT menjadi 36,6 KT atau sekitar 43,29% di tahun berjalan. Penurunan ini diimbangi kenaikan harga jual rata-rata dari US\$780 menjadi US\$1.088 atau sekitar 40%.

Styrene Monomer Segment

The company recorded a decrease in sales of Styrene Monomer in 2022 of 22.34%, to US\$280 million from US\$361 million in 2021. This was mainly due to a decrease in sales volume from 300.9 KT to 221.2 KT, or around 26.50%, in the current year. This decrease was offset by an increase in the average selling price from US\$1,182 to US\$1,244, or around 5%. This decrease was caused by the Turn Around Maintenance at the Styrene Monomer Plant in the current year.

Butadiene Segment

Sales of Butadiene and its by-products amounted to US\$163 million, down 6.76% compared to 2021 of US\$175 million. This was mainly due to a decrease in sales volume from 116.0 KT to 89.9 KT, or around 22.46%, in the current year. This decrease was also accompanied by a decrease in the average selling price from US\$1,082 to US\$1,054, or around 3%.

Butene-1 & MTBE Segment

The company recorded Butene-1 & MTBE sales of US\$40 million in 2022, a decrease of 15.47% compared to 2021's sales of US\$47 million. This change occurred mainly due to a decrease in sales volume from 64.6 KT to 36.6 KT, or around 43.29% in the current year. This decrease was offset by an increase in the average selling price from US\$780 to US\$1,088 or around 40%.

PENDAPATAN

Kinerja pendapatan Perseroan pada tahun 2022 mencapai US\$2.385 juta, menurun 7,59% dibandingkan tahun sebelumnya yang sebesar US\$2.580 juta. Penurunan ini terutama karena menurunnya volume penjualan sebagai akibat pengaturan produksi yang disebabkan penurunan margin penjualan.

Kontributor utama pendapatan bersih berasal dari segmen Polyolefin, dengan porsi mencapai 62,17% terhadap total pendapatan bersih. Lainnya adalah Olefins dengan kontribusi 17,28%, Styrene Monomer sebesar 11,76%, Butadiene sebesar 6,83%, Butene-1 & MTBE sebesar 1,66% serta penyewaan tangki dan dermaga sebesar 0,29%.

REVENUES

The Company's revenues performance in 2022 reached US\$2,385 million, decreased by 7.59% compared to the previous year which amounted to US\$2,580 million. This decrease was mainly due to a decrease in sales volume as a result of production arrangements caused by a decrease in sales margins.

The main contributor for net revenues was derived from the Polyolefin segment, with a portion reaching 62.17% of total net revenues. Others are Olefins with 17.28%, Styrene Monomer with 11.76%, Butadiene with 6.83%, Butene-1 & MTBE with 1.66% as well as tanks and jetty lease with 0.29%.

BEBAN POKOK PENDAPATAN

Beban pokok pendapatan Perseroan terutama terdiri dari bahan baku yang digunakan dalam operasi produksi, seperti Naphtha, Propylene, dan Benzene. Termasuk dalam beban utama itu adalah tenaga kerja langsung dan biaya pabrikasi.

Pada tahun 2022, beban pokok pendapatan yang dicatat Perseroan meningkat sebesar 7,16% dibandingkan tahun 2021 yang sebesar US\$2.235 juta, sehingga menjadi US\$2.396 juta. Kenaikan itu disebabkan oleh peningkatan harga bahan baku. Harga Naphtha naik dari rata-rata sekitar US\$659 per ton menjadi US\$815 per ton, sejalan dengan peningkatan harga minyak mentah Brent, dari US\$71 per barel menjadi US\$81 per barel.

(RUGI) LABA KOTOR

Di tengah kondisi global yang penuh tantangan, Perseroan tetap berhasil mengompensasi peningkatan beban pokok pendapatan dengan peningkatan nilai penjualan. Akibat adanya kenaikan pada harga bahan baku, Perseroan membukukan rugi kotor sebesar US\$10.954 juta hingga akhir tahun buku 2022.

(BEBAN) PENDAPATAN OPERASIONAL

(Beban) pendapatan operasi Perseroan terdiri dari laba kotor dikurangi beban penjualan, beban umum, dan administrasi. Pada tahun 2022, total beban operasional Perseroan mencapai US\$116,2 juta, menurun 145,75% dibandingkan pendapatan operasional tahun sebelumnya yang sebesar US\$254 juta.

Kontributor utama penurunan pendapatan operasional adalah turunnya laba kotor sekitar US\$356 juta menjadi rugi kotor tahun berjalan. Selain itu, terdapat kenaikan beban umum dan administrasi sebesar 17,07% dibandingkan tahun 2021 menjadi US\$62 juta, sementara beban penjualan meningkat sebesar 12,36%.

(RUGI) LABA SEBELUM PAJAK

Perseroan membukukan rugi sebelum pajak tahun 2022 sebesar US\$176,5 juta, turun 187,4% dibandingkan laba sebelum pajak tahun sebelumnya yang sebesar US\$202 juta. Penurunan ini terutama disebabkan oleh penurunan laba kotor tahun berjalan.

COST OF REVENUES

The Company's cost of revenues mainly consists of raw materials used in production operations, such as Naphtha, Propylene, and Benzene. Included in the main expenses are direct labor and plant overhead.

In 2022, the cost of revenues incurred by the Company increased by 7.16% compared to 2021 which amounted to US\$2,235 million, so it became US\$2,396 million. The increase was caused by the increase in the raw material prices. The price of the Naphtha increased from around average of US\$659 per ton to US\$815 per ton. This increase is in line with the increase in Brent crude oil which increased from around US\$71 per barrel to US\$81 per barrel.

GROSS (LOSS) PROFIT

Despite challenging global conditions, the Company was able to compensate for an increase in revenue costs with an increase in sales value. Due to an increase in raw material prices, the Company posted a gross loss of US\$10,954 million until the end of the fiscal year 2022.

OPERATING (EXPENSES) INCOME

The Company's operating (expenses) income consists of gross profit/loss with less selling expenses, general, and administrative expenses. In 2022, the Company's total operating expenses reached US\$116.2 million, a decrease of 145.75% compared to the previous year's operating income which amounted to US\$254 million.

The main contributor to the decrease in operating income majorly comes from the decrease in gross profit by around US\$356 million to become gross loss in current year. In addition, there is increase in general and administrative expenses by 17.07% compared to 2021 to become US\$62 million while the selling expenses increased by 12.36%.

(LOSS) PROFIT BEFORE TAX

The Company posted a loss before tax in 2022 of US\$176.5 million, a decrease of 187.4% compared to the previous year's profit before tax of amount US\$202 million. This decrease is mainly due to the decrease in gross profit in current year.

MANFAAT (BEBAN) PAJAK PENGHASILAN

Total manfaat pajak Perseroan pada tahun 2022 mencapai US\$27 juta, sementara pada tahun sebelumnya sebesar US\$50 juta. Perubahan sebesar 154% ini terjadi karena Perseroan membukukan rugi sebelum pajak dan bukan laba sebelum pajak pada tahun berjalan.

(RUGI) LABA BERSIH TAHUN BERJALAN

Sejalan dengan dinamika yang melamban, Perseroan membukukan rugi bersih sebesar US\$149,4 juta. Dibandingkan tahun sebelumnya yang membukukan laba bersih sebesar US\$152 juta, terjadi penurunan 198,4%.

Rincian realisasi rugi bersih tahun berjalan tersebut diuraikan sebagai berikut:

- Diatribusikan kepada pemilik entitas induk rugi bersih sebesar US\$149,5 juta, lebih rendah 198,35% dibandingkan tahun 2021 yang mencatatkan laba bersih US\$152 juta;
- Diatribusikan kepada kepentingan non-pengendali laba bersih sebesar US\$0,1 juta, lebih tinggi 218,80% dibandingkan tahun 2021 yang rugi bersih US\$0,1 juta.

(RUGI) PENGHASILAN KOMPREHENSIF TAHUN BERJALAN

Penghasilan komprehensif Perseroan pada tahun 2022 tercatat sebesar US\$109,5 juta, menurun 171,88% dibandingkan tahun 2021 sebesar US\$152 juta. Perubahan ini terjadi karena adanya penurunan laba kotor pada tahun berjalan.

Rincian realisasi rugi komprehensif tahun berjalan tersebut diuraikan sebagai berikut:

- Diatribusikan kepada pemilik entitas induk rugi komprehensif sebesar US\$110 juta, lebih rendah 171,83% dibandingkan tahun 2021 penghasilan komprehensif sebesar US\$152 juta;
- Diatribusikan kepada kepentingan non pengendali laba komprehensif US\$0,1 juta, meningkat 226,13% dari tahun 2021 yang mencatatkan rugi komprehensif US\$0,1 juta.

(RUGI) LABA PER SAHAM DASAR

Mengacu pada perkembangan yang ada, rugi per saham dasar Perseroan pada tahun 2022 menjadi US\$0,0021. Dibandingkan tahun 2021 laba per saham dasar sebesar US\$0,0021, terjadi penurunan sebesar 200%.

INCOME TAX BENEFITS (EXPENSES)

The Company's total tax benefit in 2022 reached US\$27 million, while in the previous year the total tax expense amounted to US\$50 million. The change of around 154% from prior year is due to the Company recording loss before tax instead of profit before tax in current year.

NET (LOSS) PROFIT FOR THE YEAR

ASET

Perseroan membukukan aset pada akhir tahun buku 2022 yang mencapai US\$4.930 juta, menurun 1,27% dibandingkan tahun sebelumnya yang sebesar US\$4.993 juta. Penurunan tersebut terutama disebabkan oleh penurunan kas, deposito berjangka, piutang usaha, persediaan dan aset tetap dimana terjadi kenaikan pada piutang lain-lain, aset lancar lainnya, aset derivatif dan aset tidak lancar lainnya.

Porsi aset lancar Perseroan mencapai 46,28% atau US\$2.282 juta dari total aset. Dibandingkan tahun lalu yang sebesar US\$2.926 juta, terjadi penurunan sebesar 22,04% yang disebabkan penurunan kas, deposito berjangka, piutang usaha dan persediaan. Sementara itu, piutang lain-lain dan aset lancar lainnya mengalami kenaikan.

Sedangkan aset tidak lancar Perseroan tercatat sebesar US\$2.648 juta, lebih tinggi 28,14% dibandingkan tahun 2021 sebesar US\$2.067 juta. Perubahan itu, terutama disebabkan oleh peningkatan aset derivatif dan aset tidak lancar lainnya yang dikurangi dengan penurunan aset tetap.

Untuk modal kerja bersih, yaitu aset lancar dikurangi kewajiban jangka pendek, posisinya pada akhir tahun 2022 mencapai US\$1.674 juta. Dibandingkan tahun 2021 yang sebesar US\$1.995 juta, terjadi penurunan US\$321 juta. Perubahan ini terutama disebabkan oleh penarikan deposito berjangka serta penurunan kas, piutang usaha dan persediaan yang diimbangi dengan kenaikan aset lancar lainnya dan penurunan utang usaha.

ASSETS

The Company recorded assets at the end of the 2022 fiscal year reaching US\$4,930 million, a decrease of 1.27% compared to the previous year which amounted to US\$4,993 million. The decrease was mainly caused by decline in cash, time deposits, trade receivables, inventory and fixed assets while there is increase in other receivables, other current assets, derivative assets and other non-current assets.

The portion of the Company's current assets reached 46.28% or US\$2,282 million of the total assets. Compared to the previous year, which was US\$2,926 million, there was a decrease of 22.04%, which was caused by the decline in cash, time deposits, trade receivables and inventory. Meanwhile, other receivables and other current assets increased.

Meanwhile, the Company's non-current assets were recorded at US\$2,648 million, higher by 28.14% compared to 2021 which was US\$2,067 million. The change was mainly contributed by the increase in derivative assets and other non-current assets netted off by decrease in fixed assets.

In terms of net working capital, namely current assets with less current liabilities, its position at the end of 2022 reached US\$1,674 million. Compared to 2021, which was US\$1,995 million, there was a decrease of US\$321 million. This change was mainly due to the drawdown of time deposits as well as decrease in cash, trade receivables and inventory which is netted off with increase in other current assets and decline in trade payables.

LIABILITAS

Posisi liabilitas Perseroan pada tahun 2022 mencapai US\$2.121 juta, lebih besar 2,92% dibandingkan tahun 2021 yang US\$2.061 juta. Perubahan itu terjadi karena kenaikan pinjaman bank dan utang obligasi neto, sementara pada utang usaha terjadi penurunan.

Porsi liabilitas jangka pendek Perseroan mencapai 28,65%, yaitu senilai US\$607,83 juta terhadap total liabilitas. Dibandingkan tahun sebelumnya sebesar US\$932 juta, terjadi penurunan sebesar 34,78%. Perubahan itu, terutama karena adanya penurunan pada utang usaha akibat pembayaran yang lebih tinggi pada akhir tahun 2022 dibandingkan tahun 2021.

Untuk liabilitas jangka panjang yang sebesar US\$1.513 juta, porsinya adalah 71,35% terhadap total liabilitas. Nilai tersebut mengalami kenaikan 34,04% dibandingkan tahun sebelumnya sebesar US\$1.129 juta.

Perubahan pada liabilitas jangka panjang ini disebabkan oleh peningkatan penarikan pinjaman bank dan penerbitan obligasi serta peningkatan liabilitas derivatif.

EKUITAS

Total ekuitas Perseroan pada 31 Desember 2022 sebesar US\$2.809,11 juta, lebih rendah 4,21% dibandingkan tahun 2021 sebesar US\$2.932,47 juta. Kondisi ini disebabkan oleh rugi komprehensif tahun berjalan serta pembayaran dividen tunai tahun berjalan.

Kas dan Setara Kas Akhir Tahun Cash and Cash Equivalents at End of Year	1.403.973	1.579.128	918.917

Kas bersih Perseroan yang diperoleh dari aktivitas operasional berkurang 212,42% dibandingkan tahun 2021, yaitu dari US\$222 juta menjadi US\$249,4 juta. Penyebab perubahannya adalah lebih tingginya pembayaran kepada pemasok, Direksi, dan karyawan di tahun berjalan dibandingkan 2021.

LIABILITIES

The Company's liabilities position in 2022 reached US\$2,121 million, 2.92% higher compared to 2021 which was US\$2,061 million. The change happened because of increase in bank loans and bonds payable netted with decrease in trade payable.

The portion of the Company's current liabilities reached 28.65%, which amounted to US\$607.83 million to total liabilities. Compared to the previous year which was US\$932 million, there was a decrease of 34.78%. This change was primarily due to decline in trade payable as there are higher payments at the end of 2022 compared to 2021.

In terms of non-current liabilities amounted to US\$1,513 million, the portion was 71.35% of total liabilities. This value experienced an increase of 34.04% compared to the previous year which was US\$1,129 million.

This change in non-current liabilities was caused by higher drawdown of bank loans and issuance of bonds as well as increase in derivative liabilities.

EQUITY

The Company's total equity on December 31, 2022, was US\$2,809.11 million, lower by 4.21% compared to 2021 which was US\$2,932.47 million. This condition was caused by current year's comprehensive loss as well as payment of cash dividends in current year.

Kas bersih yang digunakan pada aktivitas investasi untuk tahun 2022 tercatat sebesar US\$291 juta, lebih rendah sebesar 58,18% dibandingkan tahun sebelumnya sebesar US\$696 juta. Perubahan itu terutama karena adanya penarikan deposito berjangka pada tahun berjalan diimbangi penempatan pada aset keuangan lainnya.

Sedangkan kas bersih yang diperoleh dari aktivitas pendanaan mencapai US\$365,2 juta. Dibandingkan tahun sebelumnya sebesar US\$1.134 juta, ada pengurangan sebesar 67,80% yang disebabkan oleh penambahan utang bank jangka panjang dan utang obligasi diimbangi dengan pembayaran utang bank dan obligasi di tahun berjalan.

Seiring dengan perubahan-perubahan tersebut, posisi kas dan setara kas pada akhir tahun mencapai US\$1.404 juta. Dibandingkan dengan awal tahun, terjadi penurunan sebesar 11,09%.

KEMAMPUAN MEMBAYAR UTANG

Sumber utama likuiditas Perseroan berasal dari saldo kas, kas yang dihasilkan secara internal dari operasi, fasilitas pembiayaan perdagangan, utang berjangka dan penerbitan obligasi. Persyaratan modal Perseroan terkait dengan pendanaan modal kerja, belanja modal, dan utang.

Pada 31 Desember 2022, Perseroan mencatat Kas dan Setara Kas sebesar US\$1.403,97 juta, dan total pinjaman dan pinjaman bank sebesar US\$1.495,60 juta yang terdiri dari US\$0,64 juta utang bank jangka pendek, US\$54,40 juta utang bank jangka panjang yang jatuh tempo dalam satu tahun, US\$78,02 juta utang obligasi yang jatuh tempo dalam satu tahun, US\$0,82 juta sewa pembiayaan yang jatuh tempo dalam satu tahun, US\$880,50 juta liabilitas jangka panjang dalam utang bank jangka panjang, US\$451,75 juta utang obligasi jangka panjang, US\$4,96 juta utang sewa pembiayaan (liabilitas jangka panjang) selain liabilitas keuangan derivatif sebesar US\$24,52 juta. Liabilitas ini mewakili rasio Utang terhadap Kapitalisasi sebesar 35%.

Perseroan telah melunasi pokok utang pinjaman bank JBIC dan Obligasi Berkelanjutan Chandra Asri Petrochemical II tahap II tahun 2019 pada tahun berjalan.

Pada 31 Desember 2022, Perseroan telah memenuhi syarat dan ketentuan perjanjian pinjaman yang ditetapkan oleh bank untuk seluruh fasilitas yang digunakan.

KOLEKTIBILITAS PIUTANG

Pada tahun 2022, total piutang usaha Perseroan tercatat US\$105,2 juta. Dibandingkan tahun 2021 sebesar US\$175,5 juta, terjadi penurunan sebesar 40%.

Net cash used in investing activities for 2022 was recorded at US\$291 million, 58.18% lower than the previous year, which was US\$696 million. The change was mainly due to the withdrawal of time deposits in the current year offset by placements in other financial assets.

Meanwhile, net cash obtained from financing activities reached US\$365.2 million. Compared to the previous year, which was US\$1,134 million, there was a decrease of 67.80% due to the addition of long-term bank loans and bonds payable, offset by the payment of bank loans and bonds in the current year.

In line with these changes, cash and cash equivalents at the end of the year reached US\$1,404 million. Compared to the beginning of the year, there was a decrease of 11.09%.

ABILITY TO PAY DEBT

The Company's principal sources of liquidity come from cash on hand, internally generated cash from operations, trade finance facilities, term loans, and bond issuance. The Company's capital requirements are related to the funding of working capital, capital expenditures, and loans.

As of 31 December 2022, the Company posted US\$1,403.97 million for cash and cash equivalents and US\$1,495.60 million for total loans and bank loans, consisting of US\$0.64 million in short-term bank loans, US\$54.40 million in long-term bank loans with maturities in one year, US\$78.02 million in bonds payable that mature in one year and US\$0.82 million of finance leases maturing in one year, US\$880.50 million for non-current liabilities in long-term bank loans, US\$451.75 million in long-term bonds payable, US\$4.96 million in finance leases payable (non-current liabilities) other than derivative financial liabilities, which amounted to US\$24.52 million. This liability represents a Debt to Capitalization ratio of 35%.

The Company has paid off the principal of the JBIC bank loan and Shelf Registration Bond II Chandra Asri Petrochemical Phase II year 2019 in the current year.

As of 31 December 2022, the Company has complied with the terms and conditions of the loan agreement set by the bank for all the facilities used.

RECEIVABLES COLLECTABILITY

The total trade accounts receivable recorded by the Company in 2022 were US\$105.2 million. There was a 40% decrease in comparison to 2021, which was US\$175.5 million.

Sedangkan tingkat pengembalian piutang mencapai 22 hari, lebih lambat dibandingkan 19 hari pada tahun 2021. Kondisi ini disebabkan oleh kondisi ekonomi global dimana ternyata penurunan kondisi keuangan pelanggan menyebabkan pembayaran tidak dilakukan sesuai dengan tanggal jatuh tempo.

Meanwhile, the receivables turnover rate reached 22 days, slower than the 19 days in 2021. This condition was due to the global economic conditions, and it turned out that the decline in the customer's financial condition resulted in payments not being made on time.

PROSPEK DAN PENGEMBANGAN USAHA

Petrokimia, yang mengubah minyak dan gas menjadi segala jenis produk sehari-hari, seperti plastik, pupuk, kemasan, pakaian, perangkat digital, peralatan medis, deterjen atau ban, merupakan bagian integral dari masyarakat modern. Dengan demikian permintaan petrokimia, elemen kunci dari barang-barang konsumen yang tak terhitung jumlahnya, secara intrinsik terkait dengan permintaan dan pengeluaran konsumen.

Seperti yang kita ketahui, industri petrokimia menghadapi beberapa tantangan di tahun 2022 akibat pandemi COVID-19 yang masih berlangsung, yang menyebabkan gangguan rantai pasokan global dan melemahnya permintaan produk petrokimia. Selain itu, meningkatnya ketegangan geopolitik, sengketa perdagangan, dan ketidakpastian ekonomi global juga berdampak pada industri.

Namun, lingkungan yang penuh tantangan telah menjadi katalisator yang mendorong perlunya memprioritaskan kembali inisiatif ramah lingkungan dan mempercepat pertumbuhan permintaan akan produk yang berkelanjutan dan ramah lingkungan.

Mulai tahun 2023, Tiongkok, sebagai produsen dan konsumen petrokimia terbesar di dunia, telah membuka kembali perbatasannya membawa kabar baik bagi industri tersebut selain meningkatkan mobilitas secara global mulai dari Q4 2022 di mana seluruh dunia diundang untuk merayakan Piala Dunia FIFA di Qatar. Pemulihan ekonomi negara, pembukaan kembali pabrik dan bisnis diperkirakan akan mendorong permintaan untuk pulih pada tahun 2023 dan seterusnya baik di dalam negeri Tiongkok maupun internasional.

Gelombang positif akan datang ke Indonesia di mana permintaan produk petrokimia juga diperkirakan akan diuntungkan dengan pertumbuhan populasi, peningkatan mobilitas dan perjalanan. Bank Indonesia memproyeksikan pertumbuhan ekonomi 2023 sebesar 4,5% dan bahkan dapat pulih hingga 5,3% pada tahun tersebut. Sebagai produsen petrokimia terbesar, Chandra Asri akan mengarahkan operasinya dengan optimisme pemulihan sambil tetap berhati-hati dan waspada terhadap limpahan & ketidakpastian global, ketakutan akan resesi, serta stagflasi. Perseroan akan terus melanjutkan rencana ekspansinya dengan hati-hati sehingga dapat terus melayani negara dengan produk petrokimia terbaiknya dan berkontribusi terhadap pertumbuhan ekonomi.

TARGET, REALISASI DAN PROYEKSI

Pendapatan

Pendapatan Bersih menurun sebesar 7,6% atau US\$195,8 juta menjadi US\$2.384,5 juta dari US\$2.580,4 juta di tahun 2021. Selama tahun 2022 harga produk rata-rata lebih tinggi

PROSPECT AND DEVELOPMENT

Petrochemicals, which turn oil and gas into all sorts of daily products such as plastics, fertilisers, packaging, clothing, digital devices, medical equipment, detergents or tyres are integral to modern societies. As such demand for petrochemicals, a key element of countless consumer goods, is intrinsically linked to consumer demand and spending.

It was widely known that the petrochemical industry faced several challenges in 2022 due to ongoing COVID-19 pandemic, which caused disruptions in global supply chains and weakened demand for petrochemical products. Additionally, increasing geopolitical tensions, trade disputes, and uncertainty in the global economy also impacted the industry.

However, the challenging environment has become a catalyst that drives the need to re-prioritize green initiatives and accelerates demand growth for sustainable and environmentally friendly products.

As 2023 begins, the global economic outlook appears a bit brighter with China - the world's largest producer and consumer of petrochemicals, has reopened its borders bringing good news for the industry in addition to improving mobility globally starting from Q4 2022 where the world was invited to celebrate FIFA World Cup in Qatar. The country's recovering economy, reopening of factories and businesses are expected to drive demand to recover in 2023 onwards both in Chinese domestic and internationally.

The positive wave will come to Indonesia where demand of petrochemical products is also expected to benefit on the back of growing population, increasing mobility and travels. Bank Indonesia projected 2023 economic growth of 4.5% and may even recover up to 5.3% for the year. As the largest petrochemical producer, Chandra Asri will navigate its operation with optimism on recovery while remaining cautious and vigilant of global spillover & uncertainties, fear of recession, as well as stagflation. The Company will continue to prudently progress with its expansion plan so that it can further serve the nation with its best petrochemical products and contribute towards economic growth.

TARGET AND REALIZATION

Revenues

Net Revenues declined by 7.6% or US\$195.8 million to US\$2,384.5 million from US\$2,580.4 million in FY 2021. During FY 2022 product prices on average was higher by 4.4%

sebesar 4,4% dibandingkan tahun sebelumnya. Namun, volume penjualan selama tahun ini berada di level 1.989 KT, lebih rendah 4,4% dibandingkan tahun 2021 karena pemeliharaan pabrik Cracker dan Butadiene, ditambah dengan permintaan yang lebih lemah sebagai akibat dari *lockdown* yang berkepanjangan di Tiongkok.

(Rugi) Laba Tahun Berjalan

Tahun 2022 merupakan tahun yang penuh tantangan bagi semua pemain petrokimia termasuk Perseroan karena beberapa faktor seperti ketegangan geopolitik di Ukraina, perselisihan perdagangan, *lockdown* Tiongkok yang berkepanjangan akibat kasus COVID-19 yang lebih tinggi, dan ketidakpastian ekonomi global. EBITDA tahun ini turun secara signifikan dan dibukukan sebesar US\$5,3 juta didorong oleh kondisi tersebut di atas. Alhasil, pada tahun 2022 Perseroan membukukan Rugi Bersih Setelah Pajak sebesar US\$149,4 juta.

Struktur Modal

Perseroan mengelola Struktur Modalnya untuk memastikan bahwa Perseroan dapat melanjutkan kelangsungan usahanya dan mengatasi ketidakpastian dan tantangan melalui optimalisasi saldo utang dan ekuitas. Sejalan dengan kebijakan keuangannya, Perseroan mempertahankan rasio *gearing* yang relatif rendah sebesar 35% untuk tahun 2022, di bawah ketentuan maksimal 100%. Selama tahun 2022, Perseroan telah membayar penuh sisa pinjaman JBIC yang masih terutang untuk merampingkan komitmen keuangan dan menyelaraskan persyaratan fasilitas pembiayaan yang ada.

Pada tahun 2022, Perseroan telah berhasil melakukan Penerbitan:

- Obligasi Berkelanjutan III Petrokimia Chandra Asri Tahap V Tahun 2022 sebesar Rp1,4 triliun;
- Obligasi Berkelanjutan IV Petrokimia Chandra Asri Tahap I Tahun 2022 sebesar Rp2 triliun;
- Pemecahan saham dengan rasio 1:4 untuk meningkatkan likuiditas di pasar.

Target tahun 2023

Perseroan akan terus beroperasi secara optimal dengan kapasitas papan nama desain saat ini sebesar 4,2 juta ton per tahun. Perseroan akan terus melanjutkan:

- Fokus pada perluasan bisnis melalui proyek kompleks petrokimia kedua dan sinergi bisnis melalui program M&A untuk meraih pertumbuhan yang menguntungkan dan berkelanjutan;
- Terus berfokus pada keberlanjutan yang didukung oleh prinsip utama manusia, planet, dan laba. Kami bertujuan untuk mewujudkan kerangka kerja, secara konsisten mengurangi jejak karbon operasional kami, memperluas kemitraan, serta mengadvokasi ekonomi sirkular dalam pengelolaan sampah plastik di Indonesia;

compared to the previous year. However, sales volume during the year was at the level of 1,989 KT, 4.4% lower compared to FY 2021 due to maintenance on Cracker and Butadiene plants, coupled with softer demand as a result of China's prolonged lock down.

(Loss) Profit for the Year

FY 2022 was a challenging year for all petrochemical players including the Company due to several factors such as geopolitical tension in Ukraine, trade disputes, prolonged China's lockdown from higher COVID-19 cases, and global economic uncertainties. EBITDA for the year decreased significantly and was booked at US\$5.3 million driven by the abovementioned conditions. As a result, in FY 2022 the Company booked Net Loss After Tax of US\$149.4 million.

Capital Structure

The Company manages its Capital Structure to ensure that it will be able to continue as a going concern and navigate through the uncertainties and challenges through optimization of the debt and equity balances. In line with its financial policy, the Company maintained its relatively low gearing ratio of 35% for 2022, below its covenant of max 100%. During 2022, the Company has fully prepaid the remaining outstanding JBIC loan to streamline financial commitments and harmonize the terms of existing financing facilities.

In 2022, the Company has successfully conducted Issuance of:

- Shelf Registration Bonds III Chandra Asri Petrochemical Stage V Year 2022 amounting to Rp1.4 trillion;
- Shelf Registration Bonds IV Chandra Asri Petrochemical Stage I Year 2022 amounting to Rp2 trillion;
- Stock split with ratio of 1:4 to enhance liquidity in the market.

2023 Target

- Terus fokus pada transformasi digital di seluruh operasi yang bertujuan untuk meningkatkan efisiensi operasional dan kehandalan pabrik.

DIVIDEN

Kebijakan

Kebijakan dividen Perseroan saat ini adalah membayarkan dividen kepada para pemegang sahamnya sebesar sekitar 40% dari laba bersih Perseroan. Dividen akan tergantung pada arus kas dan rencana investasi Perseroan, serta persyaratan yang ditentukan berdasarkan utang Perseroan, pembatasan peraturan dan persyaratan lain.

Mengacu pada peraturan perundangan-undangan di Indonesia, keputusan mengenai dividen ditetapkan oleh pemegang saham melalui Rapat Umum Pemegang Saham Tahunan. Rekomendasinya berasal dari Dewan Komisaris dan Direksi. Perseroan dapat membagikan dividen pada tahun apa pun sepanjang Perseroan mencatatkan saldo laba positif dan setelah dilakukan alokasi untuk dana cadangan.

Rekomendasi, penetapan jumlah dan pembayaran dividen oleh Direksi Perseroan dan persetujuan pembagian dividen oleh Dewan Komisaris Perseroan adalah berdasarkan kebijaksanaan mereka sendiri. Penerapan itu akan tergantung pada sejumlah faktor-faktor, termasuk laba bersih Perseroan, ketersediaan cadangan wajib, kebutuhan belanja modal, hasil operasi, dan arus kas.

Hal tersebut selanjutnya tergantung pada berbagai faktor termasuk keberhasilan penerapan strategi bisnis Perseroan, pertimbangan keuangan, persaingan, dan peraturan yang berlaku, serta kondisi perekonomian secara umum. Selain itu, faktor-faktor lain yang spesifik terkait Perseroan dan industrinya. Banyak dari faktor-faktor tersebut berada di luar kendali Perseroan.

Sebelum berakhirnya tahun keuangan, dividen interim dapat dibagikan sepanjang diizinkan berdasarkan Anggaran Dasar Perseroan. Ketentuannya, dividen interim tidak mengakibatkan aset kekayaan bersih Perseroan menjadi kurang dari jumlah total modal ditempatkan dan disetor penuh dan cadangan wajib.

Pembagian tersebut ditentukan Direksi setelah terlebih dahulu disetujui Dewan Komisaris. Jika, setelah berakhirnya tahun buku yang dimaksud, Perseroan mengalami kerugian, dividen interim yang sudah dibagikan harus dikembalikan pemegang saham kepada Perseroan. Direksi dan Dewan Komisaris akan bertanggung jawab secara tanggung renteng dalam hal dividen interim tidak dikembalikan kepada Perseroan.

- Continue to focus on digital transformation throughout operations aimed at increasing operational efficiency and plant reliability.

DIVIDEND

Policy

Current dividend policy of the Company is to pay dividends to its shareholders in the amount of approximately 40% of the Company's net income. The dividends will be subject to the Company's cash flow and investment plans, as well as requirements imposed by the Company's indebtedness, regulatory restrictions, and other requirements.

Referring to the statutory regulations in Indonesia, the decision regarding dividends is determined by shareholders through the Annual General Meeting of Shareholders. The recommendation comes from the Board of Commissioners and the Board of Directors. The Company may declare dividends in any year if the Company has positive retained earnings and after deduction of reserves fund.

The recommendation, determination of the amount and payment of dividends by the Board of Directors of the Company and approval of the distribution of dividends by the Board of Commissioners of the Company are at their own discretion. Such implementation will depend on a number of factors, including the Company's net income, availability of mandatory reserves, capital expenditure requirements, results of operations, and cash flows.

These, in turn, depend on various factors including the successful implementation of the Company's business strategy, financial, competitive, and regulatory considerations, as well as general economic conditions. In addition, other factors that may be specific to the Company and its industry. Many of these factors are beyond the Company's control.

Prior to the end of the financial year, interim dividends may be distributed as long as permitted by the Company's Articles of Association. The provision is that the interim dividend does not result in the Company's net assets becoming less than the total amount of issued and paid-up capital and the compulsory reserves.

The distribution is determined by the Board of Directors after first being approved by the Board of Commissioners. If, after the end of the relevant financial year, the Company suffers losses, the distributed interim dividend must be returned by the shareholders to the Company. The Board of Directors and Board of Commissioners will be jointly and severally responsible in the event that the interim dividend is not returned to the Company.

Apabila keputusan dibuat untuk membagikan dividen, dividen akan dibayarkan dalam rupiah Indonesia. Pemegang saham pada tanggal pencatatan yang berlaku akan berhak atas jumlah penuh dividen yang disetujui, yang dapat dikenai pajak penghasilan (*withholding tax*) yang berlaku di Indonesia. Dividen yang diterima pemegang saham asing akan dikenai pajak penghasilan Indonesia maksimum sebesar 20% atau sebesar ketentuan peraturan perpajakan yang berlaku.

Realisasi Pembagian Dividen

Rincian realisasi pembagian dividen dalam 2 (dua) tahun terakhir disampaikan dalam table di bawah ini:

To the extent a decision was made to distribute dividends, dividends will be paid in Indonesian rupiah. Shareholders on the applicable recording date will be entitled to the full amount of the dividends approved, which is subject to the applicable withholding tax in Indonesia. Dividends received by non-Indonesian shareholders will be subject to a maximum of 20% Indonesian income tax or as stipulated by the prevailing tax regulations.

TATA KELOLA PERUSAHAAN

Corporate Governance

Chandra Asri senantiasa mengembangkan penerapan prinsip GCG di lingkungan usaha Perseroan demi menjadi entitas bisnis yang adaptif, berkesinambungan, serta berkembang dengan memiliki daya saing yang baik.

Chandra Asri is constantly working to improve the application of GCG principles in the Company's business environment in order to become an adaptable, sustainable, and growing business entity with good competitiveness.

KOMITMEN DAN PENERAPAN PRINSIP GCG

COMMITMENT AND PRINCIPLE OF GCG IMPLEMENTATION

Penerapan Tata Kelola Perusahaan yang Baik (GCG; *Good Corporate Governance*) di lingkungan PT Chandra Asri Petrochemical Tbk ("Chandra Asri", "Perseroan"), antara lain mengacu pada Peraturan Otoritas Jasa Keuangan (POJK) No. 21/POJK.04/2015 tentang Penerapan Pedoman Tata Kelola Perusahaan Terbuka. Selain itu, yang menjadi perdoman adalah Undang-Undang No. 40 Tahun 2007 tentang Perseroan Terbatas serta peraturan perundang-undangan lain yang relevan dan praktik terbaik di industri.

Perseroan memandang bahwa penerapan GCG bukan sekadar upaya untuk memenuhi kewajiban peraturan perundang-undangan, tetapi juga menjadi bagian tak terpisahkan dari tanggung jawab terhadap kegiatan usaha agar tumbuh secara berkelanjutan. Melalui penerapan GCG, Perseroan berupaya menjadi entitas bisnis yang adaptif, berkesinambungan, serta berkembang dengan memiliki daya saing yang baik.

Karena itulah, Perseroan senantiasa meningkatkan penerapan prinsip GCG di seluruh area lingkungan bisnis. Upaya tersebut juga dimaksudkan untuk melindungi kepentingan pemegang saham dan pemangku kepentingan (*stakeholders*) lainnya.

Implementation of Good Corporate Governance (GCG) within PT Chandra Asri Petrochemical Tbk ("Chandra Asri", "The Company"), among other things, refers to Financial Services Authority Regulation (POJK) No. 21/POJK.04/2015 regarding Implementation of Public Company Governance Guidelines. Furthermore, other regulations are Law No. 40 of 2007 concerning Limited Liability Companies, as well as other relevant laws and regulations and industry best practices.

The Company views GCG implementation as not only an effort to comply with laws and regulations, but also as an essential component of business activities in order to grow in a sustainable manner. Through the implementation of GCG, the Company strives to become an adaptive, sustainable, and competitive business entity.

For the reason, the Company continuously improves the application of GCG principles in all areas of the business environment. These efforts are also intended to protect the interests of shareholders and other stakeholders.

Penerapan GCG di lingkungan Perseroan mengacu pada 4 (empat) pilar tata kelola atau governansi korporat yang mencakup: (1) perilaku beretika; (2) akuntabilitas; (3) transparansi; dan (4) keberlanjutan.

The Company's implementation of GCG refers to the 4 (four) pillars of corporate governance, which are: (1) ethical behavior; (2) accountability; (3) transparency; and (4) sustainability.

Sedangkan prinsip penerapan GCG terdiri atas 8 (delapan) prinsip yang terbagi dalam 3 (tiga) kelompok: (1) prinsip-prinsip yang mengatur organ-organ penyelenggara governansi korporat, dan (2) prinsip-prinsip yang mengatur proses dan keluaran yang dihasilkan oleh organ-organ di atas, (3) kelompok prinsip yang mengatur penerima manfaat dari pelaksanaan governansi korporat.

While the GCG implementation consists of 8 (eight) principles, they are divided into 3 (three) groups: (1) principles governing the organs administering corporate governance, (2) principles governing the processes and output produced by the above organs, and (3) a group of principles governing the beneficiaries of corporate governance implementation.

Adapun 8 (delapan) prinsip dimaksud adalah:

The 8 (eight) principles are as follows:

Prinsip GCG GCG Principle	Penerapan di Perseroan Implementation in the Company
Prinsip 1: Peran dan Tanggung Jawab Direksi dan Dewan Komisaris Principle 1: Roles and Responsibilities of the Board of Directors and Board of Commissioners	
Direksi dan Dewan Komisaris menjalankan peran dan tanggung jawabnya secara independen untuk menciptakan nilai yang berkelanjutan demi kepentingan terbaik jangka panjang korporasi dan pemegang saham, dengan mempertimbangkan kepentingan para pemangku kepentingan.	Perseroan menjamin bahwa masing-masing organ perusahaan bebas dari benturan kepentingan, dominasi, dan pengaruh dari pihak mana pun yang menyebabkan keputusan menjadi tidak objektif.
The Board of Directors and the Board of Commissioners carry out their roles and responsibilities independently in order to create sustainable long-term value for the Company and shareholders while also considering the interests of other stakeholders.	The Company guarantees that each organ of the Company is free from conflict of interest, dominance, and influence from any party, which causes decisions to not be objective.
Prinsip 2: Komposisi dan Remunerasi Direksi dan Dewan Komisaris Principle 2: Composition and Remuneration of the Board of Directors and Board of Commissioners	
Anggota Direksi dan anggota Dewan Komisaris dipilih dan ditetapkan sedemikian rupa sehingga komposisi Direksi sebagai organ pengelolaan dan komposisi Dewan Komisaris sebagai organ pengawasan adalah beragam serta masing-masing terdiri dari para Direktur dan Komisaris yang memiliki komitmen, pengetahuan, kemampuan, pengalaman dan keahlian yang dibutuhkan untuk memenuhi secara tepat peran pengelolaan Direksi dan peran pengawasan Dewan Komisaris.	Perseroan telah mempertimbangkan keragaman Dewan Komisaris dan Direksi sejalan dengan yang tertuang dalam Lampiran Surat Edaran OJK No. 32/SEOJK.04/2015 tentang Pedoman Tata Kelola Perusahaan Terbuka.
Members of the Board of Directors and members of the Board of Commissioners are selected and determined in such a way that the composition of the Board of Directors as a management organ and the composition of the Board of Commissioners as a supervisory organ are diverse, with each consisting of Directors and Commissioners who have the commitment, knowledge, ability, experience, and expertise required to fulfill the management role of the Board of Directors and the supervisory role of the Board of Commissioners.	The Company has considered the diversity of the Board of Commissioners and Board of Directors in line with what is contained in the appendix to OJK Circular Letter No. 32/SEOJK.04/2015 concerning Guidelines for Public Company Governance.
Remunerasi dirancang untuk secara efektif menyelaraskan kepentingan anggota Direksi dan anggota Dewan Komisaris dengan kepentingan jangka panjang korporasi dan penciptaan nilai yang berkelanjutan.	Dalam pemberian remunerasi bagi Dewan Komisaris dan Direksi, Perseroan mengedepankan prinsip kehati-hatian serta mengacu pada peraturan perundangan yang berlaku.
Remuneration is intended to effectively align the interests of members of the Board of Directors and members of the Board of Commissioners with the corporation's long-term interests and long-term value creation.	In providing remuneration for the Board of Commissioners and the Board of Directors, the Company prioritizes the principle of prudence and refers to the applicable laws and regulations.

Prinsip GCG GCG Principle	Penerapan di Perseroan Implementation in the Company
Prinsip 3: Hubungan Kerja antara Direksi dan Dewan Komisaris Principle 3: Working Relations Between the Board of Directors and the Board of Commissioners	
Direksi dan Dewan Komisaris memiliki hubungan kerja yang erat, terbuka, konstruktif, profesional dan saling percaya untuk kepentingan terbaik korporasi. The Board of Directors and the Board of Commissioners have a close, open, constructive, professional, and trusting working relationship for the best interests of the corporation.	Realisasi dari prinsip ini, antara lain dijalankan melalui rapat berkala antara Dewan Komisaris dan Direksi. The realization of this principle, among others, is carried out through periodic meetings between the Board of Commissioners and the Board of Directors.
Prinsip 4: Perilaku Etis Principle 4: Ethical Behavior	
Korporasi memiliki komitmen untuk bertindak secara etis dan bertanggung jawab, menegakkan nilai-nilai dan budaya organisasi. The corporation has a commitment to act ethically and responsibly, upholding the values and culture of the organization.	Perseroan telah memiliki "Kode Etik" yang berlaku bagi seluruh organ di lingkungan Perseroan, dari Dewan Komisaris, Direksi, hingga seluruh karyawan. Kode Etik ini menjadi pedoman perilaku. Perseroan juga telah memiliki nilai dan budaya organisasi yang tercantum dalam iSTAR: integritas; keselamatan; kerja sama; memikul tanggung jawab; dan menghargai. The Company already has a 'Code of Conduct' that applies to all organs within the Company, from the Board of Commissioners and Board of Directors to all employees. This Code of Conduct serves as a guideline for behavior. The Company also has organizational values and culture listed in iSTAR: integrity, safety, teamwork, accountability, and respect.
Prinsip 5: Manajemen Risiko, Pengendalian Internal dan Kepatuhan Principle 5: Risk Management, Internal Control, and Compliance	
Korporasi menjalankan praktik governansi korporat yang terintegrasi dengan penerapan sistem pengendalian internal dan manajemen risiko, serta sistem manajemen kepatuhan yang efektif dalam rangka mendukung pencapaian sasaran, visi, misi, tujuan, maupun target kinerja korporat dalam menjalankan bisnis dengan bertintegritas. The corporation carries out corporate governance practices that are integrated with the implementation of internal control and risk management systems, as well as an effective compliance management system, in order to support the achievement of corporate goals, vision, mission, goals, and performance targets in running business with integrity.	Perseroan telah menjalankan sistem manajemen risiko terintegrasi dengan sistem pengendalian internal. Melalui strategi tersebut, Perseroan dapat memitigasi risiko dengan efektif, sehingga menghindari potensi kerugian. Penerapan manajemen risiko juga melibatkan karyawan dan Perseroan menyediakan kesempatan bagi karyawan untuk memberi masukan penting terkait pengambilan keputusan. Hal ini membuat manajemen beserta seluruh karyawan terlibat dalam implementasi manajemen risiko. The Company has implemented a risk management system that is integrated with an internal control system. The Company can effectively mitigate risks with this strategy, avoiding potential losses. Employees are also involved in risk management implementation, and the Company provides opportunities for employees to provide important input on decision-making. This involves management as well as all employees in the implementation of risk management.

Prinsip GCG GCG Principle	Penerapan di Perseroan Implementation in the Company
Prinsip 6: Pengungkapan dan Transparansi Principle 6: Disclosure and Transparency	
Korporasi membuat pengungkapan yang akurat dan tepat waktu mengenai semua hal yang material tentang korporasi. The corporation makes accurate and timely disclosures regarding all material matters concerning the corporation.	Perseroan mengungkapkan informasi dengan tepat waktu, memadai, akurat, serta dapat diakses dengan mudah oleh seluruh pemangku kepentingan. Pengungkapan informasi ini dilakukan secara proporsional dengan tetap memperhatikan ketentuan kerahasiaan Perseroan berdasarkan peraturan perundang-undangan. The Company discloses information in a timely, adequate, and accurate manner that all stakeholders can easily access. Disclosure of this information is carried out proportionally with due observance of the Company's confidentiality provisions based on the prevailing regulations.
Prinsip 7: Hak-hak Pemegang Saham Principle 7: Shareholders' Rights	
Korporasi melindungi dan memfasilitasi pelaksanaan hak pemegang saham dan memastikan perlakuan yang adil terhadap pemegang saham, termasuk pemegang saham minoritas. Semua pemegang saham memiliki kesempatan untuk mendapatkan ganti rugi yang efektif atas pelanggaran hak-hak mereka. The corporation safeguards and facilitates the exercise of shareholders' rights, as well as ensuring the fair treatment of shareholders, including minority shareholders. All shareholders have the right to effective redress if their rights are violated.	Perseroan senantiasa melindungi seluruh hak pemegang saham, baik pemegang saham mayoritas maupun ritel. Hal ini, antara lain ditunjukkan melalui pengungkapan informasi dengan tepat waktu, memadai, akurat, serta dapat diakses dengan mudah oleh seluruh pemangku kepentingan dalam pembagian dividen maupun RUPS. The Company always protects the rights of all shareholders, both majority and retail. This is shown, among other things, through the disclosure of timely, adequate, accurate, and easily accessible information by all stakeholders in the distribution of dividends and the GMS.
Prinsip 8: Hak-hak Pemangku Kepentingan Principle 8: Stakeholders' Rights	
Korporasi mengakui hak-hak pemangku kepentingan yang ditetapkan dalam peraturan perundang-undangan yang berlaku atau suatu perjanjian yang disepakati oleh korporasi dan mendorong kerja sama aktif dengan pemangku kepentingan dalam menciptakan kekayaan, lapangan kerja, dan keberlanjutan usaha yang sehat secara finansial. The corporation recognizes the rights of stakeholders stipulated in the prevailing regulations or an agreement agreed upon by the corporation and encourages active cooperation with stakeholders in creating wealth, employment, and financially sound business continuity.	Dalam menjalankan kegiatan operasional, Perseroan senantiasa berpegang teguh pada peraturan perundang-undangan yang berlaku, termasuk saat menjalin kerja sama dengan pihak ketiga. Selain itu, Perseroan juga telah mengimplementasikan tanggung jawab sosial dan lingkungan yang dilaporkan setiap tahun, sebagai bagian dari keberlanjutan usaha yang sehat bagi Perseroan. In carrying out operational activities, the Company always adheres to the prevailing regulations, including when collaborating with third parties. In addition, the Company has also implemented social and environmental responsibilities which are reported annually, as part of a sound business continuity for the Company.

STRUKTUR TATA KELOLA PERUSAHAAN

CORPORATE GOVERNANCE STRUCTURE

Penerapan struktur tata kelola perusahaan yang berlaku di lingkungan Chandra Asri, terutama mengacu pada Undang-Undang No. 40 tahun 2007 tentang Perseroan Terbatas. Organ tata kelola tertinggi berada di tangan Rapat Umum Pemegang Saham (RUPS), diikuti Dewan Komisaris sebagai organ pengawas dan Direksi sebagai organ pelaksana.

Sistem tersebut merupakan kerangka kerja yang mengatur pola hubungan penerapan GCG di lingkungan Perseroan. Masing-masing organ memiliki batasan tugas, tanggung jawab, serta wewenang dan dijalankan secara independen, sesuai dengan mekanisme yang diatur dalam undang-undang, peraturan regulator lainnya, anggaran dasar Perseroan, nilai-nilai perusahaan, kode etik, serta peraturan dan kebijakan perusahaan lainnya.

The implementation of the corporate governance structure in the Chandra Asri environment, with particular reference to Law No. 40 of 2007 on Limited Liability Companies. The General Meeting of Shareholders (GMS) is the highest governance organ, followed by the Board of Commissioners as the supervisory organ, and the Board of Directors as the implementing organ.

The system is a framework that governs the GCG implementation pattern within the Company. Each organ has specific duties, responsibilities, and authorities and is carried out independently, in accordance with the mechanisms established by law, other regulatory regulations, the Company's articles of association, corporate values, a code of conduct, and other Company regulations and policies.

RAPAT UMUM PEMEGANG SAHAM

GENERAL MEETING OF SHAREHOLDERS

Pelaksanaan Rapat Umum Pemegang Saham (RUPS) mengacu pada Peraturan Otoritas Jasa Keuangan (OJK) No. 32/POJK.04/2014 tentang Rencana dan Penyelenggaraan Rapat Umum Pemegang Saham Perusahaan Terbuka. RUPS merupakan organ Perseroan yang memiliki wewenang yang tidak diberikan kepada Direksi atau Dewan Komisaris dalam batas yang ditentukan dalam undang-undang dan/atau anggaran dasar.

RUPS memiliki wewenang, antara lain mengangkat dan memberhentikan anggota Dewan Komisaris dan Direksi, mengevaluasi kinerja Dewan Komisaris dan Direksi. RUPS juga dapat menyetujui perubahan anggaran dasar dan laporan tahunan serta menetapkan bentuk dan jumlah remunerasi anggota Dewan Komisaris dan Direksi. Selain itu, RUPS berwenang mengambil keputusan terkait tindakan korporasi atau keputusan strategis lainnya yang diajukan Direksi.

The implementation of the General Meeting of Shareholders (GMS) refers to Financial Services Authority Regulation No. 32/POJK.04/2014 on Planning and Convening General Meetings of Shareholders for Public Companies. The GMS is the Company organ that has the authority that is not granted to the Board of Directors or Board of Commissioners within the limits prescribed in the laws and/or the articles of association.

The GMS has the authority to, among other things, appoint and dismiss members of the Board of Commissioners and the Board of Directors and evaluate the performance of the Board of Commissioners and the Board of Directors. The GMS may also approve amendments to the articles of association and annual report as well as determine the form and amount of remuneration for members of the Board of Commissioners and Board of Directors. In addition, the GMS has the authority to make decisions related to corporate actions or other strategic decisions proposed by the Board of Directors.

KOMPOSISI DAN KEBERAGAMAN

Hingga berakhirnya tahun buku 2022, Dewan Komisaris Perseroan berjumlah 14 orang. Pengangkatan Dewan Komisaris tersebut telah memperhatikan ketentuan peraturan perundang-undangan yang berlaku, seperti Lampiran Surat Edaran Otoritas Jasa Keuangan No. 32/SEOJK.04/2015 tentang Pedoman Tata Kelola Perusahaan Terbuka.

Regulasi tersebut, antara lain mengungkapkan bahwa penentuan komposisi anggota Dewan Komisaris memperhatikan keberagaman keahlian, pengetahuan dan pengalaman yang dibutuhkan. Keberagaman tersebut merupakan kombinasi karakteristik yang diinginkan, baik dari segi organ Dewan Komisaris maupun anggota Dewan Komisaris secara individu, sesuai dengan kebutuhan Perseroan.

Komposisi yang telah memperhatikan kebutuhan Perseroan itu merupakan suatu hal yang positif, khususnya terkait pengambilan keputusan dalam rangka pelaksanaan fungsi pengawasan yang dilakukan dengan mempertimbangkan berbagai aspek lebih luas. Informasi terkait komposisi dan keberagaman Dewan Komisaris Perseroan ditunjukkan sebagai berikut:

COMPOSITION AND DIVERSITY

As of the end of the 2022 fiscal year, the Company's Board of Commissioners consists of 14 people. The appointment of the Board of Commissioners has taken into account the provisions of the prevailing regulations, such as the Attachment to the Circular Letter of the Financial Services Authority No. 32/SEOJK.04/2015 on Governance Guidelines for Public Companies.

These regulations disclose that the determination of the membership composition of the Board of Commissioners takes into account the diversity of expertise, knowledge, and experience required. This diversity is a combination of desirable characteristics, both in terms of the organs of the Board of Commissioners and the members of the Board of Commissioners individually, in accordance with the needs of the Company.

The composition that has taken into account the needs of the Company is positive, particularly regarding decision-making in the context of implementing the supervisory function, which is carried out by considering various broader aspects. Information related to the composition and diversity of the Company's Board of Commissioners is presented as follows:

KOMISARIS INDEPENDEN

Komisaris Independen merupakan pihak dari luar perusahaan yang tidak terafiliasi, baik dengan anggota Dewan Komisaris lainnya, anggota Direksi, maupun Pemegang Saham Utama dan Pengendali. Komisaris Independen bertanggung jawab untuk melakukan pengawasan dan juga mewakili kepentingan Pemegang Saham minoritas.

Sesuai ketentuan Peraturan Otoritas Jasa Keuangan No. 33/POJK.04/2014 tentang Direksi dan Dewan Komisaris Emiten atau Perusahaan Publik, jumlah Komisaris Independen minimal 30% dari total Dewan Komisaris yang menjabat. Selaras dengan ketentuan tersebut, RUPS telah mengangkat 5 (lima) atau 36% Komisaris Independen dari 14 orang Dewan

INDEPENDENT COMMISSIONER

Independent Commissioners are parties from outside the Company, unaffiliated with other members of the Board of Commissioners, members of the Board of Directors, as well as the Main and Controlling Shareholders. Independent Commissioners are responsible for overseeing and representing the interests of minority shareholders.

Pursuant to the provisions of Financial Services Authority Regulation No. 33/POJK.04/2014 on the Board of Directors and Board of Commissioners of Issuers or Public Companies, the number of Independent Commissioners is at least 30% of the total number of commissioners serving on the board. In line with these provisions, the GMS has appointed 5 (five)

Komisaris di Perseroan per tahun buku 2022, sehingga jumlahnya telah memenuhi ketentuan regulasi. Namun, pada tahun 2023, Perseroan mengangkat 2 komisaris baru.

Kriteria Penentuan Komisaris Independen

Seluruh Komisaris Independen Perseroan telah memenuhi ketentuan Peraturan Otoritas Jasa Keuangan No. 33/POJK.04/2014 tentang Direksi dan Dewan Komisaris Emiten atau Perusahaan Publik, yaitu:

1. Bukan merupakan orang yang bekerja atau mempunyai wewenang dan tanggung jawab untuk merencanakan, memimpin, mengendalikan, atau mengawasi kegiatan Perseroan dalam waktu 6 (enam) bulan terakhir sejak pengangkatan pertama kali;
2. Tidak mempunyai saham, baik langsung maupun tidak langsung pada Perseroan;
3. Tidak mempunyai hubungan afiliasi dengan Perseroan, anggota Dewan Komisaris, anggota Direksi, atau Pemegang Saham Utama Perseroan;
4. Tidak mempunyai hubungan usaha, baik langsung maupun tidak langsung, yang berkaitan dengan kegiatan usaha Perseroan;
5. Tidak memiliki rangkap jabatan pada perusahaan lainnya yang terafiliasi dengan Perseroan; dan
6. Mengerti peraturan perundang-undangan di bidang pasar modal.

Independensi dan Hubungan Afiliasi

Pengambilan keputusan yang dilakukan oleh Dewan Komisaris dan Komisaris Independen dilakukan secara objektif dan bertujuan semata-mata untuk kepentingan Perseroan. Untuk itu diperlukan independensi yang dapat terwujud dengan menghindari berbagai jenis konflik kepentingan, baik sesama anggota Dewan Komisaris, Direksi, Pemegang Saham Pengendali, maupun pihak eksternal yang berkepentingan lainnya.

Hubungan afiliasi antara anggota Dewan Komisaris, Direksi, dan Pemegang Saham Pengendali, dapat dilihat sebagaimana tabel di bawah ini:

Independent Commissioners from the 14 members of the Board of Commissioners in the Company as of 2022 fiscal year, subsequently, the number has complied with regulatory provisions. However, in 2023, the Company appointed 2 new commissioners.

Criteria of Independent Commissioner

All of the Company's Independent Commissioners have complied with the provisions of Financial Services Authority Regulation No. 33/POJK.04/2014 on Board of Directors and Board of Commissioners of Issuer or Public Companies, as follows:

1. Not being employed nor having the authority and responsibility to plan, lead, control, or supervise the Company's activities 6 (six) months prior to the first appointment;
2. Has no shares in the Company, either directly or indirectly;
3. Has no affiliation with the Company, its board of commissioners, its board of directors, or its majority shareholders;
4. Has no business relationship, either directly or indirectly, related to the Company's business activities;
5. Has no concurrent positions at other companies affiliated with the Company; and
6. Understanding the laws and regulations in the field of capital market.

Independency And Affiliated Relationship

Decision making by the Board of Commissioners and Independent Commissioners are carried out objectively and solely in the interests of the Company. For this reason, independence is required, which can be realized by avoiding various types of conflicts of interest, both among members of the Board of Commissioners, Directors, Controlling Shareholders, and other interested external parties.

The affiliated relations between members of the Board of Commissioners, Board of Directors, and Controlling Shareholders, can be viewed in the following table:

RAPAT DEWAN KOMISARIS

Kebijakan

Kebijakan rapat Dewan Komisaris di lingkungan Perseroan, antara lain mengacu pada Peraturan Otoritas Jasa Keuangan No. 33/POJK.04/2014 tentang Direksi dan Dewan Komisaris Emiten atau Perusahaan Publik. Dewan Komisaris wajib mengadakan rapat paling kurang 1 (satu) kali dalam 2 (dua) bulan. Rapat tersebut dapat dilangsungkan apabila dihadiri mayoritas dari seluruh anggota Dewan Komisaris.

Dewan Komisaris juga wajib mengadakan rapat bersama Direksi secara berkala, paling kurang 1 (satu) kali dalam 4 (empat) bulan. Seluruh kehadiran rapat Dewan Komisaris wajib disampaikan dalam laporan tahunan.

Pengambilan keputusan kedua rapat ini didasarkan pada musyawarah untuk mufakat dengan ketentuan kuorum untuk seluruh rapat Dewan Komisaris adalah lebih dari separuh jumlah anggota Dewan Komisaris yang hadir. Bilamana musyawarah untuk mufakat tidak tercapai, maka pengambilan keputusan dapat diputuskan pada suara terbanyak yang hadir dalam rapat tersebut.

The Company made a change in the composition of the Board of Commissioners on 12 January 2023 through an Extraordinary GMS resolution. Orientation activities for 2 (two) new Commissioners have been carried out, among others related to the delivery of material Corporate Governance, Company Strategy and Performance, Risk Management, and topics relevant to the duties of the new Commissioners.

IMPLEMENTATION OF DUTIES DURING THE FISCAL YEAR

The implementation of the duties of the Company's Board of Commissioners during 2022 is described as follows:

1. Monitoring and providing advice to the Board of Directors related to the Company's performance, such as operations, finance, and sales;
2. Supervising the implementation of the strategic policies by the Board of Directors;
3. Reviewing the progress of ongoing and planned project implementation;
4. Reviewing the Financial Statements for the 2022 fiscal year; and
5. Evaluating the achievement of *Corporate Scorecard* 2022 performance and reviewing as well as approving the following year's budget and *Corporate Scorecard*.

BOARD OF COMMISSIONERS MEETINGS

Policy

The Board of Commissioners meeting policy set by the Company, among others, refers to the Financial Services Authority Regulation No. 33/POJK.04/2014 on the Board of Directors and Board of Commissioners of Issuers or Public Companies. The Board of Commissioners must hold a meeting at least once every two months. The meeting can be held if attended by a majority of all members of the Board of Commissioners.

The Board of Commissioners is also required to hold regular meetings with the Board of Directors, at least once every four months. The annual report must include all attendance at the Board of Commissioners meeting.

The decision-making process for these two meetings is based on deliberation to reach a consensus, with the provision that the quorum for all Board of Commissioners meetings is more than half of the total number of members present. In the event that deliberation to reach consensus cannot be reached, the decision can be made by a majority vote of those present at the meeting.

PENGEMBANGAN KOMPETENSI DEWAN KOMISARIS

Kebijakan

Pengembangan kompetensi Dewan Komisaris merupakan bagian dari upaya untuk mengikuti perkembangan kondisi eksternal, terutama yang berpotensi memberikan dampak bagi Perseroan. Kondisi dimaksud tidak terbatas pada perkembangan industri, tetapi juga terkait dengan informasi regulasi atau lainnya. Karena itu, Perseroan telah memiliki kebijakan untuk memberikan dukungan bagi kegiatan pengembangan kompetensi Dewan Komisaris.

Realisasi

Seiring dengan penambahan kegiatan usaha yang semakin dinamis, sepanjang tahun 2022 tidak ada anggota Dewan Komisaris yang mengikuti kegiatan pelatihan dan pengembangan kompetensi.

COMPETENCY DEVELOPMENT OF THE BOARD OF COMMISSIONERS

Policy

The competency development for the Board of Commissioners is part of efforts to keep abreast of developments in external conditions, especially those that have the potential to impact the Company. These conditions are not limited to industrial developments, but also relate to regulatory or other information. Therefore, the Company has a policy to provide support for competency development activities for the Board of Commissioners.

Realization

Along with the addition dynamic development of business activities, no members of the Board of Commissioners participated in competency training and development activities throughout 2022.

DIREKSI

BOARD OF DIRECTORS

Direksi merupakan organ yang bertugas menjalankan dan bertanggung jawab atas pengurusan tersebut untuk kepentingan Perseroan. Pelaksanaan kepengurusan tersebut dilaksanakan sesuai dengan maksud dan tujuan Perseroan yang ditetapkan dalam anggaran dasar.

Direksi bertindak secara cermat, berhati-hati, dan dengan mempertimbangkan berbagai aspek penting yang relevan dalam pelaksanaan tugasnya. Direksi menggunakan wewenang yang dimiliki semata-mata untuk kepentingan Perseroan.

PEDOMAN KERJA (BOARD CHARTER)

Dalam menjalankan fungsi dan tanggung jawabnya, Direksi Perseroan telah memiliki pedoman dan kode etik (*Board Charter*). Pedoman tersebut berlandaskan pada Undang-undang No. 40 tahun 2007 tentang Perseroan Terbatas, Peraturan Otoritas Jasa Keuangan No. 33/POJK.04/2014 tentang Direksi dan Dewan Komisaris Emiten atau Perusahaan Publik, Anggaran Dasar Perseroan serta peraturan perundang-undangan lain yang relevan. Pedoman Direksi memuat:

1. Landasan Hukum;
2. Deskripsi Tugas, Tanggung Jawab, dan Wewenang;
3. Nilai-nilai;
4. Waktu Kerja;
5. Kebijakan Rapat;
6. Pelaporan dan Pertanggungjawaban;
7. Benturan Kepentingan;
8. Fungsi Nominasi yang Dilakukan oleh Dewan Komisaris; dan
9. Penutupan.

TUGAS DAN TANGGUNG JAWAB

Direksi memiliki tugas dan tanggung jawab secara kolegal yaitu memimpin dan mengelola Perseroan untuk mencapai tujuan yang telah ditetapkan. Direksi juga bertanggung jawab mengelola serta memastikan bahwa aset Perseroan digunakan hanya untuk kepentingan Perseroan. Pelaksanaan tugas dan tanggung jawab Direksi disesuaikan dengan amanat Anggaran Dasar Perseroan dan kondisi internal serta eksternal.

Selain tugas kolegal tersebut, masing-masing Direksi Perseroan mengemban tugas dan tanggung jawab khusus, yaitu:

The Board of Directors is the organ in charge of carrying out and being responsible for the management in the interests of the Company. The implementation of the management is carried out in accordance with the purposes and objectives of the Company as stipulated in the articles of association.

The Board of Directors acts carefully, prudently, and by considering various important aspects that are relevant to the implementation of their duties. The Board of Directors uses its authority solely in the interests of the Company.

BOARD OF DIRECTORS CHARTER

In carrying out its functions and responsibilities, the Company's Board of Directors has guidelines and a code of conduct (*Board Charter*). The guidelines are based on Law No. 40 of 2007 on Limited Liability Companies, Financial Services Authority Regulation No. 33/POJK.04/2014 on the Board of Directors and Board of Commissioners of Issuers or Public Companies, as well as the Company's Articles of Association. The Board of Directors Guidelines contain the following:

1. Legal Framework;
2. Description of Duties, Responsibilities, and Authority;
3. Corporate Values;
4. Working Hours;
5. Meeting Policy;
6. Reporting and Accountability;
7. Conflicts of Interest;
8. The Board of Commissioners is in charge of the nomination process; and
9. Closing.

DUTIES AND RESPONSIBILITIES

The Board of Directors has collegiate duties and responsibilities, i.e., to lead and manage the Company to achieve the established goals. The Board of Directors is also responsible for managing and ensuring that the Company's assets are used only in the interests of the Company. The implementation of the Board of Directors' duties and responsibilities is tailored to the mandate of the Company's Articles of Association as well as internal and external conditions.

In addition to the collegial duty, each member of the Board of Directors has the following individual duties and responsibilities:

INDEPENDENSI DAN HUBUNGAN AFILIASI

Independensi Direksi bertujuan agar setiap keputusan dalam pengelolaan Perseroan dilakukan secara objektif dan bertujuan semata-mata untuk kepentingan Perseroan. Segala bentuk konflik kepentingan sesama anggota Direksi, Dewan Komisaris, Pemegang Saham Pengendali, dan pihak eksternal berkepentingan lainnya harus dihindari. Oleh karena itu, Perseroan mengatur hubungan afiliasi antar Direksi sebagaimana disajikan dalam tabel berikut:

INDEPENDENCY AND AFFILIATED RELATIONS

The independence of the Board of Directors aims to ensure that every decision in the management of the Company is carried out objectively and solely in the interests of the Company. All forms of conflict of interest among members of the Board of Directors, Board of Commissioners, Controlling Shareholders, and other externally interested parties must be avoided. Therefore, the Company regulates the affiliation relationship between the Board of Directors as presented in the following table:

ORIENTASI BAGI DIREKSI BARU

Program orientasi bagi Direksi baru pada prinsipnya adalah pengenalan terhadap Perseroan, yang dikoordinasikan oleh Sekretaris Perusahaan. Pelaksanaan program orientasi bagi Direksi baru dilakukan setelah pengangkatan Direksi baru dalam RUPS.

Pada tahun buku 2022, ada 3 (tiga) anggota Direksi baru. Dalam program pengenalan tersebut, Perseroan melalui tim kerja yang terkait mempresentasikan materi yang relevan bagi anggota Direksi baru. Di antaranya meliputi Tata Kelola Perusahaan, Kinerja, Manajemen Risiko, dan topik-topik yang relevan dengan bidang tugas Direksi baru.

PELAKSANAAN TUGAS

Sepanjang tahun 2022, Direksi Perseroan merealisasikan tugas sebagai berikut:

1. Melaksanakan rencana kerja dan anggaran Perseroan;
2. Menjalankan kebijakan strategis dalam mencapai pertumbuhan kinerja, antara lain dalam hal kesehatan dan keselamatan kerja (K3), profitabilitas, keandalan pabrik, dan keunggulan kompetitif;
3. Memastikan pencapaian proyek yang sedang berjalan berlangsung sesuai rencana dan target yang telah ditetapkan;
4. Menyusun Laporan Keuangan periode tahun buku 2021;
5. Memastikan penerapan pengendalian internal, manajemen risiko, dan kepatuhan terhadap peraturan perundang-undangan; dan
6. Mengevaluasi keorganisasian, serta menyiapkan SDM dan TI yang mendukung perkembangan bisnis Perseroan;
7. Memonitor pencapaian *Corporate Scorecard* secara berkala.

RAPAT DIREKSI

Kebijakan

Kebijakan rapat Direksi, antara lain mengacu pada Peraturan OJK No. 33/POJK.04/2014 tentang Direksi dan Dewan Komisaris Emiten atau Perusahaan Publik. Dalam setiap bulan, Direksi wajib menyelenggarakan rapat sedikitnya 1 (satu) kali. Rapat tersebut dapat dilangsungkan apabila dihadiri mayoritas dari seluruh anggota Direksi.

Selain itu, Direksi wajib mengadakan rapat bersama Dewan Komisaris secara berkala, paling kurang 1 (satu) kali dalam 4 (empat) bulan. Kehadiran anggota Direksi dalam rapat-rapat tersebut wajib diungkapkan dalam laporan tahunan.

ORIENTATION FOR NEW DIRECTORS

The orientation program for new directors is principally an introduction to the Company, which is coordinated by the Corporate Secretary. Implementation of the orientation program for new Directors is carried out after the appointment of new Directors at the GMS.

In the 2022 financial year, there were 3 (three) new members of the Board of Directors. In the induction program, the Company through the relevant team presented material that was relevant to the new members of the Board of Directors. These include Corporate Governance, Performance, Risk Management, and topics relevant to the new Board of Directors' duties.

IMPLEMENTATION OF DUTIES

During 2022, the Company's Board of Directors carried out the following duties:

1. Carrying out the Company's work plan and budget;
2. Implementing strategic policies to improve performance, including occupational health and safety (OHS), profitability, plant reliability, and competitive advantage;
3. Ensuring the achievement of the ongoing projects according to the established plans and targets;
4. Preparing Financial Statements for the 2021 fiscal year;
5. Ensuring the application of internal control, risk management, and compliance with the prevailing regulations; and
6. Evaluating organization, as well as preparing HR and IT that support the Company's business development;
7. Monitoring the achievement of the Corporate Scorecard regularly.

BOARD OF DIRECTORS MEETING

Policy

The Board of Directors meeting policy, refers to OJK Regulation No. 33/POJK.04/2014 on the Board of Directors and Board of Commissioners of Issuers or Public Companies. Every month, the Board of Directors is required to hold a meeting at least once. The meeting can be held if attended by a majority of all members of the Board of Directors.

In addition, the Board of Directors is required to hold regular meetings with the Board of Commissioners, at least once every 4 (four) months. The presence of members of the Board of Directors in these meetings must be disclosed in the annual report.

Frekuensi dan Kehadiran Rapat

Selama tahun 2022, Direksi telah melaksanakan rapat internal sebanyak 12 kali, rapat gabungan dengan Dewan Komisaris 4 (empat) kali serta pelaksanaan RUPS 2 (dua) kali. Rincian frekuensi dan tingkat kehadiran Dewan Komisaris dalam rapat diungkapkan dalam tabel di bawah ini:

Meeting Frequency and Attendance

During 2022, the Board of Directors has held 12 internal meetings, 4 (four) joint meetings with the Board of Commissioners, and the GMS 2 (two) times. Details on the frequency and attendance rate of the Board of Directors in meetings are disclosed in the following table:

PENGEMBANGAN KOMPETENSI DIREKSI**Kebijakan**

Pengembangan kompetensi Direksi merupakan bagian dari upaya untuk mendukung pencapaian kinerja Perseroan. Kondisi dimaksud tidak terbatas pada perkembangan industri, tetapi juga terkait dengan informasi regulasi atau lainnya. Karena itu, Perseroan telah memiliki kebijakan untuk memberikan dukungan bagi kegiatan pengembangan kompetensi Direksi.

Realisasi

Seiring dengan perkembangan kegiatan usaha yang semakin dinamis, sepanjang tahun 2022 tidak ada anggota Direksi yang mengikuti kegiatan pelatihan dan pengembangan kompetensi.

COMPETENCY DEVELOPMENT OF THE BOARD OF DIRECTORS**Policy**

The competency development of the Board of Directors is part of efforts to support the Company's performance. These conditions are not only related to the development industry, but also to regulatory information or other factors. Therefore, the Company provides support for the development activities under the competence of the Board of Directors.

Realization

Along with the increasingly dynamic development of business activities, no members of the Board of Directors participated in competency training and development activities throughout 2022.

PENILAIAN KINERJA ORGAN PERSEROAN

PERFORMANCE ASSESSMENT OF THE COMPANY'S ORGANS

PENILAIAN DEWAN KOMISARIS DAN DIREKSI

Prosedur dan Pelaksanaan Penilaian

Perseroan telah menetapkan mekanisme untuk menilai kinerja Dewan Komisaris dan Direksi. Mekanisme tersebut menetapkan bahwa penilaian kinerja Dewan Komisaris dilaksanakan secara mandiri oleh Dewan Komisaris (*self assessment*).

Sedangkan penilaian kinerja Direksi dilakukan oleh Dewan Komisaris Perseroan. Hasil penilaian kinerja Dewan Komisaris dan Direksi kemudian dilaporkan pada RUPS sebagai bagian yang tidak terpisahkan dari Laporan Pengawasan Dewan Komisaris untuk memperoleh persetujuan dan pembebasan tugas atas periode yang dilaporkan.

Kriteria Penilaian

1. Pencapaian kinerja anggota Dewan Komisaris dan Direksi sesuai dengan target Perseroan yang telah ditetapkan;
2. Pencapaian *scorecard* Perseroan;
3. Implementasi GCG;
4. Kepatuhan terhadap peraturan perundang-undangan yang berlaku serta kebijakan Perseroan;
5. Pelaksanaan tugas dan tanggung jawab;
6. Komitmen dalam meningkatkan nilai Perseroan bagi Pemegang Saham; dan
7. Tingkat kehadiran dalam rapat internal maupun rapat gabungan Dewan Komisaris, Direksi, beserta dengan Komite-komite Pendukung di bawah Dewan Komisaris.

Hasil Penilaian

Penilaian kinerja Dewan Komisaris dan Direksi Perseroan tercermin dari kinerja Perseroan untuk tahun buku 2022. Pada tahun buku tersebut Dewan Komisaris telah menjalankan tugas dan fungsi dengan sangat baik, terutama berkenaan dengan pengawasan serta pemberian nasihat kepada Direksi. Selain itu, evaluasi juga diberikan.

Begitu pun halnya dengan Direksi. Organ Perseroan ini telah mengimplementasikan seluruh rencana strategis yang ditetapkan pada tahun buku. Seluruh tugas telah dilaksanakan secara penuh, sehingga menghasilkan keputusan-keputusan yang efektif dalam mengatasi risiko yang dihadapi Perseroan serta menghasilkan kinerja operasional dan keuangan yang kuat.

ASSESSMENT OF THE BOARD OF COMMISSIONERS AND THE BOARD OF DIRECTORS

Assessment Procedure and Implementation

The Company has determined the performance assessment mechanism for the Board of Commissioners and Board of Directors. The mechanism stipulates that the performance assessment of the Board of Commissioners is carried out independently by the Board of Commissioners (*self-assessment*).

Moreover, the performance assessment of the Board of Directors is carried out by the Board of Commissioners. The results of the performance assessment of the Board of Commissioners and Board of Directors will be reported at the GMS as an integrated part of the Board of Commissioners' Supervision Report to obtain approval and discharge the duties over the reported period.

Assessment Criteria

1. Performance achievement of the Board of Commissioners and Board of Directors in accordance with the Company's set targets;
2. Achievement of the Company's *scorecard*;
3. GCG implementation;
4. Compliance with the prevailing regulations and Company policies;
5. Implementation of duties and responsibilities;
6. Commitment in increasing Company value for Shareholders; and
7. Attendance level at internal meetings and joint meetings of the Board of Commissioners, Board of Directors, as well as with the Supporting Committees under the Board of Commissioners.

Assessment Result

The performance assessment of the Company's Board of Commissioners and Board of Directors is reflected in the Company's performance for the 2022 financial year. In that financial year, the Board of Commissioners has carried out its duties and functions very well, especially with regard to supervising and providing advice to the Board of Directors. In addition, an evaluation was also given.

Likewise with the Directors. This organ of the Company has implemented all the strategic plans set out in the financial year. All tasks have been carried out in full, resulting in effective decisions in overcoming the risks faced by the Company and strong operational and financial performance.

PENILAIAN KOMITE DI BAWAH DEWAN KOMISARIS

Hingga berakhirnya tahun buku 2022, Perseroan memiliki 2 (dua) komite yang menjadi organ di bawah Dewan Komisaris: Komite Audit dan Komite Remunerasi. Berikut, hasil penilaian pelaksanaan tugas komite-komite tersebut.

Komite Audit

Kriteria Penilaian

Dalam melaksanakan penilaian, Dewan Komisaris mengacu pada kriteria yang telah ditetapkan yaitu:

1. Kehadiran dalam rapat Komite Audit;
2. Dukungan terhadap implementasi tata kelola perusahaan, efisiensi dan efektivitas kegiatan pelaporan keuangan dan manajemen risiko;
3. Penelaahan proses dan operasi bisnis, serta kepatuhan pada peraturan-peraturan yang berlaku.

Hasil Penilaian

Mengacu pada dasar penilaian tersebut, Dewan Komisaris memandang bahwa Komite Audit telah bekerja sesuai tugas dan fungsinya serta program yang dibuat di awal tahun. Dengan demikian, Dewan Komisaris memberikan penilaian "Baik" atas kinerjanya pada tahun 2022. Komite ini telah berperan maksimal sebagai organ Dewan Komisaris, khususnya dalam memberikan rekomendasi di bidang audit, yang kemudian ditindaklanjuti menjadi kebijakan Dewan Komisaris untuk diteruskan kepada manajemen.

Komite Remunerasi

Kriteria Penilaian

Dewan Komisaris telah memiliki kriteria penilaian untuk Komite Remunerasi, yaitu:

1. Kehadiran dalam rapat Komite Remunerasi;
2. Dukungan untuk implementasi tata kelola perusahaan yang baik;
3. Struktur dan praktik remunerasi, serta kesesuaian dengan peraturan yang ada.

Hasil Penilaian

Setelah melakukan evaluasi sesuai dengan pertimbangan dasar penilaian, Dewan Komisaris menilai bahwa kinerja Komite Remunerasi sepanjang tahun 2022 adalah "Baik". Komite ini, terutama telah membantu mengevaluasi dan merumuskan remunerasi dalam organisasi Perseroan, sehingga menjadi rekomendasi Dewan Komisaris kepada manajemen untuk ditindaklanjuti.

PENILAIAN KOMITE DI BAWAH DIREKSI

Hingga akhir tahun buku 2022, Direksi Perseroan tidak memiliki komite di bawahnya. Dengan demikian, tidak ada hasil penilaian yang dapat disampaikan.

ASSESSMENT OF COMMITTEES UNDER THE BOARD OF COMMISSIONERS

As of the end of the 2022 fiscal year, the Company has 2 (two) committees that are organs under the Board of Commissioners: the Audit Committee and the Remuneration Committee. The following are the results of the assessment of the implementation of the duties of these committees.

Audit Committee

Assessment Criteria

In conducting the assessment, the Board of Commissioners refers to the established criteria, namely:

1. Attendance at Audit Committee meetings;
2. Support the implementation of corporate governance, the efficiency and effectiveness of financial reporting activities, and risk management; and
3. Review of business processes and operations, as well as compliance with the applicable regulations.

Assessment Results

Based on this assessment, the Board of Commissioners believes that the Audit Committee performed in accordance with its duties and functions, as well as the programs established at the start of the year. As a result, the Board of Commissioners assessed its performance in 2022 as "Good" rating. This committee has played an important role as an organ of the Board of Commissioners, particularly in providing auditing recommendations, which were then translated into Board of Commissioners policies and forwarded to management.

Remuneration Committee

Assessment Criteria

The Board of Commissioners has established the assessment criteria for the Remuneration Committee, namely:

1. Attendance at Remuneration Committee meetings;
2. Support for the implementation of good corporate governance; and
3. Remuneration structure and practice, as well as compliance with existing regulations.

Assessment Results

After conducting an evaluation in accordance with the basic considerations of the assessment, the Board of Commissioners considers that the performance of the Remuneration Committee throughout 2022 is "Good". This committee has especially helped evaluate and formulate remuneration within the Company's organization so that it becomes a recommendation from the Board of Commissioners to management for follow-up.

ASSESSMENT OF COMMITTEES UNDER THE BOARD OF DIRECTORS

Until the end of the 2022 financial year, the Company's Board of Directors does not have a committee under them. Thus, no assessment results can be submitted.

NOMINASI DAN REMUNERASI DEWAN KOMISARIS DAN DIREKSI

NOMINATION AND REMUNERATION OF THE BOARD OF COMMISSIONERS AND THE BOARD OF DIRECTORS

NOMINASI DEWAN KOMISARIS DAN DIREKSI

Kebijakan

Kebijakan Perseroan dalam nominasi Dewan Komisaris dan Direksi mengacu pada Peraturan OJK No. 33/POJK.04/2014 tentang Direksi dan Dewan Komisaris Emiten atau Perusahaan Publik. Regulasi tersebut menegaskan bahwa Dewan Komisaris dan Direksi diangkat dan diberhentikan oleh Rapat Umum Pemegang Saham (RUPS).

Pihak yang diangkat sebagai Dewan Komisaris dan Direksi adalah orang perseorangan yang memenuhi syarat saat diangkat dan selama menjabat. Kendati demikian, Dewan Komisaris dan Direksi dapat mengajukan pengunduran diri sebelum masa jabatannya berakhir yang kemudian diputuskan oleh RUPS.

Prosedur Nominasi

Prosedur nominasi untuk calon Dewan Komisaris dan Direksi diawali oleh usulan pemegang saham yang memiliki saham 10% atau lebih. Usulan tersebut disampaikan ke Direksi. Selanjutnya, Direksi meminta rekomendasi dari Fungsi Nominasi yang saat ini dijalankan oleh Dewan Komisaris. Kemudian Dewan Komisaris mengeluarkan rekomendasi tertulis untuk diajukan ke RUPS.

Proses nominasi yang berlaku di Perseroan ini telah sejalan dengan Peraturan OJK No. 33/POJK.04/2014 yang menyebutkan: Usulan pengangkatan, pemberhentian, dan/atau penggantian anggota Direksi kepada RUPS harus memperhatikan rekomendasi dari Dewan Komisaris atau komite yang menjalankan fungsi nominasi.

NOMINATION OF THE BOARD OF COMMISSIONERS AND BOARD OF DIRECTORS

Policy

The Company's policy in the nomination of the Board of Commissioners and Board of Directors refers to OJK Regulation No. 33/POJK.04/2014 on the Board of Directors and the Board of Commissioners of Issuers or Public Companies. The regulation confirms that the Board of Commissioners and Board of Directors are appointed and dismissed by the General Meeting of Shareholders (GMS).

Individuals who are appointed to the Board of Commissioners and the Board of Directors must meet the requirements both when they are appointed and during their term of office. However, the Board of Commissioners and the Board of Directors may submit their resignations prior to the end of their terms of office, which is then decided by the GMS.

Nomination Procedure

The nomination procedure for candidates for the Board of Commissioners and Board of Directors starts with the proposal of shareholders with 10% or more shares. The proposal is submitted to the Board of Directors. Furthermore, the Board of Directors requests recommendations from the Nomination Function, which is currently carried out by the Board of Commissioners. Subsequently, the Board of Commissioners issues a written recommendation to be submitted to the GMS.

The nomination process that applies to the Company is in line with OJK Regulation No. 33/POJK.04/2014, which states: Proposals for the appointment, dismissal, and/or replacement of members of the Board of Directors to the GMS must take into account the recommendations of the Board of Commissioners or committees conducting the nomination function.

REMUNERASI DEWAN KOMISARIS DAN DIREKSI

Kebijakan

Kebijakan pemberian remunerasi bagi Dewan Komisaris dan Direksi di lingkungan Perseroan mengacu pada Undang-Undang No. 40 Tahun 2007 mengenai Perseroan Terbatas, yang penetapannya mempertimbangkan sejumlah aspek, antara lain:

1. Kinerja keuangan dan pencapaian *Corporate Scorecard* Perseroan;
2. Prestasi kerja individu;
3. Kewajaran dengan *peer* perusahaan lainnya dalam industri sejenis; dan
4. Pertimbangan sasaran dan strategi jangka panjang Perseroan.

Remunerasi Dewan Komisaris dan Direksi ditentukan oleh RUPS atau melalui pelimpahan wewenang RUPS kepada Dewan Komisaris. Dalam mengambil keputusan terkait struktur dan besaran remunerasi, RUPS mempertimbangkan masukan dari Komite Remunerasi yang disampaikan oleh Dewan Komisaris.

Dasar pertimbangan Komite Remunerasi dalam memberikan masukan terkait remunerasi Dewan Komisaris dan Direksi adalah:

1. Remunerasi yang berlaku pada industri yang sesuai dengan kegiatan usaha Perseroan serta usaha sejenis yang sama skalanya dalam industrinya;
2. Tugas, tanggung jawab, dan wewenang anggota Dewan Komisaris dan Direksi yang dikaitkan dengan pencapaian tujuan dan kinerja Perseroan;
3. Pencapaian target kinerja masing-masing anggota Dewan Komisaris dan Direksi; dan
4. Keseimbangan antara tunjangan yang bersifat tetap dan variabel.

REMUNERATION OF THE BOARD OF COMMISSIONERS AND BOARD OF DIRECTORS

Policy

The remuneration policy for the Board of Commissioners and Board of Directors within the Company refers to Law No. 40 of 2007 on Limited Liability Companies, the stipulation of which takes into account a number of aspects, including:

1. The Company's financial performance and Corporate Scorecard achievement;
2. Individual work accomplishment;
3. Fairness with other peer companies in similar industries; and
4. Consideration on the Company's long-term goals and strategies.

The remuneration for the Board of Commissioners and the Board of Directors is determined by the GMS or by delegating the authority of the GMS to the Board of Commissioners. In making decisions on remuneration structure and amount, the GMS considers the recommendation from the Remuneration Committee that has been submitted by the Board of Commissioners.

The basis of the consideration by the Remuneration Committee in providing a recommendation for the remuneration of the Board of Commissioners and Board of Directors is as follows:

1. The current remuneration in the industry, which is relevant to the Company's business activities as well as similar businesses with the same scale in the industry;
2. Duties, responsibilities, and authority of members of the Board of Commissioners and Board of Directors that are related to the Company's goals and performance achievement;
3. Performance targets of each member of the Board of Commissioners and Board of Directors; and
4. Balance between fixed and variable allowances.

Prosedur

Prosedur penetapan remunerasi Dewan Komisaris dan Direksi sejak dari pengusulan hingga penetapan dijelaskan melalui skema di bawah ini.

Procedure

The procedure to determine the remuneration for the Board of Commissioners and the Board of Directors, from proposal to determination, is described in the following scheme.

AKUNTAN PUBLIK

PUBLIC ACCOUNTANT

KEBIJAKAN

Dalam menentukan auditor eksternal, Dewan Komisaris mengajukan kandidat untuk dibahas diputuskan oleh Rapat Umum Pemegang Saham. Mengingat prosesnya yang berjenjang, Perseroan menjamin bahwa akuntan publik yang ditunjuk dapat memberikan keyakinan atas keakuratan dan kelengkapan Laporan Keuangan Perseroan sesuai Standar Akuntansi Keuangan (PSAK). Akuntan Publik harus merupakan pihak eksternal yang independen dan telah memenuhi persyaratan untuk melaksanakan audit.

POLICY

In determining the external auditor, the Board of Commissioners proposes candidates to be discussed and decided by the General Meeting of Shareholders. Given the tiered process, the Company guarantees that the appointed public accountant can provide confidence in the accuracy and completeness of the Company's Financial Statements in accordance with Financial Accounting Standards (PSAK). Public Accountants must be independent external parties and have met the requirements to conduct audits.

SISTEM PENGENDALIAN INTERNAL

INTERNAL CONTROL SYSTEM

Pelaksanaan Sistem Pengendalian Internal (SPI) di lingkungan Perseroan bertujuan agar dapat mengamankan investasi dan aset Perseroan serta menjaga pencapaian kinerja yang baik secara efektif. Pengendalian internal juga dibangun untuk meningkatkan fungsi pengendalian yang terintegrasi (*integrated control system*) antar seluruh elemen dan entitas Perseroan.

Upaya tersebut diperlukan guna memastikan bahwa kegiatan operasional sudah dijalankan dengan baik. Selain itu, SPI dapat meningkatkan nilai tambah melalui efektivitas pelaksanaan manajemen risiko dan prinsip-prinsip GCG.

The establishment of an Internal Control System (SPI) within the Company is aimed at functioning effectively in securing the Company's investments and assets as well as maintaining good performance. Internal control was also established to improve the integrated control system between all elements and entities of the Company.

These efforts are required to ensure that operational activities are carried out in a proper manner. In addition, the Internal Control System can increase added value through the effective implementation of risk management and GCG principles.

IMPLEMENTASI PENGENDALIAN INTERNAL

Penerapan sistem pengendalian internal di lingkungan Perseroan merujuk pada standar yang diberlakukan secara internasional, yaitu yang berbasis *Committee of Sponsoring Organizations of the Treadway Commission* (COSO). Sistem pengendalian tersebut dalam bentuk pengendalian lingkungan, risiko, keuangan, operasional, serta kepatuhan terhadap peraturan perundang-undangan yang berlaku.

Uraian keterkaitan dengan COSO mencakup:

Rincian Pengendalian Internal Details of Internal Control

IMPLEMENTATION OF INTERNAL CONTROL

The implementation of the internal control system within the Company refers to internationally applied standards, i.e., those based on the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The control system is in the form of environmental, risk, financial, and operational control, as well as compliance with the prevailing regulations.

The description of the relationship with COSO includes the following:

Tema Theme	Uraian Description	
Lingkungan Pengendalian Control Environment	Pengendalian internal didasari nilai-nilai dalam Kode Etik yang dijalankan oleh seluruh karyawan, termasuk pejabat dan pengurus Perseroan, tanpa terkecuali, yang didukung dengan penjabaran fungsi dan tugas yang jelas bagi masing-masing karyawan Perseroan. Implementasi Kode Etik sebagai budaya perusahaan ini ditujukan untuk membangun pola kepemimpinan dan memperkuat sinergi organisasi, serta meningkatkan <i>sustainability competitive growth</i> berdasarkan nilai-nilai yang telah dirumuskan.	Internal control is based on the values in the Code of Conduct that are implemented without exception by all employees, including the Company's officers and executives, and is supported by a clear description of functions and duties for each employee of the Company. Implementation of the Code of Conduct as the corporate culture is intended to build the leadership cycle, strengthen organizational synergy, and increase sustainable competitive growth based on the formulated values.
	Perseroan menetapkan, mengawasi, serta menetapkan struktur, jalur pelaporan, wewenang dan tanggung jawab yang sesuai bagi setiap organ tata kelola guna mencapai tujuan yang telah ditetapkan.	The Company stipulates, supervises, and establishes appropriate structures, reporting mechanisms, authority, and responsibilities for every governance organ to achieve the designated objectives.
	Perseroan memastikan terselenggaranya koordinasi dan kerja sama yang efektif dengan pihak internal maupun pihak eksternal.	The Company ensures effective coordination and cooperation with internal and external parties.

Tema Theme	Uraian Description	
Penilaian Risiko Risk Assessment	Perseroan mengidentifikasi, menganalisis, dan mengelola risiko yang muncul, baik dari internal maupun eksternal, dengan mekanisme yang telah ditentukan. Pengelolaan risiko ini juga mempertimbangkan risiko yang dihadapi Entitas Anak sebagai unit bisnis yang terintegrasi dan terkonsolidasi dengan Perseroan.	The Company identifies, analyzes, and manages emerging risks, both internal and external, with a predetermined mechanism. This risk management also takes into account the risks that subsidiaries face as integrated and consolidated business units with the Company.
	Dalam mengelola risiko, Perseroan menerapkan kebijakan anti-fraud untuk menghindari setiap potensi benturan kepentingan yang dapat berdampak negatif bagi Perseroan.	In managing the risk, the Company has implemented an anti-fraud policy to avoid any potential conflict of interest that may be detrimental to the Company.
	Perseroan telah menetapkan sistem pengendalian internal yang sesuai dengan kegiatan usaha yang dijalankan, yang dikembangkan sesuai dengan peraturan dan <i>best practices</i> yang berlaku di industri yang sejenis.	The Company has established an internal control system in accordance with the implemented business activities, which are developed according to the prevailing regulations and best practices in similar industries.
	Pengendalian dilaksanakan secara bersama-sama oleh Dewan Komisaris, Direksi, Komite Audit, dan Unit Audit Internal, dengan melibatkan jajaran manajemen lainnya agar sistem pengendalian internal dapat berjalan secara komprehensif. Dewan Komisaris bertanggung jawab melaksanakan fungsi pengawasan terhadap kebijakan dan jalannya pengurusan Perseroan, dengan dibantu oleh Komite Audit. Direksi bertanggung jawab untuk membangun dan melaksanakan sistem pengendalian internal. Sedangkan, Unit Audit Internal berperan untuk mengevaluasi secara independen dan obyektif terhadap sistem pengendalian internal yang diterapkan oleh manajemen.	The control is implemented altogether by the Board of Commissioners, Board of Directors, Audit Committee, and Internal Audit Unit, involving other management levels to enable the internal control system to run in a comprehensive manner. The Board of Commissioners is responsible for performing the supervisory function over the implementation of the Company's policies and management, assisted by the Audit Committee. The Board of Directors is responsible for developing and implementing the internal control system. Meanwhile, the Internal Audit Unit is in charge of evaluating the internal control system applied by the management independently and objectively.
	Salah satu aspek pengendalian internal tersebut termasuk pengendalian atas sistem informasi dan teknologi yang memadai untuk mencapai tujuan jangka pendek maupun jangka panjang Perseroan.	Control over an adequate information and technology system to achieve the Company's short and long-term goals is one aspect of internal control.
	Pengendalian internal ini sejalan dan berkontribusi dalam mitigasi risiko yang dijalankan Perseroan.	This internal control is in line and contributes to the risk mitigation that is implemented by the Company.
Informasi dan Komunikasi Information and Communication	Perseroan memiliki kebijakan terkait TI yang memberikan kerangka acuan bagi setiap proses maupun unit yang terkait dengan penyelenggaraan TI.	The Company has an IT-related policy that provides a framework for every process or unit related to IT implementation.
	Setiap kebijakan terkait TI diterapkan secara tepat dan konsisten sehingga Perseroan memperoleh informasi yang relevan dan berkualitas untuk mendukung berjalannya komponen lain dalam pengendalian internal dan mendukung pengambilan keputusan yang tepat.	Every IT-related policy is implemented appropriately and consistently to enable the Company to acquire relevant and high-quality information to support the implementation of other components of internal control and to support appropriate decision-making.
	Perseroan juga melakukan komunikasi dengan auditor eksternal mengenai hal-hal yang mempengaruhi fungsi komponen pengendalian internal lainnya.	The Company also engages in communication with external auditors concerning several issues that affect the functions of other internal control components.
	Pengendalian internal juga telah memfasilitasi penyajian laporan mengenai kegiatan operasional dan keuangan sesuai dengan peraturan dan ketentuan yang berlaku. Laporan Keuangan, Laporan Tahunan, serta laporan dan informasi lain yang disajikan Perseroan kepada Pemegang Saham, regulator, dan pemangku kepentingan lainnya dapat dipertanggungjawabkan kebenarannya dan dapat diandalkan.	The internal controls have also facilitated the presentation of the operational and financial activity reports in accordance with the prevailing rules and regulations. The financial statements and annual reports, as well as other reports and information presented by the Company to the Shareholders, regulators, and other stakeholders are accountable and reliable.

Tema Theme	Uraian Description	
Pemantauan Monitoring	Implementasi pengendalian internal dievaluasi secara rutin dan menyeluruh untuk memastikan komponen-komponen pengendalian internal Perseroan telah memadai dan telah berfungsi dengan baik.	The implementation of internal control is evaluated regularly and thoroughly to ensure the internal control components have been adequate and have functioned properly.
	Unit Audit Internal dapat memberikan rekomendasi kepada manajemen untuk meningkatkan keandalannya dan/atau efektivitas pelaksanaannya. Evaluasi juga dapat dilakukan oleh Komite Audit dengan mempertimbangkan laporan kegiatan Unit Audit Internal dan pemantauan atas proses audit laporan keuangan oleh auditor eksternal.	The Internal Audit Unit is eligible to provide recommendations to the management to improve the reliability and/or effectiveness of the implementation. The evaluation can also be carried out by the Audit Committee, taking into account the Internal Audit Unit activity report and monitoring the financial statements audit conducted by external auditors.
	Untuk menjamin independensi dan keakuratannya, kajian atas implementasi pengendalian internal Perseroan dapat dilakukan oleh eksternal audit. Hasil evaluasi eksternal audit disampaikan melalui <i>Management Letter</i> kepada Direksi.	To ensure independence and accuracy, a review of the Company's internal control implementation can be carried out by an external audit. The management letter presents the results of the external audit evaluation to the board of directors.
	Seluruh hasil evaluasi dikomunikasikan dengan Dewan Komisaris dan Direksi, serta pihak-pihak lain yang terkait agar dapat diambil tindakan korektif.	All of the evaluation results shall be communicated with the Board of Commissioners and Board of Directors, as well as other relevant parties, to take corrective action.

TINJAUAN ATAS EFEKTIVITAS SISTEM PENGENDALIAN INTERNAL

Perseroan mengevaluasi sistem pengendalian internal secara berkala yang dilakukan oleh Unit Audit Internal dan Kantor Akuntan Publik (KAP). Hasil evaluasinya selalu dikomunikasikan ke pihak manajemen.

Unit Audit Internal bertugas mengomunikasikan hasil audit atas pengendalian internal, baik pada suatu unit-unit atau aktivitas tertentu, dalam laporan hasil audit yang disampaikan kepada Presiden Direktur, Direktur terkait, dan Komite Audit. Sedangkan KAP mengomunikasikan hasil evaluasi pengendalian internal Perseroan melalui penyampaian *management letter* kepada Direksi.

Pemantauan pengendalian internal dilakukan sepanjang waktu melalui tindak lanjut atas hasil audit internal dan eksternal. Komite Audit secara khusus memonitor tindak lanjut atas hasil audit yang berdampak strategis terhadap efektivitas sistem pengendalian internal Perseroan.

Berdasarkan hasil audit internal yang sudah dilakukan selama tahun 2022, Unit Audit Internal menilai bahwa sistem pengendalian internal yang ada sudah memadai dan cukup efektif. Namun demikian masih diperlukan sejumlah perbaikan untuk meningkatkan efektivitas dari sistem pengendalian internal tersebut, yaitu dengan menindaklanjuti masukan baik dari hasil audit internal maupun eksternal yang telah disampaikan sebelumnya.

EVALUATION ON THE EFFECTIVENESS OF THE INTERNAL CONTROL SYSTEM

The Company evaluates its internal control system regularly, a process carried out by the Internal Audit Unit and the Public Accounting Firm (KAP). The results of the evaluation are always communicated to the management.

The Internal Audit Unit is assigned to communicate the audit results on internal control, both in certain units or certain activities, in the audit report that is submitted to the President Director, related Directors, and the Audit Committee. Meanwhile, the KAP communicates the results of the evaluation of the Company's internal control by submitting a management letter to the Board of Directors.

The monitoring of internal control is continuously carried out through follow-up on the results of internal and external audits. The Audit Committee specifically monitors follow-up on audit results with strategic impacts on the effectiveness of the Company's internal control system.

Based on the results of internal audits conducted in 2022, the Internal Audit Unit believes that the current internal control system is adequate and quite effective. However, a number of improvements are still required to improve the effectiveness of the internal control system, specifically by following up on previously submitted inputs from both internal and external audit results.

PERNYATAAN DIREKSI DAN/ATAU DEWAN KOMISARIS ATAS KECUKUPAN SISTEM PENGENDALIAN INTERNAL

Direksi meyakini bahwa sistem pengendalian internal yang ada saat ini sudah memadai dan cukup efektif. Direksi juga percaya bahwa proses perbaikan yang berkesinambungan atas sistem pengendalian internal tetap diperlukan untuk mengantisipasi perubahan kondisi usaha Perseroan di masa yang akan datang.

STATEMENT OF THE BOARD OF DIRECTORS AND/OR BOARD OF COMMISSIONERS ON THE ADEQUACY OF THE INTERNAL CONTROL SYSTEM

The Board of Directors believes that the existing internal control system is adequate and quite effective. However, the Board of Directors also believes that a continuous improvement process for the internal control system is still needed to anticipate changes in the Company's business conditions in the future.

SISTEM MANAJEMEN RISIKO

RISK MANAGEMENT SYSTEM

GAMBARAN UMUM TENTANG SISTEM MANAJEMEN RISIKO

PT Chandra Asri Petrochemical Tbk ("Perseroan") menyadari beragam potensi risiko yang dapat mengganggu kelancaran kinerja usaha Perseroan, baik dari sisi operasional, produksi, maupun keuangan. Karena itu, Perseroan sejak dini telah mengembangkan Sistem Manajemen Risiko yang terintegrasi di tingkat korporasi dengan melibatkan masing-masing satuan kerja.

Pengembangan sistem manajemen risiko sangat penting bagi kelangsungan usaha Perseroan. Karena itu, pemutakhirannya tidak dapat dipisahkan dari strategi jangka panjang Perseroan. Hal ini bertujuan untuk mengidentifikasi semua risiko dan mengelola risiko sesuai dengan kebijakan dan *risk appetite* Perseroan.

Dalam menjalankan operasi berbagai risiko dimitigasi secara seksama untuk menghindari potensi kerugian. Perseroan juga melibatkan karyawan dalam penerapan manajemen risiko dan menyediakan kesempatan bagi karyawan untuk memberi masukan penting terkait pengambilan keputusan. Hal ini membuat manajemen beserta seluruh karyawan terlibat dalam mengimplementasikan manajemen risiko.

OVERVIEW OF THE RISK MANAGEMENT SYSTEM

PT Chandra Asri Petrochemical Tbk (the "Company") is aware of a number of potential risks that could jeopardize the smooth operation of the Company's operations, production, and finance. As a result, the Company has developed an integrated risk management system at the corporate level from the start, involving each work unit.

The development of a risk management system will be highly beneficial to the Company's business piracy. Therefore, the update cannot be separated from Company's long-term strategy. It aims to identify and manage all risks in accordance with the Company's policies and risk appetite.

In carrying out operations, various risks are carefully mitigated to avoid potential losses. The Company also involves employees in the implementation of risk management and provides opportunities for employees to provide important inputs relating to decision-making. This makes management and all employees involved in the implementation of risk management.

JENIS RISIKO DAN CARA PENGELOLAANNYA

Perseroan memetakan risiko dengan melihat faktor-faktor internal dan eksternal yang mempertimbangkan dampak dan kemungkinan terjadinya risiko dengan kerangka kinerja yang melihat risiko tersebut dan mempertimbangkan dampak holistik pada ketahanan bisnis, menuju perencanaan skenario dan pengambilan keputusan yang mendukung.

Pada tahun 2022, Perseroan telah mengidentifikasi sejumlah risiko yang berpotensi mempengaruhi kinerja usaha dan bahkan kelangsungan bisnis Perseroan. Risiko tersebut mencakup risiko usaha, operasional, dan keuangan. Garis besar faktor-faktor risiko dan mitigasi utama disampaikan dalam tabel berikut ini.

TYPES OF RISKS AND HOW TO MANAGE THEM

The Company maps risk by looking at internal and external factors that consider the impact and possibility of risks occurring, as well as a performance framework that looks at these risks and considers the overall impact on business resilience, as well as scenario planning and decision-making that supports it.

In 2022, the Company has identified a number of risks that have the potential to affect business performance and even the Company's business continuity. These risks include business, operational, and financial risks. An outline of the main risks and mitigation factors is presented in the following table.

Profil Risiko dan Mitigasi Risk Profile and Mitigation

No.	Jenis Risiko Type of Risk	Upaya Mitigasi Mitigation Efforts
1.	Pandemi COVID-19 Sebagai obyek vital nasional, Chandra Asri memiliki peran strategis dimana produknya menjadi kebutuhan bagi sektor lain. Karenanya, penting bagi Perseroan untuk tetap beroperasi di tengah tantangan Pandemi COVID-19. Pandemi COVID-19 ini berpotensi untuk menghambat operasional karena penyebaran virusnya. Tahun ini, Perseroan juga menyiapkan diri untuk mengambil langkah-langkah yang harus dilakukan setelah pandemic COVID-19 Pandemic As a vital national object, Chandra Asri has a strategic role where its products become a necessity for other sectors. Therefore, it is important for the Company to continue operating amidst the challenges of the COVID-19 pandemic. The COVID-19 pandemic has the potential to hamper operations due to the spread of the virus. This year, the Company is also preparing itself to take necessary steps for the post-pandemic.	• Terus menerapkan protokol kesehatan COVID-19; • Melakukan koordinasi secara regular melalui Tim Task Force COVID-19 untuk monitoring dan membuat rencana aksi; • Terus mengimplementasikan protokol kesehatan terkait COVID-19 yang dikeluarkan oleh pemerintah di tingkat nasional maupun lokal; • Memperkuat kesadaran karyawan dan keluarga mengenai protokol kesehatan; • Mengembangkan infrastruktur untuk memonitor implementasi protokol di tempat kerja; • Melakukan program vaksinasi & booster untuk karyawan, keluarga mereka, serta kontraktor; • Menggabungkan risiko pandemi dan endemi ke dalam Business Continuity Plan (BCP); • Mengembangkan BCM Bow-Tie Model Pandemi COVID-19; • Menerapkan model fase pemulihan konservatif Pandemi COVID-19. • Continue implement COVID-19 health protocols; • Coordinate regularly through the COVID-19 Task Force Team to monitor and create action plans; • Continue to implement health protocols related to COVID-19 issued by the government at the national and local levels; • Strengthen employees' and their families' awareness regarding health protocols; • Develop infrastructure to monitor protocols implementation in the workplace; • Conduct vaccination and booster programs for employees, their families, and contractors; • Integrate pandemic and endemic risks into the Business Continuity Plan (BCP) • Develop BCP Bow-Tie Model for the COVID-19 Pandemic; • Implement the COVID-19 Pandemic conservative recovery phase model.

No.	Jenis Risiko Type of Risk	Upaya Mitigasi Mitigation Efforts
2.	Siklus Industri Petrokimia yang Dinamis Siklus industri petrokimia dan volatilitas harga produk dapat mempengaruhi profitabilitas Perseroan secara material dan negatif. Tingkat dan margin utilisasi kapasitas dalam industri petrokimia secara historis telah mengalami tingkat fluktuasi musiman yang tinggi. Harga produk-produk petrokimia sensitif terhadap perubahan pada penawaran dan permintaan, baik secara regional maupun internasional. Permintaan akan produk-produk petrokimia secara umum berkorelasi positif dengan tingkat aktivitas ekonomi dan pertumbuhan PDB serta sangat bergantung pada permintaan dan kinerja negara-negara di kawasan Asia Pasifik, khususnya di Tiongkok, dimana kondisi ekonomi negara-negara tersebut cenderung melemah sehingga cenderung mengurangi permintaan. Di sisi lain, pasokan dipengaruhi oleh penambahan kapasitas yang signifikan. Jika penambahan tersebut tidak sesuai dengan pertumbuhan permintaan yang sesuai, maka tingkat dan margin operasi industri rata-rata akan mengalami tekanan. Pasokan merupakan komponen yang sangat penting bagi harga produk petrokimia Perseroan, yang pada akhirnya akan mempengaruhi margin kotor Perseroan. Secara historis, siklus industri petrokimia telah beberapa kali mengalami periode defisit pasokan sehingga menyebabkan tingkat dan margin operasi yang tinggi. Hal ini kemudian diikuti oleh periode surplus pasokan, terutama karena penambahan kapasitas yang signifikan, yang menyebabkan berkurangnya tingkat dan margin operasi. Waktu, tingkatan atau durasi siklus turun (<i>downcycle</i>) industri petrokimia yang tidak sepenuhnya dapat diprediksi secara akurat oleh Perseroan atau industri secara keseluruhan dapat memberikan dampak material dan merugikan terhadap profitabilitas Perseroan. Dynamic Petrochemical Industry Cycle The petrochemical industry cycle and product price volatility can materially and negatively affect the Company's profitability. Capacity utilization rates and margins in the petrochemical industry have historically experienced high seasonal fluctuation. Prices of petrochemical products are sensitive to changes in supply and demand, both regionally and internationally The demand for petrochemical products is generally positively correlated with the level of economic activity and GDP growth and is highly dependent on the demand and performance of countries in the Asia Pacific region, especially in China, where the economic conditions of these countries tend to weaken so that it tends to reduce demand. On the other hand, supply is affected by significant capacity additions. If these additions are not matched by appropriate demand growth, the average industrial operating level and margin will be under pressure. Supply is a very important component for the price of the Company's petrochemical products, which in turn will affect the Company's gross margin. Historically, the petrochemical industry cycle has experienced several periods of supply deficits resulting in high operating rates and margins. This was followed by a period of supply surplus, mainly due to significant capacity additions, which resulted in reduced operating levels and margins. The timing, level or duration of the petrochemical industry downcycle which cannot be not fully and accurately predicted by the Company or the overall industry could have a material and adverse impact on the Company's profitability.	• Mengintegrasikan turunan produk dan mendiversifikasikan produk yang ditawarkan, termasuk produk dengan nilai tambah tinggi; • Mempertahankan tingkat produksi yang optimal sebagai respon terhadap keadaan pasar dan kondisi perekonomian melalui penerapan metode produksi yang aman dan efisien; • Secara berkesinambungan menerapkan program efisiensi untuk meningkatkan produksi, pengurangan pemakaian energi, dan pengurangan biaya operasi per unit; • Meningkatkan pangsa pasar domestik dan ekspor melalui pengembangan pelanggan baru; • Meningkatkan penjualan domestik dan ekspor dengan sistem kontrak; • Menurunkan biaya bahan baku utama dengan mencari sumber alternatif bahan baku, jika memungkinkan, dan mengusahakan memperbanyak sumber pemasok bahan baku. • Integrating product derivatives and diversifying the products offered, including products with high added value; • Maintaining optimal production levels in response to market and economic conditions through the application of safe and efficient production methods; • Continuously implementing efficiency programs to increase production, reduce energy use, and reduce operating costs per unit; • Increasing domestic and export market share through new customers development; • Increasing domestic and export sales with contract system; • Reducing the cost of main raw materials by seeking alternative sources, if possible, and seeking to increase number of raw material suppliers.

3.	Kompetisi yang Semakin Meningkat Perseroan menjual produk di pasar yang sangat kompetitif. Karena sifat komoditas produk- produk utama Perseroan, persaingan di pasar-pasar ini sebagian besar didasari oleh harga, keamanan dan keandalan pasokan, kedekatan, dan layanan pelanggan. Kehilangan daya kompetitif dan pangsa pasar di Indonesia atau peningkatan kompetisi global yang berdampak pada pertumbuhan, profitabilitas, dan hasil usaha di masa yang akan datang. Pasar Indonesia untuk Ethylene, Propylene, Polyethylene, Polypropylene, Styrene Monomer dan Butadiene sangat kompetitif. Tidak terdapat jaminan bahwa pesaing tambahan atau pesaing yang ada saat ini tidak akan memulai atau memperluas produksi produk-produk yang dihasilkan oleh Perseroan atau menggantikan produk-produk tersebut atau mengintensifkan persaingan harga, khususnya oleh para produsen yang memiliki akses ke bahan baku yang lebih murah, atau mengenalkan teknologi yang lebih maju atau pabrik produksi yang lebih terpadu, sehingga dapat meningkatkan persaingan dan dapat memberikan dampak negatif dan material terhadap hasil operasional Perseroan. Perseroan juga memiliki pesaing utama dengan produsen petrokimia lainnya di kawasan Timur Tengah dan sepanjang Asia Tenggara. Para produsen petrokimia ini, yang banyak di antaranya lebih besar dari Perseroan dan mungkin memiliki sumber pendanaan yang lebih besar daripada Perseroan, mendapat keuntungan dari skala ekonomi dan efisiensi operasi yang lebih besar. Perseroan yakin bahwa Naphtha Cracker Perseroan tergolong kompetitif dibandingkan dengan Naphtha Cracker lainnya. Namun demikian, <i>ethane cracker</i> di Timur Tengah dan <i>shale gas</i> Amerika Serikat biasanya menghasilkan Ethylene dengan biaya terendah, terutama karena ketersediaan bahan baku dengan biaya rendah. Kenaikan pasokan produk berbiaya rendah ke pasar Indonesia dari pesaing Perseroan di Timur Tengah atau Amerika Serikat dapat menyebabkan tekanan pada harga produk di pasar global untuk produk-produk Perseroan secara umum dan penurunan margin bagi Perseroan. Increased Competition The Company sells products in a very competitive market. Due to the commodity nature of the Company's main products, competition in these markets is largely based on price, security and reliability of supply, proximity, and customer service. Loss of competitive power and market share in Indonesia or increased global competition impact future growth, profitability, and results of operations. The Indonesian market for Ethylene, Propylene, Polyethylene, Polypropylene, Styrene Monomer and Butadiene is very competitive. There is no guarantee that additional competitors or existing competitors will not start or expand production of products produced by the Company or replace these products or intensify price competition, especially by producers who have access to cheaper raw materials, or introduce more advanced technology or more integrated production plants, which could increase competition and could have a material and negative impact on the Company's operating results. The Company also has major competitors with other petrochemical producers in the Middle East region and throughout Southeast Asia. These petrochemical producers, many of which are larger than the Company and may have larger sources of funding than the Company, benefit from greater economies of scale and operating efficiencies. The Company believes that the Company's Naphtha Cracker is classified as competitive compared to other naphtha crackers. However, ethane crackers in the Middle East and shale gas in the United States typically produce Ethylene at the lowest cost, mainly due to the availability of the low cost feedstock. An increase in the supply of low-cost products to the Indonesian market from the Company's competitors in the Middle East or the United States could lead to pressure on product prices in the global market for Company's products in general and decrease margins for the Company.	• Mempertahankan hubungan yang kuat antara Perseroan dengan basis pelanggan yang luas dan setia; • Meningkatkan kualitas pelayanan <i>technical service assistance</i> kepada pelanggan guna memelihara tingkat kepuasan pelanggan yang baik; • Memanfaatkan keunggulan Perseroan dalam menjual, serta mengirimkan produk Olefins Perseroan kepada sebagian pelanggan melalui jalur pipa yang tersambung langsung dengan pelanggan utama Olefins; • Fokus terhadap peningkatan efisiensi operasional dan pengendalian biaya konversi; • Mengoptimalkan implementasi Enterprise Resources Planning (ERP). • Maintaining a strong relationship between the Company and a broad and loyal customer base; • Improving the quality of technical service assistance to customers in order to maintain a good level of customer satisfaction; • Utilizing the Company's advantages in selling and delivering the Company's Olefins products to several customers through pipelines that are directly connected to the main Olefins customers; • Focusing on increasing operational efficiency and controlling conversion costs; • Optimizing the implementation of Enterprise Resources Planning (ERP).

4.	Fluktuasi Biaya Bahan Baku Fluktuasi ini mengakibatkan peningkatan biaya operasional dan berakibat sebagian terhadap kinerja operasional, arus kas, dan margin. Bahan baku yang digunakan untuk memproduksi produk-produk Perseroan merupakan komoditas yang bergantung pada dorongan pasar internasional dan sebagian. Hasil operasional dan margin Perseroan di masa lampau telah dipengaruhi oleh fluktuasi biaya bahan baku. Fluktuasi biaya bahan baku ini diperkirakan masih akan terus mempengaruhi operasi dan margin Perseroan. Biaya Naphtha, yang merupakan bahan baku utama yang digunakan untuk menghasilkan produk-produk Perseroan dan sebagian besar dibeli dari pihak ketiga yang sebagian besar mewakili biaya pendapatan Perseroan. Selain itu, Perseroan juga mengeluarkan biaya bahan baku lainnya, yaitu untuk Propylene yang digunakan dalam memproduksi Polypropylene dan Benzene yang digunakan dalam memproduksi Styrene Monomer. Harga Naphtha umumnya mengikuti tren harga minyak mentah dan bervariasi, tergantung pada kondisi pasar minyak mentah yang belakangan ini sangat bergejolak. Kenaikan harga Naphtha tidak selalu sejalan dengan perubahan harga untuk produk-produk Perseroan. Akibatnya, kenaikan harga Naphtha dapat memberi dampak material dan merugikan terhadap margin dan arus kas Perseroan, sejauh Perseroan tidak dapat meneruskan kenaikan tersebut ke harga jual produk. Fluktuasi biaya Naphtha yang signifikan juga dapat menekan margin Perseroan karena kenaikan harga penjualan tidak sebesar kenaikan harga Naphtha. Raw Material Cost Fluctuations These fluctuations resulted in increased operating costs and had a partial impact on operating performance, cash flow, and margins. The raw materials used to produce the Company's products are commodities that depend on international market forces. The Company's operating results and margins have in the past been affected by fluctuations in raw material costs. It is estimated that fluctuations in raw material costs will continue to affect the Company's operations and margins. The cost of Naphtha, which is the main raw material used to produce the Company's products, is mostly purchased from third parties and most of which represent the Company's cost of revenue. In addition, the Company also incurs other raw material costs, namely for Propylene which is used in producing Polypropylene and Benzene which is used in producing Styrene Monomer. Naphtha price in general follows the trend of crude oil prices and vary, depending on the crude oil market conditions which have been very volatile lately. Increases in Naphtha price are not always in line with price changes for the Company's products. As a result, an increase in Naphtha prices could have a material and adverse effect on the Company's margins and cash flow, to the extent that the Company is unable to carry the increase into product selling prices. Significant fluctuations in Naphtha costs can also reduce the Company's margins because the increase in selling price is not as big as the increase in Naphtha price.	• Menjaga fleksibilitas dengan pengadaan LPG dan kondensat, ketika secara ekonomis dapat menjadi bahan baku alternatif untuk mengurangi biaya bahan baku; • Melanjutkan mencari pasokan bahan baku (hulu) yang terintegrasi; • Bekerja sama dengan penyedia bahan baku dengan harga dan skema kompetitif; • Memanfaatkan sinergi dengan mitra strategis, SCG Chemicals & Thailoil, untuk pengadaan bahan baku. • Maintaining flexibility through the procurement of LPG and condensate, when economically it can be an alternative raw material to reduce raw material costs; • Continuing to seek integrated (upstream) raw material supply; • Cooperate with raw material providers with competitive prices and schemes; • Utilizing synergies with strategic partners, SCG Chemicals & Thailoil, for the procurement of raw materials.
5.	Nilai Tukar Mata Uang Asing dan Tingkat Suku Bunga Pendapatan, biaya, dan utang Perseroan sebagian besar didenominasi dalam dolar Amerika Serikat karena Perseroan memiliki sistem pelaporan dalam mata uang asing, yakni dalam dolar Amerika Serikat. Namun demikian, Perseroan beroperasi di Indonesia sehingga fluktuasi dari rupiah terhadap dolar Amerika Serikat akan mempengaruhi kinerja keuangan Perseroan, terutama terhadap pajak, beban gaji, dan pembelian produk dan servis lokal. Untuk itu, Perseroan senantiasa menjaga nilai saldo rupiah dengan tujuan untuk memberikan perlindungan nilai ekonomi terhadap pengeluaran yang didenominasi dalam rupiah. Foreign Currency Exchange Rates and Interest Rates Most of the Company's revenues, expenses, and debts are denominated in United States dollars because the Company has a reporting system in foreign currency, namely in United States dollars. However, the Company operates in Indonesia so that fluctuations from the rupiah against the United States dollar will affect the Company's financial performance, especially on taxes, salary expenses, and purchases of local products and services. For this reason, the Company always maintains the value of the rupiah balance with the aim of providing economic value protection for expenditures denominated in rupiah.	• <i>Interest rate swap</i> untuk memitigasi risiko meningkatnya suku bunga; • <i>Forward foreign exchange</i> untuk memitigasi eksposur terhadap fluktuasi nilai tukar mata uang asing; dan • <i>Cross currency interest rate swaps</i> untuk memitigasi risiko dari tingkat suku bunga dan nilai Obligasi Rupiah Perusahaan terhadap dolar AS yang merupakan mata uang fungsional Perseroan. • Interest rate swaps to mitigate the risk of rising interest rates; • Forward foreign exchange to mitigate exposure to fluctuations in foreign exchange rates; and • Cross currency interest rate swaps to mitigate risks from interest rates and the value of the Company's Rupiah Bonds against the US dollar which is the Company's functional currency.

6.	Faktor External pada Kegiatan Operasional Kegiatan operasional Perseroan tergantung pada produksi dan faktor-faktor lain di luar kendali Perseroan, seperti pasokan listrik, pemadaman yang tidak terjadwal, pasokan bahan baku, gangguan akibat kecelakaan, atau bencana alam. Seluruh fasilitas produksi Perseroan di Cilegon dan Serang di Provinsi Banten membutuhkan 70MW tenaga listrik selama operasi normal. Pabrik-pabrik tersebut membutuhkan pasokan listrik yang terus menerus untuk mempertahankan operasi yang stabil, sehingga pemadaman listrik yang signifikan dapat memberikan dampak material dan merugikan terhadap kegiatan usaha, hasil operasional, dan kondisi keuangan Perseroan. Untuk Naphtha Cracker dan Polyethylene, Perseroan mendapatkan sekitar separuh dari kebutuhan dayanya dari PT Perusahaan Listrik Negara Persero (PLN) sedangkan selebihnya diperoleh dari Gas Turbine Generator (GTG) berkapasitas 33MW dan Steam Turbine Generator (STG) berkapasitas 20MW yang dimiliki Perseroan dimana salah satunya digunakan sebagai sumber listrik cadangan jika terjadi kehilangan daya dari grid. Bahan bakar yang digunakan untuk pembangkitan listrik dari GTG didapatkan dari kelebihan methane yang merupakan produk samping dari Naphtha Cracker. Perseroan melakukan kesepakatan dengan PT Perusahaan Gas Negara (Persero) Tbk dan PT Banten Inti Gasindo dalam penyediaan bahan bakar gas untuk menghasilkan uap/steam dan menggunakan sebagian uap yang dihasilkan oleh Naphtha Cracking Furnaces dan tiga boiler untuk mengoperasikan STG. Sedangkan, pabrik Polypropylene, New Polyethylene, Butadiene dan Styrene Monomer Perseroan mendapatkan seluruh kebutuhan listrik dari PLN. Jika pasokan listrik, gas, atau uap tersebut tidak tersedia karena berbagai alasan, maka Perseroan harus mengandalkan <i>emergency generator</i>, yang tidak dapat memenuhi kebutuhan operasional semua pabrik secara normal. Di samping itu, terdapat risiko hambatan produksi, seperti keterbatasan kapasitas, kegagalan mekanis dan sistem, keterlambatan konstruksi/pengembangan kualitas, dan penundaan pengiriman peralatan mesin yang menyebabkan tertahannya produksi dan berkurangnya <i>output</i>. Pengiriman Naphtha tepat waktu merupakan hal paling penting untuk kelangsungan produksi yang beroperasi secara kontinyu sepanjang tahun. Keterlambatan pasokan bahan baku Naphtha akan berdampak pada potensi kerugian produksi dan biaya produksi yang lebih tinggi. Lebih lanjut, Perseroan memiliki jaringan pipa sepanjang 45 kilometer dari kompleks pabrik Perseroan ke sejumlah pelanggan di kawasan Cilegon dan Serang untuk distribusi produk Ethylene yang dihasilkan Perseroan. Jaringan pipa tersebut tidak seluruhnya berada pada lahan milik Perseroan. Oleh karena itu, terdapat risiko atas gangguan keberlangsungan jaringan pipa Ethylene yang diakibatkan aktivitas warga yang berada di sekitar lokasi pipa. Operasi produksi Perseroan juga dapat terganggu akibat dari bencana alam. Kepulauan Indonesia merupakan salah satu daerah dengan kondisi gunung berapi yang paling aktif di dunia. Komplek pabrik Perseroan yang berlokasi di Cilegon dan Serang di Provinsi Banten hanya memiliki jarak sekitar 50 kilometer dari Gunung Anak Krakatau yang dikenal dengan aktivitas vulkanik dan seismiknya sehingga berpotensi menyebabkan letusan gunung, gempa bumi, tsunami, atau gelombang pasang. Pabrik-pabrik Perseroan bergantung pada pengoperasian berkelanjutan dari fasilitas dermaga, utilitas, dan fasilitas pendukung lainnya, serta jaringan pipa dan infrastruktur yang terkait lainnya. Gangguan terhadap pengoperasian salah satu bagian fasilitas ini dapat berdampak signifikan terhadap kemampuan Perseroan untuk terus mengoperasikan fasilitas lainnya dan secara signifikan dapat mempengaruhi kemampuan Perseroan untuk menjalankan kegiatan usaha Perseroan dalam keadaan normal.	• Untuk memastikan keandalan pasokan listrik pada pabrik Naphtha Cracker dan Polyethylene, Perseroan memasang trafo yang tersambung langsung dengan jaringan 150KV milik PLN untuk menunjang keandalan operasional pabrik Polypropylene, Butadiene, dan New Polyethylene. • Dalam hal terjadinya ketiadaan pasokan listrik secara mendadak dari PLN (<i>black out</i>) terutama untuk Naphtha Cracker dan Polyethylene, Perseroan mempunyai <i>power load shedding system</i> yang akan menghentikan suplai listrik secara otomatis ke pabrik Polyethylene, namun tidak mengganggu operasional Naphtha Cracker. Hal ini dikarenakan pasokan listrik untuk Naphtha Cracker didapat dari GTG dan STG. Dengan demikian, kerugian akibat ketiadaan pasokan listrik dari PLN dapat diminimalisir. • Guna mengurangi risiko terganggunya pengadaan bahan baku Naphtha, Perseroan menjaga ketersediaan Naphtha dalam jumlah tertentu di tangki cadangan untuk menjamin kelangsungan produksi. • Perseroan melakukan pemeliharaan jaringan pipa Ethylene secara terjadwal dengan melakukan patroli yang juga melibatkan aparat setempat. Selain itu, Perseroan juga secara aktif mengadakan sosialisasi (<i>community awareness</i>) mengenai pengamanan lokasi jalur pipa kepada warga yang bermukim di dekat lokasi jalur pipa. • Dalam memastikan keandalan pabrik, filosofi pemeliharaan Perseroan didasarkan pada teknik pencegahan dan terjadwal. Departemen Inspeksi Perseroan menggunakan <i>Shell Risk Based Inspection System</i> (RBI) dan Perseroan menggunakan SAP untuk merencanakan pemeliharaan. Selain program pemeliharaan rutin, Perseroan menjalankan Turn Around Maintenance pabrik-pabriknya secara berkala guna melakukan perbaikan besar dan pemeliharaan terjadwal atas mesin utama, pembaharuan terjadwal untuk memenuhi atau melampaui persyaratan ketentuan. Hal ini dilaksanakan setiap 4-5 tahun untuk pabrik Naphtha Cracker, 2 tahun untuk Styrene Monomer, dan setiap tahun untuk pabrik Polypropylene. Baru-baru ini pada tahun 2019, Perseroan melakukan Turn Around Maintenance yang berlangsung selama 51 hari. • Perseroan memiliki program perlindungan asuransi yang komprehensif, termasuk di dalamnya perlindungan terhadap bencana alam, serta mengimplementasikan <i>business continuity management</i> dan <i>disaster recovery system</i> untuk mempersiapkan kelangsungan usaha jika terjadi bencana yang tidak direncanakan.

	External Factors in Operational Activities The Company's operational activities depend on production and other factors beyond the Company's control, such as power supply, unscheduled outages, supply of raw materials, interruptions due to accidents or natural disasters. All of the Company's production facilities in Cilegon and Serang in Banten Province require 70MW of electricity during normal operation. These plants require a continuous supply of electricity to maintain stable operations, so a significant power outage could have a material and adverse effect on the Company's business activities, results of operations, and financial condition. For Naphtha Cracker and Polyethylene, the Company obtains about half of its power needs from PT Perusahaan Listrik Negara Persero (PLN), while the rest is obtained from a Gas Turbine Generator (GTG) with a capacity of 33MW and a Steam Turbine Generator (STG) with a capacity of 20MW owned by the Company, one of which is used as a backup power source in case of loss of power from the grid. The fuel used to generate electricity from GTG is obtained from excess methane which is a by-product of the Naphtha Cracker. The Company entered into an agreement with PT Perusahaan Gas Negara (Persero) Tbk and PT Banten Inti Gasindo in supplying gas fuel to produce steam and using part of the steam produced by the Naphtha Cracking Furnaces and three boilers to operate the STG. Meanwhile, the Company's Polypropylene, New Polyethylene, Butadiene, and Styrene Monomer plants obtain all of their electricity needs from PLN. If the supply of electricity, gas, or steam is not available for various reasons, the Company must rely on emergency generators, which cannot meet the normal operational needs of all plants. In addition, there is a risk of production constraints, such as limited capacity, mechanical and system failures, delays in quality construction/development, and delays in the delivery of machine tools which cause production delays and reduced output. On-time Naphtha delivery is the most important thing for the continuity of production which operates continuously throughout the year. Delays in the supply of Naphtha raw materials will have an impact on potential production losses and higher production costs. Furthermore, the Company has a pipeline network of 45 kilometers from the Company's factory complex to a number of customers in the Cilegon and Serang areas for the distribution of Ethylene products produced by the Company. The pipeline network is not entirely located on the Company's land. Therefore, there is a risk of disruption to the sustainability of the Ethylene pipeline network due to the activities of residents around the pipe location. The Company's production operations can also be disrupted due to natural disasters. The Indonesian archipelago is one of the most active volcanic areas in the world. The Company's plant complexes located in Cilegon and Serang in Banten Province are only about 50 kilometers from Mount Anak Krakatau which is known for its volcanic and seismic activity that has the potential to cause volcanic eruption, earthquake, tsunami, or tidal waves. The Company's plants depend on the ongoing operation of its jetties, utilities, and other support facilities, as well as pipelines and other related infrastructure. Disruption to the operation of one part of this facilities can have a significant impact on the Company's ability to continue operating other facilities and can significantly affect the Company's ability to carry out the Company's business activities under normal circumstances.	• To ensure the reliability supply of electricity to the Naphtha Cracker and Polyethylene plants, the Company installed transformers that are directly connected to PLN's 150KV network to support operational reliability for the Polypropylene, Butadiene, and New Polyethylene plants. • In the event of a sudden absence of electricity supply from PLN (black out), especially for Naphtha Cracker and Polyethylene, the Company has a power load shedding system that will automatically stop supplying electricity to the Polyethylene plant, but not to disrupt Naphtha Cracker operations. This is due to electricity supply for Naphtha Cracker is obtained from Gas turbine generator (GTG) and Steam turbine Generator (STG). Thus, losses due to the absence of electricity supply from PLN can be minimized. • In order to reduce the risk of disruption in the supply of Naphtha raw materials, the Company maintains the availability of certain amount of Naphtha in reserve tanks to ensure continuity of production. • The Company carries out scheduled maintenance of the Ethylene pipeline network by conducting patrols which also involve local officials. In addition, the Company also actively conducts socialization (community awareness) regarding the security of the pipeline to residents who live near the pipeline location. • In ensuring plant reliability, the Company's maintenance philosophy is based on preventive and scheduled techniques. The Company's Inspection Department uses the Shell Risk Based Inspection System (RBI) and the Company uses SAP to plan maintenance. In addition to routine maintenance programs, the Company carries out regular Turn Around Maintenance of its plants to carry out major repairs and scheduled maintenance of main engines, scheduled renewals to meet or exceed regulatory requirements. This is done every 4-5 years for Naphtha Cracker plant, 2 years for Styrene Monomer, and every year for Polypropylene plant. Recently in 2019, the Company carried out a Turn Around Maintenance which lasted for 51 days. • The Company has a comprehensive insurance protection program, including protection against natural disasters, as well as implementing a business continuity management and disaster recovery system to prepare for business continuity in the event of an unplanned disaster.

7.	Keandalan Pabrik Proses produksi pabrik petrokimia dilakukan secara terus menerus (<i>continue</i>) dan dapat mengalami kerugian besar apabila berhenti secara tiba-tiba tanpa direncanakan (<i>unplanned shutdown</i>). Beberapa faktor yang menyebabkan <i>unplanned shutdown</i> adalah penurunan nilai keandalan peralatan di pabrik karena umurnya yang sudah tua. Chandra Asri yang telah beroperasi selama >30 tahun memetakan bahwa faktor-faktor seperti mesin yang sudah tua dan mengalami korosi sebagai risiko yang dapat menyebabkan <i>unplanned shutdown</i>. Plant Reliability The petrochemical plant production process is carried out continuously and can experience large losses if it stops suddenly without being planned (<i>unplanned shutdown</i>). Several factors that cause unplanned shutdown are a decrease in the value of the reliability of equipment at the plants due to its old age. Chandra Asri, which has been in operation for >30 years, maps out factors such as old and corroded engines as risks that can cause unplanned shutdown.	• Setiap minimal 4 tahun, Chandra Asri melakukan Turn Around Maintenance. Secara otomatis, mesin diremajakan. Selama periode itu, produksi pabrik dihentikan. Komponen yang sudah tua, tidak memenuhi standar, dan usang diganti dengan suku cadang yang lebih baru, lebih aman, dan lebih andal. • Melanjutkan Program Manajemen Korosi dengan memahami, melakukan pemantauan, pengendalian dan menghitung serta memprediksi kecepatan korosi. • Melanjutkan peningkatan Program Pemeliharaan Pencegahan dengan melakukan perawatan mesin dan peralatan pabrik sebagai bentuk strategi preventif. • Meningkatkan Program Pemeliharaan Prediktif untuk melacak kondisi mesin dan memberikan peringatan sebelum kerusakan terjadi. • Menerapkan Budaya Keandalan. • Program Peningkatan Suku Cadang. • Berkolaborasi dengan SCG untuk meningkatkan program perawatan tungku. • At least every 4 years, Chandra Asri does Turn Around Maintenance. Automatically, the engine is rejuvenated. During that period, plant production was halted. Old, substandard, and obsolete components are replaced with newer, safer, and more reliable parts. • Continuing the Corrosion Management Program by understanding, monitoring, controlling and calculating and predicting corrosion velocity. • Continuing the improvement of the Preventive Maintenance Program by carrying out maintenance on plant machines and equipment as a form of preventive strategy. • Enhancing Predictive Maintenance Program to track machine condition and provide warnings before breakdowns occur. • Implementing a Culture of Reliability. • Spare parts Upgrade Program • Collaborating with SCG to improve furnace maintenance program.

8.	Kefahanan Finansial Pandemi COVID-19 tidak dapat diprediksi kapan berakhirnya dan diperkirakan akan berlangsung lama. Ketidakpastian selama masa pandemi ini dapat berpengaruh terhadap kinerja dan finansial Perusahaan. Oleh karena itu, Chandra Asri mempersiapkan beberapa hal untuk ketahanan finansial yang berkelanjutan. Financial Resilience The COVID-19 pandemic cannot be predicted when it will end and is expected to last a long time. Uncertainty during this pandemic can affect the Company's performance and finances. Therefore, Chandra Asri prepared several things to maintain its sustainable financial resilience.	• Mengurangi OPEX, mengoptimalkan Modal Kerja, serta menjadwalkan kembali CAPEX; • Memprioritaskan CAPEX untuk Integritas Aset; • Memastikan semua pengeluaran sesuai anggaran yang disetujui; • Refase biaya non-kritis dan CAPEX; • Meninjau rekrutmen karyawan yang sedang berlangsung dengan memprioritaskan area kritis membutuhkan SDM; • Melibatkan vendor secara holistik untuk memperluas sumber pasokan; • Mendapatkan pembiayaan 'lebih rendah dengan waktu (tenor) yang lebih lama' serta meningkatkan keragaman dan daya saing pendanaan secara menyeluruh; • Meninjau dan mewujudkan manfaat bisnis yang ditargetkan dari transformasi digital. • Reducing OPEX, optimizing Working Capital and rescheduling CAPEX; • Prioritizing CAPEX for Asset Integrity; • Ensuring all expenses are within the approved budget; • Rephasing non-critical costs and CAPEX; • Reviewing ongoing employee recruitment by prioritizing critical areas that require human resources; • Engaging vendors holistically to expand supply sources; • Get "lower with longer tenor" financing and increase overall diversity and competitiveness of funding; • Reviewing and realizing targeted business benefits from digital transformation.
9.	Kinerja Safety, Health and Environment Sebagai Obyek Vital Nasional dan perusahaan petrokimia, bagi Chandra Asri, faktor <i>Safety, Health, and Environment</i> (SHE) merupakan area fokus utama bagi Perseroan. Komitmen ini tercermin dalam setiap kebijakan yang diambil Perseroan yang mengutamakan aspek keselamatan dan kesehatan kerja (K3). Penerapan K3 ini terus selalu ditingkatkan untuk mendukung <i>Operational Excellence</i> Perusahaan. Di satu sisi, aspek SHE ini selalu menjadi faktor risiko yang harus secara terus menerus diidentifikasi dan dibuatkan rencana mitigasinya agar selalu ada peningkatan terus menerus. Safety, Health and Environment Performance As a National Vital Object and a petrochemical company, for Chandra Asri, Safety, Health and Environment (SHE) factors are the main focus areas for the Company. This commitment is reflected in every policy taken by the Company which prioritizes aspects of occupational safety and health. The implementation of occupational safety and health is continuously being improved to support the Company's Operational Excellence. On the other hand, the occupational safety and health aspect is always a risk factor that must be continuously identified and needs mitigation plan so that there is always continuous improvement.	• Program Peningkatan Sistem seperti mengidentifikasi risiko/bahaya utama serta mengembangkan program Contractor Safety Management System (CSMS); • Membuat Program Peningkatan Budaya Keselamatan seperti pelatihan kepemimpinan dalam keselamatan kerja serta peningkatan kompetensi SHE; • Melaksanakan Program <i>Process Safety Management</i>; • Menerapkan Kajian Bencana Alam seperti meninjau fasilitas pabrik, menetapkan prosedur manajemen krisis, menyelesaikan Business Continuity Management, serta Manajemen Kepatuhan Risiko. • System Improvement Program such as identify the main risks/hazards and develop the Contractor Safety Management System (CSMS) program; • Creating Safety Culture Improvement Programs such as safety leadership training and occupational safety and health competency improvement; • Implementing Process Safety Management program; • Implementing Natural Disaster Studies such as reviewing plant facilities, establishing crisis management procedures, completing Business Continuity Management and Compliance Risk Management.

10.	Budaya dan Pola Pikir Karyawan Salah satu faktor yang mempengaruhi kinerja Chandra Asri secara langsung adalah produktivitas karyawannya. Dalam perjalanannya, selalu ada potensi risiko menurunnya produktivitas karyawan karena berbagai hal seperti kurangnya tanggung jawab terhadap kualitas pekerjaan. Perseroan memandang bahwa risiko ini dapat dimitigasi dengan menginjeksi budaya perusahaan yang dapat menjadi mindset dan bertujuan untuk mengubah budaya kerja karyawan agar lebih fokus, proaktif, dan pada akhirnya lebih produktif. Perseroan memiliki iSTAR sebagai budaya yang Perusahaan yang terdiri atas <i>integrity, safety, teamwork, accountability, dan respect</i>. Budaya inilah yang terus ditanamkan untuk membentuk pola pikir karyawan sehingga berdampak pada produktivitas dan kinerjanya. Culture and Employees' Mindset One of the factors that directly affects Chandra Asri's performance is the productivity of its employees. Along the way, there is always a potential risk of decreased employees' productivity due to various things such as a lack of responsibility for the quality of work. The Company views that this risk can be mitigated by injecting a corporate culture that can become a mindset and aims to change the work culture of employees to be more focused, proactive, and ultimately more productive. The Company has iSTAR as the corporate culture consisting of integrity, safety, teamwork, accountability, and respect. This culture is continuously instilled to shape the mindset of employees so that it has an impact on productivity and performance.	• Memasukkan nilai-nilai dan budaya perusahaan iSTAR sebagai bagian dari Key Performance Indicator (KPI); • Mengkampanyekan terus menerus perjalanan iSTAR dalam setiap aspek pekerjaan; • Mengintegrasikan dan mempertahankan program dengan unit organisasi yang ada; • Berdasarkan pertumbuhan Perseroan di masa depan, nilai-nilai Perseroan akan dikaji ulang sesuai dengan kebutuhan bisnis mendatang. • Incorporating iSTAR's corporate values and culture as part of the Key Performance Indicator (KPI); • Continuously campaigning for iSTAR's journey in every aspect of work; • Integrating and maintaining programs with existing organizational units; • Based on the Company's future growth, the Company's values will be reviewed according to future business needs.
11.	Manajemen Talenta Mendapatkan talenta, memperkerjakan orang yang tepat untuk posisi yang tepat, serta mempertahankan talenta terbaik menjadi isu yang saat ini dihadapi berbagai perusahaan, tak terkecuali Chandra Asri. Terutama dalam industri petrokimia yang memiliki persyaratan dan keahlian khusus bagi karyawannya. Selain permasalahan untuk mendapatkan talenta, persoalan lain seperti talenta yang meninggalkan Perseroan dengan berbagai alasan juga perlu dimitigasi. Talent Management Acquiring talent, hiring the right people for the right positions, and retaining the best talents are issues that are currently being faced by various companies, and Chandra Asri is no exception. Especially in the petrochemical industry which has special requirements and skills for its employees. In addition to the problem of acquiring talent, other issues such as talent leaving the Company for various reasons also need to be mitigated.	• Mengembangkan <i>Talent Pool</i> untuk memberikan saluran pengembangan karir bagi karyawan Chandra Asri; • Mengkaji <i>dual career ladder</i> berdasarkan kebutuhan bisnis; • Melakukan pemetaan bakat untuk posisi-posisi kunci dalam rangka meningkatkan <i>bench strength</i>; • Melanjutkan program retensi karyawan termasuk analisis <i>pay positioning</i> untuk pengembangan, manfaat <i>talent mobility</i>, Kerangka Karir Management, memperbarui kebijakan progresi, dan merevisi <i>First Home Ownership Program</i> (FHOP). • Developing Talent Pool to provide career development channels for Chandra Asri employees; • Study dual career ladder based on business requirement; • Talent mapping for Key positions to increase bench strength; • Continue Talent retention programs including pay positioning analysis and proposal for improvement, talent mobility benefits, Career Management Framework, updating progression policies, and revising the First Home Ownership Program (FHOP) procedure.

12.	Extended Producer Responsibility (EPR) Plastik merupakan materi yang sangat bermanfaat bagi kebutuhan manusia sehari-hari. Namun, tingkat konsumsi masyarakat di Indonesia ini belum seiring dengan pembangunan infrastruktur pengelolaan sampah plastik serta edukasi masyarakat untuk manajemen persampahan. Karenanya, plastik sering dituduh menjadi penyebab pencemaran lingkungan karena sifatnya yang tidak mudah terurai. Padahal, sampah plastik sebenarnya memiliki nilai lebih apabila dikumpulkan dan dikelola dengan baik. Pemerintah Indonesia kemudian menerapkan Extended Producer Responsibility (EPR) yaitu kebijakan untuk meminta produsen bertanggung jawab terhadap produk mereka pascapemakaian termasuk pada produk plastik. Extended Producer Responsibility (EPR) Plastic is a very useful material for everyday human needs. However, the level of public consumption in Indonesia has not been in line with the development of plastic waste management infrastructure and public education on waste management. Therefore, plastic is often accused of causing environmental pollution because it is not easily decomposed. In fact, plastic waste actually has more value if it is collected and managed properly. The Indonesian government then implemented Extended Producer Responsibility (EPR); a policy to hold producers responsible for their products after use, including plastic products.	• Berkolaborasi dengan pemerintah lokal dan asosiasi industri untuk mengedukasi pemangku kepentingan; • Membuat berbagai macam program advokasi dalam upaya mempengaruhi arah kebijakan pemerintah lokal dan nasional; • Mengembangkan dan mengimplementasikan program ekonomi sirkular. • Collaborating with local government and industry associations to educate stakeholders; • Creating various kinds of advocacy programs in an effort to influence the direction of local and national government policies; • Developing and implementing circular economy programs.

TINJAUAN EFEKTIVITAS MANAJEMEN RISIKO

Peninjauan efektivitas sistem manajemen risiko Perseroan dilaksanakan oleh Dewan Komisaris dan Direksi bersama Unit Audit Internal. Selain itu, Perseroan juga senantiasa melakukan penguatan dalam pengelolaan risiko serta melakukan penyesuaian terhadap kondisi terkini dari perusahaan.

Berdasarkan hasil audit internal yang telah dilakukan selama tahun 2022, Unit Audit Internal percaya bahwa sistem manajemen risiko yang ada cukup efektif dalam mengidentifikasi dan memitigasi risiko-risiko usaha, operasional dan keuangan yang relevan dengan kondisi usaha Perseroan. Selain itu, sistem manajemen risiko yang dijalankan saat ini juga dirasa cukup efektif dalam mengidentifikasi dan menyiapkan rencana mitigasi untuk potensi risiko-risiko baru yang dapat mempengaruhi aktivitas usaha Perseroan.

EVALUATION ON THE EFFECTIVENESS OF RISK MANAGEMENT

The evaluation of the effectiveness of the Company's risk management system is carried out by the Board of Commissioners and Board of Directors, together with the Internal Audit Unit. In addition, the Company also continuously strengthens risk management and makes adjustments to the current conditions of the Company.

Based on the results of the internal audit conducted during 2022, the Internal Audit Unit believes that the existing risk management system is quite effective in identifying and mitigating business, operational, and financial risks that are relevant to the Company's business conditions. In addition, the current risk management system is considered quite effective in identifying and preparing mitigation plans for potential new risks that may affect the Company's business activities.

PERNYATAAN DIREKSI DAN/ATAU KOMISARIS ATAU KOMITE AUDIT ATAS KECUKUPAN SISTEM MANAJEMEN RISIKO

Komite Audit meyakini bahwa sistem manajemen risiko yang ada saat ini sudah cukup efektif dalam mereduksi risiko-risiko usaha, operasional dan keuangan yang telah diidentifikasi sebelumnya. Begitu juga dengan potensi risiko-risiko baru yang mungkin akan timbul dan berdampak signifikan di masa mendatang.

STATEMENT OF THE BOARD OF DIRECTORS AND/OR BOARD OF COMMISSIONERS OR THE AUDIT COMMITTEE ON THE ADEQUACY OF THE RISK MANAGEMENT SYSTEM

The Audit Committee believes that the current risk management system is quite effective in reducing the identified business, operational, and financial risks. This also applies to potential new risks that may arise and have a significant impact in the future.

PENGADAAN BARANG DAN JASA

PROCUREMENT OF GOODS AND SERVICES

Dalam menjalankan kegiatan operasional, Perseroan menjalin kerja sama dengan pemasok lokal dan nasional. Keberadaan pemasok tersebut memiliki peran strategis dalam mata rantai operasional usaha.

Pengadaan barang dan jasa merupakan proses penyediaan barang ataupun jasa yang dibutuhkan oleh Perseroan untuk mendukung aktivitas operasional. Proses tersebut dilaksanakan dengan mengedepankan prinsip persaingan yang sehat dan wajar di antara penyedia barang dan jasa berdasarkan ketentuan dan prosedur, serta dengan tetap memperhatikan prinsip-prinsip GCG. Seluruh perusahaan pemasok yang bekerja sama dengan Perseroan senantiasa memperhatikan masalah aspek lingkungan, hak asasi manusia, kebebasan berserikat, kepatuhan terhadap berbagai aturan tentang ketenagakerjaan, serta dampak yang diberikan kepada masyarakat.

Pengadaan barang dan jasa dilaksanakan oleh Departemen Kontrak dan Pengadaan yang berkoordinasi langsung dengan Komite Kontrak yang beranggotakan Direksi Perseroan. Proses pengadaan senantiasa mempertimbangkan harga yang wajar dan bersaing, standar kualitas yang tinggi, dan kesesuaian kontraktor/vendor.

Selain itu, Perseroan juga mempertimbangkan elemen-elemen lain seperti waktu pengiriman yang tepat berdasarkan Konfirmasi Pemesanan, pelayanan yang baik sesuai dengan kontrak, dan kebijakan serta prosedur yang telah ditetapkan. Selanjutnya, Komite Kontrak akan menilai setiap proposal yang masuk dengan memperhatikan indikator-indikator khusus, seperti:

1. Kesesuaian terhadap prinsip usaha Perseroan;
2. Adanya penyimpangan terhadap kebijakan dan prosedur yang disetujui;
3. Kelayakan evaluasi teknis dan komersial;
4. Syarat dan ketentuan yang menjadi beban secara tidak sengaja;
5. Syarat dan ketentuan yang tidak menguntungkan;
6. Proteksi yang mencukupi terhadap kerugian yang timbul akibat kegagalan atau terminasi.

In carrying out operational activities, the Company established cooperative relationships with local and national suppliers. The existence of these suppliers has a strategic role in the business's operational chain.

The procurement of goods and services is the process of providing goods or services needed by the Company to support operational activities. This process is carried out by prioritizing the principles of healthy and fair competition among providers of goods and services based on provisions and procedures while also complying with the principles of GCG. All supplier companies that cooperate with the Company always take into account aspects of the environment, human rights, freedom of association, compliance with various employment regulations, as well as the impact on society.

The procurement of goods and services is carried out by the Contract and Procurement Department, which coordinates directly with the Contract Committee, of which the Board of Directors is a member. The process for the procurement of goods and services always considers reasonable and competitive prices, high quality standards, and the suitability of the contractors/vendors.

In addition, the Company also considers other elements such as the accurate delivery time based on order confirmation, good service according to the designated contracts, and policies and procedures. Furthermore, the Contract Committee will assess each incoming proposal by observing specific indicators, such as:

1. Conformity to the Company's business principles;
2. Any deviation from the approved policy and procedure;
3. Technical and commercial feasibility analysis;
4. Terms and conditions that unintentionally become expenses;
5. Unfavorable terms and conditions; and
6. Sufficient protection against losses arising from failure or termination.

PRA KUALIFIKASI KONTRAKTOR/ VENDOR

Pra-kualifikasi kontraktor/vendor merupakan salah satu langkah dalam proses penetapan pemasok atau kontraktor. Seluruh vendor yang mendaftar akan dinilai berdasarkan standar yang telah ditentukan terlebih dahulu sebelum diputuskan layak atau tidak untuk mengikuti tender.

Proses prakualifikasi kontraktor/vendor terdiri dari evaluasi teknis dan evaluasi/penilaian komersial. Hasil evaluasi tersebut menjadi dasar Perseroan mengembangkan daftar kontraktor yang telah disetujui dan memenuhi standar yang ditetapkan sebelumnya.

PRE-QUALIFICATION OF CONTRACTOR/ VENDOR

Contractor/vendor pre-qualification is one step in the process of determining the supplier or contractor. All vendors who have registered will be assessed according to the designated standards before deciding whether to be eligible or not to participate in the bidding.

The contractor/vendor pre-qualification process consists of technical evaluation and commercial evaluation/assessment. The evaluation results serve as the basis for the Company to create a list of contractors who have been approved and have met the specified standards.

KEBIJAKAN PENGUNGKAPAN INFORMASI

DISCLOSURE OF INFORMATION POLICY

KEBIJAKAN KEPEMILIKAN SAHAM DEWAN KOMISARIS DAN DIREKSI

Kebijakan kepemilikan saham oleh Dewan Komisaris dan Direksi yang berlaku di Perseroan mengacu pada Peraturan Otoritas Jasa Keuangan (POJK) No. 11/POJK.04/2017 tentang Laporan Kepemilikan atau Setiap Perubahan Kepemilikan Saham Perusahaan Terbuka. Dengan demikian, Dewan Komisaris dan Direksi wajib melaporkan kepemilikan sahamnya, baik langsung maupun tidak, kepada OJK.

Kewajiban pelaporan tersebut hanya berlaku bagi Dewan Komisaris atau Direksi yang memiliki saham paling sedikit 5% dari modal disetor perusahaan terbuka. Selain itu, setiap ada perubahan kepemilikan sedikitnya 0,5% dari saham yang disetor, harus dilaporkan. Kebijakan inilah yang diadopsi oleh Perseroan.

PELAKSANAAN TAHUN BUKU

Pada tahun buku 2022 tidak ada perubahan kepemilikan saham oleh Dewan Komisaris dan Direksi. Rincian kepemilikan saham Dewan Komisaris dan Direksi, baik langsung maupun langsung diuraikan pada bab "Profil Perusahaan".

POLICY ON SHARE OWNERSHIP OF THE BOARD OF COMMISSIONERS AND BOARD OF DIRECTORS

The policy on share ownership adopted by the Board of Commissioners and Board of Directors applicable to the Company refers to the Financial Services Authority Regulation (POJK) Regulation No. 11/POJK.04/2017 on Ownership Reports or Any Changes in Share Ownership of Public Companies. Accordingly, the Board of Commissioners and the Board of Directors are required to report their share ownership, either directly or indirectly, to the OJK.

This reporting requirement only applies to the Board of Commissioners or the Board of Directors with shares of at least 5% of the paid-up capital of a public company. In addition, every change in ownership of at least 0.5% of the paid-up shares must be reported. This policy has been adopted by the Company.

IMPLEMENTATION IN THE FISCAL YEAR

In the 2022 financial year, there is no change in share ownership by the Board of Commissioners and Directors. Details of the share ownership of the Board of Commissioners and Board of Directors, both directly and indirectly, are described in the "Company Profile" chapter.

SISTEM PELAPORAN PELANGGARAN

WHISTLEBLOWING SYSTEM

Sistem pelaporan pelanggaran atau *Whistleblowing System* (WBS) merupakan saluran penyampaian informasi pelanggaran yang diberikan kepada pemangku kepentingan, baik internal maupun eksternal, untuk menyampaikan laporan kepada Perseroan. Penerapan WBS ini merupakan bagian penting dari upaya Perseroan menerapkan prinsip GCG serta menjaga integritas usaha yang dijalankan.

The Whistleblowing System (WBS) is a channel for delivering information on violations to stakeholders, both internal and external, who then submit reports to the Company. The implementation of the WBS is a crucial part of the Company's efforts to implement GCG principles as well as to maintain the integrity of the business being carried out.

CARA, PROSEDUR DAN PENGELOLA LAPORAN

Pengaduan pelanggaran yang terjadi dapat dilaporkan melalui *e-mail*, telepon, serta dapat juga dilaporkan secara langsung kepada pihak yang menangani pelaporan pelanggaran, yaitu HR Services and Employee Relations Division. Seluruh laporan yang masuk akan diverifikasi berdasarkan bukti terkait. Apabila benar terjadi pelanggaran, maka terlapor akan diberikan sanksi sesuai dengan beratnya pelanggaran.

Perseroan memberikan sanksi yang tegas dan konsisten atas pelanggaran yang terbukti dan ditangani melalui WBS. Dengan demikian, dapat memberikan efek jera bagi pelaku pelanggaran maupun pihak lain yang memiliki niat melakukan pelanggaran.

MECHANISM, PROCEDURES, AND REPORT MANAGERS

The report on violations that occurred may be sent via email or telephone, and it can also be reported directly to the party that handles violation reporting, which is the HR Services & Employee Relations Division. The follow-up on the incoming reports will be verified based on relevant evidence. In the event that the violation is proven correct, punishment will be imposed on the reported party according to the degree of the violation.

The Company imposes firm and consistent sanctions for proven violations, which are handled through the WBS. Therefore, giving a deterrent effect to violators and other parties who have the intention of committing violations.

PERLINDUNGAN BAGI PELAPOR

Setiap pelapor mendapatkan hak perlindungan dari Perseroan dalam bentuk kerahasiaan identitas dan dukungan moril lainnya. Namun demikian, hak perlindungan akan dicabut apabila terbukti pelapor memberikan laporan palsu.

PROTECTION FOR WHISTLEBLOWER

Each whistleblower is entitled to protection from the Company in the form of anonymity and other moral support. However, the right to protection will be revoked if it is proven to be a false report.

HASIL DARI PENANGANAN PENGADUAN

Sepanjang tahun buku 2022, tidak ada pengaduan yang masuk melalui *Whistleblowing System*. Dengan demikian, Perseroan tidak dapat menyampaikan rinciannya.

RESULT OF COMPLAINT HANDLING

Throughout the 2022 financial year, no complaints have been received through the Whistleblowing System. Thus, the Company cannot provide details.

KEBIJAKAN ANTI KORUPSI DAN GRATIFIKASI

ANTI-CORRUPTION AND GRATIFICATION POLICY

Perilaku korupsi dan gratifikasi yang merupakan upaya memperoleh keuntungan untuk diri sendiri atau orang lain, tidak hanya merugikan Perseroan, tetapi juga para pemangku kepentingan lainnya serta masyarakat pada umumnya. Karena itu, Perseroan secara tegas menolak korupsi dan gratifikasi di lingkungan Perseroan.

Kebijakan tentang anti korupsi dan gratifikasi telah diatur dalam Kode Etik Perseroan dan diinternalisasikan dalam nilai perusahaan, yaitu iSTAR, khususnya nilai integritas dan akuntabilitas. Agar praktik bebas korupsi ini dapat berjalan secara konsisten, maka Perseroan melakukan sosialisasi secara berkala kepada karyawan, mitra usaha, dan pelanggan dalam berbagai kesempatan.

PROGRAM DAN PROSEDUR MENGATASI PRAKTIK KORUPSI

Upaya Perseroan untuk mengatasi potensi terjadinya praktik korupsi, terutama dilakukan melalui sosialisasi atau penyampaian informasi terkait dengan Kode Etik yang berlaku di Perseroan. Selain itu, Perseroan juga telah menyediakan sistem pengaduan seandainya ada dugaan praktik korupsi terjadi di lingkungan Perseroan.

Saluran pengaduan tersebut merupakan bagian dari *Whistleblowing System* atau sistem pengaduan pelanggaran yang dapat disampaikan melalui *e-mail*. Selain itu, informasi dapat juga dilaporkan secara langsung kepada pihak yang menangani pelaporan pelanggaran yaitu HR Service & Employee Relations Division.

PELATIHAN/SOSIALISASI ANTI KORUPSI KEPADA KARYAWAN

Sosialisasi kebijakan anti korupsi dilaksanakan secara berkala, bersamaan dengan sosialisasi Kode Etik perusahaan. Saluran komunikasi dalam penyampaian kebijakan anti korupsi, antara lain: portal internal (intranet); materi orientasi pegawai baru dalam sesi *New Employee Onboarding Program* (NEOP); serta pertemuan dan diskusi langsung.

The corruption and gratification behavior, which is an effort to gain profit for oneself or others, is not only detrimental to the Company, but also to other stakeholders and society in general. Therefore, the Company firmly rejects corruption and gratification within the Company.

The policies on anti-corruption and gratuity have been regulated in the Company's Code of Conduct and are internalized in the corporate values, namely iSTAR, particularly the values of integrity and accountability. In order to ensure that a corruption-free practice can run consistently, the Company conducts periodic socialization with employees, business partners, and customers on various occasions.

PROGRAMS AND PROCEDURES TO ADDRESS CORRUPT PRACTICES

The Company's efforts to address the potential for corrupt practices are mainly carried out through socialization or the delivery of information related to the Code of Conduct applicable in the Company. In addition, the Company has also provided a complaint system in the event of allegations of corrupt practices occurring within the Company.

The complaint channel is part of the Whistleblowing System or a violation complaint system that can be submitted via email. In addition, information can also be reported directly to the party handling the reporting of violations, i.e., the HR Service & Employee Relations Divisions.

ANTI-CORRUPTION TRAINING/ SOCIALIZATION TO EMPLOYEES

Socialization of the anti-corruption policy is carried out regularly, along with the socialization of the Company's Code of Conduct. Communication channels in the delivery of anti-corruption policy include internal portal (intranet); new employee orientation materials in the New Employee Onboarding Program (NEOP) session; as well as face-to-face meetings and discussions.

Human Resources

Perseroan telah memiliki "*Competency Framework*" bagi pengembangan SDM yang mencakup kompetensi teknis maupun non-teknikal, termasuk sistem pembelajarannya.

The company already has a "Competency Framework" for human resource development that includes technical and non-technical competencies, as well as a learning system.

PENGELOLAAN SUMBER DAYA MANUSIA

MANAGEMENT OF HUMAN RESOURCES

PT Chandra Asri Petrochemical Tbk ("Chandra Asri", "Perseroan") menilai bahwa Sumber Daya Manusia (SDM) merupakan aset penting dalam mewujudkan visi dan misi Perseroan. Pencapaian kinerja Perseroan, baik dalam jangka pendek, menengah, maupun jangka panjang hanya dapat dicapai melalui kontribusi SDM yang memiliki kompetensi dan kapasitas yang mumpuni serta berintegritas.

PT Chandra Asri Petrochemical Tbk ("Chandra Asri", "The Company") considers that Human Resources (HR) are an important asset in realizing the Company's vision and mission. The achievement of the Company's performance, both in the short, medium, and long terms, can only be achieved through HR contributions who have competence, qualified capacity, and integrity.

Perseroan mengelola SDM secara efektif dan terarah sejak dari proses rekrutmen hingga pengembangan karier, sebagai upaya untuk mewujudkan SDM unggul yang dapat menggerakkan organisasi ke arah yang lebih baik. Pengembangan kompetensi dan pengelolaan SDM juga diarahkan sejalan dengan perkembangan industri yang digeluti Perseroan.

Mengacu pada harapan itu, Perseroan selalu mengutamakan pelatihan dan pengembangan kompetensi bagi karyawan. Perseroan juga telah memiliki "*Competency Framework*" yang mencakup kompetensi teknis maupun non-teknis, termasuk sistem pembelajarannya sebagai panduan pengembangan kompetensi SDM. Melalui konsep tersebut, karyawan dibentuk untuk menjadi SDM yang mumpuni sehingga dapat mendukung perkembangan Perseroan ke depan.

Pendidikan dan pelatihan yang diterapkan oleh Perseroan juga didesain sesuai dengan kebutuhan karyawan serta tepat sasaran guna mendukung rencana kerja Perseroan secara keseluruhan. Pada prinsipnya, pengembangan SDM dijalankan dengan berbasis kompetensi yang terdiri dari kompetensi inti (*core*), kepemimpinan (*leadership*), fungsional/teknis (*functional/technical*), *job family*, serta program untuk *wellbeing*.

The Company manages human resources in an effective and directed manner, from the recruitment process to career development, in an effort to create excellent human resources who can move the organization to a better direction. Competency development and HR management are also directed in line with the development of the industry in which the Company is involved.

Referring to this expectation, the Company always prioritizes training and competency development for employees. In addition, the Company also has a "*Competency Framework*" that includes technical and non-technical competencies, as well as its learning system, which serves as a guide for HR competency development. Through these concepts, employees are shaped to become qualified HR that will be able to support the Company's development in the future.

The education and training that are implemented by the Company are designed in accordance with the needs of employees and are also right on target to support the Company's overall work plan. In principle, HR development is competency-based, which consists of core, leadership, functional/technical, and job family competencies, as well as programs for their well-being.

Perseroan berprinsip bahwa kegiatan usaha harus tumbuh dan berkembang bersama SDM. Komitmen tersebut diwujudkan dengan lahirnya *Employee Value Proposition* (EVP), nilai yang ditawarkan oleh Perseroan kepada karyawan dan calon karyawan terkait pengembangan diri, kultur, penghargaan, pengakuan (*recognition*), dan apresiasi yang membedakan Perseroan dengan perusahaan lainnya.

Konsep tersebut hadir untuk menegaskan komitmen Perseroan yang memosisikan karyawan sebagai investasi terbaik. Pada akhirnya, hal ini diharapkan dapat meningkatkan keunggulan kompetitif Perseroan di lingkungan industri yang terus berkembang pesat.

Model pelatihan dan pengembangan kompetensi dilakukan melalui pertemuan baik secara tatap muka (*offline*) maupun daring (*online*). Program-program yang dilakukan pada dasarnya dilakukan untuk menutup kesenjangan kompetensi yang ada dalam suatu kelompok karyawan maupun individu berdasarkan hasil peninjauan. Selain itu, terdapat juga program pengembangan yang disesuaikan dengan arahan dan kebutuhan Perseroan dalam rangka mendukung pencapaian target jangka panjang Chandra Asri.

The Company has the principle that business activities must grow and progress with HR. This commitment is manifested with the creation of the "Employee Value Proposition" (EVP), namely the values offered by the Company to employees and prospective employees in terms of self-development, culture, awards, recognition, and appreciation that distinguish the Company from other companies.

The concept aims to underline the Company's commitment that positions its employees as the best investment. Ultimately, this is expected to increase the Company's competitive advantage in an industrial environment that continues to grow rapidly.

The competency training and development model is carried out through face-to-face (*offline*) and online meetings. The programs are being carried out to solve competency gaps in a group of employees and individuals based on the assessment results. In addition, there are also development programs that are tailored to the direction and needs of the Company to support the achievement of Chandra Asri's long-term targets.

PRINSIP PENGELOLAAN SUMBER DAYA MANUSIA

HUMAN RESOURCES MANAGEMENT PRINCIPLES

Pengelolaan SDM di lingkungan Perseroan direalisasikan dengan mengacu pada prinsip-prinsip seperti diuraikan dalam tabel di bawah ini.

HR management within the Company is realized by referring to the principles described in the table below.

No.	Prinsip Principle	Realisasi Realization
1.	Perencanaan SDM yang Terarah dan Terkendali Focused and Controlled HR Planning	Perencanaan kuantitas dan kualitas SDM, serta penetapan tugas dan tanggung jawab masing-masing jabatan disesuaikan dengan kebutuhan masing-masing unit kerja yang ada saat ini, serta pengembangan usaha yang dilakukan Perseroan. HR quantity and quality planning, as well as the assignment of duties and responsibilities for each position, are adjusted to the needs of every existing work unit and business development carried out by the Company.
2.	Rekrutmen yang Adil dan Setara Fair and Equal HR Recruitment	Perseroan memiliki komitmen bahwa setiap SDM direkrut sesuai dengan pengetahuan, kemampuan, dan keterampilannya dalam memenuhi tugas dan tanggung jawabnya. Karena itu, tidak ada tindakan diskriminasi dalam rekrutmen SDM Perseroan, baik terhadap jenis kelamin, suku, agama, ras, maupun golongan politik. The Company is committed to hiring employees based on their knowledge, abilities, and skills in carrying out their duties and responsibilities. Therefore, there is no act of discrimination in the Company's HR recruitment, either on gender, ethnicity, religion, race, or political groups.
3.	Pengembangan Kompetensi dan Pengembangan Karier yang Sesuai Competence Development and Appropriate Career Development	Setiap SDM berhak mendapatkan pendidikan dan pelatihan yang diperlukan dalam berkari di Perseroan. Hal ini merupakan bentuk dukungan Perseroan bagi SDM dalam mencapai target individu yang ditetapkan sehingga dapat terus mengembangkan kariernya di Perseroan sesuai dengan peningkatan kompetensi yang dimiliki. Every HR has the right to receive the education and training programs needed while working in the Company. This is a way for the Company to support HR in achieving the individual targets set so that they can continue to develop their careers in the Company based on their competency improvements.
4.	Penilaian Kinerja yang Jujur dan Adil Honest and Fair Performance Assessment	Evaluasi kinerja oleh atasan langsung dilakukan secara wajar, jujur, dan adil. Setiap orang dinilai berdasarkan kompetensi, kinerja, dan akuntabilitas masing-masing. Performance evaluation by a direct supervisor is carried out properly, honestly, and fairly. Everyone is evaluated based on their competence, performance, and accountability.
5.	Pemenuhan Kesejahteraan Ekonomi dan Sosial Fulfillment of Economic and Social Welfare	Wujud penghargaan Perseroan terhadap setiap usaha SDM, terutama diwujudkan dalam bentuk pemberian remunerasi yang layak serta sesuai dengan standar remunerasi industri terkait dan peraturan perundang-undangan di bidang ketenagakerjaan. Perseroan juga menghargai kebebasan berserikat dan berkumpul untuk menyampaikan aspirasi kepada Manajemen. The Company's appreciation for each HR effort is mainly manifested in the form of providing appropriate remuneration in accordance with relevant industry remuneration standards and applicable Labor law and regulations. In addition, the Company respects the freedom to associate and assemble in order to convey aspirations to Management.

STRUKTUR PENGELOLAAN SUMBER DAYA MANUSIA

HUMAN RESOURCES MANAGEMENT STRUCTURE

Pengelolaan SDM Perseroan dijalankan oleh Direktorat Human Resources (HR) yang dipimpin oleh Direktur SDM & Urusan Korporat. Direktorat ini membawahi 2 (dua) General Manager (GM): GM HR Employee Relations dan GM HR Strategy. Divisi HR Employee Relations merupakan bagian personalia dan hubungan industrial, sedangkan HR Strategy bertanggung jawab untuk proses rekrutmen, pelatihan, manajemen talenta, kompensasi, dan proses evaluasi kinerja karyawan. Perseroan juga telah menunjuk HR Business Partner (HRBP) yang berada di kantor pusat maupun di pabrik Perseroan untuk menyelaraskan kebutuhan bisnis dengan pekerja dan lini manajemen dari unit-unit bisnis. HRBP juga memiliki tugas untuk memformulasikan kemitraan dengan seluruh fungsi HR dalam rangka melayani serta memberikan nilai tambah kepada manajemen dan pekerja, sekaligus menjawab kebutuhan bisnis dan organisasi.

The Company's HR management is carried out by the Human Resources (HR) Directorate, led by the Director of HR & Corporate Affairs. This Directorate oversees 2 (two) General Managers (GM): GM HR Employee Relations and GM HR Strategy. HR Employee Relations is the personnel and industrial relations division, while HR Strategy is responsible for the processes of recruitment, training, talent management, compensation, and employee performance evaluation. The Company has also appointed HR Business Partners (HRBP) at its headquarters and plant to align business needs with employees and management lines of business units. HRBP is also responsible for formulating partnership with all HR functions in order to serve and add value to Management and employees while responding to business and organizational needs.

REKRUTMEN SUMBER DAYA MANUSIA

HUMAN RESOURCES MANAGEMENT RECRUITMENT

Sesuai dengan prinsip pengelolaan SDM, Perseroan senantiasa melakukan kajian secara berkala tentang kebutuhan SDM pada unit-unit organisasi. Dari hasil kajian tersebut, penambahan kuantitas SDM akan dilakukan oleh Divisi Human Resources apabila dibutuhkan.

In accordance with HR management principles, the Company always conducts periodical reviews on the HR needs of organizational units. Based on the results of this study, HR quantity addition will be done by Human Resources Division if needed.

Pola rekrutmen dilakukan melalui 2 (dua) pendekatan. Pertama, rekrutmen internal untuk membuka kesempatan dan memfasilitasi pengembangan karier karyawan. Kedua, rekrutmen eksternal yang melibatkan perangkat daerah, yakni kerja sama dengan Dinas Tenaga Kerja Pemda untuk mendapatkan tenaga kerja lokal. Ketiga, metode rekrutmen secara terbuka, yaitu melalui iklan lowongan kerja di *website* Perseroan, LinkedIn, JobStreet, referensi internal, serta lembaga penyedia tenaga kerja lainnya.

The pattern of recruitment is carried out through 2 (two) approaches. First, internal recruitment to open opportunities and facilitate employee career development. Second, external recruitment that involves local officials through cooperation with the Local Manpower Government Office to recruit local workers. Third, open recruitment method, i.e., through job advertisements on the Company's website, LinkedIn, JobStreet, and internal references, as well as other labor provider agencies.

Kandidat yang masuk daftar calon karyawan selanjutnya akan melalui proses seleksi. Dalam proses ini, perhatian utama Perseroan adalah kesesuaian kebutuhan organisasi dengan keterampilan, kemampuan serta pengalaman calon karyawan untuk melaksanakan tugas sesuai dengan tuntutan pekerjaan. Perseroan memastikan tidak ada diskriminasi dalam proses rekrutmen, baik terkait dengan jenis kelamin, suku, agama, ras, maupun golongan politik.

Pada tahun buku 2022, Perseroan telah merekrut 179 karyawan baru.

Candidates that are listed as prospective employees will go through a selection process. In this process, the Company's primary concern is the suitability of the organization's needs with the skills, abilities, and experience of prospective employees to perform tasks in accordance with the job demands. The Company ensures that there is no discrimination in the recruitment process, whether related to gender, ethnicity, religion, race, or political group.

In the 2022 fiscal year, the Company has recruited 179 new employees.

PROFIL SUMBER DAYA MANUSIA

HUMAN RESOURCES MANAGEMENT PROFILE

Hingga akhir tahun buku 2022, jumlah karyawan Perseroan mencapai 2.001 orang. Jumlah ini lebih tinggi 0,70% dari tahun 2021 sebanyak 1.987 orang. Perubahan kuantitas karyawan itu disesuaikan dengan kebutuhan Perseroan tahun 2022.

Informasi selengkapnya terkait komposisi SDM Perseroan diuraikan secara lengkap pada bab "Profil Perusahaan" yang terdapat dalam Laporan Tahunan ini.

As of the end of 2022, the Company's total number of employees reached 2,001 people. This figure is 0.70% higher compared to 1,987 people in 2021. The change in the number of employees is adjusted to the needs of the Company in 2022.

Complete information regarding the composition of the Company's HR is described in full in the "Company Profile" chapter contained in this Annual Report.

TINGKAT *TURNOVER* KARYAWAN

EMPLOYEE TURNOVER RATE

Pada tahun 2022, tingkat *turnover* karyawan Perseroan sebesar 3,85%, lebih tinggi dibandingkan tahun 2021, yaitu 2,47%. Perubahan itu terjadi karena adanya karyawan yang ingin melanjutkan kuliah atau alasan pribadi lainnya.

In 2022, the Company's employee turnover rate was 3,85%, higher compared to 2021, which was 2.47%. The change occurred because there were employees who wanted to continue their studies or leave for other personal reasons.

Tingkat *Turnover* Turnover Rate

Uraian Description	Satuan Unit	2022	2021	2020
Tenaga Kerja Baru New Employee	Orang People	179	40	76

Tingkat <i>Turnover</i> Turnover Rate	%	3,85	2,47	1,36

Dalam upaya meminimalisir tingkat *turnover*, Perseroan menerapkan sejumlah inisiatif, seperti kebijakan promosi/ progresi karir, program *First Home Ownership Program* (FHOP), dan program suksesi yang jelas.

A number of initiatives are being implemented by the Company to reduce turnover. For example, promotion/ progression policies for star talent, First Home Ownership Program (FHOP), and clear success programs.

PELATIHAN DAN PENGEMBANGAN KOMPETENSI SUMBER DAYA MANUSIA

HUMAN RESOURCES MANAGEMENT COMPETENCE TRAINING AND DEVELOPMENT

Sepanjang tahun 2022, program pengembangan yang direalisasikan mengacu pada *Annual Learning & Development Plan* (ALDP) di setiap fungsi organisasi Perseroan. ALDP telah didiskusikan di akhir tahun 2021 bersama para manajer lini. Metode pengembangan yang digunakan bervariasi, yaitu pendekatan 70:20:10, di mana prinsip 70 berfokus pada pembelajaran langsung atau *on the job training*. Prinsip 20 menekankan pada *coaching/mentoring*. Sedangkan prinsip 10 adalah pelatihan di kelas atau pembelajaran mandiri.

Mengingat pandemi COVID-19 belum sepenuhnya berakhir pada tahun 2022, Perseroan melakukan adaptasi pada program pengembangan karyawan agar dilakukan secara *online* dengan tetap menjalankan kegiatan pengembangan kompetensi.

Program-program yang dijalankan pada dasarnya adalah untuk mengisi kesenjangan kompetensi yang ada pada suatu kelompok karyawan maupun individu berdasarkan hasil asesmen. Selain itu juga terdapat program pengembangan lainnya sesuai dengan arahan dan kebutuhan Perseroan guna mendukung pencapaian target jangka panjang Perseroan.

Dalam rangka mendukung komitmen pengembangan SDM berkualitas, Perseroan mengalokasikan dana sekitar US\$1,3 juta untuk implementasi program pembelajaran dan pengembangan di sepanjang tahun 2022. Rincian pelaksanaan pengembangan kompetensi karyawan diuraikan pada bab "Profil Perusahaan" yang terdapat dalam Laporan Tahunan ini.

Throughout 2022, the realized development program refers to the Annual Learning & Development Plan (ALDP) in every organizational function of the Company. ALDP has been discussed at the end of 2021 with line managers. The development method used are varied, namely the 70:20:10 approach, where the 70 principle focuses on direct learning or on-the-job training. Coaching/mentoring are emphasized in principle 20, whereas in-class training or independent learning is emphasized in principle 10.

Given that the COVID-19 pandemic has not been completely over by 2022, the Company has made adaptation on its employee development program so that it can be held online while continuing to conduct competency development activities.

Based on the assessment results, the programs implemented are designed to fill competency gaps in a group of employees or individuals. There are also other development programs in accordance with the Company's direction and needs to support the achievement of the Company's long-term targets.

To support its commitment to developing quality human resources, the Company allocated approximately US\$1.3 million for the implementation of learning and development programs throughout 2022. The implementation of employee competency development is described in detail in the "Company Profile" chapter of this Annual Report.

MANAJEMEN KINERJA SUMBER DAYA MANUSIA

HUMAN RESOURCES PERFORMANCE MANAGEMENT

Sebagai upaya untuk memastikan bahwa setiap SDM melaksanakan pekerjaannya secara konsisten serta sesuai tugas dan fungsi utamanya, Perseroan memiliki alat ukur yaitu Manajemen Kinerja SDM. Manajemen Kinerja tersebut berbasis pada pencapaian *Key Performance Indicator* (KPI). Perseroan juga telah menyusun KPI Library berdasarkan proses kerja di masing-masing area untuk memastikan kualitas dan standar kinerja yang lebih tepat sasaran.

Penetapan KPI dilakukan secara terstruktur yang diturunkan mulai dari KPI Korporat, Direktorat, Divisi, Departemen, dan Seksi, dari individu di tingkat manajer hingga staf. Selain itu, Perseroan menggunakan iSTAR yang merupakan "Nilai Perseroan" untuk menjadi acuan perilaku karyawan dalam bekerja.

Hasil penilaian terhadap pencapaian KPI dan nilai iSTAR menjadi dasar pemberian umpan balik dan pembinaan rutin karyawan untuk meningkatkan produktivitas. Hasil penilaian tersebut juga digunakan sebagai salah satu dasar pemberian penghargaan dan kompensasi serta pengembangan karier.

As an effort to ensure that each HR carries out its work consistently and according to its main duties and functions, the Company has a measurement tool, i.e., HR Performance Management. Performance Management is based on the achievement of Key Performance Indicators (KPI). The Company has also developed a KPI library based on work processes in each area to ensure more targeted quality and performance standards.

KPIs are determined in a structured manner, cascaded started from Corporate KPIs, Directorates, Divisions, Departments, and Sections, and finally to individuals at the manager level and staff. Furthermore, the Company uses iSTAR, which is the "Company Values," as a reference for employee behavior at work.

The outcomes of the evaluation of KPIs and iSTAR value achievement become the basis for providing regular feedback and coaching to employees in order to increase productivity. The assessment results are also used to determine awarding and compensation, as well as career development.

PENGHARGAAN DAN KOMPENSASI

REWARDS AND RECOGNITION

Perseroan memiliki mekanisme dalam memberikan penghargaan dan kompensasi kepada karyawan yang bertujuan meningkatkan motivasi dan loyalitas karyawan. Program tersebut terbagi menjadi *reward monetary* dan *non-monetary*, serta kombinasi dari keduanya. Sementara itu, kompensasi diberikan dalam bentuk kenaikan gaji atau bonus kinerja. Seluruhnya direalisasikan berdasarkan hasil penilaian yang adil dan transparan.

Perseroan menjaga agar tingkat kesesuaian penghargaan dan kompensasi tetap menarik dengan cara melakukan perbandingan (*benchmarking*) secara berkala di lingkungan industri petrokimia. Beberapa unsur yang menjadi pembandingan, antara lain terkait dengan persyaratan, jenis, dan besaran kompensasi yang diberikan.

The Company has a mechanism for providing rewards and compensations to employees with the aim of increasing employees' motivation and loyalty. The program is divided into monetary and non-monetary rewards, as well as a combination of the two. Compensation is given in the form of salary increases or performance bonuses. All are realized based on the results of a fair and transparent assessment.

By conducting periodical benchmarking within the petrochemical industry, the Company ensures that the appropriate level of awards and compensation remains appealing. Among the elements that serve as comparisons are the requirements, type, and amount of compensation provided.

Hasil perbandingan tersebut ditindaklanjuti oleh analisis di internal Perseroan untuk dilakukan penyesuaian bila dibutuhkan. Sementara itu, evaluasi remunerasi dilaksanakan melalui Survei Total Remunerasi Tahunan (*Annual Total Remuneration Survey/TRS*) yang dilaksanakan oleh konsultan SDM Mercer. Hingga saat ini, Perseroan berhasil mempertahankan daya saing besaran penghargaan dan kompensasi yang menarik bagi karyawan, jika dibandingkan dengan perusahaan sejenis di industri petrokimia nasional.

The results of these comparisons are followed by an internal Company analysis to make adjustments as needed. Meanwhile, evaluation is carried out through the Annual Total Remuneration Survey (TRS), which is conducted by an HR consultant, Mercer. Until now, the Company has managed to maintain competitiveness of the amount of rewards and attractive compensation for employees, compared to similar companies in the national petrochemical industry.

PENGEMBANGAN KARIER SUMBER DAYA MANUSIA

HUMAN RESOURCES CAREER DEVELOPMENT

Perseroan mendukung setiap karyawan untuk mengembangkan dan meningkatkan kariernya. Melalui Sistem Manajemen Karier, karyawan dapat mulai menentukan arah karier yang diinginkan dan mengidentifikasi program pengembangan diri yang diperlukan untuk mewujudkan hal tersebut. Pengembangan karier dapat dilakukan secara vertikal, yakni melalui promosi jabatan, ataupun secara horizontal, yakni melalui mutasi pada bidang tertentu dengan tingkat jabatan yang setara.

The Company supports every employee to develop and enhance their career. Through the Career Management System, employees can begin to determine their desired career direction and identify the required self-development programs to achieve this. Career development can be carried out vertically, namely through promotion, or horizontally, namely through transfers in certain fields with an equivalent level of position.

Hingga 31 Desember 2022, total karyawan Perseroan yang mendapatkan promosi jabatan sebanyak 50 orang. Sedangkan, jumlah karyawan yang dimutasi/dirotasi pada level jabatan yang sama sebanyak 94 orang.

As of 31 December 2022, the Company's total number of employees entitled to promotion was 50 employees. Meanwhile, a number of employees who were transferred/rotated at the same level of position were 94 employees.

REMUNERASI DAN KESEJAHTERAAN SUMBER DAYA MANUSIA

HUMAN RESOURCES REMUNERATION AND WELFARE

Perseroan menerapkan sistem remunerasi secara transparan dan adil sesuai penilaian kinerja dan peraturan perundang-undangan yang berlaku. Pemberian remunerasi dilaksanakan sesuai dengan Perjanjian Kerja Bersama (PKB) yang antara lain mengatur tentang kesejahteraan karyawan, insentif kerja, upah lembur, dana pensiun, tunjangan kesehatan, tunjangan kinerja tahunan dan liburan bonus.

PKB tersebut selalu dievaluasi secara berkala untuk disesuaikan dengan perubahan peraturan perundang-undangan dan perkembangan industri petrokimia di Indonesia.

Uraian terkait remunerasi dan manfaat lainnya bagi karyawan adalah sebagai berikut:

The Company implements a transparent and fair remuneration system based on performance evaluation and the prevailing regulations. It is also carried out in accordance with the Collective Labor Agreement (CLA), which among other things regulates employee welfare, work incentives, overtime wages, pension funds, health benefits, annual performance benefits, and holiday bonuses.

The CLA is always evaluated on a regular basis to adapt to changes in laws and regulations, as well as developments in Indonesia's petrochemical industry.

Laporan Auditor Independen

No. 00116/2.1265/AU.1/04/1766-1/1/III/2023

Pemegang Saham, Dewan Komisaris dan Direksi

PT Chandra Asri Petrochemical Tbk

Opini

Kami telah mengaudit laporan keuangan konsolidasian PT Chandra Asri Petrochemical Tbk dan entitas anaknya ("Grup"), yang terdiri dari laporan posisi keuangan konsolidasian tanggal 31 Desember 2022, serta laporan laba rugi dan penghasilan komprehensif lain konsolidasian, laporan perubahan ekuitas konsolidasian dan laporan arus kas konsolidasian untuk tahun yang berakhir pada tanggal tersebut, serta catatan atas laporan keuangan konsolidasian, termasuk ikhtisar kebijakan akuntansi signifikan.

Menurut opini kami, laporan keuangan konsolidasian terlampir menyajikan secara wajar, dalam semua hal yang material, posisi keuangan konsolidasian Grup tanggal 31 Desember 2022, serta kinerja keuangan konsolidasian dan arus kas konsolidasiannya untuk tahun yang berakhir pada tanggal tersebut sesuai dengan Standar Akuntansi Keuangan di Indonesia.

Basis Opini

Kami melaksanakan audit kami berdasarkan Standar Audit yang ditetapkan oleh Institut Akuntan Publik Indonesia. Tanggung jawab kami menurut standar tersebut diuraikan lebih lanjut dalam paragraf Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan Konsolidasian pada laporan kami. Kami independen terhadap Grup berdasarkan ketentuan etika yang relevan dalam audit kami atas laporan keuangan konsolidasian di Indonesia, dan kami telah memenuhi tanggung jawab etika lainnya berdasarkan ketentuan tersebut. Kami yakin bahwa bukti audit yang telah kami peroleh adalah cukup dan tepat untuk menyediakan suatu basis bagi opini audit kami.

Independent Auditor's Report

No. 00116/2.1265/AU.1/04/1766-1/1/III/2023

The Stockholders, Board of Commissioners and Directors

PT Chandra Asri Petrochemical Tbk

Opinion

We have audited the consolidated financial statements of PT Chandra Asri Petrochemical Tbk and its subsidiaries (the "Group"), which comprise the consolidated statement of financial position as at December 31, 2022 and the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2022, and its consolidated financial performance and its consolidated cash flows for year then ended in accordance with Indonesian Financial Accounting Standards.

Basis for Opinion

We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements paragraph of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Indonesia, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Hal Audit Utama

Hal audit utama adalah hal-hal yang, menurut pertimbangan profesional kami, merupakan hal yang paling signifikan dalam audit kami atas laporan keuangan konsolidasian periode kini. Hal-hal tersebut disampaikan dalam konteks audit kami atas laporan keuangan konsolidasian secara keseluruhan, dan dalam merumuskan opini kami atas laporan keuangan konsolidasian terkait, kami tidak menyatakan suatu opini terpisah atas hal audit utama tersebut.

Penyisihan penurunan nilai persediaan

Pada tanggal 31 Desember 2022, persediaan Grup sebesar US\$ 316.730 ribu, yang merupakan 6,4% dari jumlah aset Grup. Persediaan ini sebagian besar terdiri dari barang jadi dan bahan baku masing-masing sebesar US\$ 111.925 ribu dan US\$ 128.281 ribu, yang mana telah ditelaah manajemen pada biaya yang lebih rendah atau nilai realisasi bersih.

Selama tahun berjalan, Grup telah menurunkan persediaan ke nilai realisasi bersih sebesar US\$ 41.400 ribu, yang merupakan 27,7% dari rugi Grup pada tahun berjalan, dikarenakan dengan volatilitas harga bahan baku. Dalam menentukan nilai realisasi bersih barang jadi, manajemen membuat estimasi harga jual berdasarkan harga jual masa lalu dan harga bahan baku terkini, dan mempertimbangkan fluktuasi harga atau biaya setelah akhir tahun.

Seiring dengan kondisi pasar yang tidak stabil dan penuh tantangan, meskipun persediaan memiliki perputaran yang cepat, terdapat resiko bahwa nilai realisasi bersih atas persediaan Grup kemungkinan dicatat dibawah nilai perolehan. Oleh karena itu, penyisihan penurunan nilai persediaan ditentukan sebagai hal audit utama.

Pengungkapan atas penyisihan penurunan penilaian persediaan Grup dijelaskan pada Catatan 4 dan 8 pada laporan keuangan konsolidasian.

Bagaimana hal ini ditangani dalam audit

Kami telah melakukan prosedur audit berikut berkaitan dengan penyisihan penurunan nilai persediaan:

- Memeroleh pemahaman atas proses dan pengendalian yang relevan berkaitan dengan penyisihan penurunan nilai persediaan serta mengevaluasi rancangan dan implementasi pengendalian yang relevan.
- Memeroleh penilaian manajemen atas nilai realisasi bersih persediaan dan melakukan pemilihan atas persediaan serta membandingkan biaya dengan harga jual aktual persediaan untuk menentukan apakah persediaan dicatat pada biaya yang lebih rendah atau nilai realisasi bersih.
- Menelaah kesesuaian pengungkapan terkait di dalam laporan keuangan konsolidasian.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Allowance for decline in value of inventories

As of December 31, 2022, the Group's inventories of US\$ 316,730 thousand, which accounted for approximately 6.4% of the Group's total assets. These inventories consists mainly of finished goods and raw materials amounting to US\$ 111,925 thousand and US\$ 128,281 thousand, respectively, which management has assessed at lower of cost or net realizable value.

During the financial year, the Group has written down its inventories to the net realizable value by an amount of US\$ 41,400 thousand, which accounted for approximately 27.7% of the Group's loss for the year, due to the volatility of the raw material prices. In determining the net realizable value of the finished goods, management makes estimates of the selling prices based on the historical selling prices and current raw material prices, and taking into account the fluctuations of price or cost after the end of the year.

As the market conditions continue to be volatile and challenging, although the inventories are considered to have high turnover, there is a risk that the net realizable value of the Group's inventories may be below cost. As such, the allowance for decline in value of inventories has been determined as a key audit matter.

The Group's disclosures on the allowance for decline in value of inventories are set out in Notes 4 and 8 to the consolidated financial statements.

How the matter was addressed in the audit

We performed the following audit procedures in relation to the allowance for decline in value of inventories:

- Obtained an understanding of processes and relevant controls of determination of allowance for decline in value of inventories and evaluated the design and implementation of relevant controls.
- Obtained management's assessment of the net realizable value of inventories and made a selection of inventories and compared the costs to the actual selling prices to determine whether the inventories are stated at the lower of cost and net realizable value.
- Assessed the appropriateness of the related disclosures in the consolidated financial statements.

Informasi Lain

Manajemen bertanggung jawab atas informasi lain. Informasi lain terdiri dari informasi yang tercantum dalam laporan tahunan, tetapi tidak mencantumkan laporan keuangan konsolidasian dan laporan auditor kami.

Opini kami atas laporan keuangan konsolidasian tidak mencakup informasi lain, dan oleh karena itu, kami tidak menyatakan bentuk keyakinan apapun atas informasi lain tersebut.

Sehubungan dengan audit kami atas laporan keuangan konsolidasian, tanggung jawab kami adalah untuk membaca informasi lain dan, dalam melaksanakannya, mempertimbangkan apakah informasi lain mengandung ketidakkonsistensian material dengan laporan keuangan konsolidasian atau pemahaman yang kami peroleh selama audit, atau mengandung kesalahan penyajian material. Jika, berdasarkan pekerjaan yang telah kami laksanakan, kami menyimpulkan bahwa terdapat suatu kesalahan penyajian material dalam informasi lain tersebut, kami diharuskan untuk melaporkan fakta tersebut. Kami tidak melaporkan apapun terkait hal tersebut.

Tanggung Jawab Manajemen dan Pihak yang Bertanggung Jawab atas Tata Kelola terhadap Laporan Keuangan Konsolidasian

Manajemen bertanggung jawab atas penyusunan dan penyajian wajar laporan keuangan konsolidasian tersebut sesuai dengan Standar Akuntansi Keuangan di Indonesia, dan atas pengendalian internal yang dianggap perlu oleh manajemen untuk memungkinkan penyusunan laporan keuangan konsolidasian yang bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan.

Dalam penyusunan laporan keuangan konsolidasian, manajemen bertanggung jawab untuk menilai kemampuan Grup dalam mempertahankan kelangsungan usahanya, mengungkapkan, sesuai dengan kondisinya, hal-hal yang berkaitan dengan kelangsungan usaha, dan menggunakan basis akuntansi kelangsungan usaha, kecuali manajemen memiliki intensi untuk melikuidasi Grup atau menghentikan operasi, atau tidak memiliki alternatif yang realistis selain melaksanakannya.

Pihak yang bertanggung jawab atas tata kelola bertanggung jawab untuk mengawasi proses pelaporan keuangan Grup.

Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan Konsolidasian

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan konsolidasian tersebut.

Other Information

Management is responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibility for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

Imelda & Rekan

Sebagai bagian dari suatu audit berdasarkan Standar Audit, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.
- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Grup.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor kami ke pengungkapan terkait dalam laporan keuangan konsolidasian atau, jika pengungkapan tersebut tidak memadai, harus menentukan apakah perlu untuk memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Grup tidak dapat mempertahankan kelangsungan usaha.
- Mengevaluasi penyajian, struktur, dan isi laporan keuangan konsolidasian secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan konsolidasian mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.
- Memperoleh bukti audit yang cukup dan tepat terkait informasi keuangan entitas atau aktivitas bisnis dalam Grup untuk menyatakan opini atas laporan keuangan konsolidasian. Kami bertanggung jawab atas arahan, supervisi, dan pelaksanaan audit Grup. Kami tetap bertanggung jawab sepenuhnya atas opini audit kami.

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit, serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Imelda & Rekan

Kami juga memberikan suatu pernyataan kepada pihak yang bertanggung jawab atas tata kelola bahwa kami telah mematuhi ketentuan etika yang relevan mengenai independensi, dan mengomunikasikan seluruh hubungan, serta hal-hal lain yang dianggap secara wajar berpengaruh terhadap independensi kami, dan jika relevan, pengamanan terkait.

Dari hal-hal yang dikomunikasikan kepada pihak yang bertanggung jawab atas tata kelola, kami menentukan hal-hal tersebut yang paling signifikan dalam audit atas laporan keuangan konsolidasian periode kini dan oleh karenanya menjadi hal audit utama. Kami menguraikan hal audit utama dalam laporan auditor kami, kecuali peraturan perundang-undangan melarang pengungkapan publik tentang hal tersebut atau ketika, dalam kondisi yang sangat jarang terjadi, kami menentukan bahwa suatu hal tidak boleh dikomunikasikan dalam laporan kami karena konsekuensi merugikan dari mengomunikasikan hal tersebut akan diekspektasikan secara wajar melebihi manfaat kepentingan publik atas komunikasi tersebut.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

a. Perubahan Kebijakan Akuntansi

a. Change in Accounting Policy

Pengatribusian imbalan pada periode jasa

Attribution of benefits to periods of services

Pada bulan April 2022, Dewan Standar Akuntansi Keuangan Ikatan Akuntan Indonesia (DSAK-IAI) menerbitkan siaran pers dan mengklarifikasi pengatribusian imbalan pada periode jasa untuk program pensiun berbasis Undang-Undang Ketenagakerjaan atau Undang-Undang Cipta Kerja beserta peraturan pelaksanaan (UU Ketenagakerjaan).

In April 2022, the Indonesian Financial Accounting Standards Board of the Institute of Indonesia Chartered Accountants (DSAK-IAI) has issued a press release and clarified the attribution of benefits to the periods of service for the pension program under the Manpower Act or the Job Creation Law and its implementing regulations (Manpower Act).

Grup telah menerapkan panduan dalam siaran pers dan menerapkan perubahan yang diperlukan atas kebijakan akuntansi secara retrospektif. Manajemen telah mengukur dampak atas perubahan tersebut seperti yang diungkapkan di bawah ini:

The Group has implemented the guidance in the press release and applied the necessary changes to its accounting policies retrospectively. Management has quantified the impact as disclosed below:

3. IKHTISAR KEBIJAKAN AKUNTANSI YANG PENTING

a. Pernyataan Kepatuhan

Laporan keuangan konsolidasian Grup disusun sesuai dengan Standar Akuntansi Keuangan di Indonesia.

b. Dasar Penyusunan

Dasar penyusunan laporan keuangan konsolidasian adalah biaya historis, kecuali instrumen keuangan tertentu yang diukur pada jumlah revaluasi atau nilai wajar pada setiap akhir periode pelaporan, yang dijelaskan dalam kebijakan akuntansi di bawah ini.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Statement of Compliance

The consolidated financial statements of the Group have been prepared in accordance with Indonesian Financial Accounting Standards.

b. Basis of Preparation

The consolidated financial statements have been prepared on the historical cost basis, except for certain financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below.

Biaya historis umumnya didasarkan pada nilai wajar dari imbalan yang diberikan dalam pertukaran barang dan jasa.

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam suatu transaksi teratur antara pelaku pasar pada tanggal pengukuran, terlepas dari apakah harga tersebut dapat diamati secara langsung atau diestimasi menggunakan teknik penilaian lain. Dalam mengestimasi nilai wajar dari suatu aset atau liabilitas, Grup memperhitungkan karakteristik aset atau liabilitas jika pelaku pasar akan memperhitungkan karakteristik tersebut ketika menentukan harga aset atau liabilitas pada tanggal pengukuran. Nilai wajar untuk tujuan pengukuran dan/atau pengungkapan pada laporan keuangan konsolidasian ditentukan atas dasar tersebut, kecuali untuk transaksi pembayaran berbasis saham yang merupakan ruang lingkup PSAK 53 *Pembayaran Berbasis Saham* (PSAK 53), transaksi sewa yang merupakan ruang lingkup PSAK 73 *Sewa*, dan pengukuran yang memiliki kemiripan dengan nilai wajar namun bukan merupakan nilai wajar, seperti nilai realisasi bersih dalam PSAK 14 *Persediaan* (PSAK 14) atau nilai pakai dalam PSAK 48 *Penurunan Nilai Aset* (PSAK 48).

Laporan arus kas konsolidasian disusun dengan menggunakan metode langsung dengan mengelompokkan arus kas dalam aktivitas operasi, investasi dan pendanaan.

Direksi memiliki, pada saat persetujuan laporan keuangan konsolidasian, suatu ekspektasi yang memadai bahwa Grup memiliki sumber daya yang cukup untuk melanjutkan keberadaan operasinya untuk di masa yang akan datang. Sehingga, mereka melanjutkan penerapan dasar akuntansi kelangsungan usaha dalam penyusunan laporan keuangan konsolidasian.

c. Dasar Konsolidasian

Laporan keuangan konsolidasian menggabungkan laporan keuangan Perusahaan dan entitas yang dikendalikan oleh Perusahaan dan entitas anak. Pengendalian tercapai jika Perusahaan memiliki kekuasaan atas *investee*; eksposur atau hak atas imbal hasil variabel dari keterlibatannya dengan *investee*; dan kemampuan untuk menggunakan kekuasaannya atas *investee* untuk mempengaruhi jumlah imbal hasil investor.

Perusahaan menilai kembali apakah Perusahaan mengendalikan *investee* jika fakta dan keadaan mengindikasikan adanya perubahan terhadap satu atau lebih dari tiga elemen pengendalian yang disebutkan di atas.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of PSAK 53 *Share-based Payment* (PSAK 53), leasing transactions that are within the scope of PSAK 73 *Leases*, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in PSAK 14 *Inventories* (PSAK 14) or value in use in PSAK 48 *Impairment of Assets* (PSAK 48).

The consolidated statements of cash flows are prepared using the direct method with classifications of cash flows into operating, investing and financing activities.

The directors have, at the time of approving the consolidated financial statements, a reasonable expectation that the Group has adequate resources to continue in operational existence for the foreseeable future. Thus, they continue to adopt the going concern basis of accounting in preparing the consolidated financial statements.

c. Basis of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company and its subsidiaries. Control is achieved where the Company has the power over the investee; is exposed, or has rights, to variable returns from its involvement with the investee; and has the ability to use its power to affect its returns.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

Ketika Perusahaan memiliki hak suara kurang dari mayoritas di *investee*, ia memiliki kekuasaan atas *investee* ketika hak suara cukup untuk memberinya kemampuan praktis untuk mengarahkan aktivitas relevan secara sepihak. Perusahaan mempertimbangkan seluruh fakta dan keadaan yang relevan dalam menilai apakah hak suara Perusahaan cukup untuk memberikan Perusahaan kekuasaan, termasuk (i) ukuran kepemilikan hak suara Perusahaan relatif terhadap ukuran dan penyebaran kepemilikan pemilik hak suara lain; (ii) hak suara potensial yang dimiliki oleh Perusahaan, pemegang suara lain atau pihak lain; (iii) hak yang timbul dari pengaturan kontraktual lain; dan (iv) setiap fakta dan keadaan tambahan apapun yang mengindikasikan bahwa Perusahaan memiliki, atau tidak memiliki, kemampuan kini untuk mengarahkan aktivitas yang relevan pada saat keputusan perlu dibuat, termasuk pola pemilihan suara dalam RUPS sebelumnya.

Konsolidasi entitas anak dimulai ketika Perusahaan memperoleh pengendalian atas entitas anak dan akan dihentikan ketika Perusahaan kehilangan pengendalian pada entitas anak. Secara khusus, pendapatan dan beban entitas anak yang diakuisisi atau dijual selama tahun berjalan termasuk dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian dari tanggal diperolehnya pengendalian Perusahaan sampai tanggal ketika Perusahaan berhenti untuk mengendalikan entitas anak.

Jika diperlukan, penyesuaian dapat dilakukan terhadap laporan keuangan entitas anak agar kebijakan akuntansi sesuai dengan kebijakan akuntansi Grup.

Seluruh aset dan liabilitas dalam intra Grup, ekuitas, pendapatan, beban dan arus kas yang berkaitan dengan transaksi dalam Grup dieliminasi secara penuh pada saat konsolidasian.

Kepentingan nonpengendali di entitas anak diidentifikasi secara terpisah dari ekuitas Grup yang ada. Kepentingan pemegang saham nonpengendali yang merupakan kepentingan kepemilikan yang memberikan pemiliknya hak terhadap bagian proporsional aset bersih pada saat likuidasi pada awalnya dapat diukur sebesar nilai wajar atau bagian proporsional kepentingan nonpengendali atas nilai wajar aset bersih teridentifikasi pihak yang diakuisisi. Pilihan pengukuran dibuat untuk masing-masing akuisisi. Kepentingan nonpengendali lain awalnya diukur sebesar nilai wajar. Setelah akuisisi, jumlah tercatat kepentingan nonpengendali adalah jumlah kepentingan tersebut pada pengakuan awal ditambah bagian kepentingan nonpengendali dari perubahan selanjutnya di ekuitas.

When the Company has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including (i) the size of the Company's holding of voting rights relative to the size and dispersion of holding of the other vote holders; (ii) potential voting rights held by the Company, other vote holders or other parties; (iii) rights arising from other contractual arrangements; and (iv) any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expense of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Company gains control until the date when the Company ceases to control the subsidiary.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are identified separately from the Group's equity therein. Those interests of non-controlling stockholders that are present ownership interests entitling their holders to a proportionate share of net assets upon liquidation may initially be measured at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement is made on an acquisition-by-acquisition basis. Other non-controlling interests are initially measured at fair value. Subsequent to acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity.

Laba atau rugi dan setiap komponen penghasilan komprehensif lain diatribusikan kepada pemilik entitas induk dan kepada kepentingan nonpengendali. Jumlah penghasilan komprehensif entitas anak diatribusikan kepada pemilik entitas induk dan kepentingan nonpengendali meskipun hal tersebut mengakibatkan kepentingan nonpengendali memiliki saldo defisit.

Perubahan kepemilikan Perusahaan pada entitas anak yang tidak mengakibatkan kehilangan pengendalian Grup atas entitas anak dicatat sebagai transaksi ekuitas. Jumlah tercatat dari kepemilikan Grup dan kepentingan nonpengendali disesuaikan untuk mencerminkan perubahan kepentingan relatifnya dalam entitas anak. Selisih antara jumlah tercatat kepentingan nonpengendali yang disesuaikan dan nilai wajar imbalan yang dibayar atau diterima diakui secara langsung dalam ekuitas dan diatribusikan dengan pemilik entitas induk.

Ketika Perusahaan kehilangan pengendalian pada entitas anak, keuntungan atau kerugian diakui dalam laba rugi dan dihitung sebagai perbedaan antara (i) agregat nilai wajar pembayaran yang diterima dan nilai wajar sisa kepemilikan (*retained interest*) dan (ii) jumlah tercatat sebelumnya dari aset (termasuk *goodwill*), dikurangi liabilitas dari entitas anak dan setiap kepentingan nonpengendali. Seluruh jumlah yang diakui sebelumnya dalam penghasilan komprehensif lain yang terkait dengan entitas anak dicatat seolah-olah Grup telah melepaskan secara langsung aset atau liabilitas terkait entitas anak (yaitu direklasifikasi ke laba rugi atau ditransfer ke kategori lain dari ekuitas sebagaimana ditentukan/diizinkan oleh standar akuntansi yang berlaku). Nilai wajar setiap sisa investasi pada entitas anak terdahulu pada tanggal hilangnya pengendalian dianggap sebagai nilai wajar pada saat pengakuan awal untuk akuntansi berikutnya dalam PSAK 71 *Instrumen Keuangan* (PSAK 71), ketika berlaku, biaya perolehan pada saat pengakuan awal dari investasi pada entitas asosiasi.

d. Kombinasi Bisnis

Akuisisi bisnis dicatat dengan menggunakan metode akuisisi. Imbalan yang dialihkan dalam suatu kombinasi bisnis diukur pada nilai wajar, yang dihitung sebagai hasil penjumlahan dari nilai wajar tanggal akuisisi atas seluruh aset yang dialihkan oleh Grup, liabilitas yang diakui oleh Grup kepada pemilik sebelumnya dari pihak yang diakuisisi dan kepentingan ekuitas yang diterbitkan oleh Grup dalam pertukaran pengendalian dari pihak yang diakuisisi. Biaya-biaya terkait akuisisi diakui di dalam laba rugi pada saat terjadinya.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Company's ownership interest in existing subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interest and the non-controlling interest are adjusted to reflect the changes in their relative interest in the subsidiaries. Any difference between the amount by which the non-controlling interest are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Company.

When the Company loses control of a subsidiary, a gain or loss is recognized in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), less liabilities of the subsidiary and any non-controlling interest. All amounts previously recognized in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as specified/ permitted by applicable accounting standards). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under PSAK 71 *Financial Instruments* (PSAK 71), when applicable, the cost on initial recognition of an investment in an associate.

d. Business Combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree, and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognized in profit or loss as incurred.

Pada tanggal akuisisi, aset teridentifikasi yang diperoleh dan liabilitas yang diambilalih diakui pada nilai wajar, kecuali untuk aset atau liabilitas pajak tangguhan yang berkaitan dengan pengaturan imbalan kerja diakui dan diukur masing-masing berdasarkan PSAK 46 *Pajak Penghasilan* (PSAK 46) dan PSAK 24 *Imbalan Kerja* (PSAK 24).

Goodwill diukur sebagai selisih lebih dari nilai gabungan dari imbalan yang dialihkan, jumlah setiap kepentingan nonpengendali pada pihak diakuisisi dan nilai wajar pada tanggal akuisisi kepentingan ekuitas yang sebelumnya dimiliki oleh pihak pengakuisisi pada pihak diakuisisi (jika ada) atas jumlah neto dari aset teridentifikasi yang diperoleh dan liabilitas yang diambilalih pada tanggal akuisisi. Jika, setelah penilaian kembali, jumlah neto dari aset teridentifikasi yang diperoleh dan liabilitas yang diambilalih pada tanggal akuisisi melebihi jumlah imbalan yang dialihkan, jumlah dari setiap kepentingan nonpengendali pada pihak diakuisisi dan nilai wajar pada tanggal akuisisi kepentingan ekuitas yang sebelumnya dimiliki oleh pihak pengakuisisi pada pihak diakuisisi (jika ada), selisih lebih tersebut diakui segera dalam laba rugi sebagai keuntungan pembelian dengan diskon.

Bila imbalan yang dialihkan oleh Grup dalam suatu kombinasi bisnis termasuk aset atau liabilitas yang berasal dari pengaturan imbalan kontingen (*contingent consideration arrangement*), imbalan kontingen tersebut diukur pada nilai wajar pada tanggal akuisisi dan termasuk sebagai bagian dari imbalan yang dialihkan dalam suatu kombinasi bisnis.

Perubahan dalam nilai wajar atas imbalan kontingen yang memenuhi syarat sebagai penyesuaian periode pengukuran disesuaikan secara retrospektif, dengan penyesuaian terkait terhadap *goodwill*. Penyesuaian periode pengukuran adalah penyesuaian yang berasal dari informasi tambahan yang diperoleh selama periode pengukuran (yang tidak melebihi satu tahun sejak tanggal akuisisi) tentang fakta-fakta dan kondisi yang ada pada tanggal akuisisi.

Perlakuan akuntansi selanjutnya untuk perubahan nilai wajar dari imbalan kontinjensi yang tidak memenuhi syarat sebagai penyesuaian periode pengukuran tergantung pada bagaimana imbalan kontinjensi diklasifikasikan. Imbalan kontinjensi yang diklasifikasikan sebagai ekuitas tidak diukur kembali pada setiap tanggal pelaporan dan penyelesaian selanjutnya diperhitungkan dalam ekuitas. Imbalan kontinjensi lain diukur ulang ke nilai wajar pada tanggal pelaporan selanjutnya dengan perubahan nilai wajar diakui di laba rugi.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognized at their fair value, except for deferred tax assets or liabilities and assets or liabilities related to employee benefit arrangements are recognized and measured in accordance with PSAK 46 *Income Taxes* (PSAK 46) and PSAK 24 *Employee Benefits*, (PSAK 24) respectively.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after the reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognized immediately in profit or loss as a gain from bargain purchase.

When the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition date fair value and included as part of the consideration transferred in a business combination.

Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the measurement period (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Other contingent consideration is remeasured to fair value at subsequent reporting dates with changes in fair value recognized in profit or loss.

Bila suatu kombinasi bisnis dilakukan secara bertahap, kepemilikan terdahulu Grup atas pihak diakuisisi diukur kembali ke nilai wajar pada tanggal akuisisi dan keuntungan atau kerugian dihasilkan, jika ada, diakui dalam laba rugi. Jumlah yang berasal dari kepemilikan sebelum tanggal akuisisi yang sebelumnya telah diakui dalam penghasilan komprehensif lain direklasifikasi ke laba rugi dimana perlakuan tersebut seperti jika kepemilikan tersebut dilepas/dijual.

Jika akuntansi awal untuk kombinasi bisnis belum selesai pada akhir periode pelaporan saat kombinasi terjadi, Grup melaporkan jumlah sementara untuk pos-pos yang proses akuntansinya belum selesai dalam laporan keuangannya. Selama periode pengukuran (lihat di atas), pihak pengakuisisi menyesuaikan, aset atau liabilitas tambahan yang diakui, untuk mencerminkan informasi baru yang diperoleh tentang fakta dan keadaan yang ada pada tanggal akuisisi dan, jika diketahui, akan berdampak pada jumlah yang diakui pada tanggal tersebut.

e. Transaksi dan Penjabaran Laporan Keuangan Dalam Mata Uang Asing

Laporan keuangan individu masing-masing entitas Grup diukur dan disajikan dalam mata uang dari lingkungan ekonomi utama dimana entitas beroperasi (mata uang fungsional). Laporan keuangan konsolidasian dari Grup disajikan dalam mata uang Dolar Amerika Serikat (US\$) yang merupakan mata uang fungsional dan mata uang penyajian untuk laporan keuangan konsolidasian.

Dalam penyusunan laporan keuangan entitas Grup, transaksi dalam mata uang selain mata uang fungsional entitas (mata uang asing) diakui pada kurs yang berlaku pada tanggal transaksi. Pada setiap akhir periode pelaporan, pos moneter dalam valuta asing dijabarkan kembali pada kurs yang berlaku pada tanggal tersebut. Pos-pos nonmoneter yang diukur pada nilai wajar dalam valuta asing dijabarkan kembali pada kurs yang berlaku pada tanggal ketika nilai wajar ditentukan. Pos nonmoneter yang diukur dalam biaya historis dalam valuta asing tidak dijabarkan kembali.

Selisih kurs diakui dalam laba rugi pada periode saat terjadinya kecuali untuk:

- Selisih kurs atas transaksi yang ditetapkan untuk tujuan lindung nilai risiko valuta asing tertentu (lihat Catatan 3w untuk kebijakan akuntansi lindung nilai); dan

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date and the resulting gain or loss, if any, is recognized in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognized in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interests were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amount recognized as of that date.

e. Foreign Currency Transactions and Translation

The individual financial statements of each Group entity are measured and presented in the currency of the primary economic environment in which the entity operates (its functional currency). The consolidated financial statements of the Group are presented in United States Dollar (US\$), which is the functional currency of the Company and the presentation currency for the consolidated financial statements.

In preparing the financial statements of each Group entities, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognized in profit or loss in the period in which they arise except for:

- Exchange differences on transaction entered into in order to hedge certain foreign currency risks (see Note 3w for hedge accounting policies); and

- Selisih kurs atas pos moneter piutang atau utang dari kegiatan usaha luar negeri yang penyelesaiannya tidak direncanakan atau tidak mungkin terjadi (karenanya membentuk bagian dari investasi bersih dalam kegiatan usaha luar negeri), yang pada awalnya diakui pada penghasilan komprehensif lain dan direklasifikasi dari ekuitas ke laba rugi pada pelepasan atau pelepasan sebagian investasi neto.

Pembukuan RPU diselenggarakan dalam Rupiah, mata uang fungsionalnya. Untuk tujuan penyajian laporan keuangan konsolidasian, aset dan liabilitas RPU dijabarkan ke dalam Dolar Amerika Serikat dengan menggunakan kurs yang berlaku pada akhir tahun pelaporan. Pos penghasilan dan beban dijabarkan menggunakan kurs rata-rata untuk periode tersebut, kecuali kurs berfluktuasi secara signifikan selama periode tersebut, dalam hal ini kurs yang berlaku pada tanggal transaksi yang digunakan. Selisih kurs yang timbul diakui dalam penghasilan komprehensif lain dan diakumulasi dalam ekuitas (dan diatribusikan pada kepentingan nonpengendali).

Pada konsolidasi, selisih kurs yang berasal dari penjabaran atas investasi bersih entitas luar negeri (termasuk pos-pos moneter yang secara substansi membentuk bagian investasi bersih entitas luar negeri), dan atas pinjaman dan instrumen mata uang lainnya yang ditetapkan sebagai lindung nilai atas investasi tersebut, diakui dalam penghasilan komprehensif lain dan diakumulasi dalam komponen ekuitas yang terpisah di bawah judul cadangan selisih kurs penjabaran laporan keuangan.

Goodwill dan penyesuaian nilai wajar yang timbul dari akuisisi dari kegiatan usaha luar negeri diperlakukan sebagai aset dan liabilitas dari kegiatan usaha luar negeri dan dijabarkan pada kurs tutup buku. Selisih kurs yang timbul diakui pada penghasilan komprehensif lain.

f. Transaksi Pihak-Pihak Berelasi

Pihak-pihak berelasi adalah orang atau entitas yang terkait dengan Grup (entitas pelapor):

- Orang atau anggota keluarga dekatnya mempunyai relasi dengan entitas pelapor jika orang tersebut:
 - memiliki pengendalian atau pengendalian bersama atas entitas pelapor;
 - memiliki pengaruh signifikan atas entitas pelapor; atau

- Exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal or partial disposal of the net investment.

The books of accounts of RPU are maintained in Indonesian Rupiah, its functional currency. For the purposes of presenting these consolidated financial statements, the assets and liabilities of RPU are translated into United States Dollar using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognized in other comprehensive income and accumulated in equity (and attributed to non-controlling interests as appropriate).

On consolidation, exchange differences arising from the translation of the net investment in foreign entities (including monetary items that, in substance, form part of the net investment in foreign entities), and of borrowings and other currency instruments designated as hedges of such investments, are recognized in other comprehensive income and accumulated in a separate component of equity under the header of foreign currency translation reserve.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate. Exchange differences arising are recognized in other comprehensive income.

f. Transactions with Related Parties

A related party is a person or entity that is related to the Group (the reporting entity):

- A person or a close member of that person's family is related to the reporting entity if that person:
 - has control or joint control over the reporting entity;
 - has significant influence over the reporting entity; or

Transaksi signifikan yang dilakukan dengan pihak-pihak berelasi, baik dilakukan dengan kondisi dan persyaratan yang sama dengan pihak ketiga, diungkapkan pada laporan keuangan konsolidasian.

Significant transactions with related parties, whether or not made at similar terms and conditions as those done with third parties, are disclosed in the consolidated financial statements.

g. Instrumen Keuangan

Aset keuangan dan liabilitas keuangan diakui pada laporan posisi keuangan konsolidasian pada saat Grup menjadi salah satu pihak dalam ketentuan kontraktual instrumen tersebut.

Aset keuangan dan liabilitas keuangan pada awalnya diukur pada nilai wajar. Biaya transaksi yang dapat diatribusikan secara langsung dengan perolehan atau penerbitan aset keuangan dan liabilitas keuangan ditambahkan atau dikurangkan dari nilai wajar aset keuangan dan liabilitas keuangan, jika diperlukan, pada pengakuan awal. Biaya transaksi yang dapat diatribusikan secara langsung dengan perolehan aset keuangan dan liabilitas keuangan pada nilai wajar melalui laba rugi diakui langsung pada laba rugi.

Semua pembelian atau penjualan reguler aset keuangan diakui dan dihentikan pengakuannya berdasarkan tanggal perdagangan. Pembelian atau penjualan reguler adalah pembelian atau penjualan aset keuangan yang memerlukan penyerahan aset dalam jangka waktu yang ditetapkan oleh peraturan atau konvensi di pasar.

Semua aset keuangan yang diakui selanjutnya diukur secara keseluruhan pada biaya perolehan yang diamortisasi atau nilai wajar, tergantung pada klasifikasi aset keuangan tersebut.

Klasifikasi aset keuangan

Instrumen utang yang memenuhi persyaratan berikut selanjutnya diukur pada biaya perolehan diamortisasi:

- aset keuangan dikelola dalam model bisnis yang bertujuan untuk memiliki aset keuangan dalam rangka mendapatkan arus kas kontraktual; dan
- persyaratan kontraktual dari aset keuangan menghasilkan arus kas pada tanggal tertentu yang semata dari pembayaran pokok dan bunga ("SPPI") dari jumlah pokok terutang.

Instrumen utang selanjutnya diukur pada nilai wajar melalui penghasilan komprehensif lain ("FVTOCI"), jika memenuhi kedua kondisi berikut ini:

- aset keuangan dikelola dalam model bisnis yang tujuannya akan tercapai dengan mendapatkan arus kas kontraktual dan menjual aset keuangan; dan
- persyaratan kontraktual dari aset keuangan menghasilkan arus kas pada tanggal tertentu yang semata-mata dari pembayaran pokok dan bunga dari jumlah pokok terutang.

g. Financial Instruments

Financial assets and financial liabilities are recognized on the consolidated statement of financial position when the Group becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets and financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are measured subsequently in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

Classification of financial assets

Debt instruments that meet the following conditions are subsequently measured at amortized cost:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding.

Debt instruments that meet the following conditions are subsequently measured at fair value through other comprehensive income ("FVTOCI"):

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Seluruh aset keuangan lain selanjutnya diukur pada nilai wajar melalui laba rugi ("FVTPL").

Meskipun telah disebutkan sebelumnya, Grup dapat menetapkan pilihan tak terbatalkan pada saat pengakuan awal aset keuangan sebagai berikut:

- menyajikan perubahan selanjutnya nilai wajar investasi pada instrumen ekuitas dalam penghasilan komprehensif lain jika kriteria tertentu dipenuhi (lihat di bawah); dan
- menetapkan aset keuangan yang memenuhi kriteria biaya perolehan diamortisasi atau FVTOCI sebagai diukur pada FVTPL, jika penetapan itu mengeliminasi atau mengurangi secara signifikan inkonsistensi pengukuran dan pengakuan (inkonsistensi akuntansi) (lihat di bawah).

Biaya perolehan diamortisasi dan metode suku bunga efektif

Metode suku bunga efektif adalah metode menghitung biaya perolehan diamortisasi dari instrumen utang dan mengalokasikan pendapatan bunga selama periode yang relevan.

Untuk instrumen keuangan selain yang dibeli atau berasal dari aset keuangan memburuk, suku bunga efektif adalah tingkat suku bunga yang secara tepat mendiskontokan penerimaan kas masa depan (termasuk semua biaya dan poin yang dibayarkan atau diterima yang merupakan bagian yang tidak terpisahkan dari suku bunga efektif, biaya transaksi dan premi atau diskon lainnya) tidak termasuk kerugian kredit ekspektasian, melalui umur ekspektasian dari instrumen utang, atau, jika tepat, periode yang lebih pendek, ke jumlah tercatat bruto instrumen utang pada saat pengakuan awal. Untuk aset keuangan yang dibeli atau yang berasal dari aset keuangan memburuk, suku bunga efektif yang disesuaikan dengan risiko kredit dihitung dengan mendiskontokan estimasi arus kas masa depan, termasuk estimasi kerugian kredit, ke biaya perolehan diamortisasi instrumen utang pada pengakuan awal.

Biaya perolehan diamortisasi dari aset keuangan adalah nilai aset keuangan yang diukur pada saat pengakuan awal dikurangi pembayaran pokok, ditambah amortisasi kumulatif menggunakan metode suku bunga efektif dari selisih antara nilai awal dan nilai jatuh temponya, disesuaikan dengan penyisihan kerugiannya. Di sisi lain, jumlah tercatat bruto aset keuangan adalah biaya perolehan diamortisasi dari aset keuangan, sebelum disesuaikan dengan penyisihan kerugian.

By default, all other financial assets are subsequently measured at fair value through profit or loss ("FVTPL").

Despite the foregoing, the Group may make the following irrevocable election/designation at initial recognition of a financial asset:

- irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if certain criteria are met (see below); and
- irrevocably designate a debt investment that meets the amortized cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch (see below).

Amortized cost and effective interest method

The effective interest method is a method of calculating the amortized cost of a debt instrument and of allocating interest income over the relevant period.

For financial instruments other than purchased or originated credit-impaired financial assets, the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition. For purchased or originated credit-impaired financial assets, a credit adjusted effective interest rate is calculated by discounting the estimated future cash flows, including expected credit losses, to the amortized cost of the debt instrument on initial recognition.

The amortized cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. On the other hand, the gross carrying amount of a financial asset is the amortized cost of a financial asset before adjusting for any loss allowance.

Bunga diakui dengan menggunakan metode suku bunga efektif untuk instrumen utang yang diukur selanjutnya pada biaya perolehan diamortisasi dan pada FVTOCI. Untuk instrumen keuangan lain, kecuali aset keuangan yang dibeli atau berasal dari aset keuangan memburuk, pendapatan bunga dihitung dengan menerapkan suku bunga efektif terhadap jumlah tercatat bruto aset keuangan, kecuali aset keuangan yang kemudian mengalami penurunan nilai kredit. Untuk aset keuangan yang berasal dari aset keuangan memburuk, pendapatan bunga diakui dengan menerapkan suku bunga efektif terhadap biaya perolehan diamortisasi dari aset keuangan tersebut. Jika pada tahun pelaporan keuangan selanjutnya, risiko kredit aset keuangan tersebut membaik sehingga aset keuangan tidak lagi mengalami penurunan nilai kredit, maka pendapatan bunga diakui dengan menerapkan suku bunga efektif terhadap jumlah tercatat bruto aset keuangan.

Untuk aset keuangan yang dibeli atau berasal dari aset keuangan memburuk, Grup mengakui pendapatan bunga dengan menerapkan suku bunga efektif yang disesuaikan dengan risiko kredit atas biaya perolehan diamortisasi dari aset keuangan sejak pengakuan awal. Perhitungan tidak kembali ke basis bruto bahkan jika risiko kredit dari aset keuangan selanjutnya membaik sehingga aset keuangan tidak lagi mengalami penurunan kredit.

Pendapatan bunga diakui dalam laba rugi dan dimasukkan dalam pos "keuntungan lain-lain bersih".

Instrumen utang diklasifikasikan pada FVTOCI

Efek utang yang tercatat di bursa yang dimiliki oleh Grup diklasifikasikan sebagai FVTOCI. Nilai wajar ditentukan dengan cara yang dijelaskan dalam Catatan 42. Efek utang yang tercatat di bursa pada awalnya diukur pada nilai wajar ditambah dengan biaya transaksi. Selanjutnya, perubahan nilai tercatat pada efek utang yang tercatat di bursa tersebut sebagai akibat dari keuntungan dan kerugian selisih kurs, keuntungan atau kerugian penurunan nilai, dan pendapatan bunga yang dihitung dengan menggunakan metode suku bunga efektif, diakui dalam laba rugi. Jumlah yang diakui dalam laba rugi akan sama dengan jika efek utang yang tercatat di bursa ini diukur pada biaya perolehan diamortisasi. Semua perubahan lain dalam nilai tercatat dari efek utang yang tercatat di bursa diakui dalam penghasilan komprehensif lain dan diakumulasikan dalam cadangan revaluasi investasi. Jika efek utang yang tercatat yang terdaftar ini dihentikan pengakuannya, keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain akan direklasifikasi ke laba rugi.

Interest income is recognized using the effective interest method for debt instruments measured subsequently at amortized cost and at FVTOCI. For financial instruments other than purchased or originated credit-impaired financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired. For financial assets that have subsequently become credit-impaired, interest income is recognized by applying the effective interest rate to the amortized cost of the financial asset. If, in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognized by applying the effective interest rate to the gross carrying amount of the financial asset.

For purchased or originated credit-impaired financial assets, the Group recognizes interest income by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition. The calculation does not revert to the gross basis even if the credit risk of the financial asset subsequently improves so that the financial asset is no longer credit-impaired.

Interest income is recognized in profit or loss and is included in the "other gains - net" line item.

Debt instruments classified as at FVTOCI

Listed debt securities held by the Group are classified as at FVTOCI. Fair value is determined in the manner described in Note 42. The listed debt securities are initially measured at fair value plus transaction costs. Subsequently, changes in the carrying amount of these listed debt securities as a result of foreign exchange gains and losses, impairment gains or losses, and interest income calculated using the effective interest method are recognized in profit or loss. The amounts that are recognized in profit or loss are the same as the amounts that would have been recognized in profit or loss if these listed debt securities had been measured at amortized cost. All other changes in the carrying amount of these listed debt securities are recognized in other comprehensive income and accumulated under the heading of investments revaluation reserve. When these listed debt securities are derecognized, the cumulative gains or losses previously recognized in other comprehensive income are reclassified to profit or loss.

Instrumen ekuitas yang ditetapkan pada FVTOCI

Pada pengakuan awal, Grup dapat membuat pilihan yang tidak terbatalkan (atas dasar instrumen per instrumen) untuk menetapkan investasi dalam instrumen ekuitas pada FVTOCI. Penetapan pada FVTOCI tidak diizinkan jika investasi ekuitas dimiliki untuk diperdagangkan atau jika merupakan imbalan kontinjensi yang diakui oleh pihak pengakuisisi dalam suatu kombinasi bisnis.

Aset keuangan tersedia untuk diperdagangkan jika:

- Diperoleh untuk tujuan dijual dalam waktu dekat; atau
- Pada pengakuan awal, merupakan bagian dari portofolio instrumen keuangan yang diidentifikasi dimana dikelola bersama oleh Grup dan memiliki bukti pola pengambilan actual laba jangka pendek ; atau
- Merupakan derivatif (kecuali untuk derivatif yang merupakan kontrak jaminan keuangan atau instrumen lindung nilai yang ditunjuk dan efektif)

Investasi dalam instrumen ekuitas di FVTOCI pada awalnya diukur pada nilai wajar ditambah biaya transaksi. Selanjutnya, nilai wajar tersebut diukur pada nilai wajar dengan mengakui keuntungan dan kerugian yang timbul dari perubahan nilai wajar dalam penghasilan komprehensif lain dan diakumulasi dalam cadangan revaluasi investasi. Keuntungan atau kerugian kumulatif tidak direklasifikasi ke laba rugi atas pelepasan investasi ekuitas, melainkan dialihkan ke saldo laba.

Dividen atas investasi pada instrumen ekuitas tersebut diakui dalam laba rugi sesuai dengan PSAK 71, kecuali jika dividen tersebut secara jelas mewakili pemulihan dari sebagian biaya investasi.

Grup menetapkan semua investasi pada instrumen ekuitas yang tidak dimiliki untuk diperdagangkan pada FVTOCI ketika pengakuan awal.

Aset keuangan pada FVTPL

Aset keuangan yang tidak memenuhi kriteria yang diukur pada biaya perolehan diamortisasi atau FVTOCI (di atas) diukur pada FVTPL, khususnya:

- Investasi dalam instrumen ekuitas diklasifikasi sebagai FVTPL, kecuali Grup menetapkan investasi ekuitas yang dimiliki tidak untuk diperdagangkan dan bukan merupakan imbalan kontingen dari kombinasi bisnis, sebagai FVTOCI pada pengakuan awal.

Equity instruments designated as at FVTOCI

On initial recognition, the Group may make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is a contingent consideration recognized by an acquirer in a business combination.

A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has evidence of a recent actual pattern of short-term profit-taking; or
- it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in the investments revaluation reserve. The cumulative gain or loss is not reclassified to profit or loss on disposal of the equity investments, instead, it is transferred to retained earnings.

Dividends on these investments in equity instruments are recognized in profit or loss in accordance with PSAK 71, unless the dividends clearly represent a recovery of part of the cost of the investment.

The Group designated all investments in equity instruments that are not held for trading as at FVTOCI on initial recognition.

Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortized cost or FVTOCI (above) are measured at FVTPL, specifically:

- Investments in equity instruments are classified as at FVTPL, unless the Group designate an equity investment that is neither held for trading nor a contingent consideration arising from a business combination as at FVTOCI on initial recognition.

- Instrumen utang yang tidak memenuhi kriteria biaya perolehan diamortisasi atau FVTOCI, diklasifikasi sebagai FVTPL. Sebagai tambahan, aset keuangan yang memenuhi kriteria biaya perolehan diamortisasi dan FVTOCI dapat ditetapkan sebagai FVTPL pada saat pengakuan awal apabila penetapan tersebut mengeliminasi atau mengurangi secara signifikan inkonsistensi pengukuran dan pengakuan (yang disebut "inkonsistensi akuntansi") yang timbul dari pengukuran aset atau liabilitas atau pengakuan keuntungan dan kerugian dengan basis berbeda.

Aset keuangan pada FVTPL diukur pada nilai wajar pada setiap tanggal pelaporan, dengan keuntungan atau kerugian nilai wajar diakui dalam laba rugi sepanjang bukan merupakan bagian dari hubungan lindung nilai yang ditetapkan. Keuntungan atau kerugian bersih yang diakui dalam laba rugi termasuk dividen atau bunga yang diperoleh atas aset keuangan dan dimasukkan dalam pos "keuntungan lain lain - bersih". Nilai wajar ditentukan dengan cara yang dijelaskan dalam Catatan 42.

Reklasifikasi atas aset keuangan dan liabilitas

Grup tidak mereklasifikasi aset keuangan setelah pengakuan awal, selain dari kejadian luar biasa dimana terdapat perubahan model bisnis. Liabilitas keuangan tidak pernah diklasifikasi.

Keuntungan dan kerugian kurs mata uang asing

Jumlah tercatat aset keuangan dalam mata uang asing ditentukan dalam mata uang tersebut dan dijabarkan dengan menggunakan kurs spot pada setiap tanggal pelaporan. Secara spesifik:

- Untuk aset keuangan diukur pada biaya perolehan diamortisasi yang bukan merupakan bagian dari hubungan lindung nilai ditetapkan, selisih kurs diakui dalam laba rugi pada pos "keuntungan kurs mata uang asing - bersih".
- Untuk instrument utang diukur pada FVTOCI yang bukan merupakan bagian dari hubungan lindung nilai ditetapkan, selisih kurs atas biaya perolehan diamortisasi dari instrumen hutang diakui dalam laba rugi pada pos "keuntungan kurs mata uang asing - bersih". Perbedaan nilai tukar lainnya diakui pada keuntungan (kerugian) nilai wajar bersih atas aset keuangan yang diukur pada FVTOCI dalam cadangan lainnya.

- Debt instruments that do not meet the amortized cost criteria or the FVTOCI criteria are classified as at FVTPL. In addition, financial assets that meet either the amortized cost criteria or the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency (so called 'accounting mismatch') that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases.

Financial assets at FVTPL are measured at fair value as at each reporting date, with any fair value gains or losses recognized in profit or loss to the extent they are not part of a designated hedging relationship (see hedge accounting policy). The net gain or loss recognized in profit or loss includes any dividend or interest earned on the financial asset and is included in the "other gains - net" line item. Fair value is determined in the manner described in Note 42.

Reclassification of financial assets and liabilities

The Group does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which there is a change in business model. Financial liabilities are never classified.

Foreign exchange gains and losses

The carrying amount of financial assets that are denominated in a foreign currency is determined in that foreign currency and translated at the spot rate as at each reporting date. Specifically:

- For financial assets measured at amortized cost that are not part of a designated hedging relationship, exchange differences are recognized in profit or loss in the "gain on foreign exchange - net" line item.
- For debt instruments measured at FVTOCI that are not part of a designated hedging relationship, exchange differences on the amortized cost of the debt instrument are recognized in profit or loss in the "gain on foreign exchange - net" line item. Other exchange differences are recognized in other comprehensive income in net fair value gain (loss) on financial assets at FVTOCI in other reserves.

- Untuk aset keuangan diukur pada FVTPL yang bukan merupakan bagian dari hubungan lindung nilai ditetapkan, selisih kurs diakui dalam laba rugi pada pos "keuntungan kurs mata uang asing - bersih".

Lihat kebijakan akuntansi lindung nilai mengenai pengakuan perbedaan nilai tukar dimana komponen risiko mata uang asing dari aset keuangan ditetapkan sebagai instrumen lindung nilai untuk lindung nilai atas risiko mata uang asing.

Penurunan nilai aset keuangan

Grup mengakui penyisihan kerugian untuk kerugian kredit ekspektasian ("ECL") atas piutang usaha dan piutang lain-lain. Nilai kerugian kredit ekspektasian diperbarui pada tanggal pelaporan untuk mencerminkan perubahan risiko kredit sejak pengakuan awal masing-masing instrumen keuangan.

Grup selalu mengakui ECL sepanjang umurnya untuk piutang usaha dan aset kontrak. Kerugian kredit ekspektasian atas aset keuangan diestimasi menggunakan matriks provisi berdasarkan pengalaman kerugian kredit historis Grup, disesuaikan untuk faktor spesifik debitur, kondisi ekonomi umum serta penilaian atas arah kondisi kini dan perkiraan masa depan pada tanggal pelaporan, termasuk nilai waktu atas uang jika tepat.

Untuk semua instrumen keuangan lainnya, Grup mengakui ECL sepanjang umur ketika telah ada peningkatan risiko kredit yang signifikan sejak pengakuan awal. Jika, sebaliknya, risiko kredit pada instrumen keuangan tidak meningkat secara signifikan sejak pengakuan awal, Grup mengukur penyisihan kerugian untuk instrumen keuangan tersebut sejumlah ECL 12 bulan. Penilaian apakah ECL sepanjang umur harus diakui didasarkan pada peningkatan signifikan dalam kemungkinan terjadinya atau pada risiko gagal bayar sejak pengakuan awal dan bukan didasarkan pada bukti aset keuangan yang mengalami kerugian kredit pada tanggal pelaporan atau kejadian gagal bayar sebenarnya.

Kerugian kredit ekspektasian sepanjang umur merupakan kerugian kredit ekspektasian yang timbul dari seluruh kemungkinan peristiwa gagal bayar selama perkiraan umur instrumen keuangan. Sebaliknya, ECL 12 bulan mewakili porsi ECL sepanjang umur yang timbul dari peristiwa gagal bayar pada instrumen keuangan yang mungkin terjadi dalam 12 bulan setelah tanggal pelaporan.

- For financial assets measured at FVTPL that are not part of a designated hedging relationship, exchange differences are recognized in profit or loss in the "gain on foreign exchange - net" line item.

See hedge accounting policy regarding the recognition of exchange differences where the foreign currency risk component of a financial asset is designated as a hedging instrument for a hedge of foreign currency risk.

Impairment of financial assets

The Group recognizes a loss allowance for expected credit losses ("ECL") on trade and other accounts receivable. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

The Group always recognizes lifetime ECL for trade accounts receivable and contract assets. The expected credit losses on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Group recognizes lifetime ECL when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECL. The assessment of whether lifetime ECL should be recognized is based on significant increases in the likelihood or risk of a default occurring since initial recognition instead of on evidence of a financial asset being credit impaired at the reporting date or an actual default occurring.

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

Peningkatan risiko credit secara signifikan

Dalam menilai apakah risiko kredit pada instrumen keuangan telah meningkat secara signifikan sejak pengakuan awal, Grup membandingkan risiko gagal bayar yang terjadi pada instrumen keuangan pada tanggal pelaporan dengan risiko gagal bayar yang terjadi pada instrumen keuangan pada tanggal pengakuan awal. Dalam melakukan penilaian, Grup mempertimbangkan baik informasi kuantitatif maupun kualitatif yang wajar dan mendukung, termasuk pengalaman historis dan informasi bersifat perkiraan masa depan, yang tersedia tanpa biaya atau upaya berlebihan. Informasi masa depan yang dipertimbangkan mencakup prospek masa depan industri di mana debitur Grup beroperasi, yang diperoleh dari laporan ahli ekonomi, analisis keuangan, badan pemerintah, lembaga terkait, dan organisasi serupa lainnya, serta pertimbangan berbagai sumber eksternal aktual dan prakiraan informasi ekonomi yang terkait dengan operasi inti Grup.

Secara khusus, informasi berikut diperhitungkan ketika menilai apakah risiko kredit telah meningkat secara signifikan sejak pengakuan awal:

- penurunan yang signifikan pada indikator pasar eksternal atas risiko kredit untuk instrumen keuangan tertentu, contohnya penurunan signifikan pada spread kredit, harga *swap* gagal bayar kredit bagi peminjam, atau rentang waktu atau tingkat nilai wajar aset keuangan lebih rendah dari biaya perolehan diamortisasinya;
- memburuknya kondisi usaha, keuangan atau ekonomi yang terjadi saat ini atau prakiraan yang akan menyebabkan penurunan signifikan atas kemampuan peminjam untuk menyelesaikan kewajiban utangnya;
- terdapat penurunan yang signifikan terhadap hasil operasi peminjam, baik secara aktual atau yang diperkirakan akan terjadi;
- peningkatan risiko kredit secara signifikan pada instrumen keuangan lainnya dari peminjam yang sama;
- perubahan signifikan yang tidak menguntungkan baik secara aktual atau yang diperkirakan dalam lingkungan peraturan, ekonomik, atau lingkungan teknologi peminjam yang mengakibatkan perubahan signifikan atas kemampuan peminjam dalam memenuhi kewajiban utangnya.

Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Group's debtors operate, obtained from economic expert reports, financial analysts, governmental bodies, relevant think-tanks and other similar organizations, as well as consideration of various external sources of actual and forecast economic information that relate to the Group's core operations.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:

- significant deterioration in external market indicators of credit risk for a particular financial instrument, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor, or the length of time or the extent to which the fair value of a financial asset has been less than its amortized cost;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- significant increases in credit risk on other financial instruments of the same debtor;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Terlepas dari hasil penilaian di atas, Grup membuat praduga risiko kredit aset keuangan telah meningkat signifikan sejak pengakuan awal ketika pembayaran kontraktual tertunggak lebih dari 30 hari, kecuali jika Grup memiliki informasi yang wajar dan terdorong yang menunjukkan hal sebaliknya.

Meskipun demikian, Grup mengasumsikan bahwa risiko kredit pada instrumen keuangan tidak meningkat secara signifikan sejak pengakuan awal jika instrumen keuangan tersebut ditetapkan memiliki risiko kredit yang rendah pada tanggal pelaporan. Instrumen keuangan bertekad memiliki risiko kredit rendah jika:

- instrumen keuangan memiliki risiko gagal bayar yang rendah;
- debitur memiliki kapasitas yang kuat untuk memenuhi kewajiban arus kas kontraktualnya dalam waktu dekat; dan
- memburuknya kondisi ekonomi dan bisnis dalam jangka panjang dapat, tetapi tidak selalu, menurunkan kemampuan peminjam untuk memenuhi kewajiban arus kas kontraktualnya.

Grup menganggap aset keuangan memiliki risiko kredit rendah ketika aset memiliki peringkat kredit eksternal '*investment grade*' sesuai dengan definisi yang dipahami secara global atau jika peringkat eksternal tidak tersedia, aset tersebut memiliki peringkat internal '*performing*'. *Performing* berarti bahwa rekanan memiliki posisi keuangan yang kuat dan tidak ada jumlah yang tertunggak.

Grup secara teratur memantau efektivitas kriteria yang digunakan untuk mengidentifikasi apakah telah terjadi peningkatan risiko kredit yang signifikan dan merevisinya jika perlu untuk memastikan bahwa kriteria tersebut mampu mengidentifikasi peningkatan risiko kredit yang signifikan sebelum jumlahnya jatuh tempo.

Definisi gagal bayar

Grup menganggap hal-hal berikut ini merupakan peristiwa gagal bayar untuk tujuan manajemen risiko kredit internal karena pengalaman historis menunjukkan bahwa aset keuangan yang memenuhi salah satu kriteria berikut umumnya tidak dapat dipulihkan:

- ketika terdapat pelanggaran persyaratan keuangan oleh debitur; atau
- informasi yang dikembangkan secara internal atau diperoleh dari sumber eksternal menunjukkan bahwa debitur kemungkinan tidak akan membayar kreditornya, termasuk Grup, secara penuh (tanpa memperhitungkan jaminan yang dimiliki oleh Grup).

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if:

- the financial instrument has a low risk of default;
- the debtor has a strong capacity to meet its contractual cash flow obligations in the near term; and
- adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

The Group considers a financial asset to have low credit risk when the asset has external credit rating of '*investment grade*' in accordance with the globally understood definition or if an external rating is not available, the asset has an internal rating of '*performing*'. *Performing* means that the counterparty has a strong financial position and there is no past due amounts.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

Definition of default

The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that financial assets that meet either of the following criteria are generally not recoverable:

- when there is a breach of financial covenants by the debtor; or
- information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collateral held by the Group).

Terlepas dari analisis di atas, Grup menganggap bahwa gagal bayar telah terjadi ketika aset keuangan tertunggak lebih dari 60 hari kecuali jika Grup memiliki informasi yang wajar dan didukung untuk menunjukkan bahwa kriteria yang lebih panjang lebih tepat.

Aset keuangan memburuk

Aset keuangan mengalami penurunan nilai kredit ketika satu atau lebih peristiwa yang memiliki dampak buruk pada estimasi arus kas masa depan dari aset keuangan tersebut telah terjadi. Bukti bahwa aset keuangan mengalami penurunan nilai termasuk data yang dapat diobservasi tentang peristiwa berikut:

- kesulitan keuangan yang signifikan dari penerbit atau peminjam;
- pelanggaran kontrak, seperti kejadian gagal bayar atau tunggakan;
- pihak pemberi pinjaman, untuk alasan ekonomik atau kontraktual sehubungan dengan kesulitan keuangan yang dialami pihak peminjam, telah memberikan konsesi pada pihak peminjam yang tidak mungkin diberikan jika pihak peminjam tidak mengalami kesulitan tersebut;
- terjadi kemungkinan bahwa pihak peminjam akan dinyatakan pailit atau melakukan reorganisasi keuangan lainnya;
- hilangnya pasar aktif untuk aset keuangan itu akibat kesulitan keuangan; atau
- pembelian atau penerbitan aset keuangan dengan diskon sangat besar yang mencerminkan kerugian kredit yang terjadi.

Kebijakan penghapusan

Grup menghapuskan aset keuangan ketika ada informasi yang menunjukkan bahwa pihak lawan berada dalam kesulitan keuangan yang buruk dan tidak ada prospek pemulihan yang realistis, contoh ketika pihak lawan dalam proses likuidasi atau telah memasuki proses kebangkrutan. Aset keuangan yang dihapuskan dapat menjadi subjek aktivitas paksaan dalam prosedur pemulihan Grup, dengan mempertimbangkan nasihat hukum yang sesuai. Setiap pemulihan yang terjadi diakui dalam laba rugi.

Irrespective of the above analysis, the Group considers that default has occurred when a financial asset is more than 60 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

Credit-impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- significant financial difficulty of the issuer or the borrower;
- a breach of contract, such as a default or past due event;
- the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganization;
- the disappearance of an active market for that financial asset because of financial difficulties; or
- the purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses.

Write-off policy

The Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognized in profit or loss.

Pengukuran dan pengakuan atas kerugian kredit ekspektasian

Pengukuran kerugian kredit ekspektasian merupakan fungsi dari *probability of default*, *loss given default* (yaitu besarnya kerugian jika terjadi gagal bayar) dan eksposur pada gagal bayar. Penilaian *probability of default* dan *loss given default* berdasarkan data historis yang disesuaikan dengan informasi masa depan seperti dijelaskan di atas. Adapun eksposur atas gagal bayar, untuk aset keuangan, diwakili oleh nilai tercatat bruto aset pada tanggal pelaporan; untuk kontrak jaminan keuangan, eksposur mencakup jumlah yang ditarik pada tanggal pelaporan, ditambah dengan jumlah yang diperkirakan akan ditarik di masa depan sebelum tanggal gagal bayar yang ditentukan berdasarkan tren historis, pemahaman Grup mengenai kebutuhan pembiayaan masa depan yang spesifik dari debiturnya, dan informasi perkiraan masa depan lainnya yang relevan.

Untuk aset keuangan, kerugian kredit ekspektasian diestimasi sebagai selisih antara seluruh arus kas kontraktual yang jatuh tempo kepada Grup sesuai dengan kontrak dan seluruh arus kas yang diekspektasi akan diterima oleh Grup, didiskontokan pada suku bunga efektif awal. Untuk piutang sewa, arus kas yang digunakan untuk menentukan kerugian kredit ekspektasian konsisten dengan arus kas yang digunakan dalam mengukur piutang sewa berdasarkan PSAK 73.

Apabila kerugian kredit ekspektasian sepanjang umur diukur secara kolektif untuk kasus dimana bukti kenaikan signifikan risiko kredit pada level instrumen individual tidak tersedia, instrumen keuangan dikelompokkan dengan dasar sebagai berikut:

- Sifat instrumen keuangan (yaitu piutang usaha dan lain-lain dan jumlah tagihan kepada pelanggan Grup masing-masing dinilai sebagai grup terpisah);
- Status jatuh tempo;
- Sifat, besaran dan jenis industri debitur;
- Sifat jaminan untuk piutang sewa pembiayaan; dan
- Peringkat risiko kredit jika tersedia.

Pengelompokan ditelaah secara teratur oleh manajemen untuk memastikan setiap kelompok mempunyai karakteristik risiko yang sama.

Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date; for financial guarantee contracts, the exposure includes the amount drawn down as at the reporting date, together with any additional amounts expected to be drawn down in the future by default date determined based on historical trend, the Group's understanding of the specific future financing needs of the debtors, and other relevant forward-looking information.

For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive, discounted at the original effective interest rate. For a lease receivable, the cash flows used for determining the expected credit losses is consistent with the cash flows used in measuring the lease receivable in accordance with PSAK 73.

Where lifetime ECL is measured on a collective basis to cater for cases where evidence of significant increases in credit risk at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

- Nature of financial instruments (i.e. The Group's trade and other accounts receivables and amounts due from customers are each assessed as a separate group);
- Past-due status;
- Nature, size and industry of debtors;
- Nature of collaterals for finance lease receivables; and
- External credit ratings where available.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Jika Grup telah mengukur cadangan kerugian untuk instrumen keuangan sebesar ECL sepanjang umurnya pada tahun pelaporan sebelumnya, tetapi menentukan pada tanggal pelaporan ini bahwa kondisi untuk ECL sepanjang umurnya tidak lagi terpenuhi, Grup mengukur cadangan kerugian sejumlah ECL 12 bulan pada tanggal pelaporan ini, kecuali untuk aset yang menggunakan pendekatan yang disederhanakan.

Grup mengakui keuntungan atau kerugian penurunan nilai dalam laba rugi untuk semua instrumen keuangan dengan penyesuaian terkait ke jumlah tercatat melalui akun cadangan kerugian, kecuali untuk investasi pada instrumen hutang yang diukur pada FVTOCI, dimana penyisihan kerugian diakui dalam penghasilan komprehensif lain dan diakumulasi dalam cadangan revaluasi investasi, dan tidak mengurangi nilai tercatat aset keuangan pada laporan posisi keuangan konsolidasian.

Penghentian pengakuan aset keuangan

Grup menghentikan pengakuan aset keuangan jika dan hanya jika hak kontraktual atas arus kas yang berasal dari aset keuangan berakhir, atau Grup mentransfer aset keuangan dan secara substansial mentransfer seluruh risiko dan manfaat atas kepemilikan aset kepada entitas lain. Jika Grup tidak mentransfer serta tidak memiliki secara substansial seluruh risiko dan manfaat kepemilikan serta masih mengendalikan aset yang ditransfer, maka Grup mengakui keterlibatan berkelanjutan atas aset yang ditransfer dan liabilitas terkait sebesar jumlah yang mungkin harus dibayar. Jika Grup memiliki secara substansial seluruh risiko dan manfaat kepemilikan aset keuangan yang ditransfer, Grup masih mengakui aset keuangan dan juga mengakui pinjaman yang dijamin sebesar pinjaman yang diterima.

Pada penghentian pengakuan aset keuangan yang diukur pada biaya perolehan diamortisasi, perbedaan antara nilai tercatat aset dan jumlah imbalan yang diterima dan piutang diakui dalam laba rugi. Selain itu, pada penghentian pengakuan investasi dalam instrumen utang yang diklasifikasikan sebagai FVTOCI, keuntungan atau kerugian kumulatif yang sebelumnya diakumulasi dalam cadangan revaluasi investasi, direklasifikasi ke laba rugi. Sebaliknya, pada penghentian pengakuan investasi dalam instrumen ekuitas yang telah dipilih Grup pada pengakuan awal untuk diukur di FVTOCI, keuntungan atau kerugian kumulatif yang sebelumnya diakumulasi dalam keuntungan (kerugian) nilai wajar bersih atas aset keuangan yang diukur pada FVTOCI dalam cadangan lainnya tidak direklasifikasi ke laba rugi, tetapi dipindahkan ke saldo laba.

If the Group has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the Group measures the loss allowance at an amount equal to 12-month ECL at the current reporting date, except for assets for which the simplified approach was used.

The Group recognizes an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for investments in debt instruments that are measured at FVTOCI, for which the loss allowance is recognized in other comprehensive income and accumulated in the investment revaluation reserve, and does not reduce the carrying amount of the financial asset in the consolidated statement of financial position.

Derecognition of financial assets

The Group derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

On derecognition of a financial asset measured at amortized cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as at FVTOCI, the cumulative gain or loss previously accumulated in the investment revaluation reserve is reclassified to profit or loss. In contrast, on derecognition of an investment in an equity instrument which the Group has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the net fair value gain (loss) on financial assets at FVTOCI in other reserves is not reclassified to profit or loss, but is transferred to retained earnings.

**Liabilitas Keuangan dan Instrumen
Ekuitas**

Klasifikasi sebagai liabilitas atau ekuitas

Instrumen utang dan ekuitas yang diterbitkan oleh Grup diklasifikasikan sebagai liabilitas keuangan atau ekuitas sesuai dengan substansi perjanjian kontraktual dan definisi liabilitas keuangan dan instrumen ekuitas.

Instrumen ekuitas

Instrumen ekuitas adalah setiap kontrak yang memberikan hak residual atas aset Grup setelah dikurangi dengan seluruh liabilitasnya. Instrumen ekuitas yang diterbitkan oleh Grup dicatat sebesar hasil penerimaan bersih setelah dikurangi biaya penerbitan langsung.

Pembelian kembali instrumen ekuitas Perusahaan (saham treasury) diakui dan dikurangkan secara langsung dari ekuitas. Keuntungan dan kerugian yang timbul dari pembelian, penjualan, penerbitan atau pembatalan instrumen ekuitas Perusahaan tersebut tidak diakui dalam laba rugi.

Liabilitas Keuangan

Liabilitas keuangan diklasifikasikan sebagai "FVTPL" atau "pada biaya perolehan diamortisasi" menggunakan metode suku bunga efektif.

Namun, liabilitas keuangan yang timbul ketika pengalihan aset keuangan tidak memenuhi syarat untuk penghentian pengakuan atau ketika pendekatan keterlibatan berkelanjutan diterapkan, kontrak jaminan keuangan yang diterbitkan oleh Grup, dan komitmen yang diterbitkan oleh Grup untuk memberikan pinjaman dengan tingkat bunga di bawah pasar diukur sesuai dengan kebijakan akuntansi spesifik yang diungkapkan di bawah ini.

Liabilitas keuangan yang diukur pada FVTPL

Liabilitas keuangan diklasifikasi FVTPL ketika liabilitas keuangan merupakan 1) imbalan kontingen yang diakui oleh pihak pengakuisisi dalam kombinasi bisnis ketika PSAK 22 Kombinasi Bisnis diterapkan, 2) dimiliki untuk diperdagangkan, atau 3) ditetapkan sebagai FVTPL.

**Financial Liabilities and
Equity Instruments**

Classification as debt or equity

Debt and equity instruments issued by the Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recorded at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments (treasury shares) is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Financial Liabilities

Financial liabilities are classified as either financial liabilities "at FVTPL" or "at amortized cost" using the effective interest method.

However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, financial guarantee contracts issued by the Group, and commitments issued by the Group to provide a loan at below-market interest rate are measured in accordance with the specific accounting policies set out below.

Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is 1) contingent consideration of an acquirer in a business combination to which PSAK 22 *Business Combination* applies, 2) held for trading, or 3) it is designated as at FVTPL.

Liabilitas keuangan dimiliki untuk diperdagangkan jika:

- diperoleh terutama untuk tujuan dibeli kembali dalam waktu dekat; atau
- pada pengakuan awal merupakan bagian dari portofolio instrumen keuangan tertentu yang dikelola Grup secara bersama dan terdapat bukti mengenai pola ambil untung dalam jangka pendek aktual saat ini; atau
- merupakan derivatif, kecuali derivatif yang merupakan kontrak jaminan keuangan atau instrumen lindung nilai yang ditetapkan dan efektif.

Liabilitas keuangan selain liabilitas keuangan yang diperdagangkan dapat ditetapkan sebagai FVTPL pada saat pengakuan awal jika:

- mengeliminasi atau mengurangi secara signifikan inkonsistensi pengukuran dan pengakuan yang dapat timbul;
- liabilitas keuangan membentuk bagian dari kelompok aset keuangan, liabilitas keuangan atau keduanya dikelola dan kinerjanya dievaluasi berdasarkan nilai wajar, sesuai dengan manajemen risiko atau strategi investasi yang didokumentasikan dan informasi tentang kelompok tersebut disediakan secara internal; atau
- merupakan bagian kontrak yang mengandung satu atau lebih derivatif melekat, dan PSAK 55 *Instrumen Keuangan: Pengakuan dan Pengukuran* atau atau PSAK 71 mengizinkan seluruh kontrak gabungan (aset atau liabilitas) ditetapkan sebagai FVTPL.

Pengukuran selanjutnya liabilitas keuangan pada FVTPL

Liabilitas keuangan pada FVTPL diukur pada nilai wajar, dengan keuntungan atau kerugian yang timbul atas perubahan nilai wajar diakui dalam laporan laba rugi sepanjang hal tersebut tidak menjadi bagian dari hubungan lindung nilai yang ditentukan (lihat kebijakan akuntansi lindung nilai). Keuntungan atau kerugian bersih yang diakui dalam laba rugi menggabungkan setiap bunga yang dibayarkan atas liabilitas keuangan dan termasuk dalam bagian "keuntungan lain-lain - bersih" dalam laporan laba rugi.

A financial liability is classified as held for trading if:

- it has been acquired principally for the purpose of repurchasing in the near term; or
- on initial recognition it is part of an identified portfolio of financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- It is a derivative, except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument.

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise;
- the financial liability forms part of a group of financial assets or financial liabilities or both which is managed and its performance is evaluated on a fair value basis in accordance with a documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and PSAK 55 *Financial Instruments: Recognition and Measurement* or PSAK 71 permits the entire combined contract (asset or liability) to be designated as at FVTPL.

Subsequent measurement of financial liabilities at FVTPL

Financial liabilities at FVTPL are measured at fair value, with any gains or losses arising on changes in fair value recognized in profit or loss to the extent that they are not part of a designated hedging relationship (see hedge accounting policy). The net gain or loss recognized in profit or loss incorporates any interest paid on the financial liability and is included in the "other gains - net" line item in profit or loss.

Namun, untuk liabilitas keuangan yang ditetapkan pada FVTPL, jumlah perubahan nilai wajar liabilitas keuangan yang dapat diatribusikan pada perubahan risiko kredit liabilitas diakui dalam penghasilan komprehensif lain, kecuali jika pengakuan dampak risiko kredit di penghasilan komprehensif lain akan menciptakan atau memperbesar inkonsistensi akuntansi dalam laba rugi. Sisa perubahan dari nilai wajar atas liabilitas diakui dalam laba rugi. Perubahan nilai wajar yang dapat diatribusikan pada risiko kredit liabilitas keuangan yang diakui dalam penghasilan komprehensif lain tidak akan direklasifikasi ke laba rugi; sebaliknya, perubahan tersebut dipindahkan ke saldo laba pada saat penghentian pengakuan liabilitas keuangan.

Liabilitas keuangan pada biaya perolehan diamortisasi

Liabilitas keuangan yang bukan merupakan 1) imbalan kontingen dari pihak pengakuisisi dalam kombinasi bisnis, 2) dimiliki untuk diperdagangkan, atau 3) ditetapkan sebagai FVTPL, selanjutnya diukur pada biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif.

Metode suku bunga efektif

Metode suku bunga efektif adalah metode yang digunakan untuk menghitung biaya perolehan diamortisasi dari liabilitas keuangan dan metode untuk mengalokasikan biaya bunga selama tahun yang relevan. Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran kas masa depan (mencakup seluruh komisi dan bentuk lain yang dibayarkan dan diterima yang merupakan bagian yang tak terpisahkan dari suku bunga efektif, biaya transaksi dan premium dan diskonto lainnya) selama perkiraan umur liabilitas keuangan, atau (jika lebih tepat) digunakan periode yang lebih singkat untuk memperoleh nilai tercatat bersih pada saat pengakuan awal.

Keuntungan dan kerugian kurs mata uang asing

Untuk liabilitas keuangan dalam mata uang asing dan diukur pada biaya perolehan diamortisasi pada setiap tanggal pelaporan, keuntungan atau kerugian kurs mata uang asing ditentukan berdasarkan biaya perolehan diamortisasi dari instrumen. Keuntungan atau kerugian kurs mata uang asing diakui dalam laba rugi untuk liabilitas keuangan yang tidak merupakan bagian dari hubungan lindung nilai ditetapkan. Untuk yang ditetapkan sebagai instrumen lindung nilai untuk lindung nilai atas risiko mata uang asing, keuntungan dan kerugian selisih kurs diakui dalam penghasilan komprehensif lain dan diakumulasikan dalam komponen ekuitas yang terpisah.

However, for financial liabilities that are designated as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognized in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. The remaining amount of change in the fair value of liability is recognized in profit or loss. Changes in fair value attributable to a financial liability's credit risk that are recognized in other comprehensive income are not subsequently reclassified to profit or loss; instead, they are transferred to retained earnings upon derecognition of the financial liability.

Financial liabilities at amortized cost

Financial liabilities that are not 1) contingent consideration of an acquirer in a business combination, 2) held-for-trading, or 3) designated as at FVTPL, are subsequently measured at amortized cost using the effective interest method.

Effective interest method

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period to the net carrying amount on initial recognition.

Foreign exchange gains and losses

For financial liabilities that are denominated in a foreign currency and are measured at amortized cost as at each reporting date, the foreign exchange gains and losses are determined based on the amortized cost of the instruments. These foreign exchange gains and losses are recognized in profit or loss for financial liabilities that are not part of a designated hedging relationship. For those which are designated as a hedging instrument for a hedge of foreign currency risk, foreign exchange gains and losses are recognized in other comprehensive income and accumulated in a separate component of equity.

Nilai wajar liabilitas keuangan dalam mata uang asing ditentukan dalam mata uang asing tersebut dan dijabarkan pada kurs yang berlaku pada akhir tahun pelaporan. Untuk liabilitas keuangan yang diukur pada FVTPL, komponen nilai tukar mata uang asing merupakan bagian dari keuntungan atau kerugian nilai wajar dan diakui dalam laba rugi untuk liabilitas keuangan yang tidak merupakan bagian dari hubungan lindung nilai ditetapkan.

Penghentian pengakuan liabilitas keuangan

Grup menghentikan pengakuan liabilitas keuangan, jika dan hanya jika, liabilitas Grup telah dilepaskan, dibatalkan atau kadaluarsa. Selisih antara jumlah tercatat liabilitas keuangan yang dihentikan pengakuannya dan imbalan yang dibayarkan dan utang diakui dalam laba rugi.

Ketika Grup bertukar dengan pemberi pinjaman, satu instrumen utang menjadi instrumen lain dengan persyaratan yang berbeda secara substansial, pertukaran tersebut dicatat sebagai penghapusan liabilitas keuangan orisinal dan pengakuan liabilitas keuangan baru. Demikian pula, Grup memperhitungkan modifikasi substansial dari ketentuan liabilitas yang ada atau bagian dari liabilitas tersebut sebagai pelepasan liabilitas keuangan orisinal dan pengakuan liabilitas baru. Diasumsikan bahwa persyaratannya berbeda secara substansial jika nilai kini arus kas yang didiskonto berdasarkan persyaratan yang baru, termasuk setiap *fee* (imbalan) yang dibayarkan setelah dikurangi setiap *fee* (imbalan) yang diterima dan didiskonto menggunakan suku bunga efektif orisinal, berbeda sedikitnya 10% dari nilai kini sisa arus kas yang didiskonto yang berasal dari liabilitas keuangan orisinal. Jika modifikasi tidak substansial, maka perbedaan antara: (1) jumlah tercatat liabilitas sebelum modifikasi; dan (2) nilai kini dari arus kas setelah modifikasi, diakui dalam laba rugi sebagai keuntungan atau kerugian modifikasi dalam keuntungan dan kerugian lainnya.

h. Saling hapus antar Aset Keuangan dan Liabilitas Keuangan

Aset keuangan dan liabilitas keuangan disalinghapuskan dan nilai netonya disajikan dalam laporan posisi keuangan jika Grup tersebut memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus atas jumlah yang telah diakui; dan berintens untuk menyelesaikan secara neto atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan. Hak saling hapus harus ada pada saat ini dan tidak bersifat kontingen atas terjadinya suatu peristiwa di masa depan dan harus dapat dieksekusi oleh pihak lawan, baik dalam situasi bisnis normal dan dalam peristiwa gagal bayar, peristiwa kepailitan atau kebangkrutan.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognized in profit or loss for financial liabilities that are not part of a designated hedging relationship.

Derecognition of financial liabilities

The Group derecognizes financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

When the Group exchanges with the existing lender one debt instrument into another one with the substantially different terms, such exchange is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, the Group accounts for substantial modification of terms of an existing liability or part of it as an extinguishment of the original financial liability and the recognition of a new liability. It is assumed that the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective rate is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability. If the modification is not substantial, the difference between: (1) the carrying amount of the liability before the modification; and (2) the present value of the cash flows after modification is recognized in profit or loss as the modification gain or loss within other gains and losses.

h. Netting of Financial Assets and Financial Liabilities

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when the Group has a legally enforceable right to set off the recognized amounts; and intends either to settle on a net basis, or to realise the assets and settle the liability simultaneously. A right to set-off must be available today rather than being contingent on a future event and must be exercisable by any of the counterparties, both in the normal course of business and in the event of default, insolvency or bankruptcy.

i. Kas dan Setara Kas

Untuk tujuan penyajian arus kas, kas dan setara kas terdiri dari kas, bank dan semua investasi yang jatuh tempo dalam waktu tiga bulan atau kurang dari tanggal perolehannya dan yang tidak dijaminakan serta tidak dibatasi penggunaannya.

j. Investasi pada Entitas Asosiasi

Entitas asosiasi adalah suatu entitas yang mana Grup mempunyai pengaruh yang signifikan. Pengaruh signifikan adalah kekuasaan untuk berpartisipasi dalam keputusan kebijakan keuangan dan operasional *investee* tetapi tidak mengendalikan atau mengendalikan bersama atas kebijakan tersebut.

Penghasilan dan aset dan liabilitas dari entitas asosiasi dicatat dalam laporan keuangan konsolidasian dengan menggunakan metode ekuitas, kecuali ketika investasi diklasifikasikan sebagai dimiliki untuk dijual, sesuai dengan PSAK 58, *Aset Tidak Lancar yang Dimiliki untuk Dijual dan Operasi yang Dihentikan*.

Dengan metode ekuitas, investasi pada entitas asosiasi diakui di laporan posisi keuangan konsolidasian sebesar biaya perolehan dan selanjutnya disesuaikan untuk perubahan dalam bagian kepemilikan Grup atas laba rugi dan penghasilan komprehensif lain dari entitas asosiasi yang terjadi setelah perolehan. Ketika bagian Grup atas kerugian entitas asosiasi melebihi kepentingan Grup pada entitas asosiasi (yang mencakup semua kepentingan jangka panjang, yang secara substansi, membentuk bagian dari investasi bersih Grup dalam entitas asosiasi), Grup menghentikan pengakuan bagiannya atas kerugian selanjutnya. Kerugian selanjutnya diakui hanya apabila Grup mempunyai kewajiban bersifat hukum atau konstruktif atau melakukan pembayaran atas nama entitas asosiasi.

Investasi pada entitas asosiasi dicatat dengan menggunakan metode ekuitas sejak tanggal pada saat *investee* menjadi entitas asosiasi. Setiap kelebihan biaya perolehan investasi atas bagian Grup atas nilai wajar bersih dari aset yang teridentifikasi dan liabilitas dari entitas asosiasi yang diakui pada tanggal akuisisi, diakui sebagai goodwill. Goodwill termasuk dalam jumlah tercatat investasi, dan diuji penurunan nilainya sebagai bagian dari investasi. Setiap kelebihan kepemilikan Grup dari nilai wajar bersih aset yang teridentifikasi dan liabilitas atas biaya perolehan investasi, sesudah pengujian kembali, segera diakui di dalam laba rugi pada tahun diperolehnya investasinya.

i. Cash and Cash Equivalents

For cash flow presentation purposes, cash and cash equivalents consist of cash on hand and in banks and all unrestricted investments with maturities of three months or less from the date of placement.

j. Investments in Associate

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results of operations and assets and liabilities of associate are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment is classified as held for sale, in which case, it is accounted for in accordance with *Non-current Assets Held for Sale and Discontinued Operations*.

Under the equity method, an investment in an associate is initially recognized in the consolidated statements of financial position at cost and adjusted thereafter to recognize the Group's share of the profit or loss and other comprehensive income of the associate. When the Group's share of losses of an associate exceeds the Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognizing its share of further losses. Additional losses are recognized only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

An investment in an associate is accounted for using the equity method from the date on which the investee becomes an associate. Any excess of the cost of acquisition over the Group's share of the net fair value of identifiable assets and liabilities of the associate recognized at the date of acquisition, is recognized as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss in the period in which the investment is acquired.

Persyaratan dalam PSAK 48, diterapkan untuk menentukan apakah perlu untuk mengakui setiap penurunan nilai sehubungan dengan investasi pada entitas asosiasi. Bila diperlukan, jumlah tercatat investasi (termasuk goodwill) diuji penurunan nilai sesuai dengan PSAK 48 sebagai suatu aset tunggal dengan membandingkan antara jumlah terpulihkan (mana yang lebih tinggi antara nilai pakai dan nilai wajar dikurangi biaya pelepasan) dengan jumlah tercatatnya. Rugi penurunan nilai diakui langsung pada nilai tercatat investasi. Setiap pembalikan dari penurunan nilai diakui sesuai dengan PSAK 48 sepanjang jumlah terpulihkan dari investasi tersebut kemudian meningkat.

Grup menghentikan penggunaan metode ekuitas sejak tanggal saat investasinya berhenti menjadi investasi pada entitas asosiasi atau ventura bersama atau ketika investasi diklasifikasi sebagai dimiliki untuk dijual. Ketika Grup mempertahankan kepemilikan dalam entitas yang sebelumnya merupakan entitas asosiasi atau ventura bersama dan sisa investasi tersebut merupakan aset keuangan, Grup mengukur setiap sisa investasi pada nilai wajar pada tanggal tersebut dan nilai wajar tersebut dianggap sebagai nilai wajar pada saat pengakuan awal sesuai dengan PSAK 71. Selisih antara jumlah tercatat pada asosiasi pada tanggal metode ekuitas dihentikan, dan nilai wajar dari setiap bunga yang ditahan dan dihasilkan dari pelepasan sebagian kepentingan dalam asosiasi termasuk dalam penentuan keuntungan atau kerugian pada pelepasan asosiasi. Selanjutnya, Grup mencatat seluruh jumlah yang sebelumnya telah diakui dalam penghasilan komprehensif lain yang terkait dengan entitas asosiasi tersebut dengan menggunakan dasar perlakuan yang sama dengan yang disyaratkan jika entitas asosiasi telah melepaskan secara langsung aset dan liabilitas yang terkait. Seluruh jumlah yang diakui dalam penghasilan komprehensif lain yang terkait dengan entitas asosiasi direklasifikasi ke laba rugi (sebagai penyesuaian reklasifikasi) pada saat penghentian metode ekuitas.

Grup melanjutkan penerapan metode ekuitas jika investasi pada entitas asosiasi menjadi investasi pada ventura bersama atau investasi pada ventura bersama menjadi investasi pada entitas asosiasi. Tidak terdapat pengukuran kembali ke nilai wajar pada saat perubahan kepentingan.

The requirements of PSAK 48, are applied to determine whether it is necessary to recognize any impairment loss with respect to the Group's investment in an associate. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with PSAK 48 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount. Any impairment loss recognized forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognized in accordance with PSAK 48 to the extent that the recoverable amount of the investment subsequently increases.

The Group discontinues the use of the equity method from the date when the investment ceases to be an associate or a joint venture, or when the investment is classified as held for sale. When the Group retains an interest in the former associate or joint venture and the retained interest is a financial asset, the Group measures any retained investment at fair value at that date and the fair value is regarded as its fair value on initial recognition in accordance with PSAK 71. The difference between the carrying amount of the associate at the date the equity method was discontinued, and the fair value of any retained interest and any proceeds from disposing of a part of interest in the associate is included in the determination of the gain or loss on disposal of the associate. In addition, the Group accounts for all amounts previously recognized in other comprehensive income in relation to that associate on the same basis as would be required if that associate had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognized in other comprehensive income by that associate would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) when the equity method is discontinued.

The Group continues to use the equity method when an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate. There is no remeasurement to fair value upon such changes in ownership interests.

Jika Grup mengurangi bagian kepemilikan pada entitas asosiasi tetapi Grup tetap menerapkan metode ekuitas, Grup mereklasifikasi ke laba rugi proporsi keuntungan atau kerugian yang telah diakui sebelumnya dalam penghasilan komprehensif lain yang terkait dengan pengurangan bagian kepemilikan (jika keuntungan atau kerugian tersebut akan direklasifikasi ke laba rugi atas pelepasan aset atau liabilitas yang terkait).

Ketika Grup melakukan transaksi dengan entitas asosiasi, keuntungan dan kerugian yang timbul dari transaksi dengan entitas asosiasi diakui dalam laporan keuangan konsolidasian Grup hanya sebesar kepemilikan dalam entitas asosiasi yang tidak terkait dengan Grup.

Grup menerapkan PSAK 71, termasuk persyaratan penurunan nilai, untuk kepentingan jangka panjang dalam entitas asosiasi atau ventura bersama ketika metode ekuitas tidak diterapkan dan yang merupakan bagian dari investasi neto pada *investee*. Selanjutnya, dalam menerapkan PSAK 71 untuk kepentingan jangka panjang, Grup tidak memperhitungkan penyesuaian nilai tercatat yang disyaratkan oleh PSAK 15 *Investasi pada Entitas Asosiasi dan Ventura Bersama* (PSAK 15) (misalnya, penyesuaian nilai tercatat kepentingan jangka panjang yang timbul dari alokasi kerugian *investee* atau penilaian penurunan nilai berdasarkan PSAK 15).

k. Persediaan

Persediaan dinyatakan berdasarkan biaya perolehan atau nilai realisasi bersih, mana yang lebih rendah. Biaya terdiri atas bahan langsung dan, jika berlaku, biaya tenaga kerja langsung dan biaya *overhead* yang dikeluarkan untuk membawa persediaan ke lokasi dan kondisinya saat ini. Biaya perolehan ditentukan dengan metode rata-rata tertimbang. Nilai realisasi bersih merupakan estimasi harga jual dari persediaan dikurangi seluruh biaya penyelesaian dan estimasi biaya yang diperlukan untuk penjualan.

l. Biaya Dibayar Dimuka

Biaya dibayar dimuka diamortisasi selama manfaat masing-masing biaya dengan menggunakan metode garis lurus.

m. Aset Tetap – Pemilikan Langsung

Aset tetap yang dimiliki untuk digunakan dalam produksi atau penyediaan barang atau jasa atau untuk tujuan administratif dicatat berdasarkan biaya perolehan setelah dikurangi akumulasi penyusutan dan akumulasi kerugian penurunan nilai.

When the Group reduces its ownership interest in an associate but the Group continues to use the equity method, the Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognized in other comprehensive income relating to that reduction in ownership interest (if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities).

When a Group entity transacts with an associate, profits and losses resulting from the transactions with the associate are recognized in the Group's consolidated financial statements only to the extent of its interest in the associate that are not related to the Group.

The Group applies PSAK 71, including the impairment requirements, to long-term interests in an associate or joint venture to which the equity method is not applied and which form part of the net investment in the *investee*. Furthermore, in applying PSAK 71 to long-term interests, the Group does not take into account adjustments to their carrying amount required by PSAK 15 *Investment in Associate and Joint Venture* (PSAK 15) (i.e. adjustments to the carrying amount of long-term interests arising from the allocation of losses of the *investee* or assessment of impairment in accordance with PSAK 15).

k. Inventories

Inventories are stated at cost or net realizable value, whichever is lower. Cost comprises direct materials and, where applicable, direct labor costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is determined using the weighted average method. Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

l. Prepaid Expenses

Prepaid expenses are amortized over their beneficial periods using the straight-line method.

m. Property, Plant and Equipment – Direct Acquisitions

Property, plant and equipment held for use in the production or supply of goods or services, or for administrative purposes, are stated at cost, less accumulated depreciation and any accumulated impairment losses.

Penyusutan diakui dengan menggunakan metode garis lurus setelah memperhitungkan nilai residu berdasarkan taksiran masa manfaat ekonomis aset tetap sebagai berikut:

	<u>Tahun/Years</u>
Bangunan dan prasarana	4-30
Mesin	4-37
Kendaraan bermotor	4-8
Peralatan dan perlengkapan	4-8

Masa manfaat ekonomis, nilai residu dan metode penyusutan direviu setiap akhir tahun dan pengaruh dari setiap perubahan estimasi tersebut berlaku prospektif.

Tanah dinyatakan berdasarkan biaya perolehan dan tidak disusutkan.

Biaya berkala untuk *overhaul* mesin yang dikapitalisasi disusutkan dengan menggunakan garis lurus selama periode sampai *overhaul* berikutnya.

Beban pemeliharaan dan perbaikan dibebankan pada laba rugi pada saat terjadinya. Biaya-biaya lain yang terjadi selanjutnya yang timbul untuk menambah, mengganti atau memperbaiki aset tetap dicatat sebagai biaya perolehan aset jika dan hanya jika besar kemungkinan manfaat ekonomis di masa depan berkenaan dengan aset tersebut akan mengalir ke entitas dan biaya perolehan aset dapat diukur secara andal.

Aset tetap dihentikan pengakuannya pada saat pelepasan atau ketika tidak ada manfaat ekonomis masa depan yang diharapkan timbul dari penggunaan aset secara berkelanjutan. Keuntungan atau kerugian yang timbul dari pelepasan atau penghentian pengakuan suatu aset tetap ditentukan sebagai selisih antara hasil penjualan dan nilai tercatat aset dan diakui dalam laba rugi.

Aset yang telah disusutkan sepenuhnya yang masih digunakan tetap termasuk dalam laporan keuangan konsolidasian.

Properti dalam proses konstruksi ("aset dalam penyelesaian") untuk tujuan produksi, persediaan atau administrasi, atau tujuan yang belum ditentukan, dicatat sebesar harga perolehan, dikurangi kerugian penurunan nilai yang diakui. Biaya perolehan termasuk biaya profesional dan untuk aset kualifikasian, biaya pinjaman yang dikapitalisasi sesuai dengan kebijakan akuntansi Grup. Penyusutan aset ini, dengan dasar yang sama seperti aset properti lainnya, dimulai saat aset tersebut siap untuk digunakan sesuai dengan tujuannya.

Depreciation is recognized using the straight-line method after calculating the residual values based on the estimated useful lives of the assets as follows:

Buildings and infrastructures
Machineries
Motor vehicles
Furniture and fixtures

The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

Land is stated at cost and is not depreciated.

Capitalized cost of major periodical overhauls of machinery is depreciated using the straight line method over the period to the next overhaul.

The cost of maintenance and repairs is charged to profit or loss as incurred. Other costs incurred subsequently to add to, replace part of, or service an item of property, plant and equipment, are recognized as asset if, and only if it is probable that future economic benefits associated with the item will flow to the entity and the cost of the item can be measured reliably.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

Fully depreciated assets still in use are retained in the consolidated financial statements.

Properties in the course of construction ("construction in progress") for production, supply or administrative purposes, or for purposes not yet determined, are carried at cost, less any recognized impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalized in accordance with the Group's accounting policy. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Biaya perolehan sebuah aset termasuk estimasi awal biaya pembongkaran, pemindahan aset tetap dan restorasi lokasi aset. Liabilitas yang timbul atas estimasi tersebut dicatat sebagai "Estimasi biaya pembongkaran aset tetap". Kewajiban untuk biaya yang diperhitungkan diakui dan diukur sesuai dengan Catatan 3p.

The acquisition cost of an asset includes the initial estimate of the cost of dismantling and removing the item and restoring the site on which it is located. Liabilities resulting from such estimation were recorded as "Decommissioning Cost". The obligation for costs to be accounted for are recognized and measured in accordance with Note 3p.

n. Sewa

Grup sebagai penyewa

Grup menilai apakah sebuah kontrak mengandung sewa, pada tanggal inisiasi kontrak. Grup mengakui aset hak-guna dan liabilitas sewa terkait sehubungan dengan seluruh kesepakatan sewa di mana Perusahaan merupakan penyewa, kecuali untuk sewa jangka-pendek (yang didefinisikan sebagai sewa yang memiliki masa sewa 12 bulan atau kurang) dan sewa yang aset dasarnya bernilai-rendah. Untuk sewa-sewa tersebut, Grup mengakui pembayaran sewa sebagai beban operasi secara garis lurus selama masa sewa kecuali dasar sistematis lainnya lebih merepresentasikan pola konsumsi manfaat penyewa dari aset sewa.

Liabilitas sewa awalnya diukur pada nilai kini pembayaran sewa masa depan yang belum dibayarkan pada tanggal permulaan, yang didiskontokan menggunakan suku bunga implisit dalam sewa. Jika suku bunga ini tidak dapat ditentukan, Grup menggunakan suku bunga pinjaman inkremental khusus untuk penyewa.

Pembayaran sewa yang diperhitungkan dalam pengukuran liabilitas sewa terdiri atas:

- Pembayaran tetap (termasuk pembayaran tetap secara-substansi), dikurangi insentif sewa;
- Pembayaran sewa variabel yang bergantung pada indeks atau suku bunga yang pada awalnya diukur dengan menggunakan indeks atau suku bunga pada tanggal permulaan;
- jumlah yang diperkirakan akan dibayarkan oleh penyewa dalam jaminan nilai residual;
- harga eksekusi opsi beli jika penyewa cukup pasti untuk mengeksekusi opsi tersebut; dan
- pembayaran penalti karena penghentian sewa, jika masa sewa merefleksikan penyewa mengeksekusi opsi untuk menghentikan sewa.

Liabilitas sewa disajikan sebagai pos terpisah dalam laporan posisi keuangan konsolidasian.

n. Leases

The Group as lessee

The Group assesses whether a contract is or contains a lease, at the inception of the contract. The Group recognizes a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Group recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Group uses the incremental borrowing rate specific to the lessee.

Lease payments included in the measurement of the lease liability comprise:

- fixed lease payments (including in-substance fixed payments), less any lease incentives;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the lessee under residual value guarantees;
- the exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
- payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as a separate line in the consolidated statement of financial position.

Liabilitas sewa selanjutnya diukur dengan meningkatkan jumlah tercatat untuk merefleksikan bunga atas liabilitas sewa (menggunakan metode suku bunga efektif) dan dengan mengurangi jumlah tercatat untuk merefleksikan sewa yang telah dibayar.

Grup mengukur kembali liabilitas sewa (dan melakukan penyesuaian terkait terhadap aset hak-guna) jika:

- terdapat perubahan dalam masa sewa atau perubahan dalam penilaian atas eksekusi opsi pembelian, di mana liabilitas sewa diukur dengan mendiskontokan pembayaran sewa revisian menggunakan tingkat diskonto revisian;
- terdapat perubahan sewa masa depan sebagai akibat dari perubahan indeks atau perubahan perkiraan pembayaran berdasarkan nilai residual jaminan di mana liabilitas sewa diukur kembali dengan mendiskontokan pembayaran sewa revisian menggunakan tingkat diskonto awal (kecuali jika pembayaran sewa berubah karena perubahan suku bunga mengambang, di mana tingkat diskonto revisian digunakan); atau
- kontrak sewa dimodifikasi dan modifikasi sewa tidak dicatat sebagai sewa terpisah, di mana liabilitas sewa diukur dengan mendiskontokan pembayaran sewa revisian menggunakan tingkat diskonto revisian.

Aset hak-guna terdiri dari pengukuran awal atas liabilitas sewa, pembayaran sewa yang dilakukan pada saat atau sebelum permulaan sewa dan biaya langsung awal. Aset hak-guna selanjutnya diukur sebesar biaya dikurangi akumulasi penyusutan dan kerugian penurunan nilai.

Jika Grup dibebankan kewajiban atas biaya membongkar dan memindahkan aset sewa, merestorasi tempat di mana aset berada atau merestorasi aset pendasar ke kondisi yang disyaratkan oleh syarat dan ketentuan sewa, provisi diakui dan diukur sesuai PSAK 57 *Provisi, Liabilitas Kontijensi, dan Aset Kontijensi*. Biaya tersebut diperhitungkan dalam aset hak-guna terkait, kecuali jika biaya tersebut terjadi untuk memproduksi persediaan.

Aset hak-guna disusutkan selama tahun yang lebih singkat antara masa sewa dan masa manfaat aset pendasar. Jika sewa mengalihkan kepemilikan aset pendasar atau jika biaya perolehan aset hak-guna merefleksikan Grup akan mengeksekusi opsi beli, aset hak-guna disusutkan selama masa manfaat aset pendasar. Penyusutan dimulai pada tanggal permulaan sewa.

The lease liability is subsequently measured by increasing the carrying amount to reflect the interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

The Group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use assets) whenever:

- the lease term has changed or there is a change in the assessment of the exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- the lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used); or
- a lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.

The right-of-use assets comprise the initial measurements of the corresponding lease liability, lease payments made at or before the commencement day and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Whenever the Group incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying assets to the conditions required by the terms and conditions of the lease, a provision is recognized and measured under PSAK 57 *Provisions, Contingent Liabilities, and Contingent Assets*. The costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying assets. If a lease transfers ownership of the underlying assets or the cost of the right-of-use assets reflects that of the Group expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying assets. The depreciation starts at the commencement date of the lease.

Aset hak-guna disajikan sebagai pos terpisah di laporan posisi keuangan konsolidasian.

The right-of-use assets are presented as a separate line in the consolidated statement of financial position.

Grup menerapkan PSAK 48 untuk menentukan apakah aset hak-guna mengalami penurunan nilai dan mencatat kerugian penurunan nilai yang teridentifikasi sebagaimana dijelaskan dalam kebijakan aset penurunan nilai.

The Group applies PSAK 48 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the impairment of assets policy.

Sewa variabel yang tidak bergantung pada indeks atau suku bunga tidak diperhitungkan dalam pengukuran liabilitas sewa dan aset hak-guna. Pembayaran terkait diakui sebagai beban dalam tahun di mana peristiwa atau kondisi yang memicu pembayaran tersebut terjadi dan dicatat dalam pos "Beban umum dan administrasi" dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Variable rents that do not depend on an index or rate are not included in the measurements of the lease liability and the right-of-use asset. The related payments are recognized as an expense in the period in which the event or condition that triggers those payments occur and are included in the line "General and administrative expenses" in the consolidated statement of profit or loss and other comprehensive income.

Sebagai cara praktis, PSAK 73 mengizinkan penyewa untuk memisahkan komponen nonsewa, dan mencatat masing-masing komponen sewa dan komponen nonsewa sebagai kesepakatan sewa tunggal. Grup tidak menggunakan cara praktis ini. Untuk kontrak yang memiliki komponen sewa dan satu atau lebih sewa tambahan atau komponen non sewa, Grup mengalokasikan imbalan dalam kontrak ke setiap komponen sewa dengan dasar harga jual relatif berdiri sendiri dari komponen sewa dan jumlah agregat masing-masing dari komponen non sewa.

As a practical expedient, PSAK 73 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Group has not used this practical expedient. For contracts that contain a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

Grup sebagai pesewa

The Group as lessor

Grup melakukan perjanjian sewa sebagai pesewa sehubungan dengan tangki dan dermaga.

The Group enters into lease agreements as a lessor with respect to tank and jetty.

Sewa di mana Grup sebagai pesewa diklasifikasikan sebagai sewa pembiayaan atau sewa operasi. Ketika persyaratan sewa secara substansial mengalihkan seluruh risiko dan manfaat yang terkait dengan kepemilikan ke penyewa, kontrak tersebut diklasifikasikan sebagai sewa pembiayaan. Seluruh sewa lainnya diklasifikasikan sebagai sewa operasi.

Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Penghasilan sewa dari sewa operasi diakui secara garis lurus selama masa sewa yang relevan. Biaya langsung awal yang terjadi dalam menegosiasikan dan mengatur sewa operasi ditambahkan ke jumlah tercatat aset sewa dan diakui secara garis lurus selama masa sewa.

Rental income from operating leases is recognized on a straight-line basis over the terms of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased assets and recognized on a straight-line basis over the lease term.

o. Penurunan Nilai Aset Non-Kuangan

Pada akhir setiap tahun pelaporan, Grup menelaah nilai tercatat aset non-keuangan untuk menentukan apakah terdapat indikasi bahwa aset tersebut telah mengalami penurunan nilai. Jika terdapat indikasi tersebut, jumlah terpulihkan dari aset diestimasi untuk menentukan tingkat kerugian penurunan nilai (jika ada). Bila tidak memungkinkan untuk mengestimasi jumlah terpulihkan atas suatu aset individual, Grup mengestimasi jumlah terpulihkan dari unit penghasil kas atas aset. Ketika dasar alokasi yang wajar dan konsisten dapat diidentifikasi, aset perusahaan juga dialokasikan ke masing-masing kelompok unit penghasil kas, atau sebaliknya mereka dialokasikan ke kelompok terkecil dari kelompok unit penghasil kas di mana dasar alokasi yang wajar dan konsisten dapat diidentifikasi.

Jumlah terpulihkan adalah nilai tertinggi antara nilai wajar dikurangi biaya pelepasan dan nilai pakai. Dalam menilai nilai pakainya, estimasi arus kas masa depan didiskontokan ke nilai kini menggunakan tingkat diskonto sebelum pajak yang menggambarkan penilaian pasar kini dari nilai waktu uang dan risiko spesifik atas aset dengan estimasi arus kas masa depan belum disesuaikan.

Jika jumlah terpulihkan dari aset non-keuangan (unit penghasil kas) lebih kecil dari nilai tercatatnya, nilai tercatat aset (unit penghasil kas) diturunkan menjadi sebesar jumlah terpulihkan dan rugi penurunan nilai segera diakui dalam laba rugi.

Ketika penurunan nilai selanjutnya dibalik, jumlah tercatat aset (atau unit penghasil kas) ditingkatkan ke estimasi yang direvisi dari jumlah terpulihkannya, namun kenaikan jumlah tercatat tidak boleh melebihi jumlah tercatat ketika kerugian penurunan nilai tidak diakui untuk aset (atau unit penghasil kas) pada tahun-tahun sebelumnya. Pembalikan rugi penurunan nilai diakui segera dalam laba rugi.

Kebijakan akuntansi untuk penurunan nilai aset keuangan dijelaskan dalam Catatan 3g.

p. Provisi

Provisi diakui ketika Grup memiliki kewajiban kini (baik bersifat hukum maupun bersifat konstruktif) sebagai akibat peristiwa masa lalu, kemungkinan besar Grup diharuskan menyelesaikan kewajiban dan estimasi yang andal mengenai jumlah kewajiban tersebut dapat dibuat.

o. Impairment of Non-Financial Assets

At the end of each reporting period, the Group reviews the carrying amount of non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less cost to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of the non-financial asset (cash generating unit) is less than its carrying amount, the carrying amount of the asset (cash generating unit) is reduced to its recoverable amount and an impairment loss is recognized immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

Accounting policy for impairment of financial assets is discussed in Note 3g.

p. Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

Jumlah yang diakui sebagai provisi adalah hasil estimasi terbaik pengeluaran yang diperlukan untuk menyelesaikan kewajiban ini pada akhir tahun pelaporan, dengan mempertimbangkan risiko dan ketidakpastian yang meliputi kewajibannya. Apabila suatu provisi diukur menggunakan arus kas yang diperkirakan untuk menyelesaikan kewajiban ini, maka nilai tercatatnya adalah nilai kini dari arus kas (ketika pengaruh nilai waktu uang bersifat material).

Ketika beberapa atau seluruh manfaat ekonomi untuk penyelesaian provisi yang diharapkan dapat dipulihkan dari pihak ketiga, piutang diakui sebagai aset apabila terdapat kepastian bahwa penggantian akan diterima dan jumlah piutang dapat diukur secara andal.

Provisi biaya pembongkaran aset tetap

Provisi atas biaya untuk memulihkan aset pabrik yang disewa ke kondisi semula, sebagaimana disyaratkan oleh syarat dan ketentuan sewa, diakui ketika kewajiban terjadi, yaitu ketika tanggal permulaan atau sebagai akibat dari penggunaan aset sebagai pendasar pada periode sewa tertentu, dengan estimasi terbaik Direksi atas pengeluaran yang disyaratkan untuk memulihkan aset tersebut. Estimasi direvisi secara teratur dan disesuaikan berdasarkan kondisi-kondisi baru yang sesuai.

q. Biaya pinjaman

Biaya pinjaman yang dapat diatribusikan secara langsung dengan perolehan, konstruksi atau pembuatan aset kualifikasian, yaitu aset yang membutuhkan waktu yang cukup lama agar siap untuk digunakan atau dijual, ditambahkan pada biaya perolehan aset tersebut, sampai dengan saat aset secara substansial siap untuk digunakan atau dijual.

Ketika pinjaman dengan suku bunga variabel digunakan untuk membiayai aset kualifikasian dan dilindungi nilai dengan lindung nilai arus kas yang efektif dari risiko suku bunga, bagian efektif dari derivatif tersebut diakui dalam penghasilan komprehensif lain dan direklasifikasi ke laba rugi ketika aset kualifikasian berdampak pada laba rugi. Ketika suku bunga pinjaman tetap digunakan untuk membiayai aset kualifikasian dan nilai wajarnya dilindungi nilai secara efektif dari risiko suku bunga, biaya pinjaman yang dikapitalisasi mencerminkan tingkat bunga yang dilindungi nilai.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Decommissioning cost provisions

Provisions for the costs to restore leased plant assets to their original condition, as required by the terms and conditions of the lease, are recognised when the obligation is incurred, either at the commencement date or as a consequence of having used the underlying asset during a particular period of the lease, at the directors' best estimate of the expenditure that would be required to restore the assets. Estimates are regularly reviewed and adjusted as appropriate for new circumstances.

q. Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

To the extent that variable rate borrowings are used to finance a qualifying asset and are hedged in an effective cash flow hedge of interest rate risk, the effective portion of the derivative is recognized in other comprehensive income and reclassified to profit or loss when the qualifying asset impacts profit or loss. To the extent that fixed rate borrowings are used to finance a qualifying asset and are hedged in an effective fair value hedge of interest rate risk, the capitalized borrowing costs reflect the hedged interest rate.

Semua biaya pinjaman lainnya diakui dalam laba rugi pada tahun terjadinya.

All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

r. Pengakuan Pendapatan

Penjualan barang

Pendapatan Grup terutama dihasilkan dari penjualan barang jadi kepada pelanggan. Penjualan tersebut sebagian besar terdiri dari satu elemen pengiriman dan pendapatan diakui pada satu titik waktu tertentu pada saat pengendalian barang telah dialihkan kepada pelanggan. Pendapatan dari penjualan barang diukur berdasarkan imbalan yang menjadi haknya dalam kontrak dengan pelanggan dan tidak termasuk jumlah yang ditagih atas nama pihak ketiga. Grup mengakui pendapatan ketika mengalihkan pengendalian barang atau jasa kepada pelanggan, yaitu pada saat pengiriman barang.

Pendapatan sewa tangki dan dermaga

Kebijakan akuntansi untuk pendapatan sewa tangki dan dermaga diungkapkan dalam Catatan 3n.

Penghasilan dividen

Penghasilan dividen dari investasi diakui ketika hak pemegang saham untuk menerima pembayaran ditetapkan.

s. Imbalan Kerja

Imbalan kerja jangka pendek

Liabilitas diakui atas manfaat yang menjadi hak karyawan sehubungan dengan upah dan gaji, cuti tahunan dan cuti sakit dalam periode di mana jasa terkait diserahkan, sebesar jumlah yang tidak didiskontokan dari pembayaran manfaat ekspektasian sebagai imbalan atas jasa tersebut.

Hak karyawan atas cuti tahunan diakui ketika karyawan mendapat hak. Provisi dibuat untuk liabilitas cuti tahunan akibat jasa yang diserahkan oleh karyawan sampai tanggal periode pelaporan.

Imbalan pascakerja program pensiun iuran pasti

Pembayaran kepada program manfaat pensiun iuran pasti dibebankan ketika karyawan telah menyerahkan jasa yang memberikan hak kepada karyawan atas iuran.

r. Revenue Recognition

Sale of goods

The Group's revenue is primarily generated from the sale of finished products to customers. Those sales predominantly contain a single delivery element and revenue is recognized at a single point in time when control has been transferred to the customer. Revenue from sale of goods is measured based on the consideration to which the Group expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Group recognizes revenue when it transfers control of a product or service to a customer, upon delivery of goods.

Tank and jetty lease revenue

Accounting policies for tank and jetty lease revenue are disclosed in Note 3n.

Dividend income

Dividend income from investments is recognized when the shareholders' rights to receive payment has been established.

s. Employee Benefits

Short-term employee benefits

A liability is recognized for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefit expected to be paid in exchange for that service.

Employee entitlements to annual leave are recognized when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the end of the reporting period.

Defined contribution pension plan

Payments to defined contribution retirement benefit plans are charged as an expense when employees have rendered the services entitling them to the contributions.

Imbalan pascakerja program imbalan pasti

Grup membukukan imbalan pasca kerja imbalan pasti untuk karyawan sesuai dengan Undang-Undang Ketenagakerjaan No. 13/2003. Grup menghitung selisih antara imbalan yang diterima karyawan berdasarkan undang-undang yang berlaku dengan manfaat yang diterima dari program asuransi untuk pensiun normal.

Perusahaan melakukan pendanaan untuk imbalan ini yang dikelola oleh sebuah perusahaan asuransi. Pendanaan tersebut tidak memenuhi syarat sebagai aset program.

Biaya penyediaan imbalan ditentukan dengan menggunakan metode *projected unit credit* dengan penilaian aktuarial yang dilakukan pada setiap akhir periode pelaporan tahunan. Pengukuran kembali, terdiri dari keuntungan dan kerugian aktuarial, tercermin langsung dalam laporan posisi keuangan konsolidasian yang dibebankan atau dikreditkan ke penghasilan komprehensif lain periode terjadinya. Pengukuran kembali diakui dalam penghasilan komprehensif lain tercermin sebagai pos terpisah pada penghasilan komprehensif lain di ekuitas dan tidak direklasifikasi ke laba rugi.

Biaya jasa lalu diakui dalam laba rugi ketika terjadi amandemen program atau kurtailmen, atau ketika Grup mengakui biaya restrukturisasi terkait atau pesangon, jika lebih dahulu. Bunga neto dihitung dengan mengalikan tingkat diskonto dengan liabilitas atau aset imbalan pasti neto. Biaya imbalan pasti dibagi menjadi tiga kategori:

- Biaya jasa (termasuk biaya jasa kini, biaya jasa lalu serta keuntungan dan kerugian kurtailmen dan penyelesaian).
- Beban atau pendapatan bunga neto.
- Pengukuran kembali.

Grup menyajikan dua komponen pertama dari biaya imbalan pasti di laba rugi, Keuntungan dan kerugian kurtailmen dicatat sebagai biaya jasa lalu.

Kewajiban imbalan pensiun yang diakui pada laporan posisi keuangan konsolidasian merupakan defisit atau surplus aktual dalam program imbalan pasti Grup. Surplus yang dihasilkan dari perhitungan ini terbatas pada nilai kini manfaat ekonomik yang tersedia dalam bentuk pengembalian dana program dan pengurangan iuran masa depan ke program.

Defined benefit plan

The Group provides post-employment benefits as required under Labor Law No. 13/2003 (the "Labor Law"). For normal pension scheme, the Group calculates and recognizes the higher of the benefits under the Labor Law and those under such pension plan.

The Company made funding of this benefit through an investment fund being managed by an insurance company. Such funding does not qualify as a plan asset.

The cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, is reflected immediately in the consolidated statements of financial position with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected as a separate item under other comprehensive income in equity and will not be reclassified to profit or loss.

Past service cost is recognized in profit or loss when the plan amendment or curtailment occurs, or when the Group recognizes related restructuring costs or termination benefits, if earlier. Net interest is calculated by applying a discount rate to the net defined benefit liability or asset. Defined benefit costs are in to three categories:

- Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements).
- Net interest expense or income.
- Remeasurement.

The Group presents the first two components of defined benefit costs in profit or loss. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognized in the consolidated statement of financial position represents the actual deficit or surplus in the Group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

Grup mengakui haknya dalam penggantian berdasarkan polis asuransi sebagai aset terpisah, yang diukur sebesar nilai wajarnya. Dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian, beban terkait dengan program imbalan pasti dapat disajikan secara neto setelah dikurangkan dengan jumlah yang diakui dalam penggantian.

Imbalan kerja jangka panjang lain

Liabilitas yang diakui sehubungan dengan imbalan kerja jangka panjang lain diukur pada nilai kini estimasi arus kas keluar masa depan yang diharapkan akan dilakukan oleh Grup sehubungan dengan jasa yang diberikan oleh karyawan hingga tanggal pelaporan.

Pesangon

Liabilitas untuk pesangon diakui mana yang terjadi lebih dulu ketika entitas tidak dapat lagi menarik penawaran imbalan tersebut dan ketika entitas mengakui biaya restrukturisasi terkait.

t. Pajak Penghasilan

Beban pajak penghasilan merupakan jumlah pajak kini terutang dan pajak tangguhan.

Pajak kini

Pajak kini terutang berdasarkan laba kena pajak untuk suatu tahun. Laba kena pajak berbeda dari laba sebelum pajak seperti yang dilaporkan di laba rugi karena tidak memperhitungkan penghasilan atau beban yang dikenakan pajak atau dikurangkan pada tahun berbeda dan tidak memperhitungkan pos-pos yang tidak pernah dikenakan pajak atau tidak dapat dikurangkan. Liabilitas Grup untuk pajak kini dihitung berdasarkan tarif pajak yang telah berlaku pada akhir tahun pelaporan.

Provisi diakui untuk penentuan pajak yang tidak pasti, tetapi kemungkinan besar akan mengakibatkan arus keluar dana kepada otoritas pajak. Provisi diukur sebesar estimasi terbaik atas jumlah ekspektasian yang terhutang. Penilaian berdasarkan pada pertimbangan professional pajak dalam Grup yang didukung dengan pengalaman lalu atas aktivitas tersebut.

The Group recognizes its right to reimbursement under the insurance policy as a separate assets, which is measured at fair value. In the consolidated statement of profit or loss and other comprehensive income, the expense relating to a defined benefit plan is presented net of the amount recognized for a reimbursement.

Other long-term employee benefits

Liabilities recognized in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Group in respect of services provided by employees up to the reporting date.

Termination

A liability for a termination benefit is recognized at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognizes any related restructuring costs.

t. Income Tax

Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

A provision is recognized for those matters for which the tax determination is uncertain but it is considered probable that there will be a future outflow of funds to a tax authority. The provisions are measured at the best estimate of the amount expected to become payable. The assessment is based on the judgement of tax professionals within the Group supported by previous experience in respect of such activities.

Pajak tangguhan

Pajak tangguhan diakui atas perbedaan temporer antara jumlah tercatat aset dan liabilitas dalam laporan keuangan konsolidasian dengan dasar pengenaan pajak yang digunakan dalam perhitungan laba kena pajak. Liabilitas pajak tangguhan umumnya diakui untuk seluruh perbedaan temporer kena pajak. Aset pajak tangguhan umumnya diakui untuk seluruh perbedaan temporer yang dapat dikurangkan sepanjang kemungkinan besar bahwa laba kena pajak akan tersedia sehingga perbedaan temporer dapat dimanfaatkan. Aset dan liabilitas pajak tangguhan tidak diakui jika perbedaan temporer timbul dari pengakuan awal (selain dari kombinasi bisnis) dari aset dan liabilitas suatu transaksi yang tidak mempengaruhi laba kena pajak atau laba akuntansi. Selain itu, liabilitas pajak tangguhan tidak diakui jika perbedaan temporer timbul dari pengakuan awal *goodwill*.

Aset dan liabilitas pajak tangguhan diukur dengan menggunakan tarif pajak yang diharapkan berlaku dalam periode ketika liabilitas diselesaikan atau aset dipulihkan berdasarkan tarif pajak (dan peraturan pajak) yang telah berlaku atau secara substantif telah berlaku pada akhir periode pelaporan.

Pengukuran aset dan liabilitas pajak tangguhan mencerminkan konsekuensi pajak yang sesuai dengan cara Grup memperkirakan, pada akhir tahun pelaporan, untuk memulihkan atau menyelesaikan jumlah tercatat aset dan liabilitasnya.

Jumlah tercatat aset pajak tangguhan ditelaah ulang pada akhir tahun pelaporan dan dikurangi jumlah tercatatnya jika kemungkinan besar laba kena pajak tidak lagi tersedia dalam jumlah yang memadai untuk mengkompensasikan sebagian atau seluruh aset pajak tangguhan tersebut.

Pajak kini dan pajak tangguhan diakui sebagai beban atau penghasilan dalam laba rugi tahun berjalan, kecuali untuk pajak penghasilan yang timbul dari transaksi atau peristiwa yang diakui di luar laba rugi (baik dalam penghasilan komprehensif lain maupun secara langsung di ekuitas), dalam hal tersebut pajak juga diakui di luar laba rugi, atau yang timbul dari akuntansi awal kombinasi bisnis. Dalam hal kombinasi bisnis, pengaruh pajak termasuk dalam akuntansi kombinasi bisnis.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary differences arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary differences arises from the initial recognition of goodwill.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on the tax rates (and tax laws) that have been enacted, or substantively enacted, by the end of the reporting period.

The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of their assets and liabilities.

The carrying amount of deferred tax asset is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Current and deferred tax are recognized as an expense or income in profit or loss, except when they relate to items that are recognized outside of profit or loss (whether in other comprehensive income or directly in equity), in which case the tax is also recognized outside of profit or loss, or where they arise from the initial accounting for a business combination. In the case of a business combination, the tax effect is included in the accounting for the business combination.

Aset dan liabilitas pajak tangguhan saling hapus ketika entitas memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus aset pajak kini terhadap liabilitas pajak kini dan ketika aset pajak tangguhan dan liabilitas pajak tangguhan terkait dengan pajak penghasilan yang dikenakan oleh otoritas perpajakan yang sama atas entitas kena pajak yang sama atau entitas kena pajak yang berbeda yang memiliki intensi untuk memulihkan aset dan liabilitas pajak kini dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan, pada setiap periode masa depan dimana jumlah signifikan atas aset atau liabilitas pajak tangguhan diharapkan untuk diselesaikan atau dipulihkan.

u. (Rugi) Laba per Saham Dasar

(Rugi) laba per saham dasar dihitung dengan membagi laba bersih yang diatribusikan kepada pemilik entitas induk dengan jumlah rata-rata tertimbang saham yang beredar pada tahun yang bersangkutan.

v. Instrumen Derivatif

Grup menggunakan berbagai variasi instrumen keuangan derivatif untuk mengelola eksposur atas risiko suku bunga dan risiko perubahan nilai tukar mata uang asing termasuk kontrak valuta berjangka, *interest rate swap and cross currency swap*.

Derivatif awalnya diakui pada nilai wajar pada tanggal kontrak dilakukan dan selanjutnya diukur kembali pada nilai wajarnya pada setiap akhir tahun pelaporan. Dampak keuntungan atau kerugian diakui segera di laba rugi kecuali jika derivatif ditetapkan dan efektif sebagai instrumen lindung nilai di mana saat pengakuan di laba rugi bergantung pada sifat dari hubungan lindung nilai.

Derivatif dengan nilai wajar positif diakui sebagai aset keuangan sedangkan derivatif dengan nilai wajar negatif diakui sebagai liabilitas keuangan. Derivatif tidak saling hapus dalam laporan keuangan kecuali Grup memiliki hak yang memiliki kekuatan hukum dan intensi untuk saling hapus.

Suatu derivatif disajikan sebagai aset tidak lancar atau liabilitas jangka panjang jika sisa jatuh tempo dari instrumen lebih dari 12 bulan dan tidak diharapkan akan direalisasi atau diselesaikan dalam jangka waktu 12 bulan. Derivatif lainnya disajikan sebagai aset lancar atau liabilitas jangka pendek.

w. Akuntansi Lindung Nilai

Grup menggunakan instrumen keuangan derivatif – *cross currency swap* dan *interest rate swap* untuk mengelola eksposur atas risiko suku bunga dan fluktuasi nilai tukar.

Deferred tax assets and liabilities are offset when there is legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities when there is an intention to settle its current tax assets and current tax liabilities on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

u. Basic (Loss) Earnings per Share

Basic (loss) earnings per share is computed by dividing net income attributable to the owners of the Company by the weighted average number of shares outstanding during the year.

v. Derivative Financial Instruments

The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risk including foreign exchange forward contracts, interest rate swap and cross currency swap.

Derivatives are initially recognized at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair values at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as hedging instrument in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

A derivative with a positive fair value is recognized as a financial asset whereas a derivative with a negative fair value is recognized as a financial liability. Derivatives are not offset in the financial statements unless the Group has both a legally enforceable right and intention to offset.

A derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the instrument is more than 12 months and is not expected to be realized or settled within 12 months. Other derivatives are presented as current assets or current liabilities.

w. Hedge Accounting

The Group enters into derivative financial instruments – *cross currency swap* and *interest rate swap* to manage its exposure to interest rate and foreign exchange fluctuations.

Pada insepse hubungan lindung nilai, Grup mendokumentasi hubungan antara instrumen lindung nilai dan *item* yang dilindung nilai, bersama dengan tujuan manajemen risiko dan strategi pelaksanaan lindung nilai. Selanjutnya, pada saat dimulainya lindung nilai dan secara berkelanjutan, Grup mendokumentasikan apakah instrumen lindung nilai sangat efektif dalam rangka saling hapus perubahan dalam nilai wajar atau perubahan arus kas dari *item* yang dilindung nilai yang dapat diatribusikan pada risiko lindung nilai.

Lindung Nilai atas Arus Kas

Bagian efektif dari perubahan nilai wajar derivatif yang ditujukan dan memenuhi kualifikasi sebagai lindung nilai arus kas diakui sebagai penghasilan komprehensif lain dan terakumulasi pada cadangan lindung nilai arus kas. Keuntungan atau kerugian yang terkait dengan bagian yang tidak efektif langsung diakui dalam laba rugi, dan termasuk dalam "keuntungan lain-lain - bersih".

Jumlah yang sebelumnya diakui sebagai penghasilan komprehensif lain dan terakumulasi dalam ekuitas direklasifikasi ke laba rugi pada periode ketika *item* yang dilindung nilai diakui dalam laba rugi, di pos yang sama dari laporan laba rugi dan penghasilan komprehensif lain konsolidasian dengan *item* yang dilindung nilai. Namun, ketika suatu lindung nilai atas prakiraan transaksi yang kemudian menimbulkan pengakuan aset non-keuangan atau liabilitas non-keuangan, keuntungan dan kerugian yang sebelumnya diakui sebagai penghasilan komprehensif lain dan terakumulasi di ekuitas dipindahkan dari ekuitas dan termasuk dalam pengukuran awal biaya dari aset non-keuangan atau liabilitas non-keuangan.

Akuntansi lindung nilai dihentikan pada saat Grup membatalkan hubungan lindung nilai, ketika instrumen lindung nilai kadaluarsa atau dijual, dihentikan atau digunakan, atau ketika tidak lagi memenuhi persyaratan akuntansi lindung nilai. Keuntungan dan kerugian diakui dalam penghasilan komprehensif lain dan terakumulasi di ekuitas saat itu tetap berada di bagian ekuitas dan akan diakui pada saat prakiraan transaksi yang pada akhirnya diakui dalam laba rugi. Ketika prakiraan transaksi tidak lagi diharapkan akan terjadi, akumulasi keuntungan atau kerugian dalam ekuitas langsung diakui dalam laba rugi.

x. Informasi Segmen

Segmen operasi diidentifikasi berdasarkan laporan internal mengenai komponen dari Grup yang secara regular direviu oleh pengambil keputusan operasional dalam rangka mengalokasikan sumber daya dan menilai kinerja segmen operasi.

At the inception of the hedge relationship, the Group documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk.

Cash Flow Hedges

The effective portion of changes in the fair value of derivatives that were designated and qualified as cash flow hedges was recognized in other comprehensive income and accumulated under the heading of cash flow hedging reserve. The gain or loss relating to the ineffective portion was recognized immediately in profit or loss, and is included in the "other gains - net" line item.

Amounts previously recognized in other comprehensive income and accumulated in equity were reclassified to profit or loss in the periods when the hedged item was recognized in profit or loss, in the same line of the consolidated statement of profit or loss and other comprehensive income as the recognized hedged item. However, when the hedged forecast transaction resulted in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously recognized in other comprehensive income and accumulated in equity were transferred from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

Hedge accounting was discontinued when the Group revoked the hedging relationship, when the hedging instrument expired or was sold, terminated, or exercised, or it no longer qualified for hedge accounting. Any gain or loss recognized in other comprehensive income and accumulated in equity at that time remained in equity and was recognized when the forecast transaction was ultimately recognized in profit or loss. When a forecast transaction was no longer expected to occur, the gain or loss accumulated in equity was recognized immediately in profit or loss.

x. Segment Information

Operating segments are identified on the basis of internal reports about components of the Group that are regularly reviewed by the chief operating decision maker in order to allocate resources to the segments and to assess their performances.

Segmen operasi adalah suatu komponen dari entitas:

- a. yang terlibat dalam aktivitas bisnis yang mana memperoleh pendapatan dan menimbulkan beban (termasuk pendapatan dan beban terkait dengan transaksi dengan komponen lain dari entitas yang sama);
- b. yang hasil operasinya dikaji ulang secara regular oleh pengambil keputusan operasional untuk membuat keputusan tentang sumber daya yang dialokasikan pada segmen tersebut dan menilai kinerjanya; dan
- c. dimana tersedia informasi keuangan yang dapat dipisahkan.

Informasi yang digunakan oleh pengambil keputusan operasional dalam rangka alokasi sumber daya dan penilaian kinerja mereka terfokus pada kategori dari setiap produk.

An operating segment is a component of an entity:

- a. that engages in business activities from which it may earn revenues and incurred expenses (including revenues and expenses relating to the transactions with other components of the same entity);
- b. whose operating results are reviewed regularly by the entity's chief operating decision maker to make decision about resources to be allocated to the segments and assess its performance; and
- c. for which discrete financial information is available.

Information reported to the chief operating decision maker for the purpose of resource allocation and assessment of performance is more specifically focused on the category of each product.

4. PERTIMBANGAN KRITIS AKUNTANSI DAN SUMBER UTAMA KETIDAKPASTIAN ESTIMASI

Dalam penerapan kebijakan akuntansi Grup, yang dijelaskan dalam Catatan 3, direksi diwajibkan untuk membuat pertimbangan, estimasi dan asumsi tentang jumlah tercatat aset dan liabilitas yang tidak tersedia dari sumber lain. Estimasi dan asumsi terkait didasarkan pada pengalaman historis dan faktor-faktor lain yang dianggap relevan. Hasil aktualnya mungkin berbeda dari estimasi tersebut.

Estimasi dan asumsi yang mendasari ditelaah secara berkelanjutan. Revisi estimasi akuntansi diakui dalam periode dimana estimasi tersebut direvisi jika revisi hanya mempengaruhi periode tersebut, atau pada periode revisi dan periode masa depan jika revisi mempengaruhi periode saat ini dan masa depan.

Pertimbangan Kritis dalam Penerapan Kebijakan Akuntansi

Dalam proses penerapan kebijakan akuntansi yang dijelaskan dalam Catatan 3, tidak terdapat pertimbangan kritis yang memiliki dampak signifikan pada jumlah yang diakui dalam laporan keuangan konsolidasian, selain dari penyajian estimasi yang diatur di bawah ini.

Sumber Utama Ketidakpastian Estimasi

Asumsi utama mengenai masa depan dan sumber utama ketidakpastian estimasi lainnya pada akhir tahun pelaporan, yang memiliki risiko signifikan yang mengakibatkan penyesuaian material terhadap jumlah tercatat aset dan liabilitas dalam tahun pelaporan berikutnya dijelaskan di bawah ini:

4. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in Note 3, the directors are required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical Judgments in Applying Accounting Policies

In the process of applying the accounting policies described in Note 3, management has not made any critical judgement that has significant impact on the amounts recognized in the consolidated financial statements, apart from those involving estimates, which are dealt with below.

Key Sources of Estimation Uncertainty

The key assumptions concerning future and other key sources of estimation uncertainty at the end of the reporting period, that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period are discussed below:

Penyisihan penurunan nilai persediaan

Seiring dengan kondisi pasar yang tidak stabil dan penuh tantangan, meskipun persediaan memiliki perputaran yang cepat, terdapat resiko bahwa nilai realisasi bersih atas persediaan Grup kemungkinan dicatat dibawah nilai tercatat. Dalam menentukan nilai realisasi bersih barang jadi, manajemen membuat estimasi harga jual berdasarkan harga jual masa lalu dan harga bahan baku terkini, dan mempertimbangkan fluktuasi harga atau biaya setelah akhir tahun. Walaupun diyakini bahwa estimasi harga jual yang digunakan dalam mengestimasi penyisihan penurunan nilai persediaan telah sesuai dan wajar, namun perubahan signifikan atas asumsi ini dapat berdampak material terhadap penyisihan penurunan nilai persediaan, yang akan mempengaruhi operasi Grup.

Nilai tercatat persediaan diungkapkan dalam Catatan 8.

Taksiran Masa Manfaat Ekonomis Aset Tetap

Masa manfaat setiap aset tetap Grup ditentukan berdasarkan periode kegunaan yang diharapkan dari aset tersebut. Estimasi ini ditentukan berdasarkan pengalaman atas aset sejenis. Masa manfaat setiap aset direviu secara periodik dan disesuaikan apabila prakiraan berbeda dengan estimasi sebelumnya karena keausan, keusangan teknis dan komersial, hukum atau keterbatasan lainnya atas pemakaian aset. Namun terdapat kemungkinan bahwa hasil operasi di masa mendatang dapat dipengaruhi secara signifikan oleh perubahan atas jumlah serta periode pencatatan biaya yang diakibatkan karena perubahan faktor yang disebutkan di atas.

Perubahan masa manfaat aset tetap dapat mempengaruhi jumlah beban penyusutan yang diakui dan nilai tercatat aset tersebut.

Nilai tercatat aset tetap diungkapkan dalam Catatan 14.

Liabilitas Imbalan Kerja

Penentuan liabilitas imbalan kerja tergantung pada pemilihan asumsi tertentu yang digunakan oleh aktuaris dalam menghitung jumlah liabilitas tersebut. Asumsi tersebut termasuk antara lain tingkat diskonto dan tingkat kenaikan gaji. Realisasi yang berbeda dari asumsi Grup akan diakui sebagai penghasilan komprehensif lain dan akan berpengaruh terhadap jumlah liabilitas. Walaupun asumsi Grup dianggap tepat dan wajar, perubahan signifikan dalam hasil aktual atau perubahan signifikan asumsi yang digunakan dapat berpengaruh secara signifikan terhadap liabilitas imbalan kerja Grup.

Nilai tercatat dari liabilitas imbalan kerja dan asumsi aktuarial diungkapkan dalam Catatan 22.

Allowance for decline in value of inventories

As the market conditions continue to be volatile and challenging, although the inventories are considered to have high turnover, there is a risk that the net realizable value of the Group's inventories may be below cost. In determining the net realizable value of the finished goods, management makes estimates of the selling prices based on the historical selling prices and current raw material prices, and taking into account the fluctuations of price or cost after the end of the period. While it is believed that the estimated selling prices of the inventories used in the estimation of the allowance for decline in value of inventories are appropriate and reasonable, significant changes in these assumptions may materially affect the assessment of the allowance for decline in value of inventories, which will impact the result of the Group's operations.

The carrying amount of inventories is disclosed in Note 8.

Estimated Useful Lives of Property, Plant and Equipment

The useful life of each item of the Group's property, plant and equipment are estimated based on the period over which the asset is expected to be available for use. Such estimation is based on experience with similar assets. The estimated useful life of each asset is reviewed periodically and updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the asset. It is possible, however, that future results of operations could be materially affected by changes in the amounts and timing of recorded expenses brought about by changes in the factors mentioned above.

A change in the estimated useful life of any item of property, plant and equipment would affect the recorded depreciation expense and decrease in the carrying amounts of these assets.

The carrying amounts of property, plant and equipment is disclosed in Note 14.

Employment Benefits Obligation

The determination of provision for employment benefits obligation is dependent on selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions include among others, discount rate and rate of salary increase. Actual results that differ from the Group's assumptions recognized as other comprehensive income and affect the recorded provision. While it is believed that the Group's assumptions are reasonable and appropriate, significant differences in actual results or significant changes in assumptions may materially affect the Group's provision for employment benefits obligation.

The carrying amount of employment benefits obligation and the actuarial assumptions are disclosed in Note 22.

Jangka waktu rata-rata kredit penjualan barang berkisar antara 7 hingga 30 hari. Penjualan ekspor biasanya dilakukan dengan menggunakan fasilitas *Letter of Credit*. Tidak ada bunga yang dibebankan untuk piutang yang belum jatuh tempo.

Sebelum menerima pelanggan baru, Grup akan menelaah apakah calon pelanggan memenuhi persyaratan yang ditetapkan.

Sebelum menyetujui penjualan kredit, Grup memeriksa sisa batas kredit yang dapat diberikan kepada pelanggan tersebut. Pelanggan diharuskan untuk melunasi piutang sebelumnya, sebelum penjualan kredit yang baru disetujui. Otorisasi manajemen tingkat atas diperlukan untuk menyetujui penjualan kredit yang telah melewati batas kredit.

Cadangan kerugian kredit untuk piutang usaha telah diukur sejumlah ECL sepanjang umur. ECL pada piutang usaha diestimasi berdasarkan matriks provisi dengan mengacu pada pengalaman gagal bayar debitur masa lalu dan analisis posisi keuangan debitur saat ini, disesuaikan dengan faktor-faktor yang spesifik dari debitur dan kondisi ekonomi umum industri di mana debitur beroperasi.

Trade Accounts Receivable - Net	

As at January 1, 2021, trade receivables from contracts with customers amounted to US\$ 127,180 thousand (net of loss allowance for credit losses of US\$ 118 thousand).

The average credit period on sale of goods is between 7 to 30 days. Export sales are usually supported by Letter of Credit. No interest is charged for receivables not yet due.

Before accepting a new customer, the Group will assess whether the potential customer meets the required conditions.

Before approving any credit sales, the Group checks the remaining credit limit for the respective customer. Customers are required to settle their outstanding receivables before the new credit sales are approved. Approval by top level management is required for credit sales above the credit limit.

Allowance for credit losses for trade accounts receivable has been measured at an amount equal to lifetime ECL. The ECL on trade accounts receivable are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate.

Tidak ada perubahan dalam teknik estimasi atau asumsi signifikan yang dibuat selama tahun pelaporan berjalan.

There has been no change in the estimation techniques or significant assumptions made during the current reporting period.

Tabel berikut merinci profil risiko piutang usaha dari kontrak dengan pelanggan berdasarkan matriks provisi Grup. Karena pengalaman historis kerugian kredit Grup tidak menunjukkan pola kerugian yang berbeda signifikan untuk segmen pelanggan yang berbeda, ketentuan untuk cadangan kerugian berdasarkan status masa lalu tidak lagi dipisahkan antara basis pelanggan Grup yang berbeda.

The following table details the risk profile of trade accounts receivable from contracts with customers based on the Group's provision matrix. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished between the Group's different customer base.

Piutang lain-lain sebagian besar merupakan piutang atas bunga, biaya pelabuhan dan *water treatment*.

Tidak ada bunga yang dibebankan atas piutang lain-lain.

Sebelum menerima pelanggan baru, Grup akan menelaah apakah calon pelanggan memenuhi persyaratan yang ditetapkan.

Untuk tujuan penilaian penurunan nilai, piutang lain-lain dianggap memiliki risiko kredit yang rendah dan tidak terdapat peningkatan risiko gagal bayar yang signifikan sejak pengakuan awal. Oleh karena itu, untuk tujuan penilaian penurunan nilai piutang ini, cadangan kerugian diukur sebesar sejumlah ECL 12 bulan.

Dalam menentukan ECL, manajemen telah memperhitungkan posisi keuangan pihak terkait, disesuaikan dengan faktor-faktor spesifik dari pihak terkait dan kondisi ekonomi umum industri dimana pihak terkait beroperasi, dalam memperkirakan kemungkinan terjadinya gagal bayar pinjaman serta kerugian saat terjadinya gagal bayar. Manajemen berpendapat bahwa piutang lain-lain memiliki kerugian kredit yang tidak material.

Other accounts receivable mostly are interest receivable, port fee and water treatment.

There is no interest is charged for other accounts receivable.

Before accepting a new customer, the Group will assess whether the potential customer meets the required conditions.

For purpose of impairment assessment, the other receivable is considered to have low credit risk and there has been no significant increase in the risk of default since initial recognition. Accordingly, for the purpose of impairment assessment for this receivable, the loss allowance is measured at an amount equal to 12-month ECL.

In determining the ECL, management has taken into account the financial position of the relevant parties, adjusted the factors that are specific to the relevant parties and general economic conditions of the industry in which the relevant parties operate, in estimating the probability of default of the other accounts receivable as well as the loss upon default. Management believes that the other accounts receivables have immaterial credit loss.

Pada tahun berjalan, Grup telah menurunkan nilai persediaan ke nilai realisasi bersih sebesar US\$ 41.400 ribu (2021: US\$ 3.800 ribu) yang dicatat sebagai beban dan termasuk dalam "beban pokok pendapatan". Manajemen berpendapat bahwa penyisihan penurunan nilai persediaan tersebut cukup.

Karena peningkatan harga jual persediaan pada awal tahun 2022, Grup membalik US\$ 3.800 ribu, bagian dari penurunan persediaan yang dilakukan pada tahun 2021 pada laba rugi tahun berjalan. Pembalikan tersebut termasuk dalam "beban pokok pendapatan".

Pada tanggal 31 Desember 2022, seluruh persediaan diasuransikan kepada pihak ketiga terhadap risiko kerugian atas risiko kebakaran, bencana alam dan risiko lainnya dengan jumlah pertanggungan sebesar US\$ 366.000 ribu (31 Desember 2021: sebagian persediaan yang diasuransikan US\$ 288.000 ribu). Manajemen berpendapat bahwa nilai pertanggungan tersebut cukup untuk menutupi kemungkinan kerugian yang timbul pada Grup.

8. INVENTORIES

During the year, the Group has written down inventories to net realizable value by an amount of US\$ 41,400 thousand (2021: US\$ 3,800 thousand) that were recognised as an expense and included in "cost of revenues". Management believes that the allowance for decline in value in inventories is adequate.

Due to the increase in the selling prices of the inventories in early 2022, the Group reversed US\$ 3,800 thousand, being part of inventories write down made in 2021 to the current year profit or loss. The reversal is included in "cost of revenues".

As of December 31, 2022, all inventories were insured with third parties to cover possible risks against fire, disasters and other risks for US\$ 366,000 thousand (December 31, 2021: certain inventories were insured US\$ 288,000 thousand). Management believes that the insurance coverage is adequate to cover possible losses to the Group.

As of December 31, 2022 and 2021, the Company is in compliance with the terms and conditions of all the bonds payable.

22. LIABILITAS IMBALAN KERJA

a. Program Pensiun Iuran Pasti

Perusahaan dan CAP2 menyelenggarakan program pensiun iuran pasti untuk seluruh karyawan tetap yang dikelola oleh PT Asuransi Jiwa Manulife Indonesia, Dana Pensiun Lembaga Keuangan. Iuran ini berasal dari 4% gaji pokok yang dibayarkan karyawan, sedangkan sisanya sebesar 7,5% dibayarkan oleh Perusahaan untuk gaji pokok maksimum Rp 5.000 ribu per bulan.

Akumulasi iuran pensiun Grup yang timbul dari program pensiun iuran pasti adalah sebesar US\$ 3.566 ribu pada 31 Desember 2022 (31 Desember 2021: US\$ 3.800 ribu).

b. Program Pensiun Imbalan Pasti

Grup menghitung dan membukukan imbalan kerja imbalan pasti untuk karyawan yang berhak sesuai dengan Undang-Undang Ketenagakerjaan No. 13/2003 tanggal 25 Maret 2003. Jumlah karyawan yang berhak atas imbalan kerja tersebut sebanyak 1.898 pada tanggal 31 Desember 2022 (31 Desember 2021: 1.923).

Program pensiun imbalan pasti memberikan eksposur Grup terhadap risiko aktuarial seperti risiko tingkat bunga dan risiko gaji.

Risiko Tingkat Bunga

Penurunan suku bunga obligasi akan meningkatkan liabilitas program; namun, sebagian akan dioffset (saling hapus) oleh peningkatan imbal hasil atas investasi instrumen utang.

Risiko Gaji

Nilai kini kewajiban imbalan pasti dihitung dengan mengacu pada gaji masa depan peserta program. Dengan demikian, kenaikan gaji peserta program akan meningkatkan liabilitas program itu.

22. EMPLOYEE BENEFITS OBLIGATION

a. Contributory Pension Plan

The Company and CAP2 provide contributory pension plan for all of their permanent employees, which is managed by PT Asuransi Jiwa Manulife Indonesia, Trustee-Administered Fund. Contribution to the pension plan consists of a payment of 4% of basic salary paid by the employee, and 7.5% contributed by the Company for the maximum basic salary of Rp 5,000 thousand per month.

The Group's accumulated pension expense arising from the contributory pension plan amounted to US\$ 3,566 thousand as of December 31, 2022 (December 31, 2021: US\$ 3,800 thousand).

b. Defined Benefit Pension Plan

The Group calculates and records estimated defined employment benefits for its qualifying employees in accordance with Labor Law No. 13/2003 dated March 25, 2003. The number of employees entitled to the benefits is 1,898 as of December 31, 2022 (December 31, 2021: 1,923).

The defined benefit pension plan typically expose the Group to actuarial risks such as interest rate risk and salary risk.

Interest Risk

A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.

Salary Risk

The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Beban imbalan pasti yang diakui di penghasilan komprehensif adalah sebagai berikut:

Amounts recognized in comprehensive income in respect of the defined benefit plan are as follows:

	2022 US\$ '000	2021*) US\$ '000

Sejak tahun 2005, Perusahaan mengikuti Program Pesangon Plus, yang dikelola oleh PT Asuransi Jiwa Manulife Indonesia sebagai asuransi jiwa bagi karyawannya. Tidak terdapat kontribusi yang dibayarkan oleh Perusahaan kepada dana pensiun pada 31 Desember 2022 dan 2021.

Since 2005, the Company entered into Program Pesangon Plus, managed by PT Asuransi Jiwa Manulife Indonesia, as the life insurance for its employees. No contribution was paid by the Company to pension fund as of December 31, 2022 and 2021.

Hak penggantian terdiri atas investasi yang 40% ditempatkan pada pasar uang, 20% ditempatkan pada efek ekuitas dan 40% ditempatkan pada pendapatan tetap dengan nilai wajarnya sebesar US\$ 1.198 ribu pada tanggal 31 Desember 2022 (31 Desember 2021: US\$ 1.251 ribu) disajikan sebagai bagian dari aset tidak lancar lainnya.

The reimbursement right consists of investment which 40% are placed on money market, 20% on equity securities and 40% on fixed income with a fair value of US\$ 1,198 thousand as of December 31, 2022 (December 31, 2021: US\$ 1,251 thousand) presented as part of other non-current assets.

Perhitungan imbalan kerja dihitung oleh aktuaris independen, KKA Halim & Rekan pada 31 Desember 2022 dan 2021. Kewajiban imbalan kerja pada tanggal 31 Desember 2022 adalah berdasarkan laporan aktuarial independen KKA Halim & Rekan dengan nomor 0644/KKA-PA-REP/IK/III/2023 (2021: 0383/KKA-PA-REP/IK/II/2022) untuk Perusahaan dan 0646/KKA-PA-REP/IK/III/2023 (2021: 0385/KKA-PA-REP/IK/II/2022) untuk CAP2, seluruhnya diterbitkan pada tanggal 10 Maret 2023. Penilaian aktuarial dilakukan dengan menggunakan asumsi utama sebagai berikut:

	31 Desember/ December 31, 2022	31 Desember/ December 31, 2021	1 Januari/ January 1, 2021	
Tingkat diskonto per tahun	7,00%	6,75%	6,50%	Discount rate per annum

Tingkat pengunduran diri	5%	5%	10%	Resignation rate
Usia pensiun normal	57 tahun/years	57 tahun/years	57 tahun/years	Normal retirement age

Asumsi aktuarial yang signifikan untuk penentuan kewajiban imbalan pasti adalah tingkat diskonto dan kenaikan gaji yang diharapkan. Sensitivitas analisis di bawah ini ditentukan berdasarkan masing-masing perubahan asumsi yang mungkin terjadi pada akhir periode pelaporan, dengan semua asumsi lain konstan:

The employment benefits are calculated by an independent actuary, KKA Halim & Rekan on December 31, 2022 and 2021. Employee benefits obligation as of December 31, 2022 was based on KKA Halim & Rekan's independent actuarial reports number 0644/KKA-PA-REP/IK/III/2023 (2021: 0383/KKA-PA-REP/IK/II/2022) for the Company and 0646/KKA-PA-REP/IK/III/2023 (2021: 0385/KKA-PA-REP/IK/II/2022) for CAP2, all issued on March 10, 2023. The actuarial valuation was carried out using the following key assumptions:

Significant actuarial assumptions for the determination of the defined obligation are discount rate and expected salary increase. The sensitivity analyses below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant:

	31 Desember/ December 31, 2022 US\$ '000	31 Desember/ December 31, 2021*) US\$ '000	
Tingkat diskonto			Discount rate
Tingkat diskonto +1%	(2.314)	(2.988)	Discount rate +1%
Tingkat diskonto -1%	2.244	1.949	Discount rate -1%
Tingkat kenaikan gaji			Salary increase rate
Tingkat kenaikan gaji +1%	2.729	2.462	Salary increase rate +1%
Tingkat kenaikan gaji -1%	(2.783)	(3.484)	Salary increase rate -1%

*) Disajikan kembali (Catatan 2a)

*) As restated (Note 2a)

Analisis sensitivitas yang disajikan di atas mungkin tidak mewakili perubahan yang sebenarnya dalam kewajiban imbalan pasti mengingat bahwa perubahan asumsi terjadinya tidak terisolasi satu sama lain karena beberapa asumsi tersebut mungkin berkorelasi.

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Selanjutnya, dalam menyajikan analisis sensitivitas di atas, nilai kini kewajiban imbalan pasti dihitung dengan menggunakan metode *projected unit credit* pada akhir periode pelaporan, yang sama dengan yang diterapkan dalam menghitung liabilitas manfaat pasti yang diakui dalam laporan posisi keuangan konsolidasian.

Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation recognized in the consolidated statements of financial position.

Tidak ada perubahan dalam metode dan asumsi yang digunakan dalam penyusunan analisis sensitivitas dari periode sebelumnya.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior period.

Durasi rata-rata dari kewajiban imbalan pada tanggal 31 Desember 2022 adalah 8 tahun (31 Desember 2021: 9 tahun), yang sepenuhnya terdiri dari anggota aktif.

The average duration of the defined benefits obligation at December 31, 2022 is 8 years (December 31, 2021: 9 years), that consists of active members.

Peraturan Pemerintah Pengganti Undang-Undang Nomor 1 Tahun 2021 tentang Kebijakan Keuangan Negara dan Stabilitas Sistem Keuangan untuk Penanganan Pandemi Corona Virus Disease 2020 (COVID-19) dan/atau dalam Rangka Menghadapi Ancaman yang Membahayakan Perekonomian Nasional dan/atau Stabilitas Sistem Keuangan ("Perppu No. 1/2021") mulai berlaku pada 31 Maret 2021. Perppu 1/2021 menyesuaikan tarif pajak penghasilan badan dalam negeri dan bentuk usaha tetap menjadi 22% yang berlaku untuk Tahun Pajak 2020 dan 2021 dan 20% berlaku untuk Tahun Pajak 2022 dan selanjutnya.

Harmonisasi Peraturan Pajak ("HPP") mulai berlaku pada tanggal 7 Oktober 2021. HPP tersebut mempertahankan tarif pajak penghasilan untuk perusahaan domestik dan badan usaha tetap sebesar 22% untuk tahun fiskal 2022 dan selanjutnya, dan bukan 20%.

Government Regulation in Lieu of Law No. 1 Year 2021 on State Financial Policy and Stability of Financial Systems for the Management of Coronavirus Disease 2020 (COVID-19) and/or Counter the Threat to National Economy and/or Stability of Financial Systems ("Perppu No. 1/2021") took effect on March 31, 2021. Perppu 1/2021 reduced the income tax rates for domestic corporations and permanent establishments to 22% applicable for fiscal years 2020 and 2021 and further reduction to 20% applicable for fiscal year 2022 and thereafter.

The Harmonization of Tax Regulations Law ("HPP") took effect on October 7, 2021. The HPP retained the income tax rates for domestic corporations and permanent establishments at 22% for fiscal year 2022 and thereafter, instead of 20%.

Perusahaan telah mendapat persetujuan dari Direktorat Jenderal Pajak untuk melakukan pelaporan perpajakan dalam mata uang Dolar Amerika Serikat (mata uang fungsional), efektif 1 Januari 2011, dalam Keputusan Menteri Keuangan Republik Indonesia No. KEP-83/WPJ.19/2010 tanggal 21 Oktober 2010, sehubungan dengan perubahan status Perusahaan dari Penanaman Modal Dalam Negeri menjadi Penanaman Modal Asing berdasarkan Izin Prinsip Penanaman Modal dari Badan Koordinasi Penanaman Modal (BKPM) No. 197/1/IP/PMA/2010.

Pada tanggal 29 Nopember 2016, Perusahaan telah mendapat pemanfaatan fasilitas pajak penghasilan atas Proyek Ekspansi *Ethylene Cracker* dari Direktorat Jenderal Pajak, yang diperhitungkan sebagai pengurang penghasilan kena pajak bersih sebanyak 30% dari jumlah yang diinvestasikan dalam aset tetap dengan jumlah Rp 3.499.944 juta (ekuivalen dengan US\$ 260.490 ribu), yang diprorata 5% selama 6 tahun produksi komersial.

Pada tanggal 29 Desember 2020, Perusahaan telah mendapat pemanfaatan fasilitas pengurangan pajak penghasilan badan atas Proyek Ekspansi *New Polyethylene Cracker* dari Direktorat Jenderal Pajak, yang diperhitungkan sebagai pengurang pajak penghasilan badan sebesar 30% untuk jangka waktu 7 tahun pajak, 50% untuk 2 tahun setelahnya serta pembebasan dari pemotongan dan pemungutan pajak penghasilan oleh pihak ketiga selama masa tersebut.

Perhitungan pajak kini, pajak dibayar dimuka dan utang pajak adalah sebagai berikut:

The Company has obtained the approval from the Directorate General of Taxation to report its taxation reporting in US Dollar (functional currency), effective January 1, 2011, through Decision Letter No. KEP-83/WPJ.19/2010, of Ministry of Finance of the Republic of Indonesia dated October 21, 2010. This is related to the change of the Company's status from Domestic Capital Investment to Foreign Capital Investment based on Permit of Capital Investment Principle from Capital Market Coordination Board (BKPM) No. 197/1/IP/PMA/2010.

On November 29, 2016, the Company has received tax facility benefit for the Ethylene Cracker Expansion Project from Directorate General of Taxation, which allows reduction in net taxable income up to 30% of the amount invested in property, plant and equipment totaling to Rp 3,499,944 million (equivalent to US\$ 260,490 thousand), prorated at 5% for 6 years of the commercial production.

On December 29, 2020, the Company has received income tax reduction facility for the New Polyethylene Cracker Expansion Project from Directorate General of Taxation, which allows deduction in corporate income tax of 30% for 7 years, 50% for the subsequent two years as well as the exemption from the income tax withheld and collected by third parties for the aforementioned period.

- On November 23, 2021, CAP2 has appointed and signed agreements with four contractors namely Toyo Engineering Corporation, Samsung Engineering Co., Ltd., Wood, and PT Haskoning Indonesia to work on the *Front-End Engineering Design* (FEED) for its construction of CAP2's plants.
- On December 30, 2022, the Company has signed a Conditional Shares Sale and Purchase Agreement (CSPA) and followed by Shareholders Agreement (SHA) for two subsidiaries owned by PT Krakatau Sarana Infrastruktur (KSI), namely PT Krakatau Daya Listrik (KDL) and PT Krakatau Tirta Industri (KTI). In the CSPA, it was agreed that the Company will purchase 70% of KSI's shares in KDL and 49% of KSI's shares in KTI with a total transaction value of Rp 3.24 Trillion (equivalent to US\$ 210 million). Subsequently, on February 27, 2023, the Company has officially signed the deed of acquisition and deed of sale and purchase of shares.

Pada tanggal 1 April 2022, Grup mereklasifikasi portofolio investasi obligasi dari nilai wajar melalui kategori pengukuran pendapatan komprehensif lain sebesar US\$ 393.341 ribu dan ke dalam kategori pengukuran biaya diamortisasi sebagai akibat dari perubahan model bisnis. Manajemen Grup menentukan bahwa karena perubahan internal dalam mengelola investasi obligasi di mana untuk hasil jangka panjang, investasi dalam obligasi tersebut saat ini dimiliki dalam bisnis yang tujuannya adalah untuk memiliki aset untuk mendapatkan arus kas kontraktual dan membiayai pengembangan dari CAP2. Setelah tanggal reklasifikasi, instrumen ini tidak akan diukur pada nilai wajar dengan perubahan nilai wajar pada pendapatan komprehensif lain.

Portofolio investasi pada obligasi direklasifikasi pada nilai wajar. Namun, pada tanggal reklasifikasi, keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain dikeluarkan dari ekuitas dan disesuaikan dengan nilai wajar portofolio investasi obligasi. Akibatnya, portofolio investasi pada obligasi diukur pada tanggal reklasifikasi seolah-olah selalu diukur pada biaya perolehan diamortisasi. Suku bunga efektif dan pengukuran kerugian kredit ekspektasian tidak disesuaikan sebagai akibat dari reklasifikasi. Risiko kredit pada pengakuan awal terus digunakan untuk menilai perubahan risiko kredit pada obligasi.

On April 1, 2022, the Group reclassified the portfolio of investment in bonds out of the fair value through other comprehensive income measurement category amounted to US\$ 393,341 thousand and into the amortised cost measurement category as a result of the change in the business model. The Group's management determined that due to internal changes in managing these investment in bonds in which for a long term yield, these investment in bonds are currently held within a business model whose objective is to hold assets to collect the contractual cash flows and finance the development of CAP2. Subsequent to the reclassification date, these instruments will no longer be measured at fair value with changes in fair value recognized in other comprehensive income.

The portfolio of investment in bonds is reclassified at fair value. However, at the reclassification date, the cumulative gain or loss previously recognised in other comprehensive income is removed from equity and adjusted against the fair value of the portfolio of investment in bonds. As a result, the portfolio of investment in bonds is measured at the reclassification date as if it had always been measured at amortised cost. The effective interest rate and the measurement of expected credit losses are not adjusted as a result of the reclassification. The credit risk at initial recognition continues to be used to assess changes in the credit risk on the bonds.

Pada tanggal 31 Desember 2022, nilai wajar investasi pada obligasi yang dicatat pada biaya perolehan diamortisasi adalah sebesar US\$ 686.947 ribu.

As of December 31, 2022, the fair value of investment in bonds carried at amortised cost amounted to US\$ 686,947 thousand.

b. Tujuan dan kebijakan manajemen risiko keuangan

Fungsi *Corporate Treasury* Grup menyediakan jasa untuk bisnis, mengkoordinasikan akses ke pasar keuangan domestik dan internasional, memantau dan mengelola risiko keuangan yang berkaitan dengan operasi Grup melalui laporan risiko internal yang menganalisis eksposur dengan derajat dan besarnya risiko. Risiko ini termasuk risiko pasar (termasuk risiko mata uang, risiko suku bunga dan risiko harga lainnya), risiko kredit dan risiko likuiditas.

Grup berusaha untuk meminimalkan dampak dari risiko dengan menggunakan instrumen keuangan derivatif untuk lindung nilai terhadap eksposur risiko. Penggunaan derivatif keuangan diatur oleh kebijakan Grup yang disetujui oleh dewan direksi, yang memberikan prinsip-prinsip tertulis pada risiko nilai tukar, risiko suku bunga, risiko kredit, penggunaan derivatif keuangan dan instrumen derivatif non-keuangan, dan investasi atas kelebihan likuiditas. Kepatuhan terhadap batasan kebijakan dan eksposur ditinjau oleh auditor internal secara terus menerus. Grup tidak melaksanakan atau memperdagangkan instrumen keuangan, termasuk instrumen keuangan derivatif, untuk tujuan spekulasi.

Fungsi *Corporate Treasury* melaporkan secara berkala kepada dewan direksi untuk memantau risiko dan mengurangi eksposur risiko.

i. Manajemen risiko pasar

Aktivitas Grup terekspos terutama untuk risiko keuangan atas perubahan nilai tukar mata uang asing (Catatan 42.b.ii) dan suku bunga (Catatan 42.b.iii). Grup mengadakan berbagai instrumen keuangan derivatif untuk mengelola eksposur risiko mata uang asing dan risiko suku bunga, termasuk:

- *Swap* suku bunga untuk mengurangi risiko kenaikan suku bunga;
- Kontrak valuta asing berjangka untuk mengurangi eksposur terhadap fluktuasi nilai tukar; dan
- *Cross Currency Swap* untuk mengurangi risiko kenaikan suku bunga dan kurs pada utang obligasi.

Tidak terdapat perubahan eksposur Grup terhadap risiko pasar atau cara mengelola dan mengukur risiko tersebut.

b. Financial risk management objectives and policies

The Group's *Corporate Treasury* function provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyze exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

The Group seeks to minimize the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Group policies approved by the board of directors, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The Group does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

The *Corporate Treasury* function reports regularly to the board of directors to monitor risks and mitigate risk exposures.

i. Market risk management

The Group's activities expose it primarily to the financial risks of changes in foreign currency exchange rates (Note 42.b.ii) and interest rates (Note 42.b.iii). The Group enters into a variety of derivative financial instruments to manage its exposure to foreign currency risk and interest rate risk, including:

- Interest rate swaps to mitigate the risk of rising interest rates;
- Forward foreign exchange contracts to mitigate exposures to exchange rate fluctuating; and
- Cross currency swap to mitigate the risk of rising interest rate and foreign exchange on the bonds payable.

There has been no change to the Group's exposure to market risk or the manner in which these risks are managed and measured.

ii. Manajemen risiko mata uang asing

Grup terekspos pengaruh fluktuasi nilai tukar mata uang asing terutama karena transaksi yang didenominasi dalam mata uang asing seperti penjualan domestik, beberapa beban tertentu dan pinjaman yang didenominasi dalam Rupiah. Jumlah eksposur bersih mata uang selain Dolar Amerika Serikat Grup pada tanggal pelaporan diungkapkan dalam Catatan 39.

Grup memelihara saldo kas dalam mata uang Rupiah yang cukup untuk memenuhi kebutuhan pembayaran dalam Rupiah.

Analisis sensitivitas mata uang asing

Analisis sensitivitas Grup di bawah ini terhadap peningkatan dan penurunan Dollar Amerika Serikat terhadap mata uang Rupiah menggunakan 1% pada tanggal 31 Desember 2022 (31 Desember 2021: 2%), dengan seluruh variabel konstan lainnya, rugi bersih setelah pajak untuk tahun yang berakhir 31 Desember 2022 akan turun/naik sebesar US\$ 260 ribu (laba bersih setelah pajak 31 Desember 2021: turun/naik sebesar US\$ 2.092 ribu). 1% pada tanggal 31 Desember 2022 (31 Desember 2021: 2%) adalah tingkat sensitivitas yang digunakan ketika melaporkan secara internal risiko mata uang asing kepada para karyawan kunci, dan merupakan penilaian manajemen terhadap perubahan yang mungkin terjadi pada nilai tukar valuta asing. Analisis sensitivitas hanya mencakup *item* instrumen keuangan dalam mata uang moneter selain Dolar Amerika Serikat yang ada dan menyesuaikan translasinya pada akhir periode untuk perubahan persentase dalam nilai tukar mata uang asing.

Menurut pendapat manajemen, analisis sensitivitas tidak representatif atas risiko valuta asing melekat karena eksposur pada akhir periode pelaporan tidak mencerminkan eksposur selama tahun berjalan.

Kontrak valuta berjangka

Pada tahun berjalan, Grup menandatangani kontrak valuta asing berjangka tertentu sebagai lindung nilai atas dampak terkait fluktuasi harga pembelian bahan baku Grup. Grup menggunakan strategi lindung nilai lanjutan, menggunakan kontrak dengan periode hingga 6 bulan. Pada saat jatuh tempo kontrak berjangka, Grup melakukan kontrak baru yang ditujukan sebagai hubungan lindung nilai terpisah.

ii. Foreign currency risk management

The Group is exposed to the effect of foreign currency exchange rate fluctuation mainly because of foreign currency denominated transactions such as domestic sales, certain expenditure and borrowings denominated in Indonesian Rupiah. The Group's net open currency other than U.S. Dollar exposure as of reporting date is disclosed in Note 39.

The Group maintains sufficient cash balance denominated in Indonesian Rupiah to cover the payments denominated in Indonesian Rupiah.

Foreign currency sensitivity analysis

The Group's sensitivity analysis below to the increase and decrease in the U.S. Dollar against Indonesian Rupiah the relevant foreign currencies uses 1% at December 31, 2022 (December 31, 2021: 2%), with all other variables held constant, net loss after tax for the year ended December 31, 2022 would decrease/increase by US\$ 260 thousand (net profit after tax December 31, 2021: decrease/increase by US\$ 2,092 thousand). 1% as at December 31, 2022 (December 31, 2021: 2%) are the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding monetary items of financial instrument denominated in currency other than U.S. Dollar and adjusts its translation at the period end for percentage change in foreign currency rates.

In management's opinion, the sensitivity analysis is unrepresentative for the inherent foreign exchange risk because the exposure at the end of the reporting period does not reflect the exposure during the year.

Forward foreign exchange contracts

In the current year, the Group has entered into certain forward foreign exchange contracts as hedge of exposure against the fluctuation in the purchase price of the Group's raw materials. The Group utilizes a rollover hedging strategy, using contracts with terms of up to 6 months. Upon maturity of forward contract, the Group enters into a new contract designated as separate hedging relationship.

Tabel berikut merinci kontrak valuta asing berjangka yang ada pada akhir periode pelaporan:

The following table details the forward foreign currency ("FC") contracts outstanding at the end of the reporting period:

Kontrak outstanding	Tingkat rata-rata nilai tukar Average exchange rate		Mata uang asing/ Foreign currency		Nilai nominal/ Notional value		Nilai wajar aset (liabilitas) Fair value of assets (liabilities)		Outstanding contracts

iii. Manajemen risiko tingkat bunga

Grup terpapar risiko suku bunga karena entitas dalam Grup meminjam dana dari bank mayoritas dalam Dolar Amerika Serikat dengan tingkat bunga mengambang. Risiko ini dikelola oleh Grup, antara lain, dengan menggunakan kontrak *swap* suku bunga. Aktivitas lindung nilai dievaluasi secara reguler untuk menyelaraskan dengan pandangan suku bunga dan *defined risk appetite*, untuk memastikan strategi lindung nilai paling efektif telah diterapkan.

Grup terpapar suku bunga acuan Dolar Amerika Serikat LIBOR, dimana tunduk ke reformasi acuan suku bunga.

Eksposur Grup atas suku bunga liabilitas keuangan dirinci dalam bagian manajemen risiko likuiditas pada catatan ini.

Untuk utang dengan suku bunga mengambang, Grup telah memulai diskusi dengan para *Lenders* untuk mengubah suku bunga acuan atas pinjaman tersebut.

Grup telah memantau pasar dan output dari kelompok kerja berbagai industri yang mengelola transisi ke suku bunga acuan yang baru. Termasuk pengumuman yang dibuat oleh regulator LIBOR. Pada tahun 2020, regulator telah menjelaskan bahwa, di akhir tahun 2021, mereka tidak akan berusaha untuk membujuk, atau memaksa, bank untuk mengajukan IBOR. Pada bulan Maret 2021, *Financial Conduct Authority (FCA)* telah mengumumkan tanggal penghentian pengajuan seluruh pengaturan LIBOR oleh bank, setelah itu tarif LIBOR yang representatif tidak akan tersedia lagi. FCA telah mengkonfirmasi bahwa semua pengaturan LIBOR akan berhenti disediakan oleh administrator manapun atau perwakilan manapun:

- segera setelah 31 Desember 2021, untuk seluruh pengaturan Sterling, Euro, Franc Swiss, dan Yen Jepang, dan 1-minggu dan 2-bulan USD; dan
- segera setelah 30 Juni 2023, untuk pengaturan USD yang tersisa.

iii. Interest rate risk management

The Group is exposed to interest rate risk because entities in the Group borrow funds from banks largely in United States Dollar at floating interest rates. The risk is managed by the Group by the use of interest rate swap contracts. Hedging activities are evaluated regularly to align with interest rate views and defined risk appetite, ensuring the most cost-effective hedging strategies are applied.

The Group is exposed to United States Dollar LIBOR interest rate benchmark, which are subject to interest rate benchmark reform.

The Group's exposures to interest rates on financial liabilities are detailed in the liquidity risk management section of this note.

For the Group's floating rate debt, the Group has started discussions with its Lenders to amend the reference benchmark interest rate.

The Group has closely monitored the market and the output from the various industry working groups managing the transition to new benchmark interest rates. This includes announcements made by LIBOR regulator. In 2020, the regulator has made clear that, at the end of 2021, it will no longer seek to persuade, or compel, banks to submit IBORs. In March 2021, the Financial Conduct Authority (FCA) has announced the dates that panel bank submissions for all LIBOR settings will cease, after which representative LIBOR rates will no longer be available. The FCA has confirmed that all LIBOR settings will either cease to be provided by any administrator or no longer be representative:

- immediately after December 31, 2021, in the case of all Sterling, Euro, Swiss Franc and Japanese Yen settings, and the 1-week and 2-month USD settings; and
- immediately after June 30, 2023, in the case of the remaining USD settings.

Berikut merupakan risiko utama Grup atas transisi tersebut:

Risiko suku bunga dasar

Terdapat dua elemen risiko sebagai mana dijabarkan di bawah ini:

- Jika negosiasi bilateral dengan rekanan Grup tidak berhasil diselesaikan sebelum penghentian LIBOR, terdapat ketidakpastian yang signifikan terkait dengan tingkat suku bunga yang akan berlaku. Hal ini menimbulkan risiko suku bunga tambahan yang tidak dapat diantisipasi ketika kontrak ditandatangani dan tidak masuk dalam strategi manajemen risiko suku bunga. Misalnya, dalam beberapa kasus, klausul *fallback* dalam kontrak pinjaman LIBOR dapat mengakibatkan tingkat bunga menjadi tetap untuk jangka waktu yang tersisa pada penawaran LIBOR terakhir. Grup bekerja sama dengan semua rekanan untuk menghindari hal ini terjadi, namun jika hal ini terjadi, kebijakan manajemen risiko suku bunga Grup akan berlaku normal dan dapat mengakibatkan penyelesaian atau perpindahan ke *swap* suku bunga baru untuk mempertahankan campuran antara utang suku bunga mengambang dan tetap.
- Basis risiko suku bunga dapat timbul jika instrumen nonderivatif dan instrumen derivatif yang dimiliki untuk mengelola risiko suku bunga pada instrumen nonderivatif beralih ke suku bunga acuan alternatif pada waktu yang berbeda. Risiko ini juga dapat muncul ketika derivatif semula bertransisi pada waktu yang berbeda. Grup akan memantau risiko ini terhadap kebijakan manajemen risikonya.

Risiko likuiditas

Terdapat perbedaan mendasar antara LIBOR dan suku bunga acuan alternatif yang akan diadopsi oleh Grup. LIBOR merupakan suku bunga *forward-looking* yang diterbitkan untuk suatu periode (misalnya 3 bulan) pada awal periode tersebut dan termasuk di dalamnya spread kredit antar bank, sedangkan suku bunga acuan alternatif biasanya merupakan suku bunga semalam bebas risiko yang diterbitkan pada akhir periode semalam tanpa adanya spread kredit melekat. Perbedaan ini menimbulkan tambahan ketidakpastian atas pembayaran bunga dengan suku bunga mengambang yang akan memerlukan tambahan pengelolaan likuiditas. Kebijakan pengelolaan risiko likuiditas Grup telah diperbarui untuk memastikan sumber daya likuid yang cukup untuk mengakomodasi kenaikan tak terduga dalam suku bunga semalam.

The following are the key risks for the Group arising from the transition:

Interest rate basis risk

There are two elements to this risk as outlined below:

- If the bilateral negotiations with the Group's counterparties are not successfully concluded before the cessation of LIBOR, there are significant uncertainties with regard to the interest rate that would apply. This gives rise to additional interest rate risk that was not anticipated when the contracts were entered into and is not captured by our interest rate risk management strategy. For example, in some cases the fallback clauses in LIBOR loan contracts may result in the interest rate becoming fixed for the remaining term at the last LIBOR quote. The Group is working closely with all counterparties to avoid this from occurring, however if this does arise, the Group's interest rate risk management policy will apply as normal and may result in closing out or entering into new interest rate swaps to maintain the mix of floating rate and fixed rate debt.
- Interest rate risk basis may arise if a non-derivative instrument and the derivative instrument held to manage the interest risk on the non-derivative instrument transition to alternative benchmark rates at different times. This risk may also arise where back-to-back derivatives transition at different times. The Group will monitor this risk against its risk management policy.

Liquidity risk

There are fundamental differences between LIBOR and the alternative benchmark rates which the Group will be adopting. LIBOR is forward-looking term rates published for a period (e.g. 3 months) at the beginning of that period and include an inter-bank credit spread, whereas alternative benchmark rates are typically risk free overnight rates published at the end of the overnight period with no embedded credit spread. These differences will result in additional uncertainty regarding floating rate interest payments which will require additional liquidity management. The Group's liquidity risk management policy has been updated to ensure sufficient liquid resources to accommodate unexpected increases in overnight rates.

Risiko akuntansi

Jika transisi ke suku bunga acuan alternatif untuk kontrak tertentu diselesaikan dengan cara yang tidak memperbolehkan penerapan keringanan yang diperkenalkan dalam amandemen Tahap 2, dapat menyebabkan penghentian hubungan akuntansi lindung nilai, peningkatan volatilitas dalam laba rugi jika lindung nilai yang ditetapkan kembali tidak sepenuhnya efektif dan terjadi volatilitas dalam laba rugi jika instrumen keuangan non-derivatif dimodifikasi atau dihentikan pengakuannya. Grup bertujuan untuk menyetujui perubahan kontrak yang memungkinkan penerapan PSAK 71. Secara khusus, Grup tidak berusaha untuk merombak derivatif atau menutup derivatif dan memasuki pasar derivative baru di mana derivatif telah ditetapkan dalam hubungan lindung nilai.

Risiko litigasi

Jika tidak tercapai kesepakatan untuk menerapkan reformasi acuan suku bunga pada kontrak yang ada (misalnya yang timbul dari interpretasi yang berbeda dari persyaratan *fallback* yang ada), terdapat risiko perselisihan berkepanjangan dengan rekanan yang dapat menimbulkan biaya hukum dan biaya tambahan lainnya. Grup bekerja sama dengan seluruh rekanan untuk menghindari hal ini terjadi.

Risiko operasional

Tidak terdapat kontrak warisan LIBOR milik Grup yang mencakup klausul penggantian yang memadai dan kuat untuk penghentian suku bunga acuan. Berbagai kelompok kerja di industri sedang membuat ketentuan *fallback* untuk berbagai instrumen dan IBOR, yang dipantau secara ketat oleh Grup. Grup berencana untuk mentransisikan sebagian besar kontrak terkait IBOR ke suku bunga bebas risiko melalui pengenalan, atau amandemen, klausul *fallback* ke dalam kontrak yang akan mengubah dasar penentuan arus kas suku bunga dari IBOR ke RFR pada waktu yang disepakati.

Grup akan terus menerapkan amandemen PSAK 55 sampai ketidakpastian yang timbul dari reformasi tingkat acuan suku bunga sehubungan dengan waktu dan jumlah arus kas yang mendasari Grup terekspos sampai selesai. Grup berasumsi bahwa ketidakpastian ini tidak akan berakhir sampai kontrak Grup yang merujuk kepada IBOR diubah sampai tanggal penentuan pergantian tingkat acuan suku bunga, arus kas dari suku bunga acuan alternatif, dan penyesuaian spread yang relevan. Sebagian dari hal ini akan bergantung pada pengenalan klausul *fallback* yang masih harus ditambahkan dalam kontrak Grup dan negosiasi dengan pemberi pinjaman dan pemegang obligasi.

Accounting risk

If transition to alternative benchmark rates for certain contracts is finalized in a manner that does not permit the application of the reliefs introduced in the Phase 2 amendments, this could lead to discontinuation of hedge accounting relationships, increased volatility in profit or loss if re-designated hedges are not fully effective and volatility in the profit or loss if non-derivative financial instruments are modified or derecognised. The Group is aiming to agree changes to contracts that would allow PSAK 71 reliefs to apply. In particular, the Group is not seeking to novate derivatives or close out derivatives and enter into new on-market derivatives where derivatives have been designated in hedging relationships.

Litigation risk

If no agreement is reached to implement the interest rate benchmark reform on existing contracts (e.g. arising from differing interpretation of existing fallback terms), there is a risk of prolonged disputes with counterparties which could give rise to additional legal and other costs. The Group is working closely with all counterparties to avoid this from occurring.

Operational risk

None of the Group's LIBOR legacy contracts include adequate and robust fallback clauses for a cessation of the referenced benchmark interest rate. Various working groups in the industry are working on fallback provisions for different instruments and IBORs, which the Group is monitoring closely. The Group is planning to transition the majority of its IBOR-linked contracts to risk free rates through introduction of, or amendments to, fallback clauses into the contracts which will change the basis for determining the interest cash flows from IBOR to RFR at an agreed point in time.

The Group will continue to apply the amendments to PSAK 55 until the uncertainty arising from the interest rate benchmark reforms with respect to the timing and the amount of the underlying cash flows that the Group is exposed to ends. The Group has assumed that this uncertainty will not end until the Group's contracts that reference IBORs are amended to specify the date on which the interest rate benchmark will be replaced, the cash flows of the alternative benchmark rate and the relevant spread adjustment. This will, in part, be dependent on the introduction of fallback clauses which have yet to be added to the Group's contracts and the negotiation with lenders and bondholders.

Eksposur Grup terhadap suku bunga asset keuangan dan liabilitas keuangan dirinci dalam bagian manajemen risiko likuiditas pada catatan ini.

Analisis sensitivitas suku bunga

Analisis sensitivitas di bawah ini telah ditentukan berdasarkan eksposur suku bunga untuk instrumen derivatif dan non-derivatif pada akhir periode pelaporan. Untuk liabilitas tingkat bunga mengambang, analisis tersebut disusun dengan asumsi jumlah liabilitas terutang pada akhir periode pelaporan itu terutang sepanjang tahun. Kenaikan atau penurunan 100 basis poin digunakan ketika melaporkan risiko suku bunga secara internal kepada karyawan kunci dan merupakan penilaian manajemen terhadap perubahan yang mungkin terjadi pada suku bunga.

Jika suku bunga lebih tinggi/rendah 100 basis poin (2021: 100 basis poin) dan semua variabel lainnya tetap konstan, rugi bersih setelah pajak, untuk tahun yang berakhir 31 Desember 2022 akan naik sebesar US\$ 18.262 ribu (31 Desember 2021: laba bersih setelah pajak akan turun sebesar US\$ 3.702 ribu). Hal ini terutama disebabkan oleh eksposur Grup terhadap suku bunga atas pinjaman dengan suku bunga variabel.

Kontrak *swap* suku bunga

Dalam kontrak *swap* suku bunga, Grup setuju untuk menukar perbedaan antara jumlah tingkat bunga tetap dengan mengambang yang dihitung atas jumlah pokok nosional yang disepakati. Meskipun tidak ditetapkan dan memenuhi kualifikasi sebagai akuntansi lindung nilai, kontrak-kontrak yang memungkinkan Grup untuk mengurangi risiko perubahan suku bunga eksposur arus kas pada utang tingkat bunga variabel. Nilai wajar *plain vanilla* (tingkat bunga tetap untuk tingkat bunga mengambang) *swap* dihitung dengan menambahkan nilai kini dari pembayaran bunga tetap yang telah diketahui dari awal *swap* (*fixed leg*) dan nilai kini dari pembayaran bunga mengambang yang ditentukan pada setiap tanggal pembayaran yang ditentukan (*floating leg*). Tingkat suku bunga rata-rata didasarkan pada tingkat bunga tetap yang dibayarkan oleh bank.

Kontrak *swap* suku bunga diselesaikan secara triwulanan. Tingkat bunga mengambang pada *swap* suku bunga adalah *London Interbank Offered Rate* (LIBOR). Grup akan menyelesaikan perbedaan antara tingkat bunga tetap dan mengambang secara dasar neto.

The Group's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.

Interest rate sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 100 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 100 basis points (2021: 100 basis point) higher/lower and all other variables were held constant, net loss after tax, for the year ended December 31, 2022, would increase by US\$ 18,262 thousand (December 31, 2021: net profit after tax would decrease by US\$ 3,702 thousand). This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings.

Interest rate swap contracts

Under interest rate swap contracts, the Group agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Although not designated and qualified for hedge accounting, those contracts are enable the Group to mitigate the risk of changing interest rates on the cash flow exposures on issued variable rate debt. The fair value of a plain vanilla (fixed rate for floating rate) swap is computed by adding the present value of the fixed coupon payments known at the start of the swap (fixed leg) and present value of the floating coupon payments determined at the agreed dates of each payment (floating leg). The average interest rate is based on the fixed rate paid by the banks.

The interest rate swaps are settled on a quarterly basis. The floating rate on the interest rate swaps is London Interbank Offered Rate (LIBOR). The Group will settle the difference between the fixed and floating interest rate on a net basis.

iv. Manajemen risiko harga petrokimia

Pendapatan Grup sangat bergantung pada penjualan barang-barang turunan/ olahan petrokimia *naphtha* yang sangat dipengaruhi oleh harga petrokimia dunia. Di sisi lain, harga petrokimia dunia dapat berfluktuasi secara signifikan yang dipengaruhi terutama oleh harga minyak mentah *Brent* dan faktor permintaan dan penawaran.

Untuk memitigasi risiko ini, Grup mengkombinasikan strategi metode penetapan harga maupun waktu penetapan dengan terus memperhatikan perkembangan global yang mempengaruhi pasar petrokimia.

v. Manajemen risiko kredit

Nilai tercatat aset keuangan pada laporan keuangan konsolidasian setelah dikurangi dengan cadangan kerugian, mencerminkan eksposur Grup terhadap risiko kredit.

Grup mengembangkan dan mengelola peringkat risiko kredit untuk mengkategorikan eksposur sesuai dengan tingkat risiko gagal bayar. Grup menggunakan catatan perdagangannya sendiri untuk memeringkat pelanggan utama dan debitur lainnya.

Kerangka peringkat risiko kredit kini Grup terdiri dari kategori berikut:

Kategori/ <i>Category</i>	Deskripsi/Description	Dasar pengakuan ECL/ <i>Basis for recognizing ECL</i>
Lancar/ <i>Performing</i>	Pihak lawan memiliki risiko gagal bayar yang rendah dan tidak memiliki tunggakan./ <i>The counterparty has a low risk of default and does not have any past-due amounts.</i>	ECL 12 bulan/ <i>12-month ECL</i>
Dicadangkan/ <i>Doubtful</i>	Jumlah yang tertunggak >30 hari atau telah ada peningkatan risiko kredit yang signifikan sejak pengakuan awal./ <i>Amount is >30 days past due or there has been a significant increase in credit risk since initial recognition.</i>	ECL sepanjang umur – kredit tidak memburuk/ <i>Lifetime ECL – not credit-impaired</i>
Gagal bayar/ <i>In default</i>	Jumlah yang tertunggak >60 hari atau ada bukti yang mengindikasikan aset mengalami penurunan nilai kredit./ <i>Amount is >60 days past due or there is evidence indicating the asset is credit-impaired.</i>	ECL sepanjang umur – kredit memburuk/ <i>Lifetime ECL – credit-impaired</i>
Penghapusan/ <i>Write-off</i>	Ada bukti yang mengindikasikan bahwa debitur dalam kesulitan keuangan yang buruk dan Grup tidak memiliki prospek pemulihan yang realistis./ <i>There is evidence indicating that the debtor is in severe financial difficulty and the Group has no realistic prospect of recovery.</i>	Saldo dihapuskan/ <i>Amount is written off</i>

iv. Petrochemical price risk management

The Group's revenue is highly dependent on naphtha petrochemical process, which in turn is highly influenced by global petrochemical prices, which tend to be cyclical and subject to significant fluctuations. Global petrochemical prices are subject to numerous factors beyond the Group's control, including mainly Brent crude oil price and supply and demand factors.

To mitigate this risk, the Group combines strategies of price fixing method and the timing of price fixing, while maintaining close attention on global developments that affect petrochemical market.

v. Credit risk management

The carrying amount of financial assets recorded in the consolidated financial statements, net of any allowance for losses, represents the Group's exposure to credit risk.

The Group develops and maintains its credit risk gradings to categorize exposures according to their degree of risk of default. The Group uses its own trading records to rate its major customers and other debtors.

The Group's current credit risk grading framework comprises the following categories:

(i) Grup menentukan ECL pada pos-pos tersebut menggunakan matriks provisi, yang diestimasi berdasarkan pengalaman kerugian kredit historis berdasarkan status utang debitur masa lalu, yang disesuaikan dengan kondisi saat ini dan perkiraan kondisi ekonomi di masa depan.

(i) The Group determines the ECL on these items by using a provision matrix, estimated based on historical credit loss experience based on the past due status of the debtors, adjusted as appropriate to reflect current conditions and estimates of future economic conditions.

Grup telah mengadopsi prosedur dalam memperluas persyaratan kredit kepada pelanggan dan dalam memantau risiko kreditnya. Grup hanya memberikan kredit kepada pihak lawan yang layak kredit. Kas dan deposito berjangka ditempatkan pada lembaga yang layak kredit dan memiliki kerugian kredit yang tidak material.

The Group has adopted procedures in extending credit terms to customers and in monitoring its credit risk. The Group only grants credit to credit worthy counterparties. Cash and time deposits are held with creditworthy institutions and is subject to immaterial credit loss.

Meskipun eksposur kredit Grup terkonsentrasi terutama di Indonesia, tidak terdapat konsentrasi risiko kredit signifikan pada pelanggan atau kelompok pelanggan tertentu.

Although the Group credit exposure is concentrated mainly in Indonesia, it has no significant concentration of credit risk with any single customer or group of customers.

Rincian lebih lanjut dari risiko kredit pada piutang usaha dan piutang lain-lain diungkapkan masing-masing pada Catatan 6 and 7.

Further details of credit risks on trade and other accounts receivable are disclosed in Notes 6 and 7, respectively.

vi. Manajemen risiko likuiditas

Tanggung jawab utama untuk manajemen risiko likuiditas terletak pada dewan direksi, yang telah membentuk kerangka kerja manajemen risiko likuiditas yang sesuai untuk mengelola pendanaan jangka pendek, menengah dan jangka panjang dan persyaratan manajemen likuiditas. Grup mengelola risiko likuiditas dengan memelihara cadangan yang memadai, fasilitas perbankan dan fasilitas pinjaman cadangan, dengan terus memantau arus kas prakiraan dan aktual. Manajemen berpendapat bahwa kas masa depan yang dihasilkan dari kegiatan usaha cukup untuk memenuhi kebutuhan modal kerja dan melunasi pinjaman jangka pendek saat jatuh tempo. Kebutuhan pembiayaan untuk modal kerja ditelaah secara berkala dan pada saat diperlukan.

Rincian fasilitas tambahan yang belum digunakan yang dimiliki Grup untuk mengurangi risiko likuiditas termasuk dalam Catatan 41a.

Tabel risiko likuiditas dan suku bunga

Tabel berikut merinci sisa jatuh tempo kontrak untuk liabilitas keuangan non-derivatif dengan periode pembayaran yang disepakati Grup. Tabel telah disusun berdasarkan arus kas yang tak terdiskonto dari liabilitas keuangan berdasarkan tanggal terawal dimana Grup dapat diminta untuk membayar. Tabel mencakup untuk arus kas pokok dan bunga. Jatuh tempo kontrak didasarkan pada tanggal terawal dimana Grup mungkin akan diminta untuk membayar.

vi. Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Group's short, medium and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows. Management believes that future cash to be generated from operations is sufficient to meet working capital requirements and settle the current portion of outstanding loans as they fall due. Financing requirements for working capital are reviewed on a regular basis and where deemed necessary.

Details of additional undrawn facilities that the Group has at its disposal to further reduce liquidity risk are included in Note 41a.

Liquidity and interest risk tables

The following table details the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment period. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The table includes both interest and principal cash flows. The contractual maturity is based on the earliest date on which the Group may be required to pay.

c. Manajemen modal

Grup mengelola modal untuk memastikan bahwa entitas dalam Grup akan mampu untuk melanjutkan keberlangsungan usaha, selain memaksimalkan keuntungan para pemegang saham melalui optimalisasi saldo utang dan ekuitas. Strategi Grup tetap tidak berubah dari 2021.

Struktur modal Grup terdiri dari pinjaman, yang mencakup liabilitas sewa, utang bank, instrumen keuangan derivatif dan utang obligasi yang dijelaskan pada Catatan 19, 20 dan 21 dan jumlah ekuitas, yang terdiri dari modal yang ditempatkan, cadangan umum dan dividen, tambahan modal disetor, cadangan lainnya, saldo laba dan kepentingan non-pengendali yang dijelaskan pada Catatan 23, 24, 25, 26, 27 dan 28.

Direksi Grup secara berkala melakukan revaluasi struktur permodalan Grup. Sebagai bagian dari revaluasi ini, Direksi mempertimbangkan biaya permodalan dan risiko yang berhubungan.

Rasio jumlah pinjaman terhadap kapitalisasi adalah sebagai berikut:

	31 Desember/ December 31, 2022 US\$ '000	31 Desember/ December 31, 2021*) US\$ '000

Rasio jumlah pinjaman terhadap kapitalisasi	35%	27%	Total debt to capitalization ratio

*) Disajikan kembali (Catatan 2a)

c. Capital management

The Group manages capital to ensure that entities in the Group will be able to continue as a going concern, in addition to maximize the profit of the shareholders through the optimization of the balance of debt and equity. The Group's strategy remains unchanged from 2021.

The capital structure of the Group consists of debt, which includes the lease liabilities, bank loans, derivative financial instrument and bonds payable disclosed in Notes 19, 20 and 21 and total equity, comprising issued capital, reserves and dividends, additional paid-in capital, other reserves, retained earnings and non-controlling interests as disclosed in Notes 23, 24, 25, 26, 27 and 28.

The Board of Directors of the Group periodically reviews the Group's capital structure. As part of this review, the Board of Directors considers the cost of capital and the related risks.

The total debt to capitalization ratio are as follows:

*) As restated (Note 2a)

d. Pengukuran Nilai Wajar

Nilai wajar instrumen keuangan yang dicatat pada biaya perolehan diamortisasi

Direksi menganggap bahwa nilai tercatat aset keuangan dan liabilitas keuangan, kecuali utang obligasi dan utang bank dengan tingkat bunga tetap mendekati nilai wajarnya.

Investasi pada obligasi pemerintah dengan tingkat bunga tetap dikelompokkan ke dalam level 1 dengan nilai wajar dan nilai tercatat masing-masing sebesar US\$ 696.850 ribu dan US\$ 705.798 ribu pada 31 Desember 2022.

Utang obligasi dikelompokkan ke dalam level 1 dengan nilai wajar dan nilai tercatat masing-masing sebesar US\$ 554.663 ribu dan US\$ 529.765 ribu pada 31 Desember 2022 (31 Desember 2021: masing-masing sebesar US\$ 425.251 ribu dan US\$ 407.598 ribu).

Utang bank dengan tingkat bunga tetap dikelompokkan ke dalam level 2 dengan nilai wajar dan nilai tercatat masing-masing sebesar US\$ 3.399 ribu dan US\$ 4.053 ribu pada 31 Desember 2022 (31 Desember 2021: masing-masing sebesar US\$ 5.028 ribu dan US\$ 5.519 ribu).

Teknik penilaian dan asumsi yang diterapkan untuk tujuan pengukuran nilai wajar

Nilai wajar aset keuangan dan liabilitas keuangan ditentukan sebagai berikut:

- Nilai wajar aset keuangan dan liabilitas keuangan dengan syarat dan kondisi standar dan diperdagangkan di pasar aktif ditentukan dengan mengacu pada harga pasar
- Nilai wajar *swap* suku bunga dihitung dengan menambahkan nilai kini dari pembayaran bunga tetap yang telah diketahui dari awal *swap* (*fixed leg*) dan nilai kini dari pembayaran bunga mengambang yang ditentukan pada setiap tanggal pembayaran yang ditentukan (*floating leg*).
- Nilai wajar kontrak valuta berjangka mata uang asing diukur dengan menggunakan kurs kuotasi yang berasal dari suku bunga kuotasi sesuai jatuh tempo kontrak.
- Nilai tercatat dari aset dan liabilitas keuangan yang jatuh tempo dalam satu tahun mendekati nilai wajarnya karena jatuh tempo dalam jangka pendek. Untuk aset keuangan dan liabilitas keuangan jangka panjang, biaya perolehan diamortisasi mendekati nilai wajarnya karena instrumen tersebut dikenakan tingkat bunga pasar.

d. Fair Value Measurements

Fair value of financial instruments carried at amortized cost

The directors consider that the carrying amounts of financial assets and financial liabilities, except bonds payable and bank loan with fixed rate interest approximate their fair values.

Investment in government bonds are grouped into level 1 with fair value and carrying amount amounting to US\$ 696,850 thousand and US\$ 705,798 thousand, as of December 31, 2022.

Bonds payable are grouped into level 1 with fair value and carrying amount amounting to US\$ 554,663 thousand and US\$ 529,765 thousand, respectively, as of December 31, 2022 (December 31, 2021: US\$ 425,251 thousand and US\$ 407,598 thousand, respectively).

Bank loan with fixed interest rate are grouped into level 2 with fair value and carrying amount amounting to US\$ 3,399 thousand and US\$ 4,053 thousand, respectively, as of December 31, 2022 (December 31, 2021: US\$ 5,028 thousand and US\$ 5,519 thousand, respectively).

Valuation techniques and assumptions applied for the purposes of measuring fair value

The fair values of financial assets and financial liabilities are determined as follows:

- The fair values of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices.
- The fair value of interest rate swap is computed by adding the present value of the fixed coupon payments known at the start of the swap (*fixed leg*) and present value of the floating coupon payments determined at the agreed dates of each payment (*floating leg*).
- Foreign currency forward contracts are measured using quoted forward exchange rates derived from quoted interest rates matching maturities of the contracts.
- The carrying amount of financial assets and liabilities due in one year approximates fair value because of their short-term maturity. For non-current financial assets and financial liabilities, the amortized cost approximates fair value because such instruments carry market rate of interest.

Hirarki pengukuran nilai wajar atas aset dan liabilitas Grup

Tabel berikut ini merangkum nilai tercatat dan nilai wajar aset dan liabilitas, yang dianalisis nilai wajarnya berdasarkan pada:

- Pengukuran nilai wajar level 1 adalah yang berasal dari harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik; yang dapat diakses entitas pada tanggal pengukuran;
- Pengukuran nilai wajar level 2 adalah yang berasal dari input selain harga kuotasian yang termasuk dalam Level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung (misalnya harga) atau secara tidak langsung (misalnya derivasi dari harga); dan
- Pengukuran nilai wajar level 3 adalah yang berasal dari teknik penilaian yang mencakup input untuk aset atau liabilitas yang bukan berdasarkan data pasar yang dapat diobservasi (input yang tidak dapat diobservasi).

Fair value measurements hierarchy of the Group's assets and liabilities

The following tables summarize the carrying amounts and fair values of the assets and liabilities, analyzed among those whose fair value is based on:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 fair value measurements are those derived from inputs other the quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Nilai wajar atas aset keuangan dan liabilitas keuangan Grup yang diukur pada nilai wajar secara berulang

Sebagian dari aset keuangan dan liabilitas keuangan Grup diukur pada nilai wajar pada akhir setiap periode pelaporan. Tabel berikut memberikan informasi mengenai bagaimana nilai wajar dari aset keuangan dan liabilitas keuangan ditentukan (secara khusus, teknik penilaian dan input yang digunakan).

Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. 43. KONDISI INDUSTRI

Petrokimia, yang mengubah minyak dan gas menjadi segala jenis produk sehari-hari – seperti plastik, pupuk, kemasan, pakaian, perangkat digital, peralatan medis, deterjen atau ban – merupakan bagian integral dari masyarakat modern. Dengan demikian permintaan petrokimia, elemen kunci dari barang-barang konsumen yang tak terhitung jumlahnya, secara intrinsik terkait dengan permintaan dan pengeluaran konsumen. Selain produk penting untuk kehidupan kita sehari-hari, petrokimia juga ditemukan di banyak bagian sistem energi modern, termasuk panel surya, bilah turbin angin, baterai, insulasi termal untuk bangunan, dan suku cadang kendaraan listrik.

Seperti yang diketahui secara luas, industri petrokimia menghadapi beberapa tantangan di tahun 2022 akibat pandemi COVID-19 yang masih berlangsung, yang menyebabkan gangguan rantai pasokan global dan melemahnya permintaan produk petrokimia. Selain itu, meningkatnya ketegangan geopolitik, sengketa perdagangan, dan ketidakpastian ekonomi global juga berdampak pada industri.

43. INDUSTRY CONDITION

Petrochemicals, which turn oil and gas into all sorts of daily products – such as plastics, fertilisers, packaging, clothing, digital devices, medical equipment, detergents, or tyres – are integral to modern societies. As such demand for petrochemicals, a key element of countless consumer goods, is intrinsically linked to consumer demand and spending. In addition to products critical to our daily lives, petrochemicals are also found in many parts of the modern energy system, including solar panels, wind turbine blades, batteries, thermal insulation for buildings, and electric vehicle parts.

It was widely known that the petrochemical industry faced several challenges in 2022 due to ongoing COVID-19 pandemic, which caused disruptions in global supply chains and weakened demand for petrochemical products. Additionally, increasing geopolitical tensions, trade disputes, and uncertainty in the global economy also impacted the industry.

Namun, lingkungan yang penuh tantangan telah menjadi katalisator yang mendorong perlunya memprioritaskan kembali inisiatif ramah lingkungan dan mempercepat pertumbuhan permintaan akan produk yang berkelanjutan dan ramah lingkungan.

Mulai tahun 2023, China, sebagai produsen dan konsumen petrokimia terbesar di dunia, telah membuka kembali perbatasannya membawa kabar baik bagi industri tersebut. Pemulihan ekonomi negara, pembukaan kembali pabrik dan bisnis diperkirakan akan mendorong permintaan untuk pulih pada tahun 2023 dan seterusnya secara internasional.

Sebagai salah satu produsen petrokimia terbesar, Grup akan mengarahkan operasinya dengan optimisme pemulihan sambil tetap berhati-hati dan waspada terhadap limpahan & ketidakpastian global, ketakutan akan resesi, serta stagflasi. Perseroan akan terus melanjutkan rencana ekspansinya dengan hati-hati sehingga dapat terus melayani negara dengan produk petrokimia terbaiknya dan berkontribusi terhadap pertumbuhan ekonomi.

Dari sisi operasional, kinerja operasional yang berkelanjutan dan keselamatan tetap menjadi fokus utama Grup dengan penerapan protokol kesehatan yang ketat bagi karyawan dan pengunjung eksternal di semua lokasi seperti fasilitas produksi, site office dan kantor pusat. Grup menegaskan kembali tujuannya untuk menghindari risiko penularan yang dapat datang kapan saja dan di mana saja. Komitmen Grup pada penerapan Lingkungan, Sosial dan Tata Kelola (ESG) yang berdampak juga telah menerima penghargaan dan kemitraan yang diterima sepanjang tahun. Selain itu, inisiatif Transformasi Digital telah berhasil diterapkan di proses bisnis Grup dan telah membantu Grup untuk menavigasi operasinya selama pandemi. Hal ini juga telah diapresiasi dengan penerimaan penghargaan INDI 4.0 (Indeks Kesiapan Industri Indonesia) untuk kategori digitalisasi agresif.

Grup juga dapat mempertahankan akses ke bank dan pasar modal obligasi dengan biaya yang kompetitif dan persyaratan lebih baik, serta fasilitas kredit impor dan ekspor yang diperpanjang dan diperluas. Grup juga memiliki manajemen liabilitas yang proaktif untuk semakin memperkuat struktur permodalannya. Di samping itu juga, Grup terus menumbuhkan basis investor domestik dengan mengembangkan pasar obligasi Rupiah untuk menghasilkan portofolio sumber pembiayaan yang kompetitif.

However, the challenging environment has become a catalyst that drives the need to re-prioritize green initiatives and accelerates demand growth for sustainable and environmentally friendly products.

Starting in 2023, China, as the world's largest producer and consumer of petrochemicals, has reopened its borders and brings great news to the industry. The country's economic recovery, the reopening of factories and businesses are expected to drive the demand to recover in 2023 and beyond globally.

As one of the largest petrochemical producer, the Group will navigate its operation with optimism on recovery while remaining cautious and vigilant of global spillover & uncertainties, fear of recession and stagflation. The Company will continue to prudently progress with its expansion plan so that it can further serve the nation with its best petrochemical products and contribute towards economic growth.

From operational perspective, sustained operational and safety performance remain the major focus of the Group with strict health protocols implementation for employees and external visitors in all locations such as production facilities, site office and head office. The Group reiterates its aim to avoid the risk of transmission that may come anytime and anywhere. The Group's commitment on impactful Environmental, Social and Governance (ESG) stewardship has also been rewarded and partnerships received during the year. In addition to that, Digital Transformation initiatives have been successfully implemented across the Group's business process and have helped the Group to navigate its operation during pandemic. This also has been appreciated by receiving INDI 4.0 (Indonesia Industry Readiness Index) award for the aggressive digitalization category.

The Group is also able to maintain access to the banks and bond capital markets at competitive rates and compelling terms, as well as extended and expanded import and export credit facilities. The Group has also a proactive liability management to continuously strengthen its capital structure. In addition to that, the Group is continuously growing its domestic investor base by developing Rupiah bond market to yield competitive financing sources portfolio.
